F. The Deal.

1. Cards are dealt from left to right starting at the first seat with a valid wager and proceeding in a clockwise direction.

21st Century Blackjack Rules

2. The player/dealer receives one card face-up and each seat with a valid wager receives two cards face-up.
3. When the player/dealer's first card (face-up) is a Joker there is no draw.

G. Player Options – Decision.

1. The seated player will make final decision in playing of hand. If playing on empty seat, first wager will make decision.

H. Player Options – Stand.

1. Players who want to stand must signal their intentions to the dealer with a hand signal. The accepted signal to stand is a wave of the hand above the table surface. A verbal declaration is not sufficient.
2. It is the player's responsibility to correctly signal his intentions. If the player makes no response to the dealer's prompt, and the player's total is 12 or more, the dealer can assume the player wishes to stand.
 - a) When the dealer points to a player's hand, and pauses, it will be assumed that the player has been given an opportunity to act, or at least to signify his intentions.
 - b) If the dealer then moves on to the next active hand, and action takes place, it is assumed that the previous player has accepted the action and has no more valid options.
3. Players must stand with any hand that contains a Joker.
4. Players have no more options on any hand that totals 22 or more.

I. Player Options – Hit.

1. Players who want to 'hit' a hand may do so by signaling to the dealer with a scratch on the table surface. A verbal declaration is not sufficient.
2. It is the player's responsibility to correctly signal his intentions. If the player's total is less than 11 and no signal is given, or the player does not respond to the dealer prompt, the dealer may automatically hit the hand.

3. Players may not double or split after taking a hit card, nor may they surrender any hand containing more than two cards.
4. Players may draw multiple hit cards.

J. Player Options – Double-Down.

1. Players may double their wagers on any two cards not containing a Joker.
2. The player who has paid a collection and has most money in action will make the decision of doubling. Other players with wagers in the same seat can double their wagers or allow the hand to be played as 'double for less,' but they cannot take more hit cards. Only one card will be dealt on a double-down bet.
3. No additional collection is charged on double-up wagers.
4. Players signal their intentions by placing a second wager behind the first wager. A verbal declaration followed by the placement of the second wager will be accepted as a double.
5. The dealer will announce 'Double-down,' and will deal one card placed face-up and at a horizontal position.
6. Players may double-down for less money than the original wager, but may not double-down for more money than the original wager.

K. Player Options – Splitting.

1. Players may split any two cards of equal rank other than Joker-Joker or Joker-Ace.
2. The player who has paid a collection and has most money in action will make the decision to split. If another player in the same hand does not want to split, his/her hand will be played as the first split hand. The player who did not split the first time will lose all options on the second split hand.
3. No additional collection is charged on split wagers.
4. Players signal their intentions by placing a second wager of equal amount beside the first wager. A verbal declaration followed by the placement of the second wager will be accepted as a split.

21st Century Blackjack Rules

5. Players may split hands to a maximum of three playable hands. In other words, they may split twice only.
6. Players may double-down on any split hands.
7. Players may surrender a split hand that contains no more than two cards.
8. In the case of splitting Aces, the player will receive one card only on each hand, dealt horizontally. After splitting aces surrender is not a valid option.

L. Player Options – Surrender.

1. Players may surrender any two-card hand and the dealer will return half the original wager.
2. Cards will remain face-up on the table until completion of the deal, with the surrendered amount of chips placed on top of the cards.
3. The signal for surrender is for the player to draw a line on the table or to push the bet forward with a slight push. A verbal announcement of surrender will be followed by the dealer's confirmation.
4. As mentioned previously, the player may surrender any two-card hand. It is therefore possible for a player to split a hand and surrender one or both hands after taking the first hit. (Split Aces are not eligible for surrender.)
5. If more than one player is betting a seat, one of the players may surrender while the other player continues to play out the hand.

M. Player/Dealer Options.

1. The player/dealer has no options. Hands of Soft 17 or less must be hit, and any totals of Hard 17 or greater will stand.
2. The player/dealer cannot add or remove chips from the bank after the first card is dealt, but may add or remove chips from the bank between dealing rounds.
3. If the player/dealer's first card is a Joker the hand is over and there are no draws.
4. If the player/dealer's hand is a natural all double-downs and splits have no action. Surrenders will play 'as is' and players will have already received half their original wagers.

N. Action Button.

1. The player/dealer's second card (hole card) will determine the beginning of the action and the placement of the action button, according to the following chart:

Player/Dealer's Hole Card	Relative Position of Action Button
Ace or 8	1 st Position from Bank
2 or 9	2 nd Position from Bank
3 or 10	3 rd Position from Bank
4 or Jack	4 th Position from Bank
5 or Queen	5 th Position from Bank
6 or King	6 th Position from Bank
7 or Joker	7 th Position from Bank

O. Player/Dealer Rules.

1. The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals.
2. The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered.
3. The player/dealer does not have to cover all bets. In the event that money does not cover, the action button will be used to determine which bets will be paid.
4. A seated player does not have to bet the hand before acting as player/dealer.
5. Only a seated player may act as player/dealer.
6. No player may act as player/dealer on an empty seat.
7. The player/dealer may not play any other hand during his deal.

P. Kum-Kum Banks.

1. Players may pool their resources in order to act as player/dealer. Two or more players may pool to form a kum-kum bank.
2. The Hustler Casino takes no responsibility in settling disputes between players involved in a kum-kum bank.

T. Errors – The Draw.

1. If a card is exposed before the player has acted, the exposed card plus 3 additional cards will be burned and placed in the discard rack. No exposed cards can be moved forward or backwards in any circumstances.
2. If a player is passed and not given an opportunity to act in turn, that player will have a chance to complete his draw last, providing the player/dealer has not already acted.
3. If a player is passed after the dealer has pointed or prompted, the hand will play out as a 'standing' hand.
4. If the draw is started in the wrong seat, and one card only is exposed, that card and three additional cards will be burned and action returned to the correct seat.
5. If the draw is started in the wrong seat, and more than one card has been exposed, the draw will continue around the table in order. The passed player will have an opportunity to act on his hand before the player/dealer receives cards.

6. If a player coerces the dealer to expose a card from the shoe, the player must accept the exposed card.
7. If cards run out prior to the completion of all hands, the entire round is declared a misdeal and players receive free collections. The entire shoe is to be reshuffled prior to the next round.

U. Supervisor Decisions.

1. The act of backing up cards can only be done by a supervisor.
2. Management reserves the right to make decisions which are in the best interest of the game, and under special circumstances a decision may be rendered that is contrary to the strict and technical interpretation of these rules.

PAI GOW POKER

Description

Management has the final word on who may play and the manner in which play is conducted. Discourteous behavior or abusive language will not be tolerated.

Management is not responsible for the conduct of any player, but will retain the right to refuse the use of the facility to any player.

The HUSTLER CASINO is not responsible for chips or cash left on the table.

Pai GOW poker is a simple game to play. It is played with a 53-card deck, which includes the joker. The joker can be used as an ace or as any card that completes a straight or flush.

The house dealer deals the cards into seven hands of seven cards. Six of the hands go to players and one hand goes to the player/dealer. The player/dealer shakes the dice cup, which contains three dice, and the total on the dice determines who receives the first set of cards and where the action begins. The player/dealer position is always 1, 8, and 15. Out of the seven cards each player receives, the player creates a two-card hand (sometimes called the front hand) and a five-card hand (sometimes called the back hand). The two-card hand must rank lower than the five-card hand. The goal of the game is to make two hands that are both higher than the two hands made by the player/dealer. Pai GOW poker uses the same ranking of hands as in other high poker games.

All bets are against the player/dealer. The player wins if both of his or her hands rank higher than those of the player/dealer. A tie (push)-occurs if one hand is higher and the other is lower; no money changes hands. The player/dealer wins if both of the player's hands are lower than the player/dealer's hands. The player/dealer wins all situations in which one player hand is identical to that of the player/dealer (copy) and the other player/dealer hand wins the player/dealer pushes in all situations in which one player hand is identical to that of the player/dealer (copy) and the other player/dealer hand loses.

The designated dealer button rotates, and any player may take a turn being the player/dealer for two consecutive hands.

The house dealer makes all payoffs, at even money, from the stack of the player/dealer.

PAI GOW POKER

Rules

1. All action proceeds in a clockwise direction starting from the action button.
2. You may not show your hand to or discuss your hand with, any other player at any time while the game-is in play.
3. The total count of the dice points after opening the dice cup determines which player receives the first hand, counting from the player/dealer as number 1 and proceeding clockwise. The player/dealer position is always 1, 8, and 15, no matter how many players are seated. Examples: If the dice points total 9, the player immediately to the left of the player/dealer receives the first hand. If the dice points total 15, the player/dealer receives the first hand.
4. The point total of the dice also determines the position of the action button, except when the player/dealer position is indicated; in those cases, the first player to the left (clockwise) of the player/dealer receives the action button.
5. The player/dealer's hand will not be opened until all other hands have been set. In the case in which the player/dealer's hand is opened before all hands are set, the house dealer will set the player's hand in the most logical manner.
6. A misdeal will be declared if:
 - A. The joker or an ace is boxed or exposed.
 - B. Two or more cards are boxed or exposed on the deal.
7. A boxed or exposed card on the deal will be replaced, after the deal is finished, with the first of the remaining four cards.

9. You are responsible for the final setting of your hands. The house dealer may assist in setting your hand or otherwise offer advice upon your request, but cannot be held responsible for the final decision.
10. Statements regarding the value of your hand are not binding. The cards read for themselves.
11. If you set your hands in such a way that the two-card hand ranks higher than the five-card hand, your hand is fouled and the wager is forfeited to the extent that money covers.
12. If you put three cards in one hand and four in the other, or one card in one hand and six in the other, your hand is fouled and the wager is forfeited to the extent that money covers.

13. The house dealer may set more than one player's hand on any one deal according to the logical way.
14. You may look at only one hand, regardless of the number of hands on which you have wagered. You can be the "active" player on only one circle (spot) and on only one hand, regardless of the number of hands on which you have wagered.
15. The player/dealer's hand is not set until the player/dealer has signified his or her final decision in an obvious manner to the house dealer.

17. A hand that is misread by the house will play at true value if it can be retrieved intact.
18. When the player/dealer asks the house dealer to help set the hand, the house dealer cannot allow the player/dealer to set the hand fouled. If the house dealer mistakenly allows a fouled hand to be played, management will set the hand in the "logical way" and play will continue. A player/dealer's hand can never be set fouled.
19. If the player/dealer hand is open a players with a wager loses (or thinks he/she loses), and pushes his wager on top of his/her cards (technically surrendering). If the player pushes the money on top of his cards, and that hand wins or pushes (or loses), Dealer should immediately call the floorperson - Floorperson will warn the player that any future occurrence will result in that hand losing automatically. 20. Main Floor: Player/dealer may not ask for and receive an additional shuffle whenever he/she wants one. The dealer is to shuffle the card according to HUSTLER CASINO procedure only.
High Limit Room. Player/dealer may ask for and receive an additional shuffle.
High Limit Room. It is required that a seated player bet 6(six) times per round.
21. Player/Dealer- The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

SUPER PAN 9

Description

Super Pan 9 is a fast-paced game that resembles baccarat. In the game, a dealing shoe is used to hold decks of cards that do not contain 7s, 8s, 9s, and 10s. The house dealer deals three cards to each player, including the player/dealer. Each player then has the opportunity to draw one additional card. The object of the game is for your cards to total as close to nine as possible. The goal is for your hand beat the player/dealer's hand.

In Super Pan 9, all picture cards have a value of zero. The value of the hand is the value of the "ones" column in the total of the hand. For example, a player receives 6, 4, 3 in the first three cards. This hand totals 13, but the hand has a value of three. The player draws a 5. The hand totals 18, but the value of the hand is now eight.

The player/dealer shakes the dice cup to determine the "action spot," that is, the position of the first hand that will be compared against that of the player/dealer and which player is dealt too first. The total count of the dice determines which seat is the action spot. The player/dealer's position is always 1, 9, and 17, regardless of how many players are seated.

The draw begins clockwise from the player/dealer, which makes the player/dealer the last player to draw. All hands play against the player/dealer's hand to the extent that money covers.

SUPER PAN 9

Rules

1. All action proceeds in a clockwise direction starting from the action button.
2. You may not show your hand to, or discuss your hand, with any other player at any time during play.
3. The total count of the dice points after opening the dice cup determines which player is dealt to first and has first action. The player/dealer's position is always 1, 9, and 17, no matter how many players are seated. Examples: If the dice points total 8, the player to the player/dealer's right will receive the first card and has first action.

On the draw, the first player to the player/dealer's left is offered the option of one additional card. The option continues until the player/dealer has the option of drawing the last card.

4. You may look at only one hand, regardless of the number of hands on which you have wagered.
5. A misdeal will be declared if:
 - a. It has been determined before the deal is complete that cards have gone to the wrong spot.
 - b. The player/dealer has the wrong number of cards.
 - c. A foreign card appears on the table.
6. All exposed cards on the deal play. On the draw, an exposed card will be replaced after the player/dealer has acted on his or her hand and before the players hands are read. (An exposed card is defined as one that lands face up on the table.)
7. A boxed card in the shoe is a non-existent card and is immediately replaced by the next card in the shoe.
8. If the house dealer deals a card off the table, the card is a dead card and the player receives the next card.
9. Statements regarding the value of your hand are not binding. The cards read for themselves.
10. Each player who wishes a fourth card must request a card in turn.
11. When the player/dealer's three-card hand totals 4 or less, the house dealer automatically draws a card for the player/dealer.

12. When the player/dealer's three-card hand totals 7, 8, or 9, the hand, automatically stands (plays as is).
13. When you request assistance on the play of a hand, the house dealer plays the hand according to HUSTLER CASINO Rules.
 - a. Draw on 5 or less, and
 - b. Stand on 6 or more.

After the player/dealer's hand has been opened and set, the a hand that has been set in the "logical way" is opened and checked. Any hand that has been played incorrectly by a house dealer will be reset by management.

14. Once the player/dealer's hand is open, no one else may act on his or her hand.
15. After the announcement "All hands set" has been made, you may not touch or alter your wager. Penalty: Possible forfeiture of that wager to the extent that money covers.
16. If you miss your opportunity to draw, the house dealer will back up the draw cards in order for you to receive the proper draw card, as long as the player/dealer's hand has not been opened. If you change to a hit from a no hit or vice versa, your hand will be played the logical way with the exception of 5 or 6, which will be played in the original position it was set.
17. If the player/dealer has not drawn a card, the house dealer must determine that the player/dealer has made a commitment to stand, announce the total, and proceed to settle the wagers.
18. A misdeal will not be declared after the draw has commenced, except when the player/dealer's hand does not have three cards.
19. If a card has been removed from the shoe at the request of an active player, it must play.
20. If a card has been removed from the shoe because of dealer error, the card will be placed directly under the shoe, and will be the next card in play.
20. A boxed card out of the shoe never plays.
21. All players are responsible for protecting their own hands. If you foul your hand through your carelessness with other cards, your wager is forfeited to the extent that money covers.
23. If you have an incorrect number of cards, you have a fouled hand. It is your responsibility to notify the house dealer of a problem before the draw commences.
24. A player/dealer partnership may consist of no more than three active players at the same

time.

25. Your hand must remain in view of the dealer at all times, or you risk a fouled hand and forfeiture of your wager.
26. Player/Dealer- The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

PAI GOW TILES

Description

The game of PAI GOW comes to the United States from Asia. The game's playing pieces are dominoes, commonly known as tiles. Each Player receives four tiles and makes two hands of two tiles each, a high hand and a secondhand. The house dealer shuffles the tiles and the player/dealer shakes the dice cup, which contains three dice. The total of the dice determines who receives the first set of tiles and where the action begins. The house dealer delivers four tiles to each spot or position (also known as circle) at the table. The player/dealer's hand is pushed toward the player's spot who is acting as the player/dealer. The hand is then "capped" and brought back in by the house dealer for safe keeping until all the players hands are set. The goal of the game is to make two hands out of the four tiles that are both higher than the two hands made by the player/dealer. The player wins if both his or her hands rank higher than those of the player/dealer. A tie (push) occurs if one hand is higher and the other is lower, in which case no money changes hands. The player/dealer wins if both of the player's hands are lower than the player/dealer's hands. The player/dealer wins all situations in which one player hand is identical to that of the player/dealer and the other player/dealer hand wins. The player/dealer pushes all situations in which one player hand is identical to that of the player/dealer and the other player/dealer hand loses.

