Homicide in California

2009

Published annually by the
California Department of Justice
Division of California Justice Information Services
Bureau of Criminal Information and Analysis
Criminal Justice Statistics Center

February 2011

This report and other reports are available on the
California Attorney General's website: <http://ag.ca.gov>

The role of the Criminal Justice Statistics Center is to:

- *Collect, analyze, and report statistical data that provide valid measures of crime and the criminal justice process.*
- *Examine these data on an ongoing basis to better describe crime and the criminal justice system.*
- *Promote the responsible presentation and use of crime statistics.*

Executive Summary

Homicide in California, 2009 contains information about the crime of homicide and its victims, as well as demographic data on persons arrested for homicide. Information about the death penalty, the number of peace officers killed in the line of duty, and justifiable homicide is also included. This report provides data for 2009 and prior years.

The California Department of Justice (DOJ) is responsible for reporting annual statistics on homicide as mandated by Penal Code section 13014. Information displayed in this report is extracted from several databases maintained by the DOJ. The primary source of information is the Homicide File, which captures willful and justifiable homicide crime data. Other databases capture information about persons arrested for homicide, death penalty sentences, and peace officers killed in the line of duty.

The type of data collected, and the methods used to collect these data, differ for each data set. Unless otherwise indicated, all calculations are based on the number of known victims.

Homicide Crimes

The Homicide Crimes section (pages 1–22) provides data on homicide crimes reported to law enforcement.

- From 2008 to 2009, the rate of homicide crimes per 100,000 population decreased 8.9 percent (5.6 to 5.1). Comparing 2000 to 2009, the homicide crime rate decreased 15.0 percent (6.0 to 5.1).
- From 2000 to 2009, the homicide rate per 100,000 population ranged from a high of 6.8 in 2002 and 2005 to this year's low of 5.1. The homicide crime rate has not been this low in more than 40 years.
- A greater percentage of white victims were female than were Hispanic or black victims. White victims tended to be older, while Hispanic and black victims tended to be younger.
- Females were more likely to be killed in their residence, while males were more likely to be killed on streets or sidewalks.
- In 2009, where the victim-offender relationship was known, the majority of the victims were killed by friends or acquaintances.
- Firearms were used in 70.5 percent of homicides in 2009.
- Of the 35 counties for which 2009 homicide rates were calculated, Monterey County experienced the highest homicide rate per 100,000 population (11.8); Napa County experienced the lowest (0.7).
- In 2009, the average daily number of homicides was highest on weekends (6.9 vs. 4.8).
- In 2009, where the contributing circumstance was known, 35.0 percent of homicides were the result of an argument and 39.0 percent were gang-related.
- From 2000 to 2009, the number of gang-related homicides increased 9.5 percent.

Homicide Arrests

The Homicide Arrests section (pages 25–29) provides data on arrests made by law enforcement personnel.

- From 2008 to 2009, the rate of homicide arrests per 100,000 population at risk decreased 3.2 percent (6.2 to 6.0). Comparing 2000 to 2009, the homicide arrest rate decreased 3.2 percent (6.2 to 6.0).
- From 2000 to 2009, the overwhelming majority of homicide arrestees and victims were male.
- From 2000 to 2009, the largest percentage of homicide arrestees and victims were Hispanic.
- From 2000 to 2009, the largest percentage of homicide arrestees and victims were aged 18–29.

Death Penalty Sentences

The Death Penalty Sentences section (page 33) provides information about persons sentenced to death in California in 2009.

- By the end of 2009, there were 681 persons under sentence of death in California. Of these, 29 were sentenced in 2009.

Peace Officers Killed in the Line of Duty

Information about peace officers killed in the line of duty (pages 37–38) is obtained from the Homicide File.

- In 2009, four peace officers were feloniously killed in the line of duty.

- Between 2000 and 2009, 43 peace officers were killed in the line of duty.

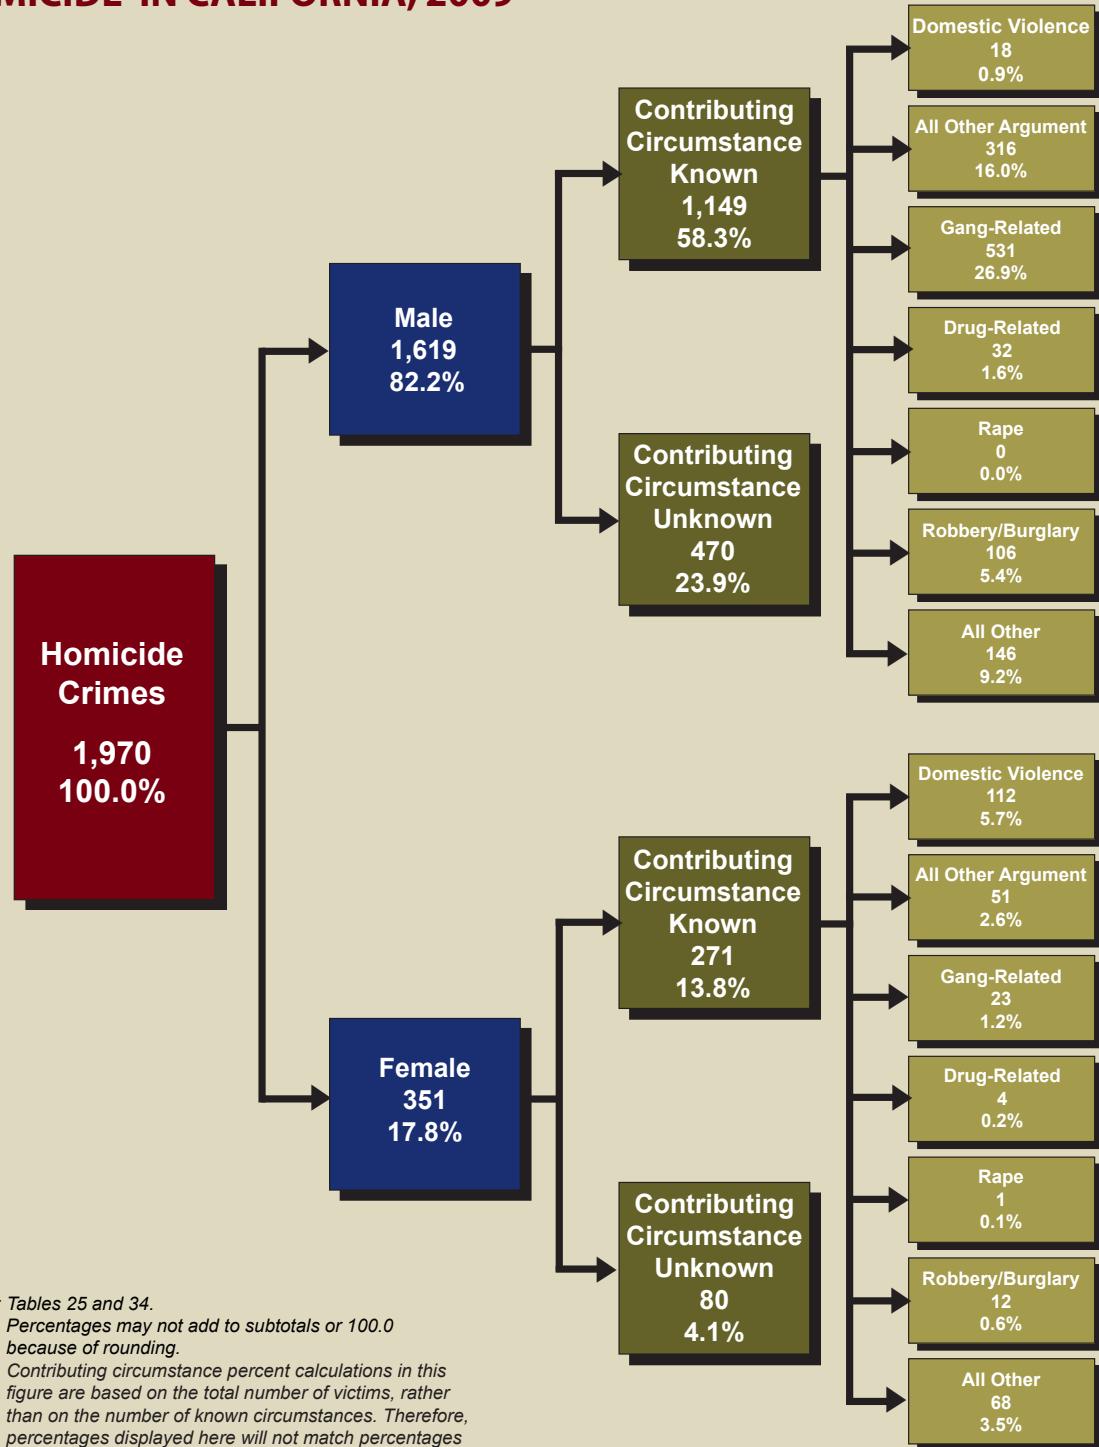

Justifiable Homicides

Information about justifiable homicides by a private citizen or peace officer (pages 41–44) is obtained from the Homicide File.

- In 2009, justifiable homicides by peace officers were most often the result of a felon attacking a peace officer (50.4 percent).

At-a-Glance

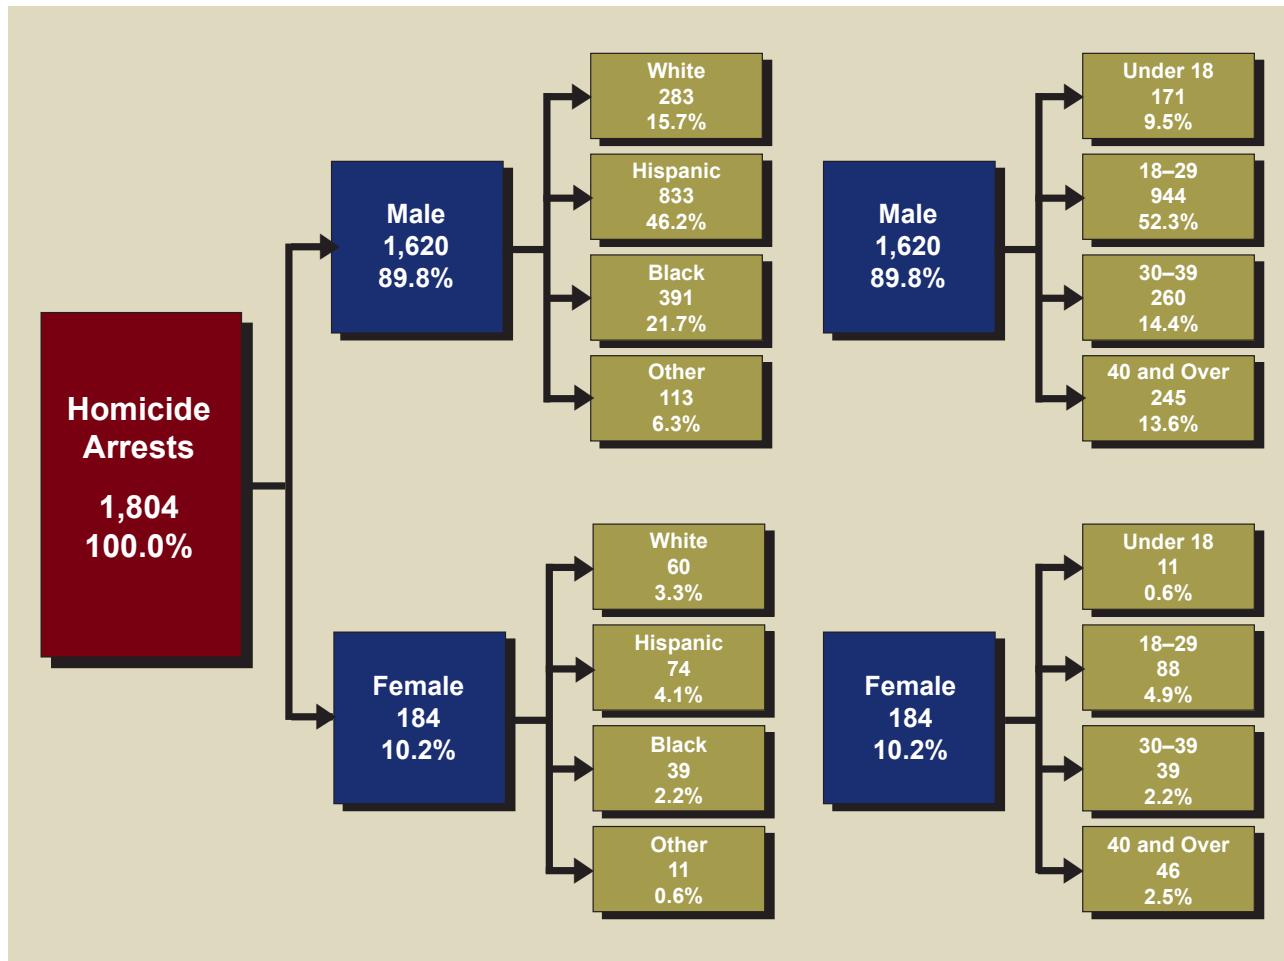

HOMICIDE IN CALIFORNIA, 2009

Source: Tables 25 and 34.

