

OMAHA HIGH/LOW SPLIT

Type of Game

The game of Omaha High/Low Split is a poker game where the patrons play against each other for “the pot” of money. The game does not utilize a player-dealer position. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

The object of the game is for players to form a five-card poker hand that ranks higher or lower than the other player’s five-card poker hand. Each player must use two out of the four cards initially dealt to them at the beginning of the game, referred to as “hole” cards, and three out of the five cards dealt on the table throughout the course of the game, referred to as “community” cards or “board” cards to make their hand. When making a five-card low hand and a five-card high poker hand, a player is not required to use the same hole cards and/or community cards to complete each hand.

Description of the Deck and Number of Decks Used

The game shall be played using one standard 52-card deck and no joker. The 52-card deck shall be manually shuffled, cut, and dealt by the house dealer.

Card Values and Hand Rankings

Five-Card Low Hand Rankings - To make a qualifying five-card low hand, a player must have an 8 high or lower, meaning the two hole cards used from the player's hand and the three community cards used by the player cannot contain a card with a value of 9 or higher.

- Additionally, when determining if a player has a qualifying five-card low hand, straights and flushes do not disqualify the player's hand if all other requirements are met.
- However, if the player has a pair or higher in their low hand, the hand does not qualify.
- The lowest possible five-card poker hand is 5, 4, 3, 2, and ace; this is called a "Wheel".
- If multiple players have qualifying five-card low hands, the winning low hand is determined by comparing the highest card of each players' five-card hand, the lowest high card would be the winning hand.

For example: A hand of 7, 6, 4, 3, and ace is lower than an 8, 6, 4, 3, and 2.

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard poker table which shall accommodate up to ten seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits. Backline betting is not permitted.

Dealing Procedures and Round of Play

1. The game shall utilize a flat white disc/object with the words "dealer button" on it to visually designate which player is in the dealer position (in theory) for that hand.
 - a. The dealer button shall rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the "big blind" shall have the right of last action.
2. The game also utilizes two separate disc/objects, one with the words "small blind" and the other with the words "big blind" on them, to visually designate which player is in the "small blind" position and which player is in the "big blind" position.
 - a. The small blind and the big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards.
 - b. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - c. The small blind and big blind buttons shall rotate from player to player around the table clockwise after each round of play.

The game shall be played on a standard poker table which shall accommodate up to ten seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each round of play, as specified by the table limits. Backline wagering is not permitted.

Dealing Procedures and Round of Play

1. The game shall utilize a flat white disc/object with the words "dealer button" on it to visually designate which player is in the dealer position (in theory) for that hand.
 - a. The dealer button shall rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the "big blind" shall have the right of last action.
2. The game also utilizes two separate disc/objects, one with the words "small blind" and the other with the words "big blind" on them, to visually designate which player is in the "small blind" position and which player is in the "big blind" position.
 - a. The small blind and the big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards.
 - b. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - c. The small blind and big blind buttons shall rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, all players shall be dealt one card face-up, starting with the Player to the immediate left of the house dealer and continuing clockwise around the table.
 - a. The player with the highest ranked card shall receive the flat white disc with the words dealer button.
4. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall receive the small blind button and shall be required to place the small blind. Additionally, the player to the immediate left of the player who received the small blind button shall receive the big blind button and shall be required to place the big blind.
 - a. Both blinds are predetermined and mandatory for the players with the small blind and big blind buttons, and are used to initiate action.
 - b. Both blind wagers shall be placed in the designated wagering area, referred to as "the pot."
5. Once the blinds have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the player to the left of the dealer button, the player that received the small blind button, and continuing clockwise around the table until all players have two cards face-down.
 - a. These initial two cards are referred to as "hole cards."

Texas Hold'em

 - a. Place a wager that is equal to the amount of the big blind.
 - b. Place their two hole cards face-down into the center of the table, referred to as a "fold;" The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play;
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a "raise;"
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises;
 - e. The player in the big blind position may "check", meaning they do not wish to place an additional wager, or they may also raise, by placing an additional wager.
7. After all players have acted in turn and either called all wagers or folded their hand, the house dealer shall move all player wagers into the pot.
8. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as the "burn card."
9. The house dealer shall then take the next three cards from the top of the deck and place them face-up on the table simultaneously, which is referred to as "the flop."
 - a. These are community cards and are shared by all players.
10. Once the first three community cards have been placed face-up on the table, the second round of wagering will occur.
11. All active players that called all wagers and did not fold their hand, shall be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits;
 - b. Do not make a wager, referred to as a "check", with the option to call or raise a wager by another player;
 - c. "Call" a wager meaning to match the amount wagered by another player.
 - d. Fold their hand according to the rules and guidelines used in the previous round of play;
 - e. Raise the pot according to the rules and guidelines used in the previous round of play.