Player/Dealer- The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

The house dealer makes all payoffs, at even money, from the stack of the player/dealer.

PAI GOW TILES

Rules

1. All action proceeds in a counterclockwise direction starting with the action button.
2. All tiles (dominoes) must be kept on the table. You may not show your tiles to, or discuss your tiles with, any other player at any time while the game is in play.
3. The house dealer shuffles the tiles thoroughly and stacks them in rows, with four tiles in each row.
4. All bets must be placed before the dice cup is opened.
5. The total count of the dice points after opening the dice cup determines which player receives the first four tiles. The count begins with the player/dealer being number 1 and proceeds counterclockwise. The player/dealer's position is always 1, 9, and 17, no matter how many players are playing. Examples: If the dice points total 8, the player immediately to the left of the player/dealer receives the first four tiles. If the dice points total 17, the player/dealer receives the first four tiles.
6. The point total of the dice also determines the position of the action button. An exception is when the player/dealer position is indicated. In this case, the player/dealer will receive the first four tiles, but the first player to the right (counterclockwise) of the player/dealer receives the action button.
7. The house dealer deals four tiles to every spot, regardless of whether a bet has been made at each spot. The house-dealer returns the tiles from all empty spots to an area in front of the house-dealer's tray.
8. You receive four tiles and set them in a way you like, in two hands, each consisting of two tiles, with the high hand in one stack and the low hand in another stack, both placed in front of your bet. You may, if you wish, leave all four tiles in one stack, in which case the house dealer sets them in "logical" way.
9. The player/dealer's tiles must be covered by a button until all the player's hands have been set. At that point, the player/dealer sets his or her hand.
8. When the player/dealer's hand is set, the house dealer opens each player's hand, starting from the action button and proceeding in a counterclockwise direction, calling out the hand and declaring whether the player won, lost, or pushed.
9. If a player loses, the house dealer brings the losing-bet forward in front of the betting circle, (stacking two stacks on top of the other two tiles.)
10. If a player pushes, the house dealer leaves the money alone but brings the tiles toward the dealer's tray as if no one has bet on that spot.

11. Player/Dealer- The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

Each player is dealt 13 cards, which the player arranges into three separate poker hands: one three-card hand in front and two five-card hands. Each hand must rank higher than the hand before it. Of the three hands, the back five-card hand must be the best hand.

	5-card hand: 10- 10- 10- 3- 4	Middle
	5-card hand: 5- 6- 7- 8- 9	Back

The goal of the game is for all three, of the player's hands to rank higher than the opponent's hands. 13-card uses the same ranking-of-hands as in other high poker games.

Each player's set of hands competes separately and one at a time against each other player's set of hands. One unit is wagered on each of the three poker hands. In each matchup, the front three-card hand is compared to the front three-card hand of the opponent, the middle five-card hand is compared to the middle five-card hand of the opponent, and the back five-card hand is compared to the back five-card hand of the opponent. Each winning hand receives one unit from the other player. Thus, in each set of three matchups, four possibilities exist (discounting ties):

- a. The challenger wins all three matchups, winning three units.
- b. The challenger wins two matchups and loses one, for a net win of one unit.
- c. The challenger wins one matchup and loses two, for a net loss of one unit.
- d. The challenger loses all three matchups, losing three units.

Ties in any matchup result in no win or loss of units.

In this context, a unit is the betting limit for the particular game in which you are playing.

In addition, when certain hard-to-achieve hands are made, they reverse a bonus from each opponent. These are:

Three of a kind in front:	3 additional units
Full house in the middle:	2 additional units
Four of a kind in the middle:	8 additional units
Straight flush in the middle:	10 additional units
Four of a kind in back:	4 additional units
Straight flush in back:	5 additional units

Since each hand competes separately against every other hand, when a bonus hand beats a bonus hand, the net effect may be that the bonuses cancel each other.

13-CARD CHINESE POKER

Rules

These are the ranking of hands in descending order of strength:

Royal flush

Straight flush

Four of a kind

Full house Flush

Straight

Three of-a kind

Two pair

One pair

No pair

The betting structure is a fixed limit. One unit is wagered on each of the three poker hands, with this exception: When certain hard-to-achieve hands are made, they may receive a bonus from each opponent. These are:

Three of a kind in front:	3 additional units
Full house in the middle:	2 additional units
Four of a kind in the middle:	8 additional units
Straight flush in the middle:	10 additional units
Four of a kind in back:	4 additional units
Straight flush in back	5 additional units

Since each hand competes separately against every other hand, when a bonus hand beats a bonus hand, the net effect may be that the bonuses cancel each other.

In this context, a unit is the betting limit for the particular game in which you are playing.

The game is played for table stakes.

A buy-in is equivalent to 25 times, the limit condition.

No short buy-ins are allowed; however, at anytime you may add to your stack between hands.

Playing behind is not allowed except in a cash exchange for chips.

To receive a hand, you must have at least three betting units for the particular game in which you are playing.

Action starts with-the player to the right of the dealer button and proceeds around the table counterclockwise, with each player competing separately and one at a time against each other player.

The following situations result in a fouled hand:

- a. The middle poker hand is not ranked higher than the three-card hand.
- b. The back hand is not ranked higher than the middle hand.
- c. Any hand has the wrong number of cards.

21st CENTURY BACCARAT

Baccarat is played with a shoe that contains eight standard 52 card decks plus eight Jokers. A Joker may have any numerical value from "0" to "9". The total number of cards in a shoe is 424.

HOW TO PLAY

1. All cards have their face value with the exception of the Joker that can be played as a wild card.
2. Face cards have the value of "0".
3. Value of each hand is determined by adding the numerical values of the cards of the hand.
4. The object of the game is to obtain a hand that the sum of its cards is "9" or closer to it.
5. Players will receive two cards starting with the action button.
6. Players have the option of drawing one card.
7. A hand that contains a Joker automatically has the value of "9".
8. A hand that contains two Jokers is a natural "9" and is better than all other non-natural "9's".
9. If the sum of cards in a hand is more than "10", the value of that hand is the sum of the hand minus multiple of "10, for example: $10+3+8=1$.
10. Players must position their hands in the proper "HIT" or "Stand" box in order to receive or not receive a draw card.
11. Each player has the option to be the player/dealer for two consecutive hands on any betting position.
12. The player/dealer must shake the dice to randomly pick a position for the start of the action.
13. Player/dealers holding a natural "9" will automatically win all hands to the extent that money covers with the exception of other natural "9's" held by players.
14. All players including the player/dealer must draw on "0's", "1's", "2's", "3's", and "4's".
15. All players including the player/dealer must stand on "7's", "8's", and "9's".
16. All players have the option to HIT or STAND on "5's" but must STAND on "6's".
17. Player/dealer has the option of HIT or STAND on "5's" and "6's".
18. Settlement of all hands start with the action button.

19. Hands that have higher numerical value than the player/dealer's hand will win and the hands that have lower numerical value than the player/dealer will lose.
20. All hands that have the same value as the player/dealer's (ties) are push hands and receive no action.
21. All pay-offs start with the action button.
22. All pay-offs extend to the amount that the player/dealer's wager covers.
23. Players who do not receive action on their wagers will receive courtesy time for their next hand.

GAME RULES:

1. Players are responsible for protection of their hands, correct number of the cards before the draw, and their chips, therefore, any discussion or comment regarding the content of any hands are not allowed.
2. Players are responsible for correct playing of their hands; prior to the opening of the player/dealer's hand, any attempt to change the hand from one box to another will cause that hand to be played by the House floor personnel according to the House Way (except option hand).
3. At the request of a player, the House Dealer may play a hand (except the player/dealer's hand) according to the following house way: A) Draw on "4" and under. B) Stand on "5" and above.
4. In case of inadvertent misplay of a "House Way" hand, the draw cards will be readjusted to their correct playing position.
5. In case of inadvertent misplay of a hand by the player, the draw cards may not be readjusted, that player's hand will automatically lose to the extent that money covers and all other hands will play as is. Intentional misplaying of hands will not be tolerated.
6. A misdeal is declared when:
 - a) The deal is out of position and two or more hands are looked at.
 - b) The deal is out of position and the player/dealer's hand is looked at.
 - c) Two or more players receive incorrect number of cards and the cards are not retrievable.
 - d) The player/dealer doesn't have correct number of cards.
7. A misdeal is not declared when the pay off is commenced.
8. Seated players may not prohibit anyone from backline wagering.
9. Player/Dealer- The player/dealer position rotates in a systematic and continuous way so

the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

HOUSE RULES

1. Time collections are taken in advance.
2. Players must wager at least the minimum bet of the table limit.
3. All cash must be changed to chips.
4. "Kum-Kum" bets are collected and paid as one bet. The "House" will not be responsible for disputes that may arise from those bets.
5. Players removing their wagers prior to completion of the payoff may lose the maximum bet or win the minimum bet amount.
6. All cards must stay on the plane of the table.
7. Attempts to switch, pass, or hold out cards will cause the player's hand to be foul and forfeiture of that wager to the extent that money covers. Players found guilty of such actions will be barred and may be subject to prosecution.
8. Players in violation of the game or the House rules must accept consequences and decisions rendered by the floor Supervisors without exception.
9. The floor personnel's decision is absolutely final.
10. Player/Dealer- The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

OMAHA

Omaha is similar to Hold'em, except each player is dealt four downcards instead of two. In order to make a hand, a player must use precisely two holecards with any combination of exactly three boardcards. The betting is the same as in Hold'em.

Omaha is often played high-low split, 8-or-better. You may use any combination of two holecards and three boardcards for your high hand and another (or the same) combination of two holecards and three boardcards for your low hand.

Rules of Omaha

1. You must use exactly two of the four holecards in your hand and three cards on the board to make a valid hand.
2. All the rules of Hold'em apply to Omaha except the rule on playing the board, which is not possible in Omaha.
3. All the rules governing "kill pots" are listed in the section on kill pots.

OMAHA HIGH-LOW SPLIT (8-or-better)

Rules of Omaha High-Low Split (8-or-Better)

1. All the rules of Omaha apply to Omaha high-low split (8-or-better).
2. A qualifier of 8-or-better for low is required for all high-low split games, unless a specific posting to the contrary is displayed.
3. If there is no low hand, the high hand wins the entire pot.
4. You can use one combination to make a low hand, as long as each hand uses exactly two holecards with three boardcards.
5. All other Hold'em rules apply.

PINEAPPLE

Rules for Pineapple

Pineapple is similar to Hold'em, except each player is dealt three downcards instead of two, and one of the three downcards must be discarded after the initial round of betting but before the first three community cards (the Flop) are turned up. If a player fails to discard a card before the Flop, then that player's hand is dead. All other Hold'em rules apply.

SEVEN-CARD STUD

Seven-card stud is played with two downcards and one upcard dealt before the first betting round, followed by three more upcards (with a betting round after each card). After the last downcard is dealt, there is a final round of betting. The best five-card poker hand wins the pot. In all fixed-limit games, the smaller bet is wagered on the first two betting rounds, and the larger bet is wagered after the betting rounds on the fifth, sixth, and seventh cards. If there is an open pair on the fourth card, any player has the option of making the smaller or larger bet.

Rules of Seven-card Stud

1. The first round of betting is initiated with a forced bet by the lowest value upcard. A tie is broken by suit with the lowest suit being forced to bet. On subsequent betting rounds, the high hand on board initiates the action. Ties are broken by position, with the player who received cards first acting first.
2. The player with the forced bet has the option of opening for a full bet.
3. Completing an opening forced bet does not count as a raise, but merely as a completion of the bet. For example, in \$15-\$30 stud, the low card opens for \$5. The next player to act brings the bet to \$15 (completion of the bet). Three raises are then allowed.
4. In all fixed-limit games, when an open pair is showing on fourth street (second upcard), any player has the option of betting either the lower or the upper limit. For example, in a \$5-\$10 game, if you have a pair showing and you are the high hand, you may bet either \$5 or \$10. If you bet \$5, any succeeding player has the option to call \$5, raise \$5, or raise \$10. If a \$10 raise is made, then all other raises must be in increments of \$10. If the player who makes the open pair on fourth street checks, then all other players still have the same options.
5. In all games, the dealer announces the low card, the high hand, all raises, and all pairs. In limits of 10- 20 and higher, dealers do not announce possible straights or flushes.
6. If your first or second holecard is accidentally turned up by the dealer, then your third card will be dealt down. If both holecards are dealt up, you have a dead hand and receive your ante back. If your hand would have been the low card, as a result of the first card dealt faceup, action will start with the first hand to your left. That player may either fold, open for the amount of the forced bet, or open for a full bet.
7. If you are not present at the table when it is your turn to act on your hand, you forfeit your ante and your forced bet, if any. If you have not returned to the table in time to act on your hand, the hand will be killed in turn.

8. If you fold a hand after making a forced bet or fold when there is no wager, your seat will continue to receive cards until a bet is made.
9. If you are all in for the ante and you have the lowest card, the player to your left may come in for the forced bet, the maximum bet, or fold the hand.
10. If the wrong person is designated as low and that person bets, the action will be corrected to the proper lowcard, if at all possible. The true lowcard must bet, and the improperly designated lowcard may take back the incorrectly forced wager.
11. If the dealer burns two cards for one round or fails to burn a card, the cards will be corrected, if at all possible, to their proper positions. If this should happen on a final downcard and the cards intermingle with a player's holecards or a player looks at the card, the player must accept the card.
12. If a dealer burns and deals one or more cards before a round of betting has been completed, the card(s) must be eliminated from play, along with an additional card for each remaining player still active in the hand. After that round of betting has concluded, the dealer reburns, and play resumes. (The removed cards are held off to the side in the event the dealer runs out of cards). If the prematurely dealt card is the final downcard and has been looked at or intermingled with the player's other holecards, the player must keep the card. If there is further betting on sixth street, a player who has seven cards may not raise.
13. If there are not enough cards left in the deck for all players, the dealer will deal all the cards except the last card, which is mixed with the burn cards and any cards removed from the deck as in the previous rule. The dealer then scrambles and cuts these cards, burns again, and delivers the remaining downcards, using the last card if necessary. If there are not as many cards as players remaining without a card, the dealer does not burn, so that each player can receive a fresh card. If the dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a common card will be used. The dealer will burn a card and turn one card faceup in the center of the table. This card plays in everyone's hand. The player who is now high using the community card initiates the action for the last round.
14. If you pick up your upcards without calling a bet when facing a wager, and by doing so cause someone to act behind you (even in a heads-up situation), your hand is dead. This does not apply in a check-check situation or a bet-and-call situation.
15. You must have seven cards to win at the showdown.
16. A card dealt off the table must play and it is treated as an exposed card.

17. If the dealer turns the last card faceup to any player, the following rules apply:

A. If there are more than two players, all remaining players receive their last card facedown. Prior to action for the round of betting, a player whose last card is exposed will have the option of participating in the wagering or being declared all in.

B. If there are only two players and the first player's downcard is dealt faceup, the second player's final downcard will also be dealt faceup, and the betting proceeds as normal. In the event the first player's final card is dealt facedown and the opponent's final card is dealt faceup, the player with the exposed card will have the option of declaring all in. This decision must be made prior to any action on that round.

In any of the above situations, the player who is now high on the board using all the upcards will start the action.

18. If you call a bet even though you are beaten by an opponent's upcards, you are not entitled to a refund.

RAZZ

The lowest hand wins the pot. The format is similar to seven-card stud high, except the high card (aces are low) is required to make the forced bet on the first round, and the low hand acts first on all subsequent rounds. Straights and flushes have no ranking, so the best possible hand is 5-4-3-2-A (a wheel). An open pair does not affect the betting limit.

Rules of Razz

1. The lowest hand wins the pot. Aces are low, and straights and flushes have no effect on the low value of a hand. The best possible hand is 5-4-3-2-A.
2. The highest card starts the action with a forced bet. If the high card is tied, the forced bet is determined by suit from the highest to the lowest; that is, spades, hearts, diamonds, clubs. The low hand acts first on all subsequent rounds. If the low hand is tied, the first player clockwise from the dealer starts the action.
3. Fixed-limit games use the lower limit on third and fourth streets and the upper limit on subsequent streets. An open pair does not affect the limit.
4. Dealers announce all pairs, the first time they occur, except pairs of face cards, which are never announced.
5. All seven-card stud rules apply in razz except as otherwise noted.