Notes: Percentages may not add to subtotals or 100.0 because of rounding.

Contributing circumstance percent calculations in this figure are based on the total number of victims, rather than on the number of known circumstances. Therefore, percentages displayed here will not match percentages displayed elsewhere in this report.

Homicide Crimes

The homicide category comprises murder and nonnegligent manslaughter. Attempted murder, justifiable homicide, manslaughter by negligence, and suicide are excluded.

Contributing Circumstances

Contributing circumstance, when known, is reported by law enforcement agencies on the supplemental homicide report. In 2009, there were 550 homicides in which the contributing

circumstance was unknown. Of this number, 470 involved male victims and 80 involved female victims.

Homicide Arrests

All California law enforcement agencies report arrest information to the DOJ on the Monthly Arrest and Citation Register (MACR). Data submitted include age, gender, and race/ethnic group, and specify the most serious arrest offense and law enforcement disposition.

Homicide in California

Homicide Crimes

Homicide Crimes

Homicide Crimes, 2000–2009
Number and Rate per 100,000 Population

Year	Number	Rate
2009	1,970	5.1
2008	2,143	5.6
2007	2,258	6.0
2006	2,483	6.6
2005	2,503	6.8
2004	2,394	6.5
2003	2,402	6.7
2002	2,392	6.8
2001	2,201	6.3
2000	2,074	6.0

Source: Table 1.

Homicide is defined by the FBI's Uniform Crime Reporting (UCR) Program as the "willful (nonnegligent) killing of one human being by another." The homicide category comprises murder and nonnegligent manslaughter. Attempted murder, justifiable homicide, manslaughter by negligence, and suicide are excluded.

From 2008 to 2009:

- The homicide rate per 100,000 population decreased 8.9 percent (5.6 to 5.1).
- The number of homicides decreased 8.0 percent (from 2,143 to 1,970).

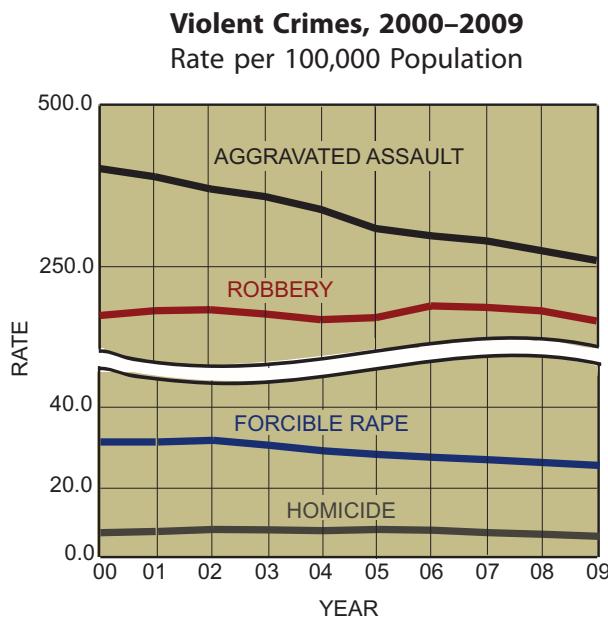

Comparing 2000 to 2009:

- The homicide rate per 100,000 population decreased 15.0 percent (6.0 to 5.1).
- The number of homicides decreased 5.0 percent (from 2,074 to 1,970).

From 2000 to 2009:

- The homicide rate per 100,000 population ranged from a high of 6.8 in 2002 and 2005 to this year's low of 5.1.

Violent Crimes

Source: Table 1.

There are four offenses classified as violent crimes by the FBI: *homicide*, *forcible rape*, *robbery*, and *aggravated assault*. For comparison, changes in the rates of the four offenses follow:

From 2008 to 2009:

- Homicide decreased 8.9 percent (5.6 to 5.1).
- Forcible rape decreased 3.0 percent (23.3 to 22.6).
- Robbery decreased 8.6 percent (181.9 to 166.3).
- Aggravated assault decreased 5.5 percent (274.7 to 259.6).

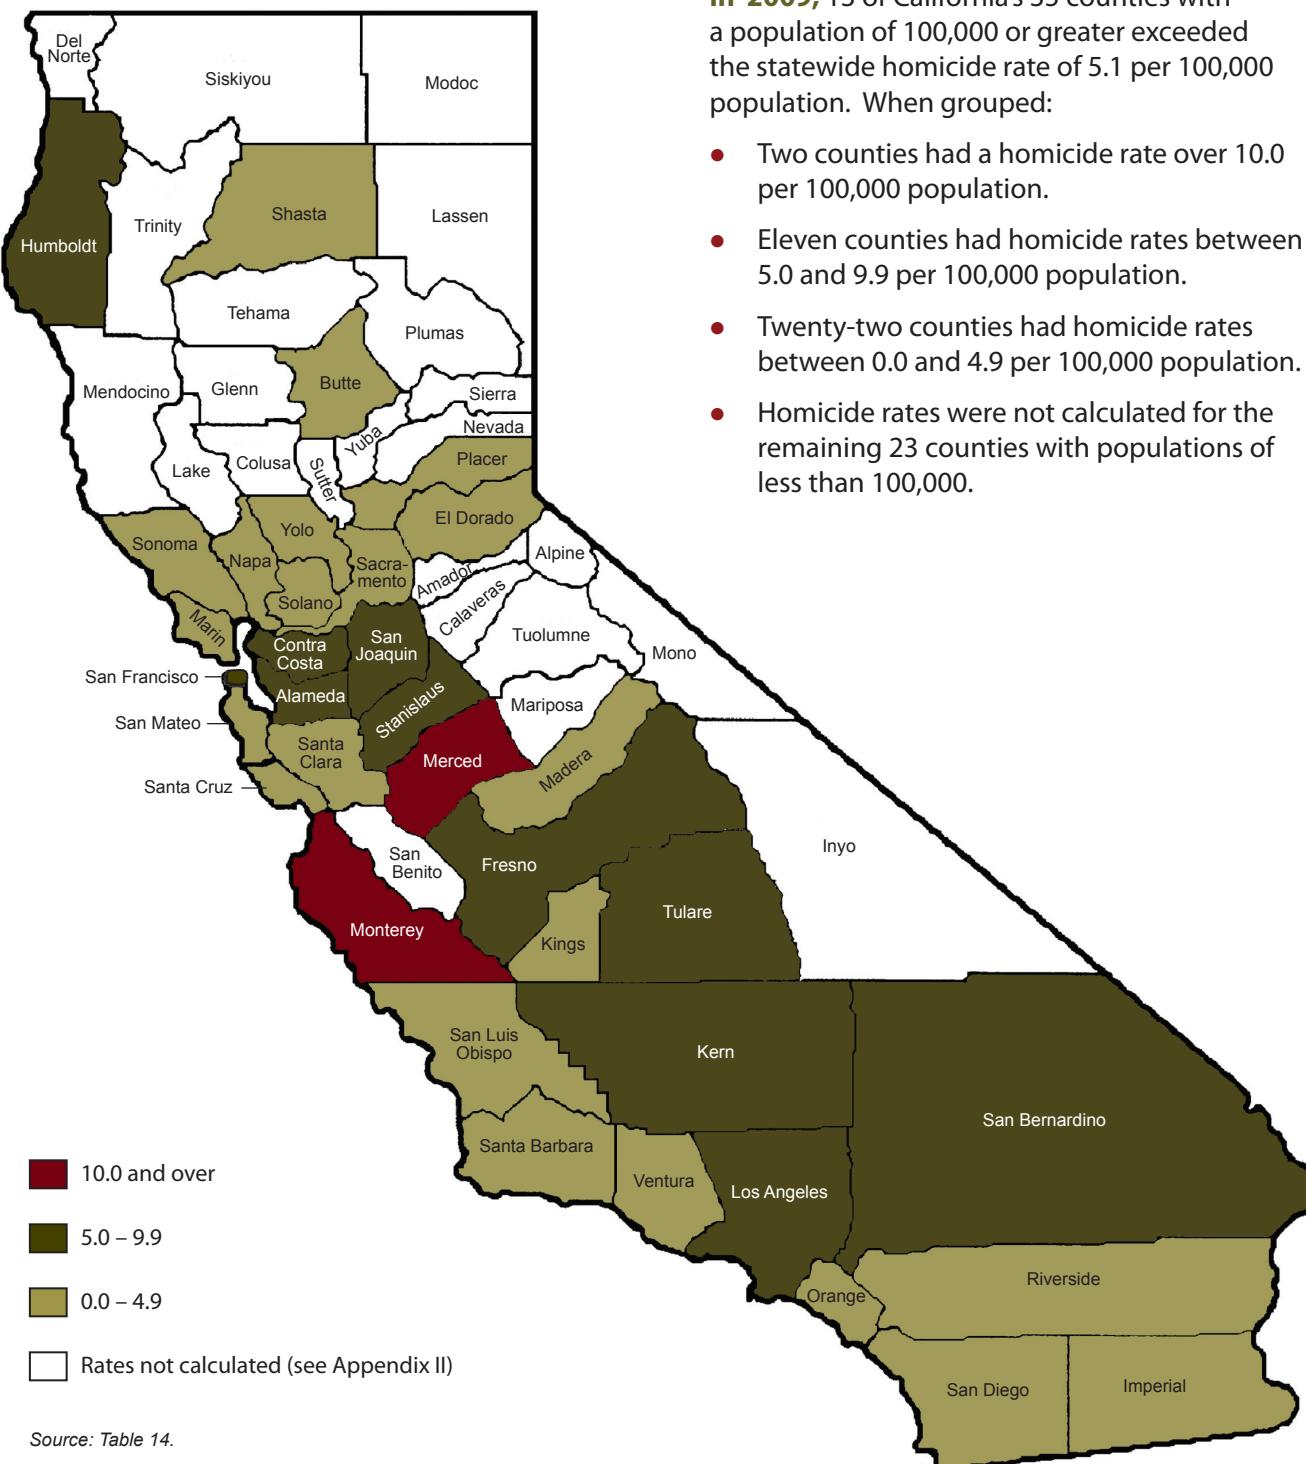

Comparing 2000 to 2009:

- Homicide decreased 15.0 percent (6.0 to 5.1).
- Forcible rape decreased 20.4 percent (28.4 to 22.6).
- Robbery decreased 4.8 percent (174.7 to 166.3).
- Aggravated assault decreased 35.3 percent (401.4 to 259.6).

Homicide Rate by County

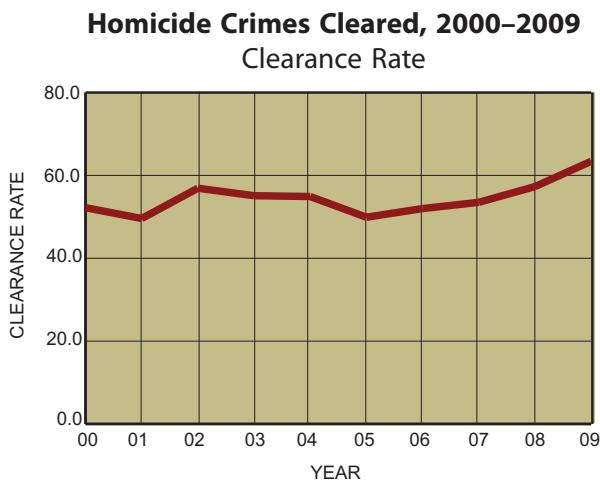

Homicide Crimes, 2009

County by Rate per 100,000 Population

Source: Table 14.

Clearance Rates

Source: Table 28.

Note: A clearance rate is the percentage of crimes (homicides) reported that have been cleared by law enforcement. See Appendix II – Computational Formulas and Appendix III – Glossary for further information.

From 2008 to 2009:

- Homicide clearance rates increased from 57.3 to 63.4.