14. The house dealer shall then take one card from the top of the deck and place it face-up on the table so that there are now a total of four community cards face-up on the table.

 - b. This card shall also become a community card and is shared by all players.
15. Once the fourth community card has been placed face-up on the table, the third round of wagering will occur.

 - a. Place a wager according to the established table limits;

The following shall apply for determining which player wins the pot:

Pai Gow Poker Gold

2. Backline betting is permitted on all wagers. However, the backline bettor does not have input into how the two-card hand and the five-card hand are arranged.
3. A standard round of play begins when a player-dealer is designated. The player-dealer will place their wager in the betting circle in front of their seat. This wager will be used to pay the winners and will set the amount the player-dealer can collect from the losers. The house dealer will place a button in front of the player-dealer. The player-dealer will place the appropriate collection fee in front of their betting circle.
4. Before the start of each hand the player and the player-dealer place their wagers. Players also have the option of wagering on the Golden Bonus Bet.
5. The Casino will have the option of either using a shuffling machine or manually dealing the cards.
 - Shuffling Machine: When using a shuffler, the house dealer will have the player-dealer shake the dice cup containing three standard dice to determine who has first action and who will be delivered the first hand.
 - The sum of the dice indicates the seat the pile of cards will be distributed. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers.
 - If the numerical total of the dice are one, eight, or fifteen, the player-dealer shall receive the first set of cards and the player to the left of the player-dealer shall receive the "Action" button.
 - If the numerical total of the dice represents a seat/spot without any wagers placed in the betting position, the Action button will be placed at the first active seat/spot clockwise from the original seat/spot.
 - All positions will receive a 7-Card hand, hand by hand dealt from the shuffler.
 - All seven piles of cards will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed.
 - Manual Shuffle: When manually shuffling and dealing, the house dealer will complete the deal of seven piles of seven cards face down in front of the house dealer position.
 - When dealing the seven piles of seven cards, the house dealer will deal one card at a time in front of the house dealer position until there are seven cards, starting from left to right.
 - Once there are seven cards laid out, the house dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven cards.
 - The remaining four cards shall be placed in the discard pile.
 - Once the cards have been stacked, the player-dealer randomly selects which pile will be distributed to the first player who receives the "Action" button.
 - The house dealer identifies the hand by placing a button marked Action on this pile by pushing the button forward and turning the pile behind it side ways.
 - To determine the placement of the first pile of cards, the player-dealer shakes a dice cup containing three standard dice.
 - The sum of the dice indicates the seat the pile of cards will be distributed. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers.
 - If the numerical total of the dice represents a seat/spot without any wagers placed, the Action button will be placed at the first active seat/spot clockwise from the original seat/spot.
 - All positions will receive a 7-Card hand, one by one.

Pai Gow Poker Gold

6. Once the Action button position is determined, the house dealer shall distribute the seven piles of cards, starting with the pile that has the Action button and continuing clockwise around the table.
7. Once all the piles of cards have been distributed, the house dealer will collect the cards distributed to seats without a wager in the betting spots and place the cards in the discard pile.
8. Once the cards have been distributed, each player shall set their hands by arranging the seven cards into a two-card hand and is placed in front of the five-card hand, and a five-card hand which is placed behind the two-card hand. The five-card hand must rank higher than the two-card hand, according to the ranking of hands, as shown above.
 - Players do not have to set their hand the “House Way”, they are free to set the hand in any fashion they choose as long as it is not a foul hand. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player(s) will automatically lose their wager(s).
 - However, players may ask the house dealer to place their hand House Way according to the chart below. Once the player asks the house dealer for assistance, the hand must be set the House Way and cannot be changed nor re-arranged.
9. When all players' hands have been set, the house dealer exposes the player-dealer's hand, and sets it according to the House Way chart, as shown below.