SEVEN-CARD STUD HIGH-LOW SPLIT (8-or-Better)

Seven card stud high-low split (8-or-better) is a stud format game which is played both high and low. A qualifier of 8-or-better for low applies to all high-low split games, unless a specific posting to the contrary is displayed. The low card initiates the action on the first round, with an ace counting as a high card for this purpose. On subsequent rounds, the high hand initiates the action. If the high hand is tied, the first player clockwise from the dealer acts first. Fixed-limit games use the lower limit on third and fourth streets and the upper limit on subsequent rounds, and an open pair does not affect the limit. Aces may be used for high or low. Straights and flushes do not effect the low value of a hand. A player may use any five cards to make the best high hand, and the same or any other grouping of five cards to make the best low hand.

Rules of Seven-Card Stud High-Low Split (8-or-Better)

1. A qualifier of 8-or-better for low applies to all high-low split games, unless a specific posting to the contrary is displayed.
2. A player may use any five cards to make the best high hand and any five cards, whether the same as the high hand or not, to make the best low hand.
3. The low card by suit initiates the action on the first round, with an ace counting as a high card for this purpose.
4. Aces may be used for high or low, and straights and flushes do not effect the value of a low hand.
5. Fixed-limit games use the lower limit on third and fourth streets and the upper limit on subsequent rounds. An open pair does not affect the limit.
6. *Splitting of pots is only determined by the cards and not by agreement among players.*
7. When there is an odd chip in a pot, the chip goes to the high hand. If two players split the pot by tying for both the high and the low, the pot shall be split as evenly as possible, with the player with the highest card by suit receiving the odd chip. When making this determination, all cards are used, not only the five cards that constitute the player's hand.
8. When there is one odd chip in the high portion of the pot and two or more high hands split all or half the pot, the odd chip goes to the player with the high card by suit. When two or more low hands split half the pot, the odd chip goes to the player with the low card by suit.
9. All rules for seven-card stud apply to seven-card stud high-low split (8-orbetter) except as otherwise noted.

LOWBALL

Lowball is draw poker with the lowest hand winning the pot. Each player is dealt five cards facedown, after which there is a betting round. Players are required to bet or fold. The players who remain in the pot now have an option to improve their hand by replacing cards in their hand with new cards. This is known as the draw. In limit poker, the bet doubles after the draw (unless otherwise posted). The most popular forms of lowball are ace-to-five lowball (also known as California lowball), and deuce-to-seven lowball (also known as Kansas City lowball). In ace-to-five lowball, the best hand is 5-4-3-2-A and in deuce-to-seven lowball, the best hand is 7-5-4-3-2, not of the same suit. For a further description of the forms of lowball, please see the individual section for each game.

Rules of Lowball

All rules governing "Kill Pots" are listed in the kill pots section.

1. *Cards Speak* Cards read for themselves. However, a *verbal declaration concerning a player's hand is binding*. Example: If a player calls an "8", that player must produce at least an "8" low or better to win. If you miscall your hand and cause another player to foul his or her hand, your hand is dead. If both hands remain intact, the best hand wins. If a miscalled hand occurs in a multihanded pot, the miscalled hand is dead, and the best remaining hand wins the pot. *For your own protection, always hold your hand until you see your opponent's cards.*
2. Any player spreading a hand with a pair in it must announce "pair" or risk losing the pot if it causes any other players to foul their hand. If two or more hands remain intact, the best hand wins the pot.
3. In ace-to-five lowball, the best hand is any 5-4-3-2-A. Straights and flushes do not count against your hand.
4. The joker is considered to be the lowest card not present in your hand.
5. As a new player, you have two options:
 - A. To wait for the big blind.
 - B. To kill the pot (double the limit for that hand by posting double the amount of the blind).
6. In a single-blind game, a player who has less than half a blind may receive a hand. However, the next player is obligated to take the blind. In the event that the all-in player wins the pot or buys in again, the player will then be obligated to take the blind.
7. In single-blind games, half a blind or more constitutes a full blind.

8. In single or multiple-blind games, if for any reason the big blind passes your seat, you may either wait for the big blind or kill the pot (provided no active player objects) in order to receive a hand. This does not apply if you have taken all of your blinds and changed seats. In this situation, you will be dealt in when your position in relationship to the blinds entitles you to a hand.

9. In limit ace-to-five lowball, before the draw, an exposed card of seven or under must be taken, and an exposed card higher than a seven must be replaced after the deal has been completed. This first exposed card is used as the burn card. After the draw, an exposed card cannot be taken. The draw is completed to each player, in order, and then the exposed card is replaced. A flashed card before the draw is not treated as an exposed card. After the draw, all flashed cards are considered exposed cards and replaced.

10. Any player may draw up to five consecutive cards.

11. Five cards constitute a playing hand; more or less than five cards after the draw constitutes a fouled hand. Before the draw, if you have less than five cards in your hand, you may receive additional cards, providing no action has been taken by the first player to act, unless that action occurs before the deal is completed. However, the dealer position may still receive a missing fifth card even if action has taken place. If action has been taken, you are entitled on the draw to receive the number of cards necessary to complete a five-card hand.

12. You may change the number of cards you wish to draw, providing:

- A. No cards have been dealt off the deck in response to your request (including the burn card).
- B. No player has acted on his or her hand based on the number of cards you have requested.

13. If you are asked how many cards you drew by another active player, you are obligated to respond until there has been action after the draw, and the dealer is also obligated to respond. Once there is any action after the draw, you are no longer obliged to respond and the dealer cannot respond.

14. In limit play, a bet and six raises is allowed in all multi-handed pots.

15. In limit play, check-and-raise is not permitted.

16. The minimum opening bet is the size of the large blind (unless otherwise posted). Example: In a \$30-\$60 limit game where, the blinds are \$10, \$20, and \$30, you may open for \$30 or \$60 before the draw.

17. Rapping the table in turn constitutes either a pass or the declaration of a pat hand, depending on the situation.

18. In limit play, if you check a seven or better and it is the best hand, all action after the draw is void, and you cannot win any money on any subsequent bets. You are still eligible to win whatever existed in the pot before the draw if you have the best hand. If you check a seven or better and the hand is beaten by a better hand, you lose the pot and any additional calls you make.

19. In ace-to-five lowball, in the event of an all-in bet that is less than half a bet, a seven or better may call this short bet after the draw and win. However, if another player overcalls this short bet and loses, the person who overcalls receives the bet back. If the seven or better fulfills his or her obligation by completing to a full bet, all subsequent betting action will stand.

KILL POTS

1. In a game which requires a player who wins two consecutive pots to kill the next pot (natural kill), a marker called a "kill button" indicates which player has won the previous pot. The winner keeps this marker until the hand is completed. If the player who has the kill button wins the next pot and it qualifies monetarily, that player must kill the next pot. There is no pot-size requirement for the first pot or "leg" of a kill. For the second "leg" to qualify for a kill, you must win at least one full bet for whatever limit you are playing, and it cannot be any part of the blind structure.
2. In lowball the betting limits before and after the draw is doubled when the pot is killed. Kill blinds are considered part of the pot. If a player with a natural kill wins again, then that player must kill it again (for the same amount as the previous hand).
3. If a player with one "leg up" splits the next pot, that player still has a "leg up" for the next hand. If the player who split the pot was the kill in the previous hand, then that player must also, kill the next pot.
4. The kill button is neutral (belonging to no player) if:
 - A. It is the first hand of a new game.
 - B. The winner of the previous pot has quit the game.
 - C. The previous pot was split and neither player had the kill button.
5. A person who leaves the table with a "leg up" toward a kill still has a "leg up" upon returning to the game.
6. When a player wins both the high and the low pot in a split-pot game ("scooper"), the next hand will be killed *only* if the pot is at least five times the size of the upper limit of the game.
7. In lowball, a player may look at two cards and randomly kill the pot. The pot may no longer be killed if any player in the game has received a third card. If you kill the pot in a voluntary kill situation, you must have at least four times the amount of the kill blind in your stack. For example: If the big blind is two chips, and the kill blind is four chips, the voluntary killer must have at least 16 chips prior to posting the kill.

8. If you are unaware that the pot has been raised or killed, and you put in a lesser amount, you may withdraw that money and reconsider that action before the draw. If it is a required kill pot (as described in rule No. 2 or in rule No. 6) with the kill button faceup, you must complete the bet or forfeit any bet.
9. Only one kill is allowed per hand. In lowball, a new player wanting to be dealt in an already killed pot may receive a hand by killing the next available pot, providing no one objects.
10. A player who is required to post a kill must do so that same hand even if he or she wishes to be dealt out or quit the game. A player who fails to post a required kill blind will not be allowed to participate in gaming until the kill money is posted.
11. In a kill pot, the killer acts last on the first betting round, but before any player acts twice. If the pot is raised, after the killer acts the action shall proceed clockwise from the killer.
12. Broken game status is allowed only for players of the same limit and game type. For this purpose a game with a mandatory kill is considered a different type of game than an otherwise similar game without a mandatory kill.

DRAW POKER (JACKS-OR-BETTER)

All five-card jacks-or-better draw games require a pair of jacks or better to open the pot. The game is played with a 53-card deck, which includes the joker. The joker can be used either as an ace or as any card that completes a straight, flush, or straight flush. All limit five-card draw games have fixed-limit betting. There are two betting rounds, one before the draw and one after the draw. The betting limit after the draw is twice the amount of the betting limit before the draw.

In all draw poker games, check-and-raise is permitted, and a bet and six raises is allowed in all multihanded pots.

Note: A player who opens the pot in jacks-or-better must show the openers, whether the hand is called or not, in order to win the pot.

Five aces are the best possible hand (four aces and joker).

Rules of Draw Poker (Jacks-or-Better)

1. A pair of jacks or better is required to open the pot. If no player opens the pot, the button moves forward and each player must ante again, unless the limit of antes has been reached for that particular game.
2. If the opener should show false openers before the draw, any other active player has the opportunity to declare the pot opened. However, any player who originally passed openers is not eligible to declare the pot open. The false opener has a dead hand and the opening bet stays in the pot. Any other bet placed in the pot by the opener may be withdrawn provided the action before the draw is not completed. If no other player declares the pot open, all bets are returned except the opener's first bet. The first bet and antes will remain in the pot, and all players who were involved in that hand are entitled to play the next hand after anteing again.
3. Any player who has legally declared the pot opened must prove openers in order to win the pot.
4. In all cases, the pot will play (even if the opener shows or declares a fouled hand) if there has been a raise, two or more players call the opening bet, or all action is completed before the draw.
5. Once action has been completed before the draw, the opener may not withdraw any bets, whether or not the hand contains qualifying openers.
6. An opener may be allowed to retrieve his or her hand to prove openers at the floorperson's discretion.
7. Any player may request the opener to retain the opening hand and show it after the winner of the pot has been determined.
8. You may split openers, but you must declare that you are splitting and place all discards under a chip to be exposed by the dealer after the completion of the hand. If you declare that you are splitting openers, but it is determined that you could not possibly have had openers when your final hand is compared with your discards, you will lose the pot.
9. You are not splitting openers if you retain openers. If you begin with the ace, joker, king, queen of spades, and the ten of clubs, you are not splitting if you throw the ten of clubs away. You are breaking a straight to draw to a royal flush, and in doing so, you have retained openers (ace, joker).
10. After the draw, if you call the opener's bet and cannot beat openers, you will not get your bet back.
11. The joker may only be used as an ace, or in straights, flushes, or straight flushes.

12. If the joker is used to make a flush, it will be the highest card of the flush not present in the hand.
13. Any player may draw up to five consecutive cards.
14. Five cards constitute a playing hand. More or fewer than five cards after the draw constitutes a fouled hand. Before the draw, a player having fewer than five cards may receive the additional cards necessary to complete his or her hand, providing no action has been taken by the first player to act (unless that action is before the deal is completed). However, the dealer position may still receive the fifth card even if action has taken place. If action has been taken, the player may draw the number of cards necessary to complete a five-card hand on the draw.
15. If you are asked how many cards you drew by another active player, you are obligated to respond until there has been action after the draw, and the dealer is also obligated to respond. Once there is any action after the draw, you are no longer obliged to respond and the dealer cannot respond.
16. You may change the number of cards you wish to draw, providing:
 - a. No cards have been dealt off the deck in response to your request.
 - b. No player has acted in any way on his or her hand based on the number of cards you have requested.
17. Cards that are exposed faceup by the dealer before the draw must be kept.
18. Cards that are exposed by the dealer on the draw cannot be kept. These cards will be replaced at the end of the draw.
19. Check-and-raise is permitted.
20. A maximum of a bet and six raises is permitted.
21. You may not change your seat between hands when there are multiple antes or forfeited money in the pot.
22. Rapping the table in turn constitutes a pass, but rapping the table in turn also may mean the declaration of a pat hand. A player who indicates a pat hand by rapping the table, not knowing the pot has been raised, may still play his or her hand.
23. Even if you are all in for just the ante (or part of the ante), you may declare the pot open if you have openers. If you are all in and falsely declare the pot open, you will lose the ante money and may not continue to play on any subsequent deals until a winner is determined. Even if you should buy in again, you must wait until the pot has been legally opened and someone else has won it before you can resume playing.

24. You have the right to pay the ante (whether single or multiple.) at any time and receive a hand, unless there is any additional money in the pot that has been forfeited during a hand in which you were not involved.

25. If the pot has been declared open by an all-in player playing for just the antes, all callers must come in for the full opening bet.

26. If you have only a full ante and no other chips and money on the table, you may play for just the ante. If no one opens and there is another ante, you may still play for that part of the antes that you have matched, without putting in any more chips and money.

MEXICAN POKER

Mexican Poker is similar to 5-card stud and is played with a standard deck “stripped” to 41 cards. The 8’s, 9’s, and 10’s are removed, the Joker remains.

To receive a hand, each player posts a collection when required. The cards are dealt clockwise, beginning to the left of the dealer button. The dealer button rotates clockwise after each hand is complete.

Each player receives a total of 5 cards, of which 1 card must be face down. After the first two cards are dealt (1 up and 1 down), a betting round begins with the high card clockwise of the dealer button, making a forced opening bet to start the action. After the betting is complete, the players may expose, if they wish, their down card. This action must be complete prior to the deal of the third card which may be delivered up or down depending on whether or not previously dealt down cards have been opened. When the third card has been delivered, betting then occurs.

The fourth and fifth cards are then dealt and played according to the same format. The player with the highest-ranking hand wins the pot.

Rules for Mexican Poker

1. The Joker is “wild” in all cases when dealt face down; however, when dealt face up, it is “wild” only with Aces, Flushes, and Straights.
2. The player with the highest card clockwise of the dealer button will make a mandatory opening bet. (When the Joker is dealt face up, it will be considered an Ace for purposes of the opening bet.) The opening bettor has the option of opening at either the lower or upper limit.
3. The highest hand will start the action on all following rounds. Hands are considered to be of equal value whether or not one hand may include the Joker. The closest of such hands to the dealer acts first.
4. If any down card is exposed by the house dealer, that player will receive his next card down and will be permitted to declare “all-in”. If the Joker is inadvertently exposed, it will play as if it had been dealt face down – “wild” in all cases.
5. The following hands are considered the same as a straight due to the removal of 8’s, 9’s, and 10’s from the deck:

“4-5-6-7-J”

“5-6-7-J-Q”

“6-7-J-Q-K”

“7-J-Q-K-A”

6. If cards on the initial deal are dealt out of sequence, a misdeal will be declared. Two instances of action, however, will indicate acceptance, in which case there will be no misdeal. The hand missed will be fouled.