Comparing 2000 to 2009:

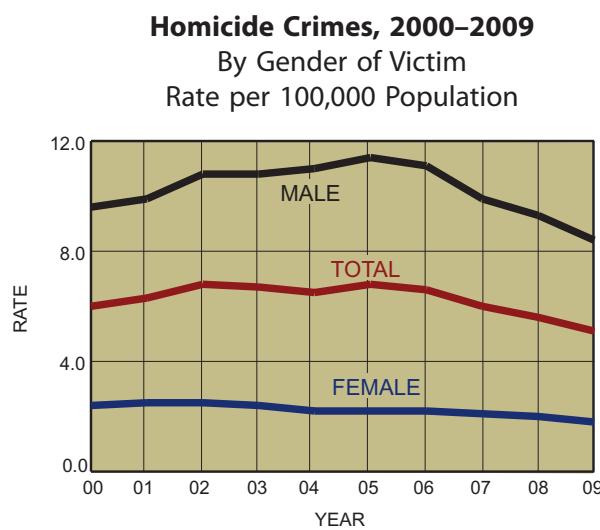

- Homicide clearance rates increased from 52.2 to 63.4.

From 2000 to 2009:

- Clearance rates ranged from this year's high of 63.4 to a low of 49.6 in 2001.

Homicide Victims

Personal Characteristics of the Victim

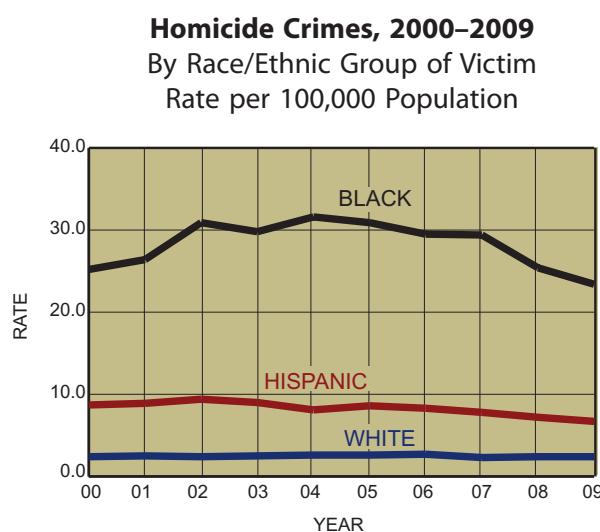

Source: Table 2.

In 2009:

- The total homicide rate was 5.1 per 100,000 population.
- The male homicide rate was more than four times that of the female homicide rate (8.4 vs. 1.8).

Comparing 2000 to 2009:

- The male homicide rate decreased 12.5 percent.
- The female homicide rate decreased 25.0 percent.

Source: Table 3.

In 2009:

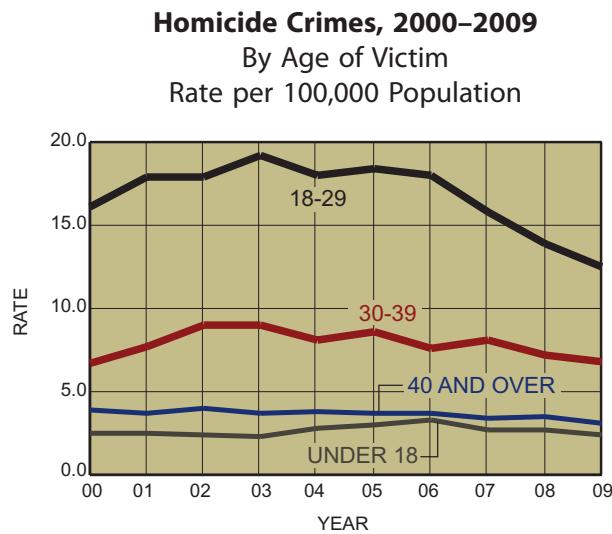

- The black homicide rate was more than nine times that of whites and more than three times that of Hispanics (23.4 vs. 2.4 and 6.4, respectively).

Comparing 2000 to 2009:

- The white homicide rate showed no change.
- The Hispanic homicide rate decreased 26.4 percent.
- The black homicide rate decreased 7.1 percent.

Personal Characteristics of the Victim

(continued)

Source: Table 4.

In 2009:

- Persons aged 18–29 had the highest homicide victimization rate (12.5 per 100,000 population).

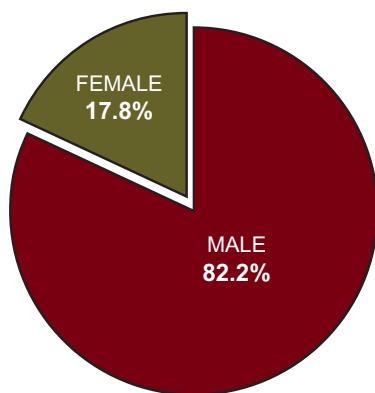

Comparing 2000 to 2009, the homicide rate:

- Decreased 4.0 percent for victims under age 18.
- Decreased 22.4 percent for victims aged 18–29.
- Increased 1.5 percent for victims aged 30–39.
- Decreased 20.5 percent for victims aged 40 and over.

Personal Characteristics of the Victim

(continued)

Homicide Crimes, 2009
By Gender of Victim

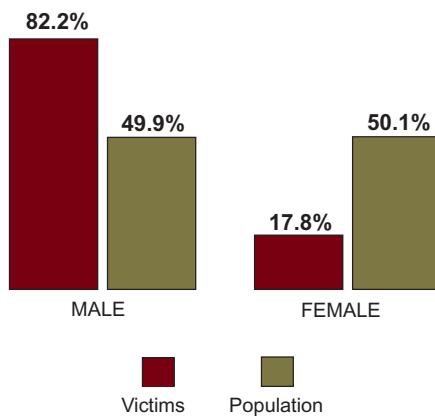

In 2009, there were 1,970 victims of homicide. Of these:

- Males represented 82.2 percent (1,619) of total homicide victims; they comprised 49.9 percent of the population.
- Females represented 17.8 percent (351) of total homicide victims; they comprised 50.1 percent of the population.

and Percent of Population

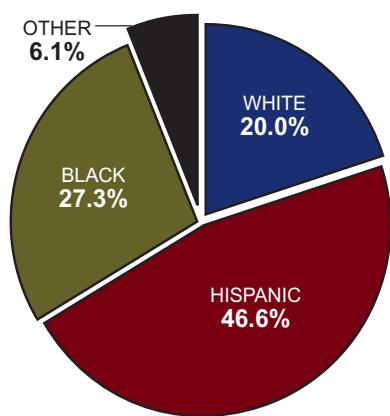

Source: Tables 2 and 5.

Personal Characteristics of the Victim

(continued)

Homicide Crimes, 2009
By Race/Ethnic Group of Victim

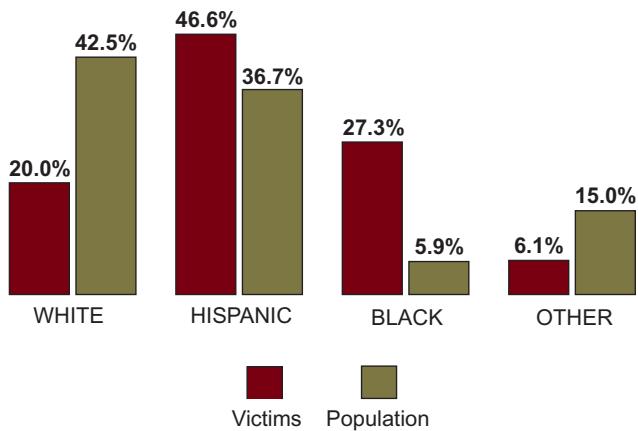

Source: Table 6.

In 2009, the race/ethnicity of the homicide victim was reported in 1,959 cases. Of these:

- Whites represented 20.0 percent (392) of the homicide victims; they comprised 42.5 percent of the population.
- Hispanics represented 46.6 percent (913) of the homicide victims; they comprised 36.7 percent of the population.
- Blacks represented 27.3 percent (534) of the homicide victims; they comprised 5.9 percent of the population.
- The “other” race/ethnic group category represented 6.1 percent (120) of the homicide victims; they comprised 15.0 percent of the population.

Personal Characteristics of the Victim

(continued)

Homicide Crimes, 2009
By Age of Victim

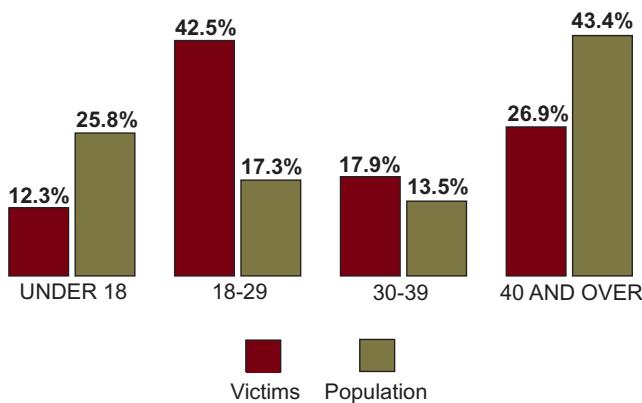

Source: Table 7.

Note: Percentages do not add to 100.0 because of rounding.

In 2009, the age of the homicide victim was reported in 1,961 cases. Of these:

- 12.3 percent (242) of the homicide victims were under age 18; this age group comprised 25.8 percent of the population.
- 42.7 percent (838) of the homicide victims were aged 18–29; this age group comprised 17.3 percent of the population.
- 18.0 percent (353) of the homicide victims were aged 30–39; this age group comprised 13.5 percent of the population.
- 26.9 percent (528) of the homicide victims were aged 40 and over; this age group comprised 43.4 percent of the population.

Homicide Crimes, 2009
Age of Victim by Percent of Total Victims
and Percent of Population

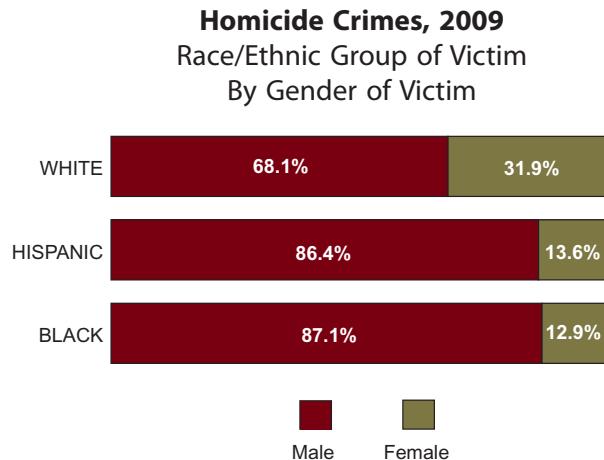

Source: Tables 4 and 7.

Note: Percentages may not add to 100.0 because of rounding.

Personal Characteristics of the Victim

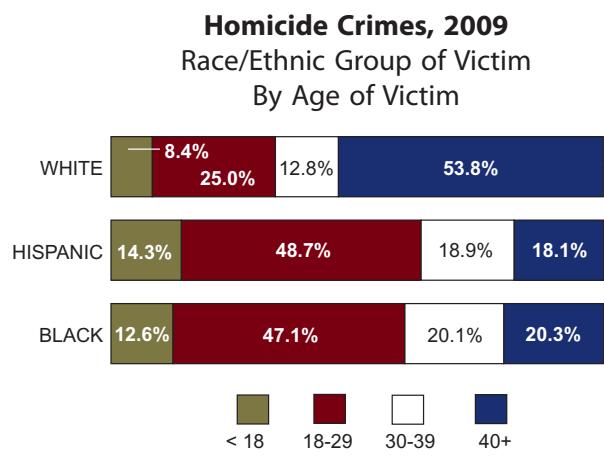

(continued)

Source: Table 8.

In 2009:

- A greater percentage of white victims were female than were either Hispanic or black victims (31.9 vs. 13.6 and 12.9 percent, respectively).

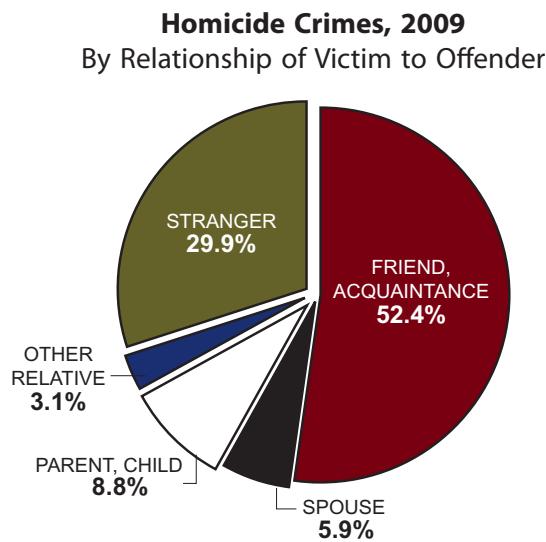

Source: Table 9.

