ARRESTS

Arrest rate – An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest. Regardless of the population used, both rates are calculated in the same manner. An arrest rate is calculated by dividing the number of reported arrests by the desired population. The result is multiplied by 100,000. For example, in 2012 there were 429,807 total felony arrests. The total population was 37,826,160 and the population at risk (10–69 years of age) was 29,735,335.

$$\frac{429,807}{37,826,160} = 0.0113626 \times 100,000 = 1,136.3 \text{ per } 100,000 \text{ population}$$

$$\frac{429,807}{29,735,335} = 0.0144544 \times 100,000 = 1,445.4 \text{ per } 100,000 \text{ population at risk}$$

Percent change – A percent change describes the change in number or rate from one year to another. A percent change is calculated by subtracting the base-year data from the current-year data. The result is divided by the base-year data and multiplied by 100. For example, in 2012 the robbery crime rate was 149.3. In 2007, the robbery crime rate was 193.4. The percent change in rate from 2007 to 2012 is a 22.8 percent decrease.

$$\frac{149.3 - 193.4}{193.4} = -0.22802 \times 100 = -22.8 \text{ percent}$$

Populations at risk – When a series of rates is calculated using different populations, the rate calculated for the total will not equal the sum of the rates for the parts. For example, the arrest rate calculated using the total at-risk population will not equal the sum of the juvenile arrest rate (based on the juvenile at-risk population) and the adult arrest rate (based on the adult at-risk population).

Also, the percent changes calculated for these at-risk rates cannot be added. This is because the percent change in the total arrest rate is the result of independent changes in both the number of arrests and the at-risk populations of adults and juveniles.

Data Limitations

- An arrest occurs when a person is taken into custody because an officer has reason to believe the person violated the law. Not all arrests result in persons being jailed. Arrestees may be released by the arresting agency, post bail, or be released on their own recognizance to appear in court at a later date. Some are issued citations, much like traffic tickets, which direct them to appear in court at a later date.
- Arrests are divided into two major groups: felony and misdemeanor. A felony arrest can result in a sentence to state prison if the offender is convicted as an adult. A misdemeanor arrest can result in a sentence of up to one year in county jail, a fine, probation, restitution, or any combination of these sentences.
- Juveniles may also be arrested for truancy, incorrigibility, running away, and violating curfew. These are referred to as “status offenses” because agency intervention is based solely on the juvenile’s status as a minor. Status offenses are acts that would not be “crimes” if committed by adults.
- If a person is arrested for multiple offenses, the MACR selects only the most serious offense based on the severity of possible punishment.
- The subjectivity of the classification and labeling process must be considered in the analysis of race/ethnic group data.

Agency-Specific Data Characteristics And Limitations:

- Reedley Community College and Fresno Community College merged in January 2010 and now report under State Center Community College.
- The Holtville Police Department did not report for January through December 2010.
- The Solano County Sheriff’s Department did not report for May through December 2010.
- The Calipatria Police Department did not report arrest data for 2010 due to staffing shortages.
- The Trinidad Police Department began contracting services with the Humboldt County Sheriff’s Department in July 2010. The Trinidad Police Department’s arrest data for July through December 2010 are included in the Humboldt County Sheriff Department’s reports.
- The San Carlos Police Department began contracting services with the San Mateo County Sheriff’s Department in November 2010. The San Carlos Police Department’s arrest data for November and December 2010 are included in the San Mateo County Sheriff Department’s reports.
- The McFarland Police Department began reporting data in January 2010.
- The Shasta County Marshal’s Office began reporting data in January 2010.
- In 2004, the Legislature amended section 11093 of the Government Code to require any state agency or department that develops and maintains data and statistics on the municipal level to report a separate breakdown for the San Fernando Valley portion of the city of Los Angeles.
- Data for the San Francisco County Sheriff’s Department are reported by the San Francisco Police Department.
- The San Francisco Police Department identified that arrests were underreported in its jurisdiction for 2010 due to Records Management System issues. Therefore, caution should be exercised when using arrest data for this jurisdiction and time frame.

Arrest Offense Codes

The following statutes and their offense groupings were valid at the time of the closeout of the 2012 arrest offense code file. All statutory codes listed are for Penal Code sections unless indicated as follows:

BP - Business and Professions Code	GC - Government Code	RT - Revenue and Taxation Code
CC - Corporations Code	HN - Harbors and Navigation Code	SH - Streets and Highways Code
CI - Civil Code	HS - Health and Safety Code	UI - Unemployment Insurance Code
EC - Education Code	IC - Insurance Code	VC - Vehicle Code
FA - Food and Agriculture Code	LC - Labor Code	WI - Welfare and Institutions Code
FC - Financial Code	MV - Military and Veterans Code	
FG - Fish and Game Code	PR - Public Resources Code