7. Because cards on 3rd, 4th, or 5th streets are dealt either face up or face down, any cards dealt out of sequence on those streets will be moved face up to their correct position. The deal of the affected street will be completed if necessary. No betting will be permitted on the affected street. Any following street will then be dealt and betting will resume. Any bets made by players who receive out of sequence cards, which had not yet been returned to their correct position will be denied and returned to the player.
8. If a player exposes a card, during other than prescribed times, it is not considered an exposed card and will be required to play it as a down card.
9. A card will be burned on each round, following the second round.
10. Check and raise is permitted.
11. All raises must be at least equal to the size of the last bet.
12. Cards speak – hold your hand until you are sure of what your opponent has.
13. Once a card touches the muck, that hand is considered fouled. However, at the Floorperson's discretion, it may be considered retrievable.
14. No string bets or raises.
15. One short buy is allowed for every full buy-in.
16. Only the player with the dealer button may ask for an additional shuffle. Deal rotates clockwise.
17. If you show any cards to one player during or after a hand, any player at your table may demand that you show those cards to all players after a winner is determined.
18. No rabbit hunting. Once the cards are out of play, players cannot look through the discards or ask the dealer what is coming off the deck.
19. All players will act in turn. If a player checks, the player who checked first must show his hand first.
20. A player who indicates action towards betting or calling will be required to complete that action with a minimum bet. However, if a player is unaware of a raise he will not be held to that unless action has been taken behind this act.
21. All Hustler Casino rules apply. Management reserves the right to make decisions in the best interest of the game. All Management decisions are final.

LA BLACKJACK

LA Blackjack uses a six deck shoe. Each deck has 52 cards and up to 4 "Jokers" depending on the game. Aces have a value of 1 or 11 while the "Jokers" count as 2 or 12. All cards are dealt face up except for the player/dealer's hole card. Each player is dealt two cards and may hit (Draw additional cards.) Cards are always dealt clockwise, starting from the first seat position. The player/dealer receives their cards last. Two aces on the first two cards, or a Joker and a card value of 10 is a "Natural".

The object of L.A. Blackjack is to beat the opposing player. (Player verses player/dealer). The closest total to 22 without going over is the best hand. If both hands are over 22, the lowest point total closest to 22 wins. If both player and player/dealer hands total the same, the hand is a push* (*With the exception of 18: If both player/dealer and player hands total 18, this is NOT a push, player/dealer wins).

- All cards have face value.
- Jokers count as 2 or 12.
- Aces have a value of 1 or 11.
- The value of each hand is the sum of its cards.
- All Player's hands are compared with the player/dealer's hand
- Cards are dealt face up except for the player/dealer's hole card.
- Players may not touch cards at any time.
- Player/dealer can win or lose up to the amount bet.
- Player/dealer wins ties on 18.
- The position of player/dealer rotates. Each position may act as player/dealer twice.
- Players may not act as player/dealer unless they have made a bet as a player during the last round.
- Player/dealer MUST hit soft 18 and lower.
- Player/dealer MUST STAND on hard 18 and higher.

House way:

THERE IS NO "HOUSE WAY"

Since we do not have a house way, we cannot have a no action hand. If the player/dealer wants to lock up a seat in order to act as player/dealer, he cannot. If the player wants to lock up a seat in order to act as player/dealer, he cannot. The seated player will be permitted to act as player/dealer even if there has not been a wager in that spot on the previous hand.

Players options:

\$10-100: 12 and lower – must hit
13 through 17 – optional
soft 18 – must hit
hard 18 and higher – MUST STAND
(Player has no option on soft 19 – must stand)

\$2-10 12 and lower – must hit
13 through soft 19 – optional
hard 19 and above – MUST STAND

Player/Dealer- The player/dealer position rotates in a systematic and continuous way so the deal does not constantly remain with a single person for many hands. There must be an intervening player/dealer so that a single player cannot have repeated deals within the meaning of Oliver v. County of Los Angeles (1998) 66 Cal. App. 4th 1397, 1408-09.

The game will be disbanded if at least one other intervening player at the table does not accept the deal when offered. The player/dealers are never required to cover all opposing

players wagers. The house never participates as a player/dealer. The house never takes a percentage of the game.

ROUND OF PLAY

1. 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino dealer stands opposite of the players, and in the center of the table. The casino dealer's chip tray is set in front of him/her. The play starts from the right of the dealer and proceeds in a clock-wise fashion.
2. The game utilizes a standard 52-card deck, with the addition of one Joker per deck for a total of 53 cards. The game can be played with a minimum of a two decks, totaling 106 cards and to a maximum of eight decks totaling 424 cards.
3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed, and collection fee for the players and Player/Dealer. A maximum of three collection rates are allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in front of their seat in a betting circle and that money will be used to pay the winners and will also set the amount that he/she can collect from the loser. The casino will place a "button" in front of the Player/Dealer which designates that they are taking the "player/dealer" position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".
6. Once the Player/Dealer has posted the amount of money he/she will wager against the other players, and once the players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished prior to the start of the game in accordance with the California Penal Code. The casino dealer will take the

collection fees and drop them into a locked collection box affixed to the gaming table.

7. After the fees have been collected, the dealer will deal the cards to the players and the Player/Dealer. All cards dealt throughout the game are always dealt face up. The casino dealer is the only person on the table to touch the cards. The players will signal to the dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino dealer deals the first card to the player seated to the left of the designated Player/Dealer, in a clock-wise fashion. Each player will be dealt one card face up and the Player/Dealer will receive his/her first card also. The Player/Dealer's dealer first card will be placed in front of the casino dealer rather than in front of the Player/Dealer's seat position.
8. The casino dealer will deal a second face up card to the players, again starting at the player to the first seated position to the left of the Player/Dealer, in a clock-wise fashion. The Player/Dealer will receive a face down card .
9. Players must follow the below listed charts in deciding whether to hit or stand on a particular hand.

10. After all players have made their best hands by indicating to the casino dealer that they do not wish to have additional cards dealt to them, the the house dealer will turn over player/Dealer hole card. This card will determine where the "action button" will be placed.
11. The action button determines where the action starts or who will be first to be paid for their winning hand or lose their wager. The action button is placed based on its numerical value and in comparison to the players seated at the table. (Please see the chart below for an example of how the card's value is used to determine the placement of the action button).

The payout or collection of the wagers will begin at the seat where the action button is placed. The settling of the wagers will proceed in a clock-wise manner until all wagers have been acted upon.

12. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action give to the affected players by the casino or the Player/Dealer.
13. If the Player/Dealer's first up card is a Joker, all hands are frozen on the table. The Player/Dealer will be dealt the next card and the action button will be placed. Winning and losing wagers will be determined and all pay-offs made. Players have no options on their hands if this occurs.
14. The Player/Dealer's cards will always be dealt and placed in front of the casino dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted in the chart below:

15. The casino dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer does not have an option of hitting a Hard 17 or higher nor staying on a Soft 17 or lower. See the chart below for details:

Rules for Player/Dealer

Must Stand on	Must Hit on	Have Option on
HARD 17 AND ABOVE	SOFT 17 OR LESS	NONE

16. Once the Player/Dealer's hand has been made, all winners and losers are determined when their card's numerical value are compared to the Player/Dealer's. The Player/Dealer is never required to cover all opposing player's wagers. A Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers. If there is not enough money from the Player/Dealer position to cover all winning wagers, there will be no refund, free collection, or other form of rebate given to the affected players.
17. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clock-wise fashion around the table.
18. The next round of play begins once the casino dealer collects all cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clock-wise to the next position on the table. If there is no person that intervenes on the Player/Dealer's position, the game will be "broken" or stopped, as required by the California Penal Code.

After the first community card is exposed, the dealer shall, beginning with the player farthest to the dealer's left and moving clockwise around the table, ask each player if he or she wishes to withdraw Bet #2 or let it ride. This decision shall be made by each player regardless of the decision made concerning bet number one.
 - a. If a player chooses to let Bet #2 ride, that bet shall remain on the appropriate betting area of the layout until the end of the round of play.
 - b. If a player chooses to withdraw Bet #2, the dealer shall move the gaming chips on the betting area designated for bet number two toward the player who shall then immediately remove the gaming chips from the betting area.
 - c. Once a determination is made on Bet #2, each player places his/her three cards face down under the third bet.
6. The dealer shall then turn over the community card in the right rectangle. This card shall become the second community card.
7. The two (2) community cards shall be used by each player in conjunction with his/her three (3) cards to complete a five card hand.
8. After the second community card is turned face up, the dealer shall, beginning with the player farthest to his or her right and continuing around the table in a counterclockwise direction, turn the three cards of each player face up.
9. The dealer shall then resolve each hand by examining each player's cards, in combination with the two (2) community cards, to determine if the player's hand is a winning or losing hand.
10. Base game payouts are made to winning hands for each bet that was not withdrawn during play. In order to qualify for a base game payout, a player's hand must contain a pair of tens or better. All losing bets shall be collected by the player/dealer. Each winning bet shall be paid in accordance with the payout odds listed on the table layout and on the attached payout table.
11. All payouts are limited to the amount of the player/dealer's wager. A player/dealer cannot win or lose more than the amount of their wager placed on the table prior to the start of the hand.
12. After all winning wagers are paid, the dealer shall immediately collect the cards of all winning players and the community cards and place them in the discard rack.
13. The player/dealer position rotates in a systematic and continuous way among the seated players, and no one player may serve as the player/dealer for more than two consecutive hands. The player/dealer button rotates clockwise around the table.

Standards of play:

Three Card Poker (TCP) is a three card poker game that utilizes a player/dealer position. As in other games featuring a player/dealer, the players play against another player where they will collect all winnings and pay all losing bets to the extent that their money covers.

The player/dealer position will be selected as in other games approved by the Bureau of Gambling Control; and the player/dealer will only "bank" the hand (including bonus bets) for two (2) consecutive times before it is rotated in a clockwise fashion around the gaming table.

All standard poker rankings will be used from the minimum winning hand of a high card to the best hand; a Royal Flush.

Type of gaming table utilized for this game:

Three Card Poker shall be played on a standard blackjack table having eight places on one side for the players and the player/dealer, and a place for the Casino dealer on the opposite side.

The cloth covering a Three Card Poker table (the layout) shall have betting areas for eight players. Within each betting area there shall be three separate designated betting spaces labeled 'Ante' and 'Play' for the placement of bets, as well as a separate circle for the placement of a bonus bet labeled 'Bonus.'

Number of players in the game:

A maximum of eight players including the player/dealer position.

Type of card deck used:

1. **Shuffling Machine:** Cards used to play Three Card Poker shall be dealt from a single deck automatic card shuffling device ('shuffler').
2. **Physical Characteristics:** Cards used to play Three Card Poker shall be in standard decks of 52 cards.
3. **Number of Decks:** Cards used to play Three Card Poker shall be played with one deck, consisting of a 52 card deck.

Betting scheme:

1. All wagers in Three Card Poker shall be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.
2. All wagers shall be placed prior to the dealer announcing "No more bets." No bets shall be made, increased, or withdrawn after the dealer has announced "No more bets."
3. At the beginning of each round of play, each player shall be required to place an ante wager. Each player will have the option to place a play wager, after inspecting their hand, which must be equal to the ante wager.
4. Each player at a Three Card Poker table, who has placed the ante wager required above, shall also have the option to make an additional "bonus wager" that awards a bonus payout to the player(s)

who receive a poker hand consisting of certain hand combinations as listed in the *Bonus Bet Payout Table*.

Dealing procedures:

1. Immediately prior to the commencement of play and after each round of play has been completed, the dealer shall shuffle the cards by use of a shuffle machine so that the cards are randomly intermixed. Upon completion of the shuffle, the device shall place the deck of cards in a single stack.
2. The dealer shall wait for each player to place their ante bets as well as any bonus bets. After each player has had the opportunity to place his/her bonus bet, the dealer will announce "No more bets."
 - a. The shuffler deals the cards in stacks of three. The dealer shall deliver the first stack of cards dealt by the shuffler to the player to the left of the player/dealer. As the remaining stacks are dealt by the shuffler, the dealer shall deliver a stack in turn to each of the other players, including the player/dealer, moving clockwise around the table. The dealer shall deliver each stack face down. The stack given to the player/dealer shall be delivered face down after which one card will be turned face up.
3. After the stacks have been dealt and delivered to each player and the player/dealer, the dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.

Round of Play

1. After the dealing procedures above have been completed, each player shall examine his/ her cards.
2. Each player who wagers in Three Card Poker shall be responsible for his/ her own hand and no person other than the player or the dealer may touch the cards of that player. Each player shall be required to keep his/ her three cards in full view of the dealer at all times.
3. After examination of the cards, each player who has placed an ante wager shall have the option to either make a play wager in an amount equal to the player's ante wager or forfeit the ante wager and end his or her participation in the round of play. The dealer shall offer this option to each player, starting with the player to the left of the dealer and moving clockwise around the table in order.
 - a. If a player has placed an ante wager and a bonus wager but does not make a play wager, the player shall forfeit both the ante wager and the bonus wager.
4. After each player has either placed a wager on the table in the play wager area or forfeited his/ her wager and hand, the dealer shall collect all forfeited wagers and associated cards, placing them in the discard rack.
5. The dealer shall then reveal the remaining player/dealer's cards and place the cards so as to form the highest possible ranking hand. The player/dealer must qualify to play with a minimum of Queen-high.
 - a. If the player/dealer does NOT qualify, the play bet receives no action. The dealer shall immediately refund this bet to players.
 - b. The Ante will receive action. If the player's hand beats the player/dealer's hand, the dealer will pay each ante not surrendered (by folding) even money. If the player's hand does not beat the player/dealer's hand, the player loses.

- c. If the player/dealer's hand qualifies, the dealer shall immediately stack each player's play bet atop the Ante.
 - i. If the player's hand beats the player/dealer's hand, the player wins even money.
 - ii. If the player/dealer's hand beats the player's hand, the player loses.
6. The dealer shall then reveal the three card hand of each active player, starting with the player farthest to the dealer's right.
7. All cards collected by the dealer shall be picked up in order and placed in the discard rack in such a way that they can be readily arranged to reconstruct each hand in the event of a question or dispute.
8. The player/dealer will first collect all losing wagers and then pay all winning wagers. Once the player/dealer's wager has been exhausted, the wagers not covered by the player/dealer will be returned to the players.
9. The player/dealer position rotates in a systematic and continuous way among the seated players, and no one player may serve as the player/dealer for more than two consecutive hands. The player/dealer button rotates clockwise around the table.

The Bonus Bet is an optional side bet for Three Card Poker. The rules are as follows:

SUMMARY OF GAME

The object of the game is to assemble two hands of two (2) or three (3) cards with a point value as close to nine (9) as possible.

DETAILS

Standards of Play

The game features a rotating player/dealer position that collects from all losers and pays all winners to the extent that their wager covers the action. The rotation of the player/dealer position is the same of industry standard games and complies with 330.11 of the California Penal Code. The object of the game is to form a hand that equals nine (9) or as close to it as possible. The player's hand is compared with the player/dealer's hand. The hand closest to "9" wins.

Type of Gaming Table Used

The game shall be played on a standard blackjack table having eight places on one side for the players and the player/dealer, and a place for the Casino dealer on the opposite side.

The game may also be played on a "batwing" or "figure-eight" table that can accommodate up to 14 players.

Number of Players in the Game

A minimum of two (2) and a maximum of fourteen (14) players can participate in the game, depending on the type of table utilized.

Type of Card Deck

A standard 52 deck of cards is utilized in a multiple deck shoe. A minimum of three (3) decks and a maximum of eight (8) decks can be used during the play of the game. There are no Jokers.

All cards 2 through 9 hold their face value. 10, J, Q & K have a value of zero (0). The Ace has a value of one (1). A hand with cards whose sum is in double figures is ranked with the tens (10s) digit ignored. For example, a hand totaling eighteen (18) would count as eight (8).

Betting Scheme

1. All wagers in 21st Century Baccarat shall be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.
2. Backline betting is allowed.
3. All wagers shall be placed prior to any cards being dealt. No bets shall be made, increased, or withdrawn after the dealer has begun dealing.
4. At the beginning of each round of play, players have the following options when placing their wager(s):

21st CENTURY BACCARAT Version 8.0

- a. Player line which pays 1 to 1
 - b. Dealer line which pays 19 to 20 or 9 ½ to 10
 - c. Tie bet which pays 8 to 1
5. Each player at a 21st Century Baccarat 8.0 table, who has placed a base game wager as required above, shall also have the option to make an additional "bonus wager" that awards a bonus payout to the player(s) who receives a hand that meets the requirements as described below in the Dragon *Bonus Bet*.
 6. All bets for the base game and tie bet must be between the minimum and maximum table limits.