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- A greater percentage of Hispanic and black victims were aged 18-29 than were white victims (48.7 and 47.1 vs. 25.0 percent, respectively).
- A greater percentage of white victims were aged 40 and over than were either Hispanic or black victims (53.8 vs. 18.1 and 20.3 percent, respectively).

Relationship of the Victim to the Offender

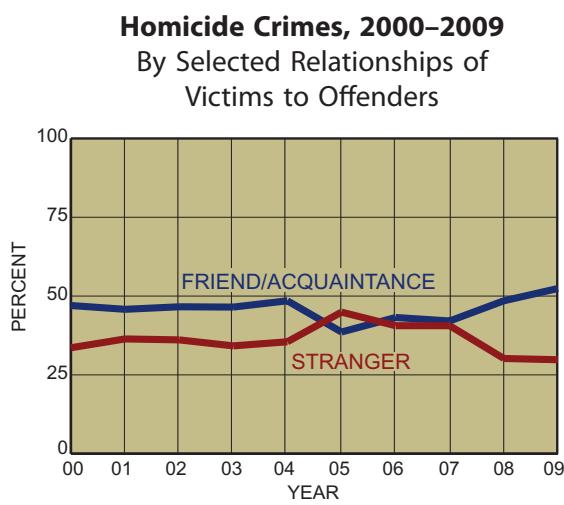

Source: Table 11.

Note: Percentages do not add to 100.0 because of rounding.

In 2009, the relationship of the homicide victim to the offender was reported in 1,092 cases. Of these:

- 52.4 percent (572) of victims were friends or acquaintances of offenders.
- 5.9 percent (64) of victims were spouses of offenders.
- 8.8 percent (96) of victims were parents or children of offenders.
- 3.1 percent (34) of victims were classified as "other relative" of the offender.
- 29.9 percent (326) of victims were strangers to offenders.

Source: Table 11.

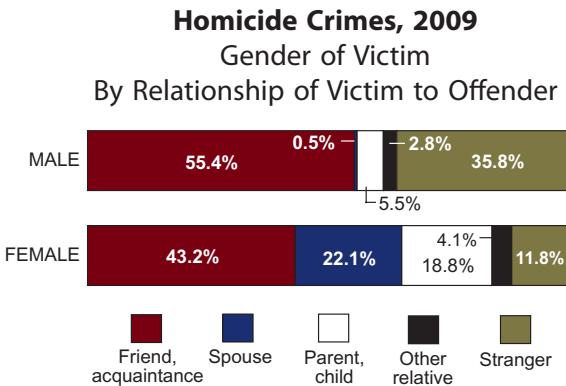

Comparing 2008 to 2009:

- The proportion of homicides in which victims were friends or acquaintances of offenders increased from 48.5 percent to 52.4 percent.

Comparing 2000 to 2009:

- The proportion of homicides in which victims were friends or acquaintances of offenders increased from 47.0 percent to 52.4 percent.
- The proportion of homicides in which victims were strangers to the offenders decreased from 33.6 percent to 29.9 percent.

Relationship of the Victim to the Offender *(continued)*

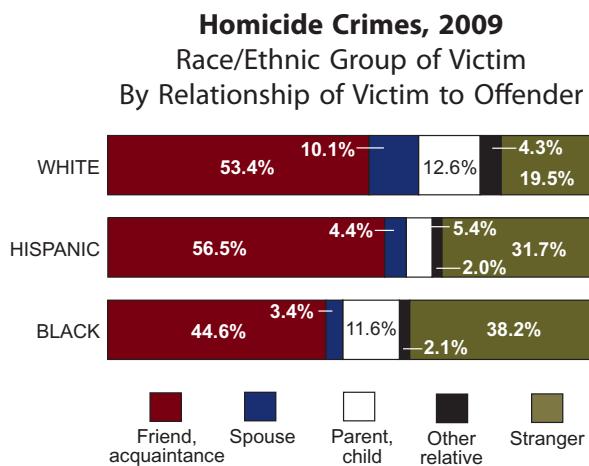

Source: Table 12.

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- A greater percentage of female victims were spouses of offenders (22.1 percent) than were male victims (0.5 percent).

Source: Table 12.

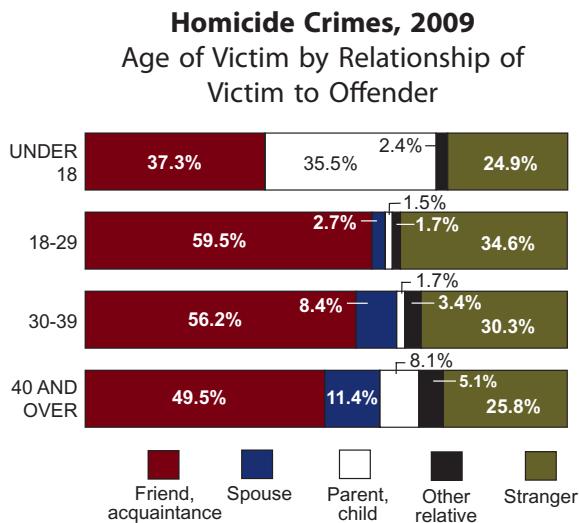

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- A greater percentage of Hispanic and black victims were strangers to offenders than were white victims (31.7 and 38.2 vs. 19.5 percent, respectively).

Relationship of the Victim to the Offender

(continued)

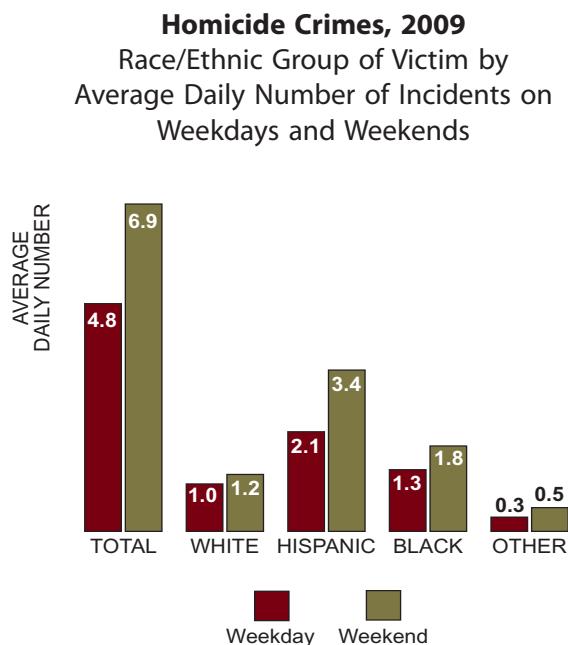

In 2009:

- Over half of the victims aged 18–29 and aged 30–39 were friends or acquaintances of the offenders (59.5 and 56.2 percent, respectively).
- A greater percentage of victims aged 40 and over were spouses of the offenders (11.4 percent) than were victims in any other age group shown.

Source: Table 13.

Note: Percentages may not add to 100.0 because of rounding.

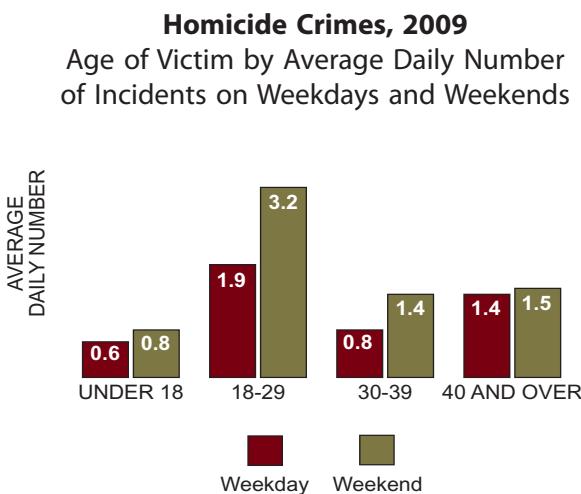

Elements of the Homicide Day of Incident

In 2009, when homicides were examined by day of incident, it was found that:

- An average of 4.8 homicide victims were killed each weekday and 6.9 homicide victims were killed each weekend day.
- Hispanic victims had the highest average daily number of incidents on both weekdays and weekends (2.1 and 3.4, respectively) of any race/ethnic group shown.
- Victims aged 18–29 had the highest average daily number of incidents on both weekdays and weekends (1.9 and 3.2, respectively) of any age group shown.

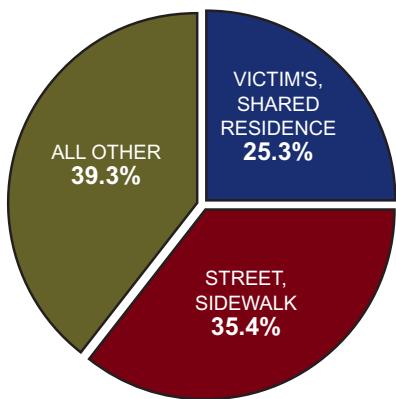

Source: Table 16.

Source: Table 17.

Location

Homicide Crimes, 2009
By Location of Homicide

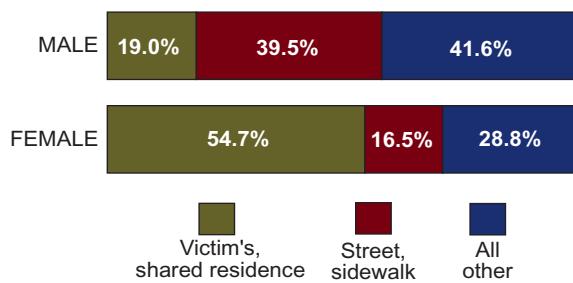

Source: Table 19.

In 2009, the location of the homicide was reported in 1,879 cases. Of these:

- 25.3 percent (475) of victims were killed at their places of residence.
- 35.4 percent (665) of homicides occurred on streets or sidewalks.
- 39.3 percent (739) of homicides occurred in locations grouped in the "all other" category.

Homicide Crimes, 2009

Gender of Victim
by Location of Homicide

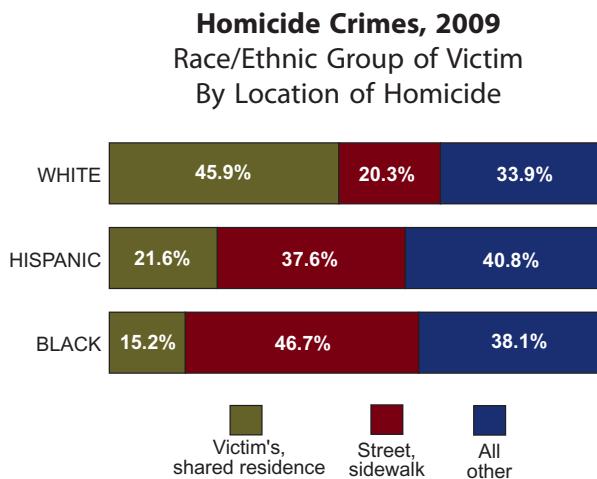

Source: Table 19.

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- The greatest percentage of males (39.5 percent) were killed on streets or sidewalks.
- The majority of females (54.7 percent) were killed at their places of residence.

Location (continued)

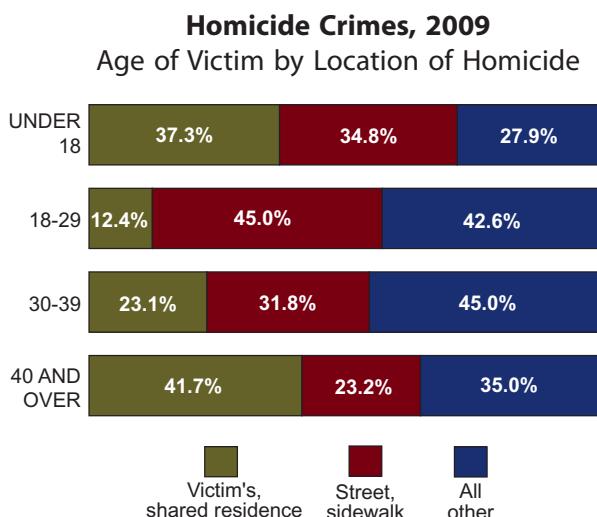

Source: Table 19.