How Winners are Determined and Paid

1. The Pai Gow Poker Gold game wager wins if the two-card hand and the five-card hand held by the player, ranks higher than the player-dealer's two-card hand and five-card hand. Winning Pai Gow Poker Gold game wagers are paid 1 to 1.
2. The Pai Gow Poker Gold game wager loses if the two-card hand and the five-card hand held by the player ranks lower than the player-dealer's two-card hand and five-card hand.
3. The Pai Gow Poker Gold game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
4. If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
5. Once the standard Pai Gow Poker Gold wagers are settled (win, lose, tie/push) the house dealer will determine if the player's hand qualifies for the Golden Bonus and/or the Envy Bonus.
6. The Golden Bonus Bet considers the best hand possible among the player's seven cards.
7. If the player's hand qualifies for payouts, the player is paid according to the posted pay table by the player-dealer. The house dealer leaves the Envy button, if applicable, next to the player's original wager and payouts. The house dealer will not pick up Envy buttons until all wagers are reconciled.
8. If the player's hand does not qualify for payouts, the player-dealer collects the Golden Bonus Bet. The house dealer leaves the Envy button, if applicable, next to the player's Pai Gow Poker Gold game wager and payouts. The house dealer will not pick up Envy buttons until all wagers are reconciled.
9. The player-dealer pays any Envy Bonuses at the end of the round as noted below:
 - If at least one player has a Four of a Kind or higher, all players with Envy buttons win (see pay table).
 - In the event more than one player has at least Four of a Kind, then all players with Envy buttons win multiple payouts.
 - A player cannot win an Envy Bonus for their own hand or for the player-dealer's hand.
10. The player-dealer collects all losing Golden Bonus Bets and pays all winning Golden Bonus Bets.
11. The cards are collected, shuffled, and a new round begins.

Pai Gow Poker Gold

6. A joker may be used as an ace, to complete any straight, to complete any flush, or to complete any straight flush, on the Golden Bonus Bet.
7. The Golden Bonus Bet remains in action regardless of whether the player's Pai Gow Poker Gold game wager wins, loses, or pushes.
8. The player-dealer shall pay all qualifying Golden Bonus Bets and shall collect all Golden Bonus Bets that did not qualify. Wagers are collected or paid, to the extent the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.
9. Qualifying Golden Bonus Bets shall be paid according to the table, as shown below.

Envy Bonus

A player who places a wager of at least \$5 on the Golden Bonus Bet shall receive an Envy button and may qualify for the Envy Bonus payout if another player who placed a Golden Bonus Bet receives a pre-determined and designated qualifying hand, as shown below. Players shall receive one Envy button for each Golden Bonus Bet in an amount equal to or greater than \$5.

1. Seated players as well as backline bettors are eligible to receive an Envy button.
2. The Envy Bonus takes into account the seven cards dealt as a player's hand.
3. In the event the first seven cards dealt to a player who has placed a Golden Bonus Bet is a pre-determined and designated qualifying hand, as shown below, all players with an Envy button shall win.
4. A player is not eligible to win an Envy Bonus for their own hand if it qualifies for an Envy Bonus payout.
5. If multiple players have made a seven-card qualifying Golden Bonus Bet and Envy Bonus hand, then all players with an Envy button shall win.
6. If multiple Envy Bonus hands are achieved, only the highest ranking hand is awarded the payout.

EXAMPLE: *One player achieves a Four of a Kind and another player achieves 5 aces. The 5 aces Envy Bonus is the only bonus payout.*

7. Players shall receive a fixed monetary payout based on the qualifying hand that another player has received and the pay table, as shown below.
8. Any other combination of the first seven cards dealt, other than the hands shown below, shall lose.
9. The Envy Bonus may win regardless of the outcome of the Pai Gow Poker Gold game wager.

Dealing Procedures and Round of Play

1. The cards will be shuffled before being placed into a shoe or random shuffling machine. The dealer will begin the game by burning a card.
2. The dealer will first start by asking the player starting from seat one if they would like to occupy the player-dealer position.
3. The dealer will ask for wagers.
4. Once the player-dealer position is filled, then at least one player must place a wager to start the game.
5. The action begins clockwise from the player-dealer position.
6. The dealer deals a total of two cards to the player face up and two cards to the dealer, the first card face up and the second card face down.
 - a. At this point the player will be offered the option to surrender unless the player-dealer's up card is an ace then the player will be offered the option to take insurance as well.
 - b. In the event the player-dealer is dealt a "natural," the game stops, there is no draw and the hands are compared. A natural beats all hands. The player and the player-dealer ties on all naturals.
 - i. The game will utilize a card reader in order for the dealer to check for a natural.
7. The players will have the opportunity to act on their hand.
 - a. After the draw, if the player totals 31 they will win their original wager provided the dealer is not dealt a natural.
 - b. The player loses on a hand with a value between 22 and 30.
 - c. The player wins if their hand total is closer to 31 without totaling a hand between 22 and 30. The player loses if the player-dealer is closer. If both the player and the player-dealer are dealt a hand of equal value then the wager is a push.
8. Once the dealer's hand is concluded the round is over.
9. The dealer will then compare the bets placed by the player who is occupying the house position to see if the player wins, loses, or ties and completes the payoffs. If the player wins the dealer will pay the player with monies from the player occupying the player-dealer position.

How Winners are Determined and Paid

- If a player's hand total is less than a natural 31 and the player-dealer's hand total is more than a natural 31, the player wins the hand. The player-dealer shall pay all winning Blackjack Elite game wagers.