Dealing Procedures

At the start of a game a player is offered the player/dealer position. Once accomplished, the casino dealer shall wait for each player to make their wager (within posted table limits) on the base game as well as any bonus bets. Once all wagers are placed, the house dealer deals two hands of two cards each, two cards to the right and two cards to the left one by one in rotation. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the dealer line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the player line. All cards are dealt face down. The dealer opens the player hand first and then the dealer's first card. The decision, if any, is made by the player(s) betting on the Player hand and then the Dealer's hand is resolved. The position that is closest to 9 wins.

A Natural 8 or 9 is accomplished when the first two cards of the player or dealer's hand has a value of eight (8) or nine (9). When this occurs, the other hand will not be allowed to draw an additional card.

How Winners are Determined and Paid

After the cards are dealt, the closest to 9 will be declared the winner and all winners will be paid and all losers will have their wagers awarded to the player/dealer.

Player Hand:

- The player hand must stand when the cards dealt are valued between 6 and 9.
- The player hand must hit when the cards dealt are valued between 0 and 4.
- The player hand must hit when the cards dealt are valued at 5 except when the dealer hand is valued at 5 or 6, and then they will have the following options:
 - Stand and keep their wager on the stand line;
 - Hit and take a community card by moving wager to hit line or place a hit button on their cards.
- The house dealer will deliver additional hit card to player's hand. If all player bets choose to stand on an option hand, the dealer will still deliver the additional hit card to the player's hand, in order to make a complete hand, for comparison purposes to the dealer's hand.
- The casino dealer will then expose the dealer's hand.

21st CENTURY BACCARAT Version 8.0

Dealer Hand:

- If the player stands, then the dealer hand hits on a total of 5 or less.
- If the player does hit for a complete hand then the dealer hand hits using the following rules:
 - If the dealer's hand total is 3, then the dealer hand is dealt a third card unless the player's third card was an 8.
 - If the dealer's hand total is 4, then the dealer hand is dealt a third card unless the player's third card was a 0, 1, 8, or 9.
 - If the dealer's hand total is 5, then the dealer hand is dealt a third card if the player's third card was 4, 5, 6, or 7.
 - If the dealer's hand total is 6, then the dealer hand is dealt a third card if the player's third card was a 6 or 7.

House Way

Player hand hits on five (5) or below and stands on six (6) or more. The casino dealer must use the house way when a player requests the casino dealer to play an additional wager.

Tie Bet

A player has the option of making a tie bet when they have also made a base game bet. The tie occurs when the player's hand and the dealer's hand equal the same number. This wager wins or loses independent of the base game bet. The tie bet may be less than, equal to, or greater than the base game wager (minimum of \$5.00, maximum of \$500.00). There is no collection fee taken for placing a tie bet wager. Winning tie bets pay 8 to 1.

Round of Play

- The player/dealer makes their wager.
- All players place their wagers on the player or dealer line.
- The dealer takes all casino collections and drops them in the affixed drop box.
- The dealer deals the cards and then determines the winner (Player or Dealer) or whether the hand is a tie.
- The dealer places the action button. The action button determines which player receives first action on their wager. The player/dealer's hole card determines the position of the action button. The player/dealer's position is always zero. Other seats, in clockwise rotation, respectively represent other numbers.
- All wagers are settled to the extent the player/dealer's wager covers the action.
- The dealer (if applicable) records whether the preceding hand was won by the player, dealer or was a Tie on the affixed electronic reader board.

Other Equipment Used

A Shuffle Master shuffler will be affixed at or near the table and utilized. In the event that the shuffle machine does not work, the dealer will shuffle the cards.

A card shoe will be used to deal the cards.

21st CENTURY BACCARAT Version 8.0

An electronic reader board will be used. This is an electronic display that allows the players to see the history of past hands dealt and whether the outcome was a win for the Player, Dealer or a Tie.

Dragon Bonus Bet

The optional bonus bet is called the “Dragon Bonus” (DB). This bonus bet is patented and owned by Shuffle Master Gaming, Inc. It is licensed exclusively to 21st Century Gaming Concepts, Inc.

Each player wagering in the base game has the option of placing a wager (minimum of \$5.00, maximum of \$500.00) on the designated DB spot located next to each player’s position on the gaming felt layout. There will be two circles in front of each player position. One will be labeled “Player Dragon Bonus” and the other will be “Dealer Dragon Bonus.”

Players have two ways to win:

1. If the hand the wager on (Player or Dealer) is a “natural or;
2. If the hand they wager on is a non-natural that wins by four (4) or more points from the losing hand. The higher margin of victory, the higher the payout. If the spread is three (3) points or less, the DB bet loses.
3. Regardless of what hand a player wagered on, a player may wager on the Player Dragon Bonus Bet circle, the Dealer Dragon Bonus Bet circle, or both.
4. There is no collection for the DB bet.
5. Players must place a wager for the base game to be able to wager on the Dragon Bonus.
6. The player/dealer will pay all Dragon Bonus Bet wagers and will collect all losing Dragon Bonus Bet wagers. Wagers are collected or paid, to the extent that the player/dealer’s wager covers. Once the player/dealer’s wager has been exhausted, the wagers not covered by the player/dealer will be returned to the players.

HUSTLER CASINO POKER GAME RULES

HOLD'EM

In Hold'em, all players receive two downcards as their personal hand, after which there is a round betting. Three boardcards are turned simultaneously (called the "flop") and another round of betting occurs. The next two boardcards are turned one at a time, with a round of betting after each card. The boardcards are community cards, and after the final round of betting, a player may use any five-card combination from among the board and personal cards. A player may even use all of the boardcards and no personal cards to form a hand. This is called "playing the board."

Hold'em uses a flat disk called a dealer button to indicate the player who is in the dealer position for that hand (even though a non-playing casino employee actually deals). The dealer button rotates clockwise. The player with the dealer button is last to receive cards on the initial deal and has the right of last action after the first betting round.

One or more blind bets are used to stimulate action and initiate play. Blinds are posted before the players look at their cards. Blinds are part of a player's bet, unless the structure of a specific game or the situation requires part or all of a particular blind to be "dead." Dead chips are not part of a player's bet. The small blind IS posted by the player immediately clockwise from the button, and the big blind is posted by the player two positions clockwise from the button.

The player to the left of the blinds initiates action on the first betting round. On all subsequent betting rounds, the action begins with the first active player to the left of the button.

In non-tournament play, the button rotates one position clockwise after each deal. The button must move forward, and the blinds adjust accordingly.

Rules for Hold'em Blinds

1. In Hold'em, all blinds are "live" (except for the "dead collection blind"). If you post a blind, you have the option of raising the pot when it is your turn.
2. When there are two blinds in a game with three or more players, the smaller blind is to the immediate left of the dealer button. In heads-up play, the small blind is on the button.
3. A new player entering a Hold'em game, has the following options:
 - a. To immediately be dealt a hand.
 - or
 - b. To let the blinds and the button pass before being dealt a hand.

4. As a new player you cannot be dealt in when you're between the small blind and the button. You must wait until the button passes.
5. In multiple-blind games players must meet the total amount of the blind obligations for every round they play. Players cannot have the button twice; the button always moves forward, and the blinds are adjusted accordingly.
6. If you miss any or all blinds, you can resume play by either posting the total amount of the blinds for that limit game or waiting for the big blind. If you choose to post the total amount of the blinds, an amount up to the size of the minimum opening bet is live, and the remainder is placed in the pot as "dead money." When it becomes your turn to act, you may either call the action or you may raise.
7. Blinds may not be made up between the big blind and the button.
8. When a game starts, a new player will not be required to post a blind until the button has made one complete revolution around the table, provided a blind has not yet passed that seat. A player may also change seats without penalty provided a blind has not yet passed the new seat. However, a player who drew for the button is considered active in the game, and is required to make up both blinds if he or she misses a blind.
9. No live "straddle" bets are allowed.

Irregularities

1. If the first card off the deck is exposed on the deal, the dealer will place it back onto the deck, reshuffle, and re-cut the cards. If any other card is exposed due to dealer error. It will be replaced as follows:
 - If a downcard is flashed or exposed due to a dealer error, it may not be kept. After completing the hand, the dealer replaces the card with the top card on the deck and the exposed card is then used for the burn card.
2. If the cards are prematurely flopped before the betting is complete, or if the flop contains too many cards, the board cards are mixed with the remainder of the deck. The burn card remains on the table. After shuffling, the dealer cuts the deck and deals a new flop without burning a card.
3. Should the dealer turn the **fourth card** on the board before the betting round is complete, the card is taken out to play for that round and the betting is completed. The dealer then burns and turns that would have been the fifth card

in the fourth card's place. After this round of betting, the dealer reshuffles the deck, including the card that was taken out of play, but not including the burn cards or discards. The dealer then cuts the deck and turns the final card without burning a card. If the **fifth card** is turned up prematurely, the deck is reshuffled and dealt in the same manner.

4. In Hold'em, if the dealer mistakenly deals the first player an extra card (after all players have received their starting hands), the card will be returned to the deck and used for the burn card. If the dealer mistakenly deals more than one extra card, it is a misdeal.

Playing the Board

You must declare that you are playing the board before you throw your cards away; otherwise you relinquish all claims to the pot.

Notes:

HUSTLER CASINO NO LIMIT AND POT-LIMIT POKER

No-limit Rules

All the rules for limit games apply to no-limit and pot-limit games, except as noted in this section.

1. There is no maximum number of raises in any betting round.
2. All bets must be at least equal to the minimum bring-in, unless the player is going all in. A bet of less than the minimum bring-in may not be raised by any player who has already checked.
3. All raises must be equal to or greater than the size of the previous bet or raise on that betting round, except for an all-in wager. A player who has already checked or called may not subsequently raise an all-in bet that is less than the amount of the last bet or raise. For example: Player A bets \$100. Player B raises \$100 more, making the total bet \$200. If Player C goes all in for less than \$300 total (not a full \$100 raise), and Player A calls, then Player B has no option to raise again, because he wasn't fully raised by Player B. If Player A does raise, then the betting is reopened, and Player B can raise again.
4. A wager is not binding until the chips are actually released into the pot.
5. If there is a discrepancy between a player's verbal statement and the amount put into the pot, the bet will be corrected to the verbal declaration.
6. Since no-limit play may require a large number of chips in order to make a bet, a player who says "raise" is allowed to make more than one move into the pot until the wager is complete, providing he/she has announced the amount of the raise.
7. A bet of a single chip or bill without comment is considered to be a bet of the full amount, of that chip or bill allowed. However, a player acting on a previous bet with a larger denomination chip or bill is calling the previous bet unless this player makes a verbal declaration to raise the pot.

8. In all no-limit and pot-limit games, the house has the right to place a maximum time limit for taking action on your hand. The floorperson will "put the clock" on player when requested to do so by a dealer. If the clock is put on the player when they are facing a bet, the player will have one additional minute to act on his/her hand. The player will receive a ten-second warning, after which the players hand is dead if he/she have not acted.
9. The casino does not recognize "insurance" or any other "proposition" wagers. The management will decline to make decisions in such matters, and the pot will be awarded to the best hand. Players are asked to refrain from instigating proposition wagers in any form.

Note: For those special rules that apply only to no-limit and pot-limit lowball, see Lowball.

9.0 Version

21st CENTURY BACCARAT Version 9.0

SUMMARY OF GAME

The object of the game is to assemble two hands of two (2) or three (3) cards with a point value as close to nine (9) as possible.

DETAILS

Standards of Play

The game features a rotating player/dealer position that collects from all losers and pays all winners to the extent that their wager covers the action. The rotation of the player/dealer position is the same of industry standard games and complies with 330.11 of the California Penal Code. The object of the game is to form a hand that equals nine (9) or as close to it as possible. The player's hand is compared with the player/dealer's hand. The hand closest to "9" wins.

Type of Gaming Table Used

The game shall be played on a standard blackjack or batwing table having eight places on one side for the players and the player/dealer, and a place for the Casino dealer on the opposite side.

The game may also be played on a "batwing" or "figure-eight" table that can accommodate up to 14 players.

Number of Players in the Game

A minimum of two (2) and a maximum of fourteen (14) players can participate in the game, depending on the type of table utilized.

Type of Card Deck

A standard 52 deck of cards is utilized in a multiple deck shoe. A minimum of three (3) decks and a maximum of eight (8) decks can be used during the play of the game. There are no Jokers.

All cards 2 through 9 hold their face value. 10, J, Q & K have a value of zero (0). The Ace has a value of one (1). A hand with cards whose sum is in double figures is ranked with the tens (10s) digit ignored. For example, a hand totaling eighteen (18) would count as eight (8).

Betting Scheme

1. All wagers in 21st Century Baccarat shall be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.
2. Backline betting is allowed.
3. All wagers shall be placed prior to any cards being dealt. No bets shall be made, increased, or withdrawn after the dealer has begun dealing.

21st CENTURY BACCARAT Version 9.0

4. At the beginning of each round of play, players have the following options when placing their wager(s):
 - a. Player line which pays 1 to 1
 - b. Dealer line which pays 19 to 20 or 9 ½ to 10
 - c. Tie bet which pays 8 to 1
5. Each player at a 21st Century Baccarat 9.0 table, who has placed a base game wager as required above, shall also have the option to make an additional "bonus wager" that awards a bonus payout to the player(s) who receives a hand that meets the requirements as described below in the Royale Bonus *Bet*.
6. All bets for the base game and tie bet must be between the minimum and maximum table limits.

Dealing Procedures

At the start of a game a player is offered the player/dealer position. Once accomplished, the casino dealer shall wait for each player to make their wager (within posted table limits) on the base game as well as any bonus bets. Once all wagers are placed, the house dealer deals two hands of two cards each, two cards to the right and two cards to the left one by one in rotation. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the dealer line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the player line. All cards are dealt face down. The dealer opens the player hand first and then the dealer's first card. The decision, if any, is made by the player(s) betting on the Player hand and then the Dealer's hand is resolved. The position that is closest to 9 wins.

A Natural 8 or 9 is accomplished when the first two cards of the player or dealer's hand has a value of eight (8) or nine (9). When this occurs, the other hand will not be allowed to draw an additional card.

How Winners are Determined and Paid

After the cards are dealt, the closest to 9 will be declared the winner and all winners will be paid and all losers will have their wagers awarded to the player/dealer. All ties between the player line and the dealer line on zero through nine (0-9) are considered a "push," and the original wagers are called off.

Player Hand:

- The player hand must stand when the cards dealt are valued between 6 and 9.
- The player hand must hit when the cards dealt are valued between 0 and 4.
- The player hand must hit when the cards dealt are valued at 5 except when the dealer hand is valued at 5 or 6, and then they will have the following options:
 - Stand and keep their wager on the stand line;
 - Hit and take a community card by moving wager to hit line or place a hit button on their cards.
- The house dealer will deliver additional hit card to player's hand. If all player bets choose to stand on an option hand, the dealer will still deliver the additional hit card to the player's hand, in order to make a complete hand, for comparison purposes to the dealer's second card.

21st CENTURY BACCARAT Version 9.0

- The casino dealer will then expose the dealer's hand.

Dealer Hand:

- If the player stands, then the dealer hand hits on a total of 5 or less.
- If the player does hit for a complete hand then the dealer hand hits using the following rules:
 - If the dealer's hand total is 3, then the dealer hand is dealt a third card unless the player's third card was an 8.
 - If the dealer's hand total is 4, then the dealer hand is dealt a third card unless the player's third card was a 0, 1, 8, or 9.
 - If the dealer's hand total is 5, then the dealer hand is dealt a third card if the player's third card was 4, 5, 6, or 7.
 - If the dealer's hand total is 6, then the dealer hand is dealt a third card if the player's third card was a 6 or 7.

House Way

Player hand hits on five (5) or below and stands on six (6) or more. The casino dealer must use the house way when a player requests the casino dealer to play an additional wager.

Tie Bet

A player has the option of making a tie bet when they have also made a base game bet. The tie occurs when the player's hand and the dealer's hand equal the same number. This wager wins or loses independent of the base game bet. The tie bet may be less than, equal to, or greater than the base game wager as long as it is within table limits. There is no collection fee taken for placing a tie bet wager. Winning tie bets pay 8 to 1.