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- A greater percentage of whites than Hispanics or blacks were killed at their places of residence (45.9 vs. 21.6 and 15.2 percent, respectively).
- A greater percentage of Hispanics and blacks were killed on streets or sidewalks than were whites (37.6 and 46.7 vs. 20.3 percent, respectively).

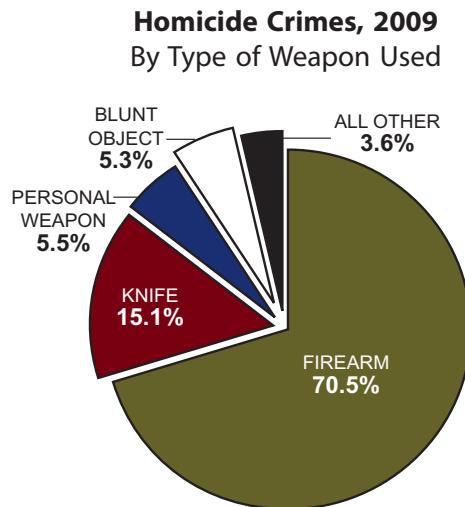

Source: Table 20.

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- A greater percentage of victims aged 18–29 were killed on streets or sidewalks (45.0 percent) than were victims in any other age group shown.
- A greater percentage of victims aged 40 and over were killed at their places of residence (41.7 percent) than were victims in any other age group shown.

Weapon

Source: Table 21.

In 2009, the type of weapon used in the homicide was reported in 1,928 cases. Of these:

- 70.5 percent (1,359) involved firearms.
- 15.1 percent (291) involved knives.
- 5.5 percent (107) involved the use of personal weapons (hands, feet, etc.).
- 5.3 percent (102) involved blunt objects (clubs, etc.).
- 3.6 percent (69) involved weapons grouped in the "all other" category (rope, drugs, etc.).

Source: Table 21.

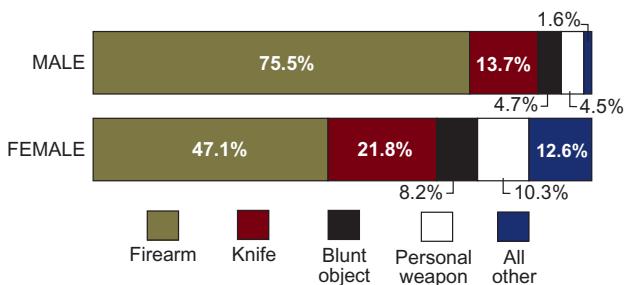

From 2000 to 2009:

- Firearms were consistently used in over 70 percent of homicides.

Homicide in California, 2009

Weapon (*continued*)

Homicide Crimes, 2009
Gender of Victim by Type of Weapon Used

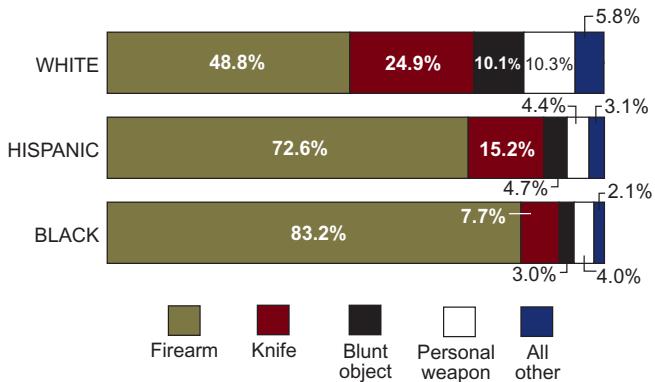

In 2009:

- A greater percentage of males (75.5 percent) were killed with firearms than were females (47.1 percent).

Source: Table 22.

Homicide Crimes, 2009
Race/Ethnic Group of Victim
By Type of Weapon Used

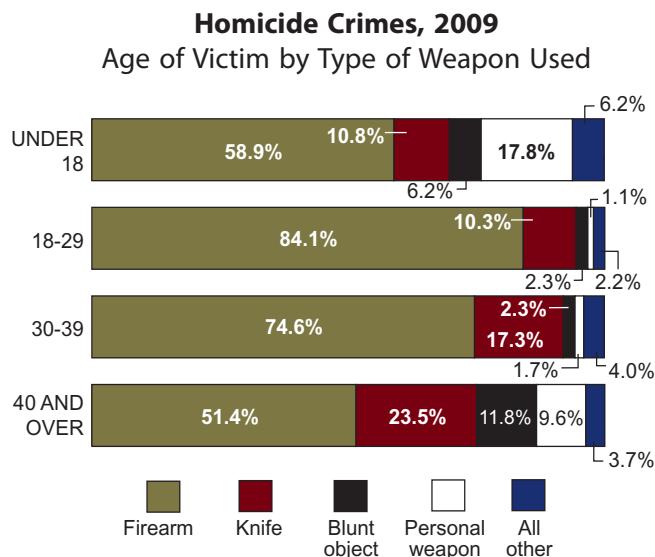

In 2009:

- A greater percentage of Hispanics and blacks were killed with firearms than were whites (72.6 and 83.2 vs. 48.8 percent, respectively).

Source: Table 22.

Note: Percentages may not add to 100.0 because of rounding.

Weapon (continued)

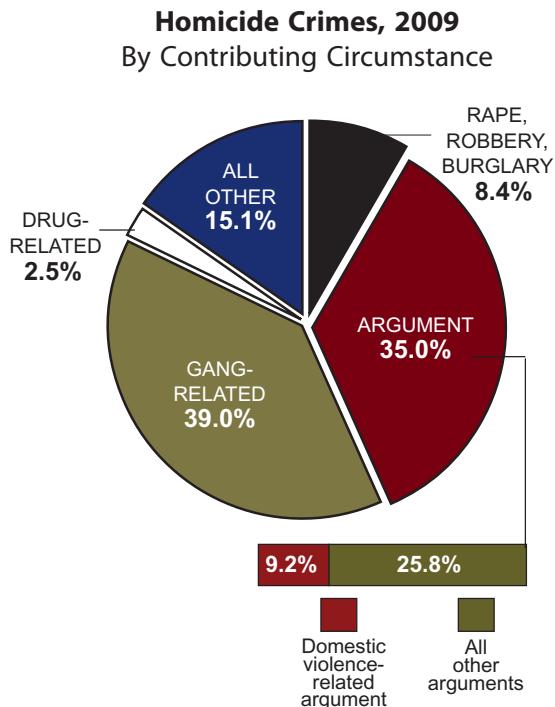

In 2009:

- The majority of victims, regardless of age group, were killed with firearms.
- A greater percentage of victims aged 40 and over were killed with non-firearms (48.6 percent) than were victims in any other age group shown.

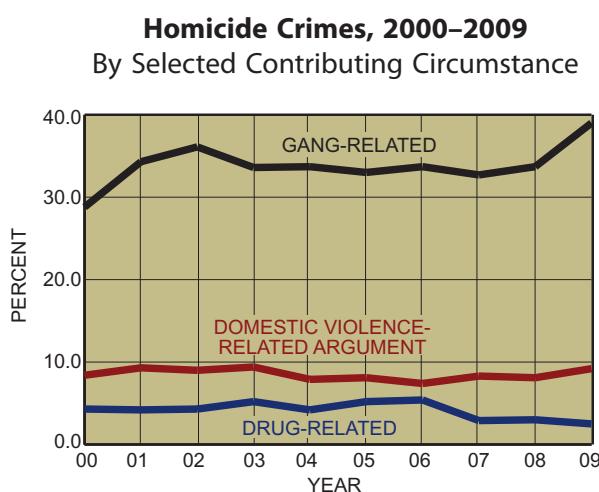

Source: Table 23.

Note: Percentages may not add to 100.0 because of rounding.

Contributing Circumstance

Source: Table 24.

Source: Table 24.

In 2009, the contributing circumstance was reported in 1,420 homicide cases. Of these:

- 8.4 percent (119) occurred as a result of a rape, robbery, or burglary.
- 35.0 percent (497) occurred as a result of an argument.
- 9.2 percent (130) occurred as a result of a domestic violence-related argument.
- 25.8 percent (367) occurred as a result of all other types of arguments.
- 39.0 percent (554) were gang-related.
- 2.5 percent (36) were drug-related.
- 15.1 percent (214) occurred as a result of “all other” contributing circumstances.

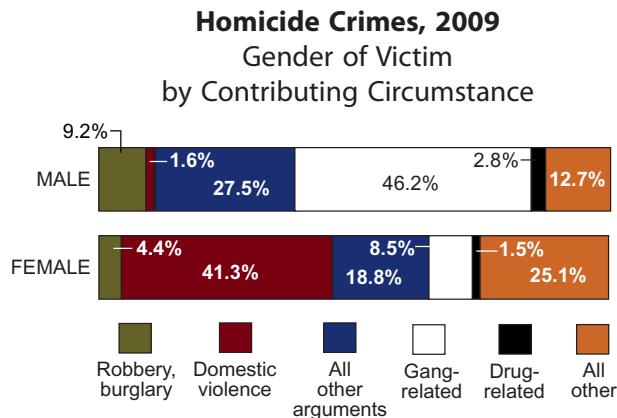

From 2008 to 2009:

- The number of gang-related homicides increased 18.1 percent.

Comparing 2000 to 2009:

- The percentage of gang-related homicides increased from 28.8 percent to 39.0 percent.
- The percentage of domestic violence-related homicides increased from 8.4 percent to 9.2 percent.
- The percentage of drug-related homicides decreased from 4.3 percent to 2.5 percent.

Contributing Circumstance (*continued*)

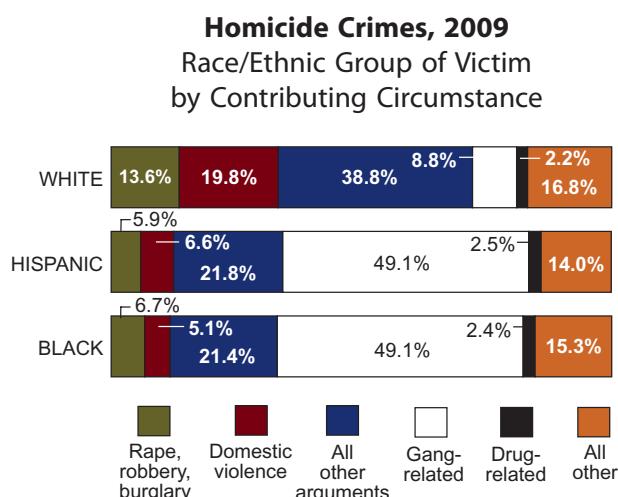

Source: Table 25.

Note: Percentages do not add to 100.0 because of rounding.

In 2009:

- Males were victims of gang-related homicides more than any other contributing circumstance (46.2 percent).
- Females were victims of domestic violence-related homicides more than any other contributing circumstance (41.3 percent).

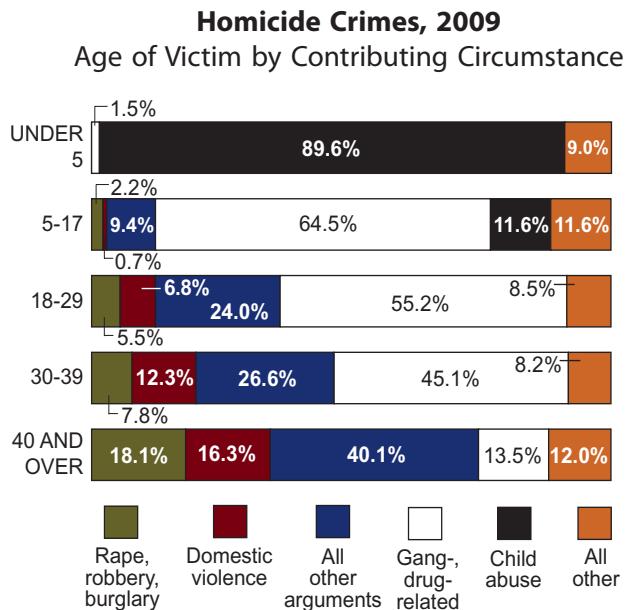

Source: Table 25.

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- The proportion of gang-related homicides was much greater for Hispanics and blacks than for whites (49.1 and 49.1 vs. 8.8 percent, respectively).

Contributing Circumstance *(continued)*

Source: Table 26.

Note: Percentages may not add to 100.0 because of rounding.