Round of Play

- The player/dealer makes their wager.
- All players place their wagers on the player or dealer line.
- The dealer takes all casino collections and drops them in the affixed drop box.
- The dealer deals the cards and then determines the winner (Player or Dealer) or whether the hand is a tie.
- The dealer places the action button. The action button determines which player receives first action on their wager. The player/dealer's hole card determines the position of the action button. The player/dealer's position is always zero. Other seats, in clockwise rotation, respectively represent other numbers.
- All wagers are settled to the extent the player/dealer's wager covers the action.
- The dealer (if applicable) records whether the preceding hand was won by the player, dealer or was a Tie on the affixed electronic reader board.

Other Equipment Used

A Shuffle Master shuffler will be affixed at or near the table and utilized. In the event that the shuffle machine does not work, the dealer will shuffle the cards.

21st CENTURY BACCARAT Version 9.0

A card shoe will be used to deal the cards.

An electronic reader board will be used. This is an electronic display that allows the players to see the history of past hands dealt and whether the outcome was a win for the Player, Dealer or a Tie.

RoyaleBonus Bet

The optional bonus bet is called the “Royale Bonus” (RB). Each player wagering in the base game has the option of placing a wager within table limits on the designated RB spot located next to each player’s position on the gaming felt layout.

Rules are as follows:

1. All hands except a pair can be made using a combination of the first four cards (two from the player and two from the dealer).
2. The pair can only be made utilizing two cards from the player hand or two cards from the dealer hand. They may not be combined.
3. Only the highest hand will be paid out.
4. The ace can be used to complete a low or a high straight.
5. The base game wagers will be settled first, then the bonus bets, and tie bets will be settled last.
6. There is no collection for the RB bet.
7. The player/dealer will pay all Royale Bonus Bet wagers and will collect all losing Royale Bonus Bet wagers. Wagers are collected or paid, to the extent that the player/dealer’s wager covers. Once the player/dealer’s wager has been exhausted, the wagers not covered by the player/dealer will be returned to the players.

ROUND OF PLAY

No-Bust- 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the Player/Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Player/Dealer sit or stands opposite of the players, and in the center of the table. The casino Player/Dealer's chip tray is set in front of him/her. The play starts from the left of the Player/Dealer and proceeds in a clockwise fashion.

The game utilizes a 52-card deck. Aces are wild and have three values:

- a. 12 on first two cards when paired with a card with the value of 10.
- b. 1 or 11 on first two card when paired with a card with value of 2-9.
- c. 1 or 11 in a hand with three or more cards.

All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed, and collection fees for the Players and Player/Dealer.

A standard round of play begins when a Player/Dealer is designated. The Player/Dealer places a wager in front of her betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the Player/Dealer and a designation whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the Table Fee collection fee in front of her betting circle.

Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each Player must pay the posted Table Fee and Jackpot (if applicable) collection for their wager(s) in any betting circle where they have money or "action".

Prior to the start of play, the casino dealer will gather the collection fees and place the chips in the appropriate collection box.

Play commences with the casino dealer distributing the cards to the Players and the Player/Dealer. The casino dealer delivers all cards face up. The casino dealer is the only person on the table to touch the cards. The Players will signal to the casino dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side-to-side manner, indicating they wish to stay with their cards on the table. The casino dealer delivers the first card to the Player seated to the left of casino dealer, in a clockwise fashion. Each Player is dealt one card face up. The Player/Dealer's first card is placed in front of the casino dealer.

The casino dealer will deal a second face up card to the players, again starting at the Player in the first seated position to the left of the casino dealer, in a clockwise fashion. The Player/Dealer will receive a face down card in front of the casino dealer.

Players must follow the below listed chart in deciding whether to hit or stand on a particular hand:

After all Players have made their best hands by indicating to the casino dealer that they do not wish to have additional cards dealt to them, the casino dealer will turn over the Player/Dealer's hole (second) card.

Beginning with the player to the right of the casino dealer, the settling of the wagers is completed in a counterclockwise manner until all wagers have been resolved.

The Player/Dealer's cards are dealt and placed in front of the casino dealer's tray.

The casino dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer must adhere to the following hit rules:

Rules For Player/Dealer		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

Once the Player/Dealer's hand is set, all winners and losers are determined by comparing the numerical value of the Player's hands with the Player/Dealer's hand. The Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.

After all wagers are settled, the casino dealer collects all cards from the table and places them in the discard tray. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clockwise fashion around the table.

The next round of play begins once the casino dealer collects all cards from the table and places them in the discard tray. The casino dealer will also change the Bank Button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clockwise to the next position on the table.

Rules of Play
Buster Blackjack
Side Bet

Buster Blackjack is a side game that complements No Bust 21st Century Blackjack[©] (hereafter **NBBJ**). It features a side wager that allows the player to bet that the Player-Dealer will bust. The greater the number of cards in the Player-Dealer's busted hand, the higher the payoff.

The Buster Blackjack Side Bet is played on a regular Blackjack or No Bust 21 table with a minimum of one (1) and a maximum of eight (8) decks. In addition to the mandatory **NBBJ** wager, the player has the option to make a "Buster" side bet.

Rules of Play

1. Buster Blackjack is played in rotation against the Player/Dealer.
2. Prior to any cards being dealt, all players have the option to make a Buster Blackjack side wager if they make the **NBBJ** wager. The Buster Blackjack side wager cannot exceed the **NBBJ** wager.
3. Players are not required to pay a Table Fee Collection to make a Buster Blackjack Side Bet.
4. If the Player-Dealer does not or cannot have a Natural and the player has a Natural, the **NBBJ** wager is paid and the casino dealer collects the Player's cards.
5. The Buster Blackjack wager remains in action whether or not the player busts or is dealt a Natural.
6. Once all players have made the decisions concerning their hands according to the rules for **NBBJ**, the casino dealer will reveal the Player-Dealer's hole card and play out her hand. If the Player-Dealer hand busts, she must pay all Buster Blackjack side wagers according to the posted Buster Blackjack pay table (See, below). The payoff odds vary with the number of cards in the Player-Dealer's busted hand. The more cards in his busted hand, the higher the payoff.
7. If the Player-Dealer does not bust, she wins all Buster Blackjack wagers in rotation to the extent of the money in action.
8. Note that if there are no **NBBJ** wagers remaining simply because all players have received a Natural, as long as there are Buster Blackjack side wagers, the Player-Dealer must complete his hand, if not 17 or greater.

1. No-Bust- 21st Century Blackjack 4.0a is played on a raised gaming table. The table seats eight players who face the casino dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino dealer stands opposite of the players, and in the center of the table. The casino dealer’s chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.

4. A standard round of play begins when a player-dealer is designated. The player-dealer places a wager in front of her betting circle. This wager is used to pay the winners. The casino will place a “button” in front of the player-dealer and a designation whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each player must pay the posted collection for their wager(s) in any betting circle where they have money or “action”.
6. Prior to the start of play, the casino dealer will take the collection fees.
7. Play commences with the casino dealer distributing the cards to the players and the player-dealer. All cards are dealt face up. The casino dealer is the only person on the table to touch the cards. The players will signal to the casino dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino dealer deals the first card to the player seated to the left of casino dealer, in a clock-wise fashion. Each player will be dealt one card face up. The player-dealer’s first card will be placed in front of the casino dealer.
8. The casino dealer will deal a second face up card to the players, again starting at the Player to the first seated position to the left of the casino dealer, in a clock-wise fashion. The player-dealer will receive a face down card in front of the casino dealer.

Positions without a wager shall not receive cards.

Once all hands have been dealt, each player may look at their hand. Each player, starting with the first player to the left of the player-dealer and continuing clockwise around the table, shall play their hand as follows:

The following tables detail what governs the player's hand:

Rules for a Player Hand		
Must Stand On	Must Hit On	Have Option On
7 – 9	0 – 4	5 & 6

When the initial three cards dealt to a player's hand equal five or six, that player has the following two options:

- Move their hand to the appropriate area on the table in front of their seated position labeled "Stand," which signifies to the house dealer that the player wishes to stand on five or six;
- Move their hand to the appropriate area on the table in front of their seated position labeled "Hit," which signifies to the house dealer that the player wishes to receive a hit card, for a total of four cards.

Once each player has placed their hand in either the stand or hit box in front of their seated position, the house dealer shall deliver one additional card to each player whose hand is in the hit box, starting with the player to the left of the player-dealer and continuing clockwise around the table. Players also may request their hand be set "House Way," as follows:

House Way:

(House Way Upon Request)		
Must Stand On	Must Hit On	Have Option On
6 or more	5 or less	N/A

The house dealer shall use the house way upon a player's request. The request to use the house way can be made by a player at any time before the player-dealer's hand is exposed.

After all players have exercised their option to either hit or stand or have their hand played house way, the house dealer shall expose the player-dealer's first and second cards, which were dealt face-down. Super Pan 9 utilizes a dice cup with three dice which determines where action begins. The player-dealer shakes the dice cup, and once opened, the total count of the dice designates placement of the action button. Beginning with the player-dealer position as number 1, and continuing clockwise, the casino dealer counts around the table up to the total number of the dice. The player-dealer position is always 1, 9, and 17, regardless of how many players are playing. If the player-dealer's wager does not cover all action on the table, wagers will be settled

starting with the player with the action button and moving clockwise from player to player in the following order: all base game wagers, followed by all Bonus Bet wagers. If the player-dealer's wager does cover all action on the table, wagers will be settled starting with the player to the right of the house dealer and continuing in a counter-clockwise manner around the table until all wagers have received action.

Once the action button has been placed, the player-dealer's hand shall then be played according to the rules as follows:

SUMMARY OF GAME

The object of the game is to assemble two hands of two or three cards with a point value as close to nine as possible.

Standards of Play

The game features a rotating player-dealer position that collects from all losers and pays all winners to the extent that their wager covers the action. The rotation of the player-dealer position is the same of industry standard games and complies with 330.11 of the California Penal Code. The object of the game is to form a hand that equals nine or as close to it as possible. The player's hand is compared with the player-dealer's hand. The hand closest to "9" wins.

Type of Gaming Table Used

The game shall be played on a standard blackjack table having eight places on one side for the players and the player-dealer, and a place for the House dealer on the opposite side.

The game may also be played on a "batwing" or "figure-eight" table that can accommodate up to fourteen players.

Number of Players in the Game

A minimum of two and a maximum of fourteen players can participate in the game, depending on the type of table utilized.

Type of Card Deck

A standard 52-deck of cards is utilized in a multiple deck shoe. A minimum of three decks and a maximum of eight decks can be used during the play of the game. There are no jokers.

All cards 2 through 9 hold their face value. 10, J, Q & K have a value of zero. The ace has a value of one. A hand with cards whose sum is in double figures is ranked with the tens digit ignored. For example, a hand totaling eighteen would count as eight.

Betting Scheme

1. All wagers in 21st Century Lucky 7 Baccarat shall be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.
2. Backline betting is allowed on all wagers.
3. All wagers shall be placed prior to any cards being dealt. No bets shall be made, increased, or withdrawn after the dealer has begun dealing.
4. At the beginning of each round of play, players have the following options when placing their wager(s):

- a. Player circle which pays 1 to 1
 - b. Dealer circle which pays 1 to 1
5. Each player at a 21st Century Lucky 7 Baccarat table, who has placed a base game wager as required above, shall also have the option to make additional "bonus wagers" that awards a bonus payout to the player(s) who receives a hand that meets the requirements as described below in the various "bonus wager" outlines.
 6. All bets for the base game and "bonus wager" bets must be between the minimum and maximum table limits, as described in each "bonus wager" outline.

Dealing Procedures

At the start of a game a player is offered the player-dealer position. Once accomplished, the house dealer shall wait for each player to make their wager (within posted table limits) on the base game as well as any bonus bets. Once all wagers are placed, the house dealer deals two hands of two cards each, two cards to the right and two cards to the left one by one in rotation. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the Dealer circle. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the Player circle. All cards are dealt face-down. The dealer opens the player hand first and then the dealer's first card. The decision, if any, is made by the player(s) betting on the player hand and then the dealer's hand is resolved. The position that is closest to nine wins.

A "natural 8" or "natural 9" is accomplished when the first two cards of the player's or dealer's hand has a value of eight or nine. When this occurs, the other hand will not be allowed to draw an additional card.

How Winners are Determined and Paid

The value of a hand is determined by adding the values of its individual cards. Tens and face cards are counted as zero, while all other cards are counted by the number of "pips" on the card face. Only the last digit of the two or three card hand total is used. The hand with the value closest to nine wins. If both dealer and player hands have the same total, the result is a push. The wagers are paid as follows:

- If the dealer hand wins, all players that wagered on the Dealer circle will be paid 1 to 1, and the Player and Tie wagers will lose.
- If the player hand wins, all players that wagered on the Player circle will be paid 1 to 1, and the Dealer and Tie wagers will lose.
- If the dealer and player hands have the same value, regardless of the number of cards in each hand, both the Dealer and Player wagers will push. However, if both hands have a total of seven, then the Dealer wager automatically loses and the Player wager still pushes.

After the house dealer delivers the first two cards to both the player hand and dealer hand, the following Baccarat rules are followed.

- For the player's hand, when the initial two cards dealt to the player hand equal five or less, the player hand will be dealt one additional card, which shall be on behalf of each player who placed a Player wager. The hand must stand on six through nine and will not

be dealt an additional card. No option. The hit and stand chart are fixed. The player hand has no stand or hit options.

- If the player stands, the dealer hand will be dealt one additional card, which shall be on behalf of all players who placed a Dealer wager on a total of five or less and must stand on six through nine.
- If the player's hand was required to draw an additional card, the dealer's hand will be dealt an additional card according to the table below. The top row represents the point value of the player's draw card. The left column represents the point value of the dealer hand's initial two card hand.
 - If the dealer's hand total is two or less, then the dealer hand is dealt a third card regardless of what the player's third card was.
 - If the dealer's hand total is three, then the dealer hand is dealt a third card unless the player's third card was an 8.
 - If the dealer's hand total is four, then the dealer hand is dealt a third card unless the player's third card was a 0, 1, 8, or 9.
 - If the dealer's hand total is five, then the dealer hand is dealt a third card if the player's third card was 4, 5, 6, or 7.
 - If the dealer's hand total is six, then the dealer hand is dealt a third card if the player's third card was a 6 or 7.

The following chart, where "S"= Dealer Line "stands" and "H"= Dealers Line "hits" demonstrates how each hand combination is resolved:

	0	1	2	3	4	5	6	7	8	9

Once all cards have been dealt, the hand with the highest total point count is declared the winner.

House Way

Player hand hits on five or below and stands on six or more. The house dealer must use the house way when a player requests the house dealer to play an additional wager.

Round of Play

- The player-dealer makes their wager.
- All players place their wagers on the Player circle or Dealer Circle.
- The dealer takes all casino collections and drops them in the affixed drop box.

- The dealer deals the cards and then determines the winner (Player or Dealer) or whether the hand is a tie.
- The dealer places the action button. The action button determines which player receives first action on their wager. The second card dealt to the player-dealer's hand determines the position of the action button. The player-dealer position is always zero (0). The other seats, in clockwise rotation, starting with the player to the left of the player-dealer and continuing in a clockwise manner around the table, respectively represent the other numbers. Wagers shall be settled in the following order from player to player: each Player and Dealer wager placed, all Player Pair, Dealer Pair, and Lucky 7 wagers, all Tie wagers, then the Monster & Buster wagers. When determining where the action button will be placed, cards will hold the following values:

Action Button Card Chart:

Player-dealer's Second Card	Card Value
Ace	1
2 through 10	Hold their face value
Jack	11
Queen	12
King	13

- All wagers are settled to the extent the player-dealer's wager covers the action.
- If the player-dealer's wager does cover all action on the table, wagers will be settled starting with the player to the right of the house dealer and continuing in a counter-clockwise manner around the table until all wagers have received action.
- The dealer (if applicable) records whether the preceding hand was won by the player, dealer or was a tie on the affixed electronic reader board.

Other Equipment Used

A Shuffle Master shuffler will be affixed at or near the table and utilized to shuffle all of the decks used. In the event that the shuffle machine does not work, the house dealer will shuffle the cards manually.

Once all cards are shuffled, either with the shuffler or manually by the house dealer, they will be placed in a card shoe which will be used to deal the cards.

An electronic reader board will be used. This is an electronic display that allows the players to see the history of past hands dealt and whether the outcome was a win for the Player, Dealer or a Tie.