In 2009, where the contributing circumstance was known:

- The majority of homicide victims under age 5 were killed as a result of child abuse (89.6 percent).
- The greatest percentage of homicide victims aged 5–17 (64.5 percent), aged 18–29 (55.2 percent), and aged 30–39 (45.1 percent) were killed as a result of gang- or drug-related activities.
- The greatest percentage of homicide victims aged 40 and over (40.1 percent) were killed as a result of an argument.

Homicide in California

Homicide Arrests

Homicide Arrests

Homicide Arrests, 2000–2009

Number and Rate per 100,000 Population at Risk

Year	Number	Rate
2009	1,804	6.0
2008	1,850	6.2
2007	2,017	6.8
2006	1,967	6.7
2005	1,956	6.8
2004	1,978	7.0
2003	1,839	6.6
2002	1,864	6.8
2001	1,754	6.6
2000	1,627	6.2

Source: Table 29.

Unlike crimes, which are classified by nationwide Uniform Crime Reporting (UCR) standards, arrests are reported by the statutory definition of the offense. This may cause some differences in the definitions of certain crimes and the reporting of the arrests for those crimes. For instance, the California definition of a homicide arrest includes murder and *nonvehicular* manslaughter. The federal definition of a homicide crime includes murder and *nonnegligent* (nonaccidental) manslaughter.

California law enforcement agencies report arrest and citation information to the DOJ on the Monthly Arrest and Citation Register. This file contains information about the age, gender, and race/ethnic group of the arrestee, and specifies the “most serious” arrest offense and law enforcement disposition.

From 2008 to 2009:

- The homicide arrest rate per 100,000 population at risk decreased 3.2 percent (6.2 to 6.0).

Comparing 2000 to 2009:

- The homicide arrest rate per 100,000 population at risk decreased 3.2 percent (6.2 to 6.0).

From 2000 to 2009:

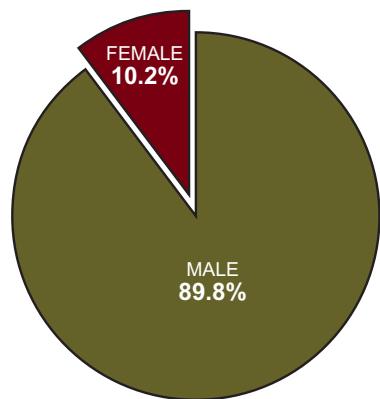

- The homicide arrest rate ranged from a high of 7.0 in 2004 to this year's low of 6.0.

Note: The following penal codes for homicide arrest offenses were valid at the time of the closeout of the 2009 arrest offense code file: 128, 187(a), 189, 192(a), 192(b), 193(a), 193(b), 273ab, 399, and 12310(a).

Personal Characteristics of the Arrestee

Homicide Arrests, 2009

By Gender of Arrestee

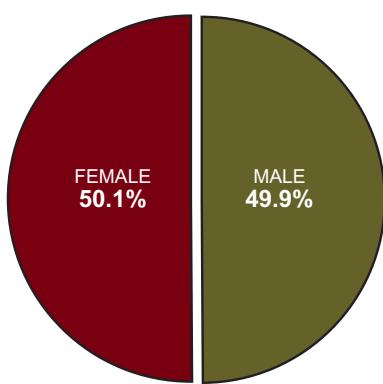

In 2009, there were 1,804 individuals arrested for homicide. Of these:

- 89.8 percent (1,620) of arrestees were male.
- 10.2 percent (184) of arrestees were female.

Source: Table 30.

Population in California, 2009

By Gender

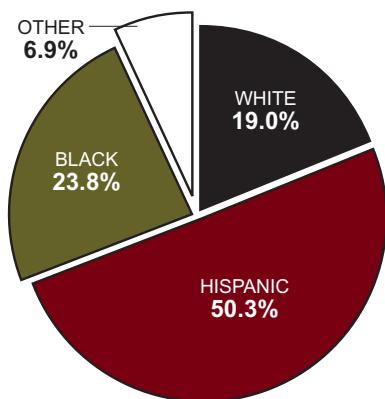

Source: Table 2.

Personal Characteristics of the Arrestee

(continued)

Homicide Arrests, 2009
By Race/Ethnic Group of Arrestee

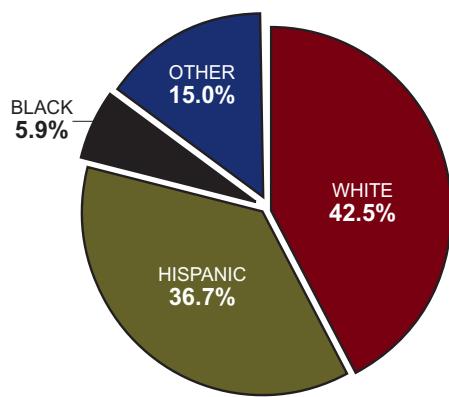

Source: Table 31.

In 2009, there were 1,804 individuals arrested for homicide. Of these:

- 19.0 percent (343) of arrestees were white.
- 50.3 percent (907) of arrestees were Hispanic.
- 23.8 percent (430) of arrestees were black.
- 6.9 percent (124) of arrestees fell into the "other" race/ethnic group category.

Population in California, 2009
By Race/Ethnic Group

Source: Table 3.

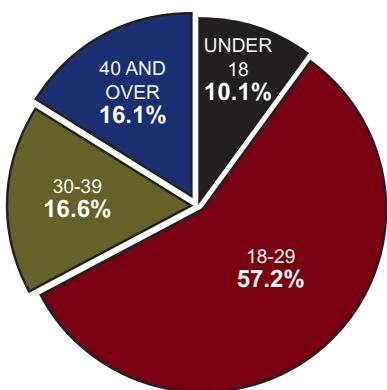

Notes: Beginning in 2004, the "other" category includes the race/ethnic group of "multi-racial."
Percentages do not add to 100.0 because of rounding.

Note: The subjectivity of the classification and labeling process must be considered in the analysis of race/ethnic group data. As commonly used, race refers to large populations that share certain similar physical characteristics such as skin color. Because these physical characteristics can vary greatly within groups as well as between groups, determination of race is frequently, by necessity, subjective. Ethnicity refers to cultural heritage and can cross racial lines. For example, the ethnic designation "Hispanic" can include persons of any race. Most commonly, self-identification of race/ethnicity is used in the classification and labeling process.

Personal Characteristics of the Arrestee

(continued)

Homicide Arrests, 2009
By Age of Arrestee

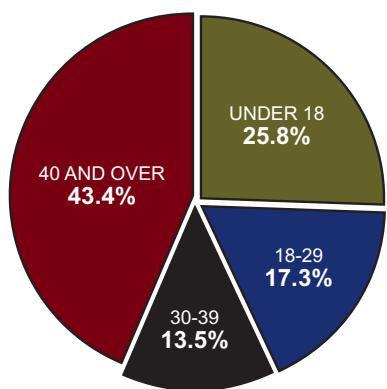

In 2009, there were 1,804 individuals arrested for homicide. Of these:

- 10.1 percent (182) of arrestees were under age 18.
- 57.2 percent (1,032) of arrestees were aged 18–29.
- 16.6 percent (299) of arrestees were aged 30–39.
- 16.1 percent (291) of arrestees were aged 40 and over.

Source: Table 32.

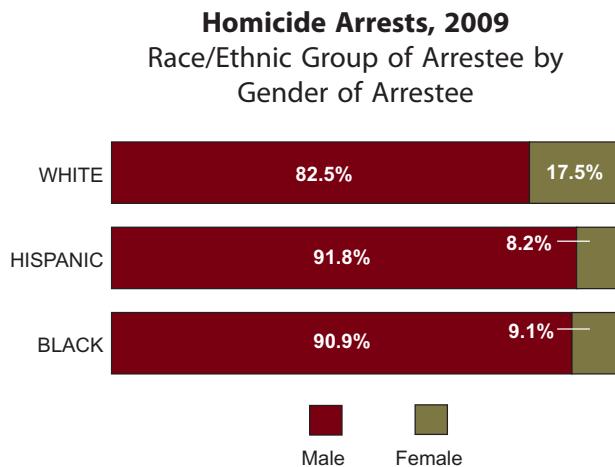

Population in California, 2009
By Age

Source: Table 4.

Personal Characteristics of the Arrestee

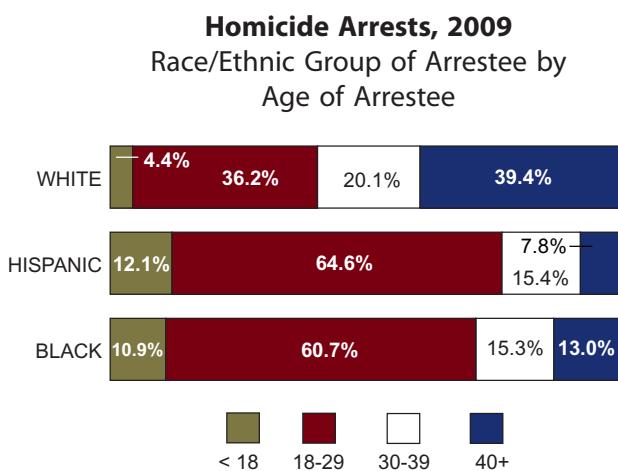

(continued)

Source: Table 33.

In 2009:

- Homicide arrestees for all three race/ethnic groups shown were predominately male.
- A greater percentage of white arrestees were female than were Hispanic or black arrestees (17.5 vs. 8.2 and 9.1 percent, respectively).

Source: Table 33.

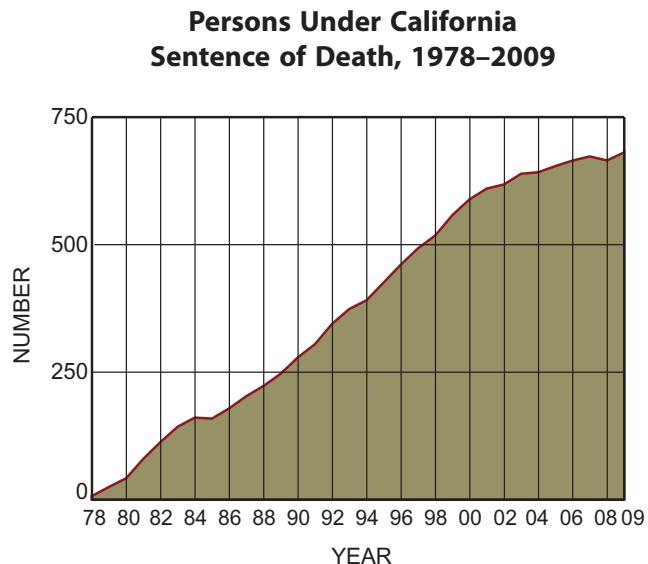

In 2009:

- A greater percentage of white arrestees were aged 40 and over than were Hispanic or black arrestees (39.4 vs. 7.8 and 13.0 percent, respectively).
- The majority of Hispanic and black arrestees were aged 18–29 (64.6 and 60.7 percent, respectively).

Homicide in California

***Death Penalty
Sentences***

Death Penalty Sentences

Source: Table 35.

This section contains information about persons sentenced to death in California in 2009. Death penalty data were extracted from the 2009 Offender-Based Transaction Statistics (OBTS) system. For detailed information regarding the death penalty and the criteria by which a person can be sentenced to death, refer to California Penal Code sections 190 through 190.9.

During 2009, there were 29 persons convicted of first-degree murder and sentenced to death. These were initial death sentences only and do not include persons who were resentenced to death after their death sentences were reversed on appeal. By the end of 2009, there were 681 persons under sentence of death in California.

In 2009, of the 29 persons newly sentenced to death:

- All but one were male.
- Nine were white, nine were Hispanic, and eleven were black.
- The average age at arrest was 33.
- Los Angeles County sentenced the largest number with 13.

Note: Additional information can be found in Tables 35 and 36.

Homicide in California

***Peace Officers Killed
in the Line of Duty***

Peace Officers Killed in the Line of Duty

Peace Officers Killed in the Line of Duty, 2009

By Type of Weapon Used

Type of weapon used	Total	Offender's	Officer's
Total.....	4	4	0
Rifle.....	2	2	0
Firearm (not specified)	2	2	0

Information about peace officers killed in the line of duty was obtained from the Homicide File. Only sworn officers *feloniously* killed in the line of duty are included. (Sworn officers accidentally killed in the line of duty and non-sworn officers, such as security guards, are excluded.)

In 2009, four peace officers were killed in the line of duty.

- Two peace officers were killed by the offenders' rifle.
- Two peace officers were killed by the offenders' unspecified firearm.

Peace Officers Killed in the Line of Duty, 2009

Race/Ethnic Group of Officer
By Gender of Officer

Race/ethnic group	Total	Gender	
		Male	Female
Total.....	4	4	0
White.....	1	1	0
Black.....	1	1	0
Other.....	2	2	0

In 2009:

- All four peace officers killed in the line of duty were male; one was white, one was black, and two were of race/ethnicities categorized as "other."

**Peace Officers Killed
in the Line of Duty, 2000–2009**

Year	Number of officers killed
Total.....	43
2009.....	4
2008.....	3
2007.....	4
2006.....	5
2005.....	5
2004.....	4
2003.....	6
2002.....	4
2001.....	6
2000.....	2

*Note: Additional information can be found in
Tables 37 and 38.*

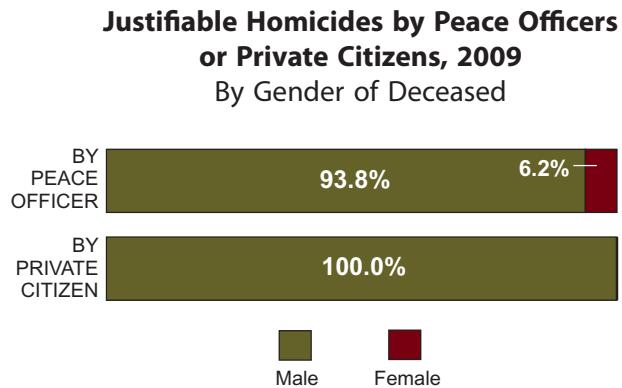

From 2000 to 2009:

- 43 peace officers were killed in the line of duty. During this time period, the largest number of deaths occurred in 2001 and 2003 (6 each), and the fewest number of deaths occurred in 2000 (2).

Homicide in California

***Justifiable
Homicides***

Justifiable Homicides

Source: Table 39.

A justifiable homicide is defined by the Uniform Crime Reporting (UCR) Program as the killing of a felon by a private citizen or peace officer during the commission of a felony. Justifiable homicides are sometimes referred to as excusable or noncriminal homicides.

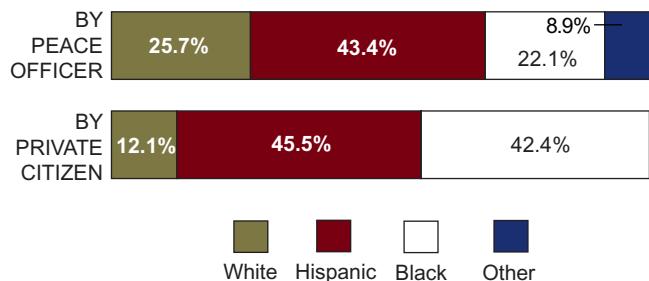

In 2009, when justifiable homicides were examined by gender, it was found that:

- 93.8 percent (106) of felons killed by peace officers were male, and 6.2 percent (7) were female.
- All felons killed by private citizens (133) were male.

Personal Characteristics of the Deceased

Justifiable Homicides by Peace Officers or Private Citizens, 2009

By Race/Ethnic Group of Deceased

Source: Table 39.

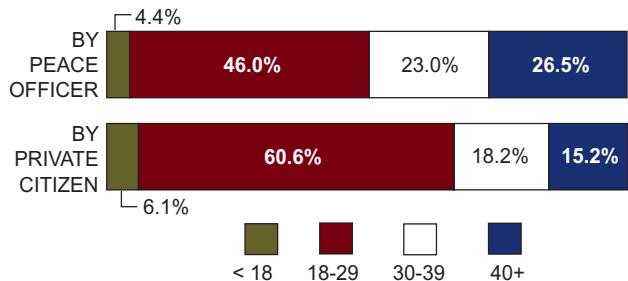

Note: Percentages may not add to 100.0 because of rounding.

In 2009:

- A greater proportion of felons killed by peace officers were Hispanic than were white or black (43.4 vs. 25.7 and 22.1 percent, respectively).
- The felons killed by private citizens were less likely to be white than Hispanic or black (12.1 vs. 45.5 and 42.4 percent, respectively).

Justifiable Homicides by Peace Officers or Private Citizens, 2009

By Age of Deceased

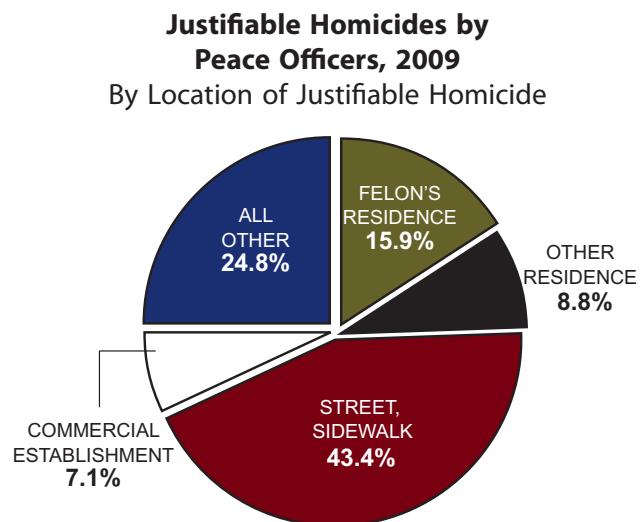

In 2009:

- A greater proportion of felons killed by peace officers were aged 18–29 (46.0 percent) than were any other age group.
- The largest proportion of felons killed by private citizens were aged 18–29 (60.6 percent).

Source: Table 39.

Note: Percentages do not add to 100.0 because of rounding.

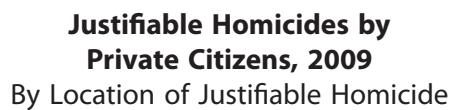

Elements of the Justifiable Homicide Location

In 2009, when justifiable homicides were examined by location, it was found that:

- The largest proportion of felons killed by peace officers were killed on a street or sidewalk (43.4 percent).
- The largest proportion of felons killed by private citizens were killed in a residence other than their own (30.3 percent).

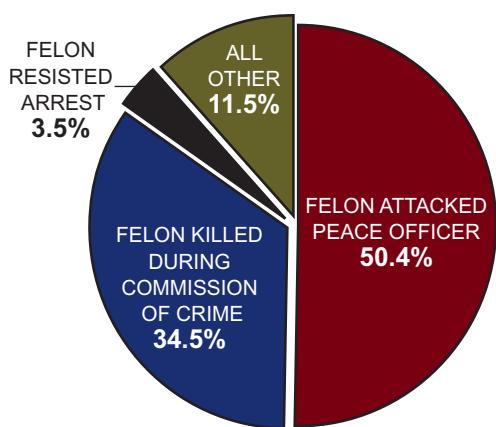

Source: Table 40.

Source: Table 40.

Contributing Circumstance

Justifiable Homicides by Peace Officers, 2009
By Contributing Circumstance

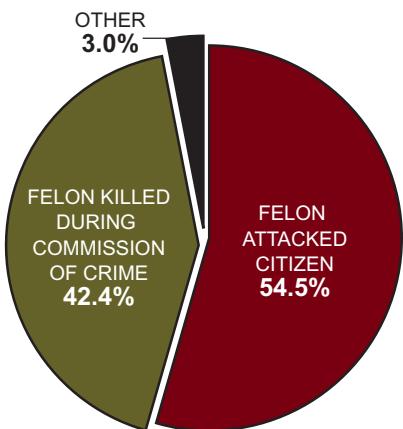

In 2009, when justifiable homicides were examined by known contributing circumstance, it was found that:

- Most felons killed by peace officers were killed while attacking a peace officer (50.4 percent).
- Most felons killed by private citizens were killed while attacking a citizen (54.5 percent).

Source: Table 41.

Note: Percentages do not add to 100.0 because of rounding.

Justifiable Homicides by Private Citizens, 2009
By Contributing Circumstance

Rate.....											

Notes: Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance.
Rates are calculated using the population for each subgroup shown; therefore, they will not add to the rate calculated for the total population.

Population breakdowns by gender will not add to total because of variations in population source data.

The "percent of population" category for male and female was calculated using the sum of the male and female populations.

¹ Beginning in 2004, population estimates are based on the 2000 Census. Previous population estimates are based on revisions of the 1990 Census. Readers are advised to exercise care in interpreting changes in percent and rate between decennial census samples.

² The "male" category includes homicide victims whose gender could not be determined: 2000 includes one, and 2002 includes one.

Rate.....	-	-	-	-	-	-	-	-	-	-		

Notes: Percentages may not add to 100.0 because of rounding.

Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance.

Rates are calculated using the population for each subgroup shown; therefore, they will not add to the rate calculated for the total population.

Population breakdowns by race/ethnic group will not add to total because of variations in population source data.

Dash indicates that the percent of population and rate for the "unknown" category cannot be calculated because there are no unknown race/ethnic group population data.

Dash may also indicate that a percent change is not calculated when the base number is less than 50.

The "percent of population" category for race/ethnic group was calculated using the sum of the race/ethnic group populations. Beginning in 2004, population estimates are based on revisions of the 1990 Census. Previous population estimates are based on the new race/ethnic group effects other population estimates is not known.

¹Beginning in 2004, the "other" category includes the new race/ethnic group of "multi-racial." The extent to which this new race/ethnic group effects other population estimates is not known.²Beginning in 2004, the "other" category includes the new race/ethnic group of "multi-racial."

Percent of population.....	-	-	-	-	-	-	-	-	-	-		
Rate.....	-	-	-	-	-	-	-	-	-	-		

Notes: Percentages may not add to 100.0 because of rounding.

Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance.

Rates are calculated using the population for each subgroup shown; therefore, they will not add to the rate calculated for the total population.

Population breakdowns by age will not add to total because of variations in population source data.

Dash indicates that the percent of population and rate for the "unknown" category cannot be calculated because there are no unknown age population data.

The "percent of population" category for age group was calculated using the sum of the age populations.

¹ Beginning in 2004, population estimates are based on revisions of the 1990 Census. Previous population estimates are based on decennial census samples. Readers are advised to exercise care in interpreting changes in percent and rate between decennial census samples.

HOMICIDE CRIMES, 2000-2009
By Gender of Victim

Year(s)	Total		Male ¹		Female	
	Number	Percent	Number	Percent	Number	Percent
2009.....	1,970	100.0	1,619	82.2	351	17.8
2008.....	2,143	100.0	1,766	82.4	377	17.6
2007.....	2,258	100.0	1,865	82.6	393	17.4
2006.....	2,483	100.0	2,070	83.4	413	16.6
2005.....	2,503	100.0	2,101	83.9	402	16.1
2004.....	2,394	100.0	1,992	83.2	402	16.8
2003.....	2,402	100.0	1,972	82.1	430	17.9
2002.....	2,392	100.0	1,938	81.0	454	19.0
2001.....	2,201	100.0	1,756	79.8	445	20.2
2000.....	2,074	100.0	1,666	80.3	408	19.7

¹ The "male" category includes homicide victims whose gender could not be determined:
2000 includes two, 2001 includes one, and 2002 includes one.

Stranger.....	29.9	24.9	34.6	30.3	25.8	-

Notes: Percentages may not add to subtotals or 100.0 because of rounding.

Dash indicates that percent distributions are not calculated when the base number is less than 50.

¹ Includes ex-husband, ex-wife, employer, employee, gang member, etc.

² Includes "common-law" marriage partner.

³ Includes stepmother, stepfather, stepdaughter, and stepson.

Notes: Dash indicates that a rate is not computed when a county's population is less than 100,000 in a given year.
Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance.
Rates are calculated using the population for each county shown; therefore, they will not add to the rate calculated for the state.

Saturday.....	18.5	19.4	20.8	18.7	14.2	-
Sunday.....	17.8	13.2	19.1	21.8	15.0	-
		Average daily number of incidents ¹				
Weekday.....	4.8	0.6	1.9	0.8	1.4	0.0
Weekend.....	6.9	0.8	3.2	1.4	1.5	0.0

Notes: Percentages may not add to subtotals or 100.0 because of rounding.

Dash

indicates that percent distributions are not calculated when the base number is less than 50.

Average daily number of incidents may not add to totals because of rounding.

¹ There were 365 days in 2009; 261 weekdays and 104 weekend days. The average daily number of incidents for weekdays was calculated by dividing weekday totals by 261. The average daily number of incidents for weekends was calculated by dividing weekend totals by 104.