Tie

A player has the option of making a Tie wager when they have also made a base game wager. The tie occurs when the player's hand and the dealer's hand equal the same number, regardless of the number of cards in each hand. This wager wins or loses independent of the base game wager. The Tie wager may a minimum of \$1 to a maximum of \$300, as long as it is within table limits. There is no collection fee taken for placing a Tie wager. Winning Tie wagers pay according to the pay table. Backline betting is allowed. So long as the hands tie at seven, a player can win both the Tie and the Lucky 7 in the same hand.

Winning Tie Hands	Payout

1397, 1408-09 or section 330.11 of the California Penal Code, relating to gambling establishments and any future regulatory guideline from the California Bureau of Gambling Control with respect to the operation of controlled games featuring a player-dealer position.

ROUND OF PLAY

1. No-Bust 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Dealer stands opposite of the players and in the center of the table. The casino Dealer chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clockwise fashion.
2. The game utilizes a 52-card deck with special marked "Natural" or "No Bust" aces with wild value. The aces are wild cards with the value of:
 - a. 11 ½ on first two cards with all cards with the value of 10's.
 - b. 1 or 11 with all cards with value of 2-9.
 - c. 1 or 11 with three or more cards.
3. All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed and collection fees for the Players and Player/Dealer.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place a wager in front of his/her betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the Player/Dealer and a designation whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each Player must pay the posted collection for their wager(s) in any betting circle where they have money or "action".
6. Prior to the start of play the casino dealer will take the collection fees.
7. Play commences with the casino Dealer distributing the cards to the Players and the Player/Dealer. All cards are dealt face up. The casino Dealer is the only person on the table to touch the cards. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and moving their hands in a side to side manner indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of casino Dealer in a clock-wise fashion. Each Player will be dealt one card face up. The Player/Dealer's first card will be placed in front of the casino dealer.
8. The casino Dealer will deal a second face up card to the players again starting at the Player to the first seated position to the left of the casino Dealer in a clockwise fashion. The Player/Dealer will receive a face down card in front of the casino Dealer.

9. Players must follow the below listed chart in deciding whether to hit or stand on a particular hand:

Rules For Player		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
ft & Hard 21 "Naturals" 11 Or Less		12
		13
		14
		15
		16
		17
		18
		19
		20

10. After all Players have made their best hands by indicating to the casino Dealer that they do not wish to have additional cards dealt to them the casino Dealer will turn over the Player/Dealer hole (second) card.
11. Beginning with the player to the right of the casino dealer the settling of the wagers will be done in a counter clockwise manner until all wagers have been acted upon.
12. The Player /Dealer cards will always be dealt and placed in front of the casino Dealer tray.
13. The casino Dealer continues to draw cards for the Player/Dealer if necessary until a hard 17 or higher number is reached. The Player/Dealer must follow the following hit rules:

Rules For Player/Dealer		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

14. The game does not utilize an action button to determine which player receives first action on their wager. The player-dealer's first card, which is dealt face-up, determines the starting point of action. The player-dealer position is not counted when determining where action shall begin. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer's face up card. When determining where action will begin, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen. Furthermore, wagers shall be settled in the following order: all game wagers on the table from player to player and then all Buster Blackjack Bonus Bet wagers on the table from player to player.

Once the Player/Dealer hand has been made all winners and losers are determined by comparing the numerical value of the Player's hands with the Player/Dealer hand. The Player /Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.

15. After all wagers are settled the cards are collected and discarded. The bank button is changed and after every two hands, the Player /Dealer position is rotated in a clock-wise fashion around the table.

16. The next round of play begins once the casino Dealer collects all cards from the table and places them in the discard tray. The casino Dealer will also change the Bank Button and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clockwise to the next position on the table.

The person in Player/Dealer position may not act as Player/Dealer position more than two consecutive hands or rounds of play. The opportunity to act as the Player/Dealer must be offered to all seated players after two hands or rounds of play so that a single player cannot repeatedly act as the Player/Dealer within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal.App.4th 1397, 1408-09 or section 330.11 of the California Penal Code relating to gambling establishments and any future regulatory guideline from the California Bureau of Gambling Control or the California Gambling Control Commission with respect to the operation of controlled games featuring a Player/Dealer position.

Player/Dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited

to the amount of the Player/Dealer wager. The house never participates as a Player/Dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the Player/Dealer wager.

CHART 1A

PLAYER-DEALER Options		
Must Stand on	Must Hit on	Have Option on
Hard 17 or more	Soft 17 or less	No Options

A "Soft" hand is achieved when a hand contains an ace or a joker with a combination of two or more cards that add up to 17, and the ace may be counted as either 1 or 11 and the joker may be counted as either 2 or 12.

A "Hard" hand is achieved when a hand contains any combination of three or more cards adding up to 17. In the event that the hand includes an ace, the ace is counted as 1, not 11. If the hand includes the joker, the joker is counted as 2, not 12.

- If a player has a "Natural 22" ("joker" and "10"), he/she has two options:
 - The player can be paid on the Blackjack Ante with 6 to 5 odds, and the game will be over for the player; or
 - The player can choose to play Poker with the hand instead of being paid out, they will be paid according to the "How Winners are Determined and Paid" chart below for Poker.
- The Blackjack wagers are settled at this point in the game according to the rules below.
- Upon the completion of the Blackjack hand, the house dealer will collect all cards dealt during the Blackjack portion of the game unless the player has placed a 7-Card Bonus wager. If the player has placed a 7-Card Bonus wager the casino dealer will collect only the cards dealt because the player requested a "hit", leaving the initial two cards dealt to the player.
- If no players in the game chose to play Blackjack with their hand, the player-dealer will automatically turn over their initial 2 cards dealt and hit or stay as if they were playing Blackjack. The player-dealer would then continue by playing Poker.
- To start the Poker portion of the game the house dealer will push his/her initial 2 cards in the middle of the table as community cards. The house dealer will draw more cards on the table if the player-dealer has less than 5 cards. If the player-dealer has more than 5

2 Way Winner

cards after the Blackjack hands (e.g., 2, 3, A, 8, 2, 10), the house dealer will use only the first 5 cards as the community cards. The “10,” in this example will be burned.

- The house dealer will deal the player-dealer 2 more cards from the remaining deck as his/her hole cards and put the remaining cards in the discard rack.
- The house dealer will then evaluate each player's hand against the player-dealer's hand. The best possible five-card hand wins according to the Poker hand ranking previously explained. The Poker wagers and Blackjack Ante are now settled according to the rules below.

Action

All action shall begin with the player to the left of the player-dealer position, moving clockwise around the table. No action button shall be utilized. Wagers will be settled in the following order from player to player, starting with the player in position 1: the Blackjack Ante, then the Blackjack Play wager, then the Poker Ante, then the Poker Play wager, and then the 7-Card Bonus. The Blackjack Ante and the Blackjack Play wager will be paid before the Poker portion begins. The Poker Ante, Poker Play wager, and 7-Card Bonus will be paid after the Poker portion ends. The player-dealer will first collect all losing wagers and then pay all winning wagers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

How Winners are Determined and Paid **Blackjack**

 - The player-dealer will pay all players' wagers even money except if a player gets a “Natural 22” which will be paid 6 to 5.
 - The second highest hand is a “joker 22”. This consists of a player getting 22 with more than two cards, including a joker, this hand beats all other Blackjack hands except a “natural 22.” The “joker 22” pays 1 to 1 on all wagers except the Poker Ante, which will be a push.
- **Push**
 - If the player and the player-dealer both have a “Natural 22” or have the same count the game is a push.
- **Losing Hand**
 - If a player's total is more than a “Natural 22,” and the player-dealer's total is a “Natural 22” or less, the player loses the hand. The player-dealer will collect all players' wagers including the Poker Ante.

Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

1. When first opening a game, the dealer shall spread the entire deck (minus the top and bottom card) across the poker table, so player can draw one card each, starting with the player to the immediate left of the house dealer. The player with the highest ranked card shall receive a flat white disk with the word "dealer" on it (ties will be settled by suit, from highest to lowest: spades, hearts, diamonds, and clubs). The house dealer will then reshuffle the cards. The dealer button is used to visually designate which player is in the dealer position (in theory) for that hand.
 - a. The dealer button shall rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the last right of action on all rounds of play except for the first round, where the big blind shall have the right of last action.
2. The game utilizes two blinds, a small blind and a big blind. The small blind and big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall be required to post the small blind. Additionally, the player to the immediate left of the player that was required to post the small blind shall be required to place the big blind. The small blind and big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards.
 - a. Both blinds are pre-determined based on the posted table limit. The blind wagers shall be placed in the designated wagering area, referred to as "the pot."
 - b. Action on the first round of betting will begin to the player to the left of the big blind.
 - c. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - d. The small blind and big blind will rotate from player to player around the table clockwise after each round of play.
3. Once the blind wagers have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the player to the left of the dealer button, the player who was required to place the small blind, and continuing clockwise around the table until all players have four cards face-down.
4. Once each player has received their four cards, the first round of betting will occur. Players are given the following options, starting with the player to the left of the big blind and continuing clockwise around the table:
 - a. Place a wager that is equal to the amount of the big blind referred to as a "call", meaning to match the amount wagered by another player;

Double Board Omaha

- b. Place their four cards face-down into the center of the table, referred to as a "fold." 5. After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.
 6. The house dealer shall then take the top card of the deck and place it face-down in the discard pile without exposing it, referred to as a "burn" card.
 7. The house dealer shall then take the next three cards from the top of the deck and place them face-up on the table simultaneously, which is referred to as "the flop," for the first board.  - b. Stand pat.
 - c. Once an active player has discarded their cards or chosen to stand pat, they cannot change the amount of cards being discarded unless:
 - i. No cards have been dealt off the deck in response to the player’s request (including the burn card); or
 - ii. If no active player has acted on their hand.
 - d. If an active player or the house dealer is asked how many cards the active player drew by another active player, that active player or the house dealer are obligated to respond until there has been action after the draw. Once there is any action after the draw, that active player and the house dealer are no longer obligated to respond.

16. The house dealer will burn the top card.
17. The house dealer will then announce how many cards each active player has discarded, and begin to replace each active players' cards consecutively starting with the first active player to the left of the dealer button.
18. Once the house dealer has replaced all the discards, the house dealer will collect all of the discarded cards and place them face-down into the discard pile. This will also signal the start of the third round of betting.
19. All active players who called all wagers and did not fold their hand will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Fold their hand according to the rules used in the previous round of play; or
 - b. Call a wager according to the rules used in the previous round of play; or
 - c. Place a wager within the posted table limits; or
 - d. Raise the previous wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
20. After all active players have acted in turn and either called all bets or folded their hand, the house dealer will move all wagers into the pot.
21. Starting with the first active player to the left of the dealer button and continuing clockwise, the house dealer will ask each active player to discard any unwanted cards. Cards will only be replaced after all active players have discarded in turn.
 - a. An active player may choose to discard 1, 2, 3, 4 or all 5 cards by placing them face-down into the center of the table.
 - i. However if all five cards are discarded, this does not constitute a fold.
 - b. Stand pat.
 - c. Once an active player has discarded their cards or chosen to stand pat, they cannot change the amount of cards being discarded unless:
 - i. No cards have been dealt off the deck in response to the player's request (including the burn card); or
 - ii. If no active player has acted on their hand.
 - d. If an active player or the house dealer is asked how many cards the active player drew by another active player, that active player or the house dealer are obligated to respond until there has been action after the draw. Once there is any action after the draw, that active player and the house dealer are no longer obligated to respond.
22. The house dealer will burn the top card.
23. The house dealer will then announce how many cards each active player has discarded, and begin to replace each active players' cards consecutively starting with the first active player to the left of the dealer button.
24. Once the house dealer has replaced all the discards, the house dealer will collect all of the discarded cards and place them face-down into the discard pile. This will also signal the start of the fourth and final round of betting.
25. All active players who called all wagers and did not fold their hand will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Fold their hand according to the rules used in the previous round of play; or
 - b. Call a wager according to the rules used in the previous round of play; or
 - c. Place a wager within the posted table limits; or
 - d. Raise the previous wager according to the rules used in the previous round of play; or

26. After the fourth and final round of betting has been completed, the house dealer will move all wagers into the pot.

27. All active players will then enter into a showdown with each other and compare their hands.

NOTE: *During the play of the game, if there are not enough cards left in the deck for all active players to receive cards from the first round of betting up to the final round of betting, the house dealer will deal each active player cards until there are not enough cards left in the deck to give each active player a card. The house dealer will combine the burn cards and the discard pile (not using the discards from the current round), scramble and shuffle per house procedures, re-cut, re-burn, and complete the draw starting from the last position the house dealer was at the time the house dealer ran out of cards.*

1. *The house dealer may not use the last card from the unused portion of the deck, known as the "stub," unless the stub will be used to replace the final discarded card for the final round of draws or needs to be used per the below guidelines:*
 - a. *If there are not enough cards in the discard pile combined with burn cards to complete all active players' hands, the stub will be shuffled with the burn card and all discarded cards from the active players whose draws were replaced (i.e. there are 7 active players going to the draw, and active Players 1-6 have all their cards completely replaced, and cards still need to be replaced for active Player 7. The house dealer would take the bottom card, the burn card, and the discarded cards from Players 1-6 only, reshuffle those cards, and continue to deal).*
2. *The house dealer will deal out the remaining cards to any player who does not have a five-card hand.*
3. *The house dealer will then collect all discarded cards from the discard round and begin a new discard pile.*
4. *Also, the house dealer will replace any missing burn cards from the discard pile to keep track of the betting round.*

How Winners are Determined and Paid

The following will apply for determining the active player(s) who wins the pot. In the instance of multiple winners, if there are an odd number of chips, the odd chips will be awarded to the player closest to the left of the dealer button:

- If only one active player is left in the game at the end of any betting round, the entire pot will be awarded to that player.
- A player is eligible to win both the high hand portion of the pot as well as the low hand portion of the pot if they have the highest ranked five-card hand and the lowest ranked qualifying five-card hand.
- If there is no qualifying five-card low hand, as described above, the entire pot will be awarded to the player with the highest ranked five-card poker hand, according to the hand and card rankings shown above. All other players will lose.
- If there is no qualifying five-card high hand, the entire pot will be awarded to the player with the highest ranked five-card low hand, according to the hand and card ranking shown above. All other players will lose.
- If there is a qualifying five-card high and five-card low hand, as described above, the pot will be divided equally in half, with half of the pot being awarded to the player with the highest ranked five-card hand and the other half of the pot being awarded to the player with the lowest ranked qualifying five-card hand.
- In the event more than one player has the highest ranking five-card hand and there is not a qualifying low five-card hand, the pot will be split equally among all players with the highest ranked five-card poker hand.

Archie

- In the event more than one player has the same qualifying low ranking five-card hand and there is not a qualifying high five-card hand, the pot will be split equally among all players with the qualifying low ranked five-card hand.
- In the event more than one player has the highest ranking five-card hand and there is a qualifying five-card low hand, the pot will be divided equally in half, with half of the pot being split equally among all players with the “highest” ranked five-card poker hand and the other half of the pot being split equally among all players with the qualifying “low” hand.
- In the event there is no qualifying five-card high hand or five-card low hand, the pot would go to the best non-qualifying high hand. If there is more than one player with the same highest ranking five-card, the pot will be split equally among all players with the highest ranked five-card poker hand.

Super 7 Card Stud Hi/Lo

Type of Game

The players of Super 7 Card Stud Hi/Lo play against each other for “the pot” of money on the table. The game does not utilize a player-dealer position, it is a Poker game. The gambling enterprise does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

The object of the game is for players to form a five-card poker hand that ranks higher or lower than the other player's five-card poker hands. Players may use any combination of their three face-down cards, known as “hole” cards and their four face-up cards, known as their “board” cards to make their hand. When making a five-card low hand and a five-card high hand, a player is not required to use the same hole cards and/or board cards to complete each hand.

Description of the Deck and Number of Decks Used

The game will be played using one standard 52-card deck and no joker. The 52-card deck will be manually shuffled, or by machine, cut and dealt by the house dealer.

Card Values and Hand Rankings

The rank of each card used in Super 7 Card Stud Hi/Lo when forming a five-card high hand, in order of highest to lowest rank, will be: ace, king, queen, jack, 10, 9, 8, 7, 6, 5, 4, 3 and 2. All suits will be considered equal in rank. An ace will be considered low any time the ace begins a straight or a straight flush.