Dash indicates that percent distributions are not calculated when the base number is less than 50.

¹ Includes domestic violence.

² Includes ex-husband, ex-wife, employer, employee, gang member, etc.

³ Includes "common-law" marriage partner.

⁴ Includes stepmother, stepfather, stepdaughter, and stepson.

Table 28
HOMICIDE CRIMES CLEARED, 2000-2009
 Number Reported, Number Cleared, and Clearance Rate

Year(s)	Number of homicides reported	Number of homicides cleared	Clearance rate ¹
2009.....	1,970	1,248	63.4
2008.....	2,143	1,227	57.3
2007.....	2,258	1,208	53.5
2006.....	2,483	1,292	52.0
2005.....	2,503	1,249	49.9
2004.....	2,394	1,314	54.9
2003.....	2,402	1,323	55.1
2002.....	2,392	1,362	56.9
2001.....	2,201	1,091	49.6
2000.....	2,074	1,082	52.2

¹ A clearance rate is the percentage of crimes (homicides) reported that have been cleared. It is calculated by dividing the number of homicides cleared by the number of homicides reported. The result is multiplied by 100. See Appendix III - Glossary for a detailed explanation of clearances.

1979.....	20	25
1978.....	7	7

Source: Offender-Based Transaction Statistics, California Department of Justice (initial sentences) and California Appellate Project (total persons under sentence of death).

¹ Total persons under sentence of death on December 31 of each year.

Persons with multiple California death sentences are counted once.

² The increase in the total number of persons under sentence of death from year-to-year will *not* equal the number of initial sentences reported each year. This is because, in addition to initial sentences, persons may be resentenced to death, no longer under sentence of death because of execution or death by other causes, removed pending retrial, resentenced to a penalty less than death, or freed.

Table 36
PERSONS SENTENCED TO DEATH, 2009
 Sentencing County by Gender, Race/Ethnic Group, and Age

Sentencing county	Total	Gender		Race/ethnic group			Age at arrest						
		Male	Female	White	Hispanic	Black	Other	Under 20	20-24	25-29	30-34	35-39	40 and over
Total.....	29	28	1	9	9	11	0	1	6	7	2	7	6
Contra Costa.....	2	2	0	2	0	0	0	0	0	0	0	1	1

Source: Population estimates were provided by the Demographic Research Unit,
California Department of Finance.

¹ Total population at risk, 10-69 years of age.

² Adult population at risk, 18-69 years of age.

³ Juvenile population at risk, 10-17 years of age.

Homicide in California

Appendices

Appendix I

Data Characteristics and Known Limitations

HOMICIDE CRIMES

Homicide data are obtained from the Supplementary Homicide Report (SHR). The SHR is submitted monthly by local California law enforcement agencies as part of the national Uniform Crime Reporting (UCR) system.

The number of reported homicide crimes represents known victims.

Per UCR definition, suicides, fetal deaths, traffic fatalities, accidental deaths, assaults to murder, and attempts to murder are not classified as criminal homicide and are not included in this report.

The findings of a court, coroner's inquest, etc., do not affect classifying or scoring of the SHR homicide counts.

Detailed data regarding the criminal homicide category can only be as comprehensive as the input provided by the individual contributing agency.

Offender data (race/ethnicity, age, and gender) are based on law enforcement identification of the offender as a suspect. No follow-up is made to determine if a conviction was obtained.

Weapon – Reporting agencies report a complete description of the weapon and the ways in which the weapon was used. For example, if a bottle was used in the commission of a murder, the agency will state whether the person was killed by beating, cutting, or stabbing.

Relationship – The relationship reported is that of the victim to the offender. For example, if a wife is killed by her husband the reported relationship is wife.

Circumstances – Statements of circumstances must be based on information known to law enforcement, not decisions of a grand jury, coroner's inquest, or other agency outside law enforcement. The reporting agency provides a brief statement as to the circumstances or precipitating events leading to the victim's death. If the killing occurred in conjunction with the commission of another felony such as a robbery or rape, the agency identifies the specific offense involved.

ARRESTS

Monthly Arrest and Citation Register (MACR)

Arrest data from the MACR reporting system are designed to collect data on the number of persons arrested, not the number of charges lodged.

If a person is arrested for multiple offenses, MACR selects only the most serious offense, based on the severity of possible punishment.

The subjectivity of the classification and labeling process must be considered in the analysis of race/ethnic group data.

Data Characteristics and Known Limitations (continued)

ADULT FELONY ARREST DISPOSITIONS **Offender-Based Transaction Statistics (OBTS)**

To provide the most valid data possible, the disposition section of this report has been removed. In 2001, Criminal Justice Statistics Center staff determined that a number of homicide arrests submitted to the DOJ's Automated Criminal History System (from which adult felony arrest disposition data are extracted) between 2000 and 2001 should have been submitted as arrests for attempted homicide. As a result, more homicide arrests were counted during these years than occurred. This caused a lower percentage of homicide convictions and a higher percentage of assault convictions. (Both percentages were based on the number of adult felony arrests for homicide for which dispositions were received.) It should be noted that the DOJ has addressed this issue and that the exclusion of disposition data does not affect crime, arrest, death penalty, or other data included in this or past reports. When homicide disposition data are once again determined to be accurate, they will be included in this publication.

POPULATION

Since 2004, the population estimates used to calculate rates have been based on revisions of the 2000 Census. Prior to 2003, these population estimates were based on revisions of the 1990 Census. Readers are advised to exercise care in interpreting changes in percent and rate between decennial census samples. In addition, the "other" population category now includes the Department of Finance's race/ethnic group of "multi-racial."

Appendix II

Computational Formulas

ARREST RATE – An arrest rate describes the number of arrests made by law enforcement agencies per 100,000 total population or per 100,000 population considered to be at risk for arrest (10–69 years of age). The at-risk population can be further distinguished by adults at risk (aged 18–69 years) and juveniles at risk (aged 10–17 years). Regardless of the population used, both rates are calculated in the same manner. An arrest rate is calculated by dividing the number of reported arrests by the respective population; the result is multiplied by 100,000. For example, in 2009 there were 1,804 homicide arrests. The total population was 38,487,889 and the total population at risk (10–69 years of age) was 30,250,950. This equals a homicide arrest rate of 4.7 per 100,000 total population and 6.0 per 100,000 total population at risk.

$$\frac{1,804}{38,487,889} = 0.000046872 \times 100,000 = 4.7 \text{ per 100,000 total population}$$

$$\frac{1,804}{30,250,950} = 0.00005964 \times 100,000 = 6.0 \text{ per 100,000 total population at risk}$$

CLEARANCE RATE – A clearance rate is the percentage of crimes reported that have been cleared. A clearance rate is calculated by dividing the number of crimes cleared by the number of crimes reported; the result is multiplied by 100. For example, in 2009 there were 1,248 homicides cleared and 1,970 homicides reported. This equals a homicide clearance rate of 63.4 percent.

$$\frac{1,248}{1,970} = 0.633502538 \times 100 = 63.4 \text{ percent}$$

CRIME RATE – A crime rate describes the number of crimes reported to law enforcement agencies per 100,000 total population. A crime rate is calculated by dividing the number of reported crimes by the total population; the result is multiplied by 100,000. For example, in 2009 there were 1,970 homicides in California and the population was 38,487,889. This equals a homicide crime rate of 5.1 per 100,000 general population.

$$\frac{1,970}{38,487,889} = 0.0000511849 \times 100,000 = 5.1 \text{ per 100,000 population}$$

PERCENT CHANGE – A percent change describes a change in number or rate from one year to another. A percent change is calculated by subtracting base-year data from current-year data; the result is divided by base-year data and multiplied by 100. For example, in 2009 the homicide crime rate was 5.1. In 2000 the homicide crime rate was 6.0. The percent change in rate from 2000 to 2009 is a 15.0 percent decrease.

$$\frac{5.1 - 6.0}{6.0} = -0.15 \times 100 = -15.0 \text{ percent}$$

Notes: When a series of rates are calculated using different populations, the rate calculated for the total will not be equal to the sum of the rates calculated for each subtotal. For example, the total arrest rate (calculated using the total at-risk population) will not equal the sum of the adult arrest rate (calculated using the adult at-risk population) and the juvenile arrest rate (calculated using the juvenile at-risk population).

Calculating rates for counties of less than 100,000 will generate an inflated rate when compared to counties with populations of 100,000 or more; therefore, rates are not calculated for counties with populations of less than 100,000.

Appendix III

Glossary

ADULT: a person 18 years of age or older.

AGGRAVATED ASSAULT: an unlawful attack or attempted attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm (UCR definition).

APPEAL: a petition initiated by a defendant for a rehearing in an appellate court regarding a previous sentence or motion.

ARREST: ". . . taking a person into custody, in a case and in the manner authorized by law. An arrest may be made by a peace officer or by a private person" (834 PC).

ARREST RATE: the number of arrests per 100,000 population or population at risk. See Appendix II – Computational Formulas for further explanation.

CALIFORNIA DEPARTMENT OF CORRECTIONS AND REHABILITATION (CDCR): the state agency that operates all state adult prisons and juvenile facilities, oversees a variety of community correctional facilities and other important correctional facility responsibilities, and supervises all adult and juvenile parolees during their reentry into society.

CLEARANCE: an offense is "cleared by arrest" or solved, for crime reporting purposes, when at least one person is arrested, charged with the commission of an offense, and turned over to a court for prosecution. Although no physical arrest is made, a clearance by arrest can be claimed when an offender is a person under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities. An

offense can also be "cleared exceptionally" for crime reporting purposes when an investigation has definitely established the identity of an offender; there is enough information to support an arrest; and the exact location of an offender is known but, for some reason, law enforcement cannot take the offender into custody.

CLEARANCE RATE: the percentage of crimes reported that have been cleared.

CONVICTION: a judgment, based either on the verdict of a jury or a judicial officer or on the guilty plea of the defendant, that the defendant is guilty.

COURT: an agency of the judicial branch of government, authorized or established by statute or constitution, having one or more judicial officers on its staff. A court has the authority to decide upon controversies in law and disputed matters of fact brought before it. Because of court consolidation we no longer distinguish between lower court and superior court.

CRIME: ". . . an act committed or omitted in violation of a law forbidding or commanding it. . ." (15 PC).

CRIME RATE: the number of reported crimes per 100,000 general population. See Appendix II – Computational Formulas for further explanation.

FELON: one who has committed a felony.

FELONY: a crime that is punishable by death or by imprisonment in a state prison (17 & 18 PC).

Glossary (*continued*)

FORCIBLE RAPE: the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are included (UCR definition).

HOMICIDE: the willful (nonnegligent) killing of one human being by another. Murder and nonnegligent manslaughter are included (UCR definition).

JUVENILE: a person under the age of 18.

MISDEMEANOR: a crime punishable by imprisonment in a county jail for up to one year.

MONTHLY ARREST AND CITATION REGISTER (MACR): a reporting system used to collect information on adult and juvenile arrests and citations by police and sheriffs' departments. This register contains data on arrest offenses, arrestee characteristics (age, gender, and race/ethnic group), and law enforcement dispositions.

OFFENDER-BASED TRANSACTION STATISTICS (OBTS): a system designed to collect statistical information on the various processes within the criminal justice system that occur between the point of the felony arrest of an adult and the point of final disposition.

OFFENSE: the charged offense is the crime for which the defendant was arrested or filed on by the district attorney. The convicted offense is the offense the defendant was convicted of or pled guilty to in court.

PENAL CODE (PC): the California Penal Code contains statutes that define criminal offenses and specify corresponding punishments. Criminal justice system mandates and procedures are also included.

POPULATION AT RISK: that portion of the total population who, because of like characteristics to the specific study group, are considered "at risk." For example, if one were studying juvenile arrestees, all persons between 10 and 17 years of age would constitute the at-risk population.

RATE: a comparison of a number of events to a population.

ROBBERY: the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by creating fear in the victim (UCR definition).

SENTENCE: the penalty imposed by a court upon a convicted person.

UNIFORM CRIME REPORTING (UCR): a federal reporting system that compiles crime data based on information submitted by law enforcement agencies throughout the nation. In California, the Department of Justice administers and forwards these law enforcement data to the federal program.

VIOLENT CRIMES: crimes committed against people. This category includes homicide, forcible rape, robbery, and aggravated assault.

Acknowledgments

The DOJ is mandated by state law to submit an annual *Homicide in California* report. The department extends its appreciation to all the law enforcement agencies that provided complete and timely data. This report would not have been possible without their cooperation.