Five-Card Low Hand Rankings – To make a qualifying five-card low hand, a player must have an 8 high or lower, meaning the five cards used to form the player's low hand cannot contain a card with a value of 9 or higher.

- Additionally, when determining if a player has a qualifying five-card low hand, straights and flushes do not disqualify the player's hand if all other requirements are met
- However, if the player has a pair or higher in their low hand, the hand does not qualify
- The lowest possible five-card poker hand is 5, 4, 3, 2 and ace; this is called a "wheel"
- If multiple players have qualifying five-card low hands, the winning low hand is determined by comparing the highest card of each players' five-card hand, the lowest high card would be the winning hand

Example: A hand of 7, 6, 4, 3 and ace is lower than 8, 5, 4, 3 and 2.

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table which will accommodate up to eight seated positions for patrons. Each seated position at the table will have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

Note: In the event that there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card. This card is mixed with the burn cards, discarded cards, folded cards and any cards burned from the deck due to a premature burn and deal (this occurs when the house dealer acts by burning a card before an active player has completed their action). The house dealer then scrambles and cuts these cards, burns the top card and delivers the remaining face-down cards, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn a card, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.

1. Before the start of any round of play, each player will be required to put in a pre-determined amount of money to participate in the coming hand, this is called the "ante".
 - a. If a player chooses not to participate in the next round, that player needs not to ante and the house dealer will not deal that player in the round.
2. Once all participating players in that round have placed an ante, the house dealer will move all player antes into the pot.

Super 7 Card Stud Hi/Lo

3. Once the antes have been placed in the pot, the house dealer will deal one card face-down to each player, starting with the first active player to the left of the house dealer and will continue clockwise around the table until all active players have three cards face-down. The house dealer will then deal one card face-up to each active player, starting with the first active player to the left of the house dealer and will continue clockwise around the table until all players have one card face-up, for a total four cards, three cards face-down and one card face-up.
 - a. The players' cards that are face-down are called "hole cards".
 - b. The player's card that is face-up is called the "door card".
4. Once players have received their initial four cards, the first round of betting will occur.
 - a. Action will start with the player with the lowest ranked door card by suit, if necessary. The suit rankings from highest to lowest will be as follows: spades, hearts, diamonds and clubs.
 - i. That player must either place a pre-determined amount of money called the "bring-in" or place a wager equal to the amount of the smaller posted table limit.
 - b. The following players starting the to the left of the bring-in player, may:
 - i. Place a wager that is equal to the amount that the bring-in player made or "call" a wager, meaning to match the amount wagered by another player; or
 - ii. Place the face-up card face-down into the center of the table, with their other three face-down cards, referred to as a "fold". The hand will be kept face-down and will be collected by the house dealer, who will then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play; or
 - iii. Place a wager equal to the amount that the bring-in player made as well as an additional amount within the posted table limit, referred to as a "raise." If only the pre-determined bring-in amount was wagered, a player may only place a wager, that when added to the pre-determined bring-in amount, equals the smaller posted table limit; or
(**Example:** The bring-in would be \$1 for \$4-\$8 limit, so when Player A brings-in for \$1, Player B may only complete to \$4)
 - iv. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering (a complete is not considered a raise), unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises.
5. After all players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
6. The house dealer will then ask for all discards, each active player must discard one of their hole cards prior to receiving additional face-up cards.
 - a. After this process, all active players will have a total of three cards, two cards face-down and one card face-up.
7. The house dealer will then take the top card of the deck and place it in the discard pile without exposing it, referred to as a "burn".
8. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's face-up card and will continue until all active players have a second card face-up. Once all active players have a total of four cards (two face-up and two face-down), the second round of betting, also known as "fourth street", will occur.
9. All active players that have called all wagers and did not fold their hand, will be given the following options, starting with the first active player who has the highest ranked cards face-up as described in the Hand Rankings above:
 - a. Place the smaller limit wager according to the established table limits; or

10. After all active players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
11. The house dealer will then burn a card.
12. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's two face-up cards and will continue until all active players have a third card face-up. Once all active players have a total of five cards (three face-up and two face-down), the third round of betting, also known as “fifth street”, will occur.
13. All active players that called all wagers and did not fold their hand, will be given the following options, starting with the active player who has the highest ranked cards face-up as described in the Hand Rankings above:
- a. Place the larger limit wager according to the established table limits; or
 - b. Check according to the rules and guidelines used in the previous round of play; or
 - c. Call a wager according to the rules and guidelines used in the previous round of play; or
 - d. Fold their hand according to the rules and guidelines used in the previous round of play; or
 - e. Raise the pot according to the rules and guidelines used in the previous round of play.
14. After all active players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
15. The house dealer will then burn card.
16. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's three face-up cards and will continue until all active players have a fourth cards face-up. Once all active players have a total of six cards (four face-up and two face-down), the fourth round of betting, also known as “sixth street”, will occur.
17. All active players that called all wagers and did not fold their hand, will be given the following options, starting with the active player who has the highest ranked up-cards as described in the Hand Rankings above:

20. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's four up-cards and will continue until all active players have third card face-down. Once all active players have a total of seven cards (four face-up and three face-down), the fifth and final round of betting, also known as “seventh street”, will occur.
21. All active players that called all wagers and did not fold their hand, will be given the following options, starting with the active player who has the highest ranked cards face-up as described in the Hand Rankings above:

23. All remaining active players will then enter into a showdown with each other and compare their hands.

How Winners are Determined and Paid

Players may use any five of their own seven cards dealt to them during the round of play to make the highest five-card poker hand. The following will apply for determining which player wins the pot:

- In the event there is one qualifying five-card high hand and no qualifying five-card low hand, as described above, the entire pot will be awarded to the player with the highest ranked five-card poker hand, according to the hand and card rankings shown above. All other players will lose
- In the event there is both a qualifying five-card high hand and a qualifying five-card low hand, as described above, the pot will be divided equally in half, with half of the pot being awarded to the player with the highest ranked five-card high hand and the other half of the pot being awarded to the player with the lowest qualifying five-card hand
- Furthermore, a player is eligible to win both the high hand portion of the pot as well as the low hand portion of the pot if they have the highest ranked five-card hand and the lowest qualifying five-card hand
 - A player does not have to use the same cards to win both pots
- In the event that more than one player has the highest ranking five-card high hand and there is not a qualifying five-card low hand, the pot will be split equally among all players with the highest ranked five-card poker hand
- In the event that more than one player has the highest ranking five-card high hand and more than one player has the highest ranking qualifying five-card low hand, the pot will be divided equally in half, with half of the pot being split equally among all players with the highest ranked five-card hand and the other half of the pot being split equally among all players with the qualifying five-card low hand
- In the instance that there are an odd number of chips, the odd chips will be awarded to the player with the highest card in their hand by suit

Super 7 Card Stud

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table which will accommodate up to eight seated positions for patrons. Each seated position at the table will have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

Note: *In the event that there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card. This card is mixed with the burn cards, discarded cards, folded cards and any cards burned from the deck due to a premature burn and deal (this occurs when the house dealer acts by burning a card before an active player has completed their action). The house dealer then scrambles and cuts these cards, burns the top card and delivers the remaining face-down cards, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn a card, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

1. Before the start of any round of play, each player will be required to place a pre-determined amount of money to participate in the coming hand; this is called the "ante."
 - a. If a player chooses not to participate in the next round, that player needs not to ante and the house dealer will not deal that player in the round.
2. Once all participating players in that round have placed an ante, the house dealer will move all player antes into the pot.
3. Once the antes have been placed in the pot, the house dealer will deal one card face-down to each player, starting with the first active player to the left of the house dealer and will continue clockwise around the table until all active players have three cards face-down. The house dealer will then deal one card face-up to each active player, starting with the first active player to the left of the house dealer and will continue clockwise around the table until all players have one card face-up, for a total four cards, three cards face-down and one card face-up.
 - a. The players' cards that are face-down are called "hole cards".
 - b. The player's card that is face-up is called the "door card".
4. Once players have received their initial four cards, the first round of betting will occur.
 - a. Action will start with the player who has the lowest ranked door card by suit, if necessary. The suit rankings from highest to lowest will be as follows: spades, hearts, diamonds and clubs.
 - i. That player must either put in a pre-determined amount of money called the "bring-in" or place a wager equal to the amount of the smaller posted table limit.
 - b. The following players starting to the left of the bring-in player, may:
 - i. Place a wager that is equal to the amount that the bring-in player made or "call" a wager, meaning to match the amount wagered by another player;
 - ii. Place the face-up card face-down into the center of the table, with their other three face-down cards, referred to as a "fold." The hand will be kept face-down and will be collected by the house dealer, who will then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play;

Super 7 Card Stud

- iii. Place a wager equal to the amount that the bring-in player made as well as an additional amount within the posted table limit, referred to as a “raise.” If only the pre-determined bring-in amount was wagered, a player may only place a wager, that when added to the pre-determined bring-in amount, equals the smaller posted table limit.
(Example: The bring-in would be \$1 for \$4-\$8 limit, so when Player A brings-in for \$1, Player B may only complete to \$4)
 - iv. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering (a complete is not considered a raise), unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises.
5. After all players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
 6. The house dealer will then ask for all discards, each active player must discard one of their hole cards prior to receiving additional face-up cards.
 - a. After this process, all active players will have a total of three cards, two cards face-down and one card face-up.
 7. The house dealer will then take the top card of the deck and place it in the discard pile without exposing it, referred to as a “burn”.
 8. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player’s face-up card and will continue until all active players have a second card face-up. Once all active players have a total of four cards (two face-up and two face-down), the second round of betting, also known as “fourth street”, will occur.
 9. All active players that have called all wagers and did not fold their hand, will be given the following options, starting with the first active player who has the highest ranked cards face-up as described in the Hand Rankings above:
 - a. Place the smaller limit wager according to the established table limits; or
 - b. Do not make a wager, referred to as a “check”, with the option to call or raise a wager by another player; or
 - c. Call a wager according to the rules and guidelines used in the previous round of play; or
 - d. Fold their hand according to the rules and guidelines used in the previous round of play; or
 - e. Raise the pot according to the rules and guidelines used in the previous round of play.
 10. After all players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
 11. The house dealer will then burn a card.
 12. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player’s two face-up cards and will continue until all active players have a third card face-up. Once all active players have a total of five cards (three face-up and two face-down), the third round of betting, also known as “fifth street”, will occur.
 13. All active players that called all wagers and did not fold their hand, will be given the following options, starting with the active player who has the highest ranked cards face-up as described in the Hand Rankings above:
 - a. Place the larger limit wager according to the established table limits; or
 - b. Check according to the rules and guidelines used in the previous round of play; or
 - c. Call a wager according to the rules and guidelines used in the previous round of play; or
 - d. Fold their hand according to the rules and guidelines used in the previous round of play; or

The house dealer will place this card next to the player's three face-up cards and will continue until all active players have a fourth cards face-up. Once all active players have a total of six cards (four face-up and two face-down), the fourth round of betting, also known as "sixth street", will occur.

20. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's four up-cards and will continue until all active players have third card face-down. Once all active players have a total of seven cards (four face-up and three face-down), the fifth and final round of betting, also known as "seventh street", will occur.
21. All active players that called all wagers and did not fold their hand, will be given the following options, starting with the active player who has the highest ranked cards face-up as described in the Hand Rankings above:
 - a. Place the larger limit wager according to the established table limits; or
 - b. Check according to the rules and guidelines used in the previous round of play; or

Description of Table Used and Total Number of Seated Positions

The game will be played using a standard poker table or small round table, which will accommodate up to four seated positions. However, in a four-handed game, only three players will receive a hand and will be actively playing. When four players are seated at the table, the player that has the dealer button will not be eligible to play, while the other three players clockwise around the table from that player will receive cards. The fourth player will become eligible during the next round of play when the dealer button rotates. The fourth player may also be eligible to participate if one of the other three players chooses not to participate during that round of play. The settling of hands will follow the same guidelines below. When there are only two players at a table, one player may elect to play two hands. If a player plays two hands during a round, their hands will only be compared to the other player's hand.

Dealing Procedures and Round of Play

1. The game will utilize a flat white disk with the words "dealer button" on it to visually designate which player is in the dealer position (in theory) for that hand.

 - c. In between hands however, a player is free to re-buy or add-on so long as their entire stack does not then exceed the maximum buy-in.

Point System

The settlement of wagers is based on points awarded for each hand. Each of the three segments is worth one point, which has a monetary value depending on the table limit. When segments are being compared between two players, as described in the order above, the player who has the highest ranking hand for each segment wins one point from their opponent(s) and will be paid according to the monetary value of one point. If a segment has the same exact rank between two players, it results in a tie (push), and no point or wager is exchanged.

Points are then multiplied by the value pre-determined by the table, known as "konditions". That amount will be paid from each player's table stakes.

In addition to players winning according to the Point System described above, if a player were to have a higher ranked hand in each of the three segments against another player, that player will receive three extra points (for a total of six points), known as a "clean sweep".

Foul Hand

A player that fails to set their hand in the proper ranking order when setting their five-card back hand, five-card middle hand, and three-card front hand, according to the rules above, is referred to as a “Foul Hand”. When a player has a foul hand, that player must pay a penalty to each player. The penalty will be six points to each player. No matter which segment has been fouled, the whole hand will be considered fouled. Additionally, the player with the foul hand will also be required to pay a player if they are eligible for bonus points according to the Bonus System below. However, the player with the foul hand is not eligible for bonus points according to the Bonus System below and that player’s participation in the hand is over.

Example of a foul hand:

The front hand (a pair of aces) ranks higher than the middle hand (a pair of jacks).	A	A	7		
	♣	♠	♣		
	J	J	K	8	4
	♦	♠	♠	♥	♠
	5	5	5	Q	Q
	♠	♥	♣	♣	♦

Bonus System

Players may be eligible for additional points when comparing their segments against other players’ segments if they make certain hands in their five-card back hand, their five-card middle hand, or their three-card front hand, as shown below. A player earns one point for each winning segment, and if a “bonus” hand is present, points are added on the bonus hand. Bonus points are earned as follows:

	Top Segment	Middle Segment	Bottom Segment
Pair of 6s	1 point	N/A	N/A
Pair of 7s	2 points	N/A	N/A
Pair of 8s	3 points	N/A	N/A

Bonus points may be awarded in addition to the other points awarded for winning a segment or Clean Sweep. In order to get the bonus for each segment, as shown above, the following requirements must be met:

- Players need not win the segment to win the bonus points.
- If a player has a qualifying bonus hand but loses the segment, they will still be awarded the bonus points.
- Bonus hand values are always additional points.
- Fouled hands will not be awarded the bonus points.

Example: if a player wins three out of three segments and has four of kind in the back, that player will win three point for three segments, the three-point bonus for winning all three segments, and ten points for the four of a kind in the back for a total of sixteen points.

Fantasy Land

A mandatory Fantasy Land is triggered if a player gets a pair of queens or better, as their front hand segment without fouling. For the next hand, the dealer button will not advance forward, as all players who were playing when the Fantasy Land was triggered must continue playing. On that next hand, the player that is in Fantasy Land receives 14 cards (their initial five cards, then nine additional cards once the other players have received their initial five cards) dealt face down. The player must then place 13 cards, face-down, optimally into their 3 hands and discard the last card. To stay in Fantasy Land a player must make a straight flush or quads on the bottom hand, a full house or better in the middle, or trips on top. If a player stays in Fantasy Land, they must make a verbal announcement to the other players in the game.

Badugi

In the event that there are not enough cards to distribute to the remaining active players on any given draw, the house dealer will combine the burn cards and the discard pile (not using the discards from the current round). The house dealer will then scramble, shuffle per house procedures, re-cut, re-burn, and complete the draw starting from the last position the house dealer was at the time the house dealer ran out of cards. The house dealer will not use the last card from the unused portion of the deck, known as the “stub”, unless that card will be used to replace the final discarded card for the final round of draws. The house dealer will then collect all discarded cards from that discard round and begin a new discard pile. The house dealer will also replace any missing burn cards from the discard pile to keep track of the betting round.

Dealing Procedures and Round of Play

1. When first opening a game, the dealer shall spread the entire deck (minus the top and bottom card) across the poker table, so player can draw one card each. There is no specific order of the draw, all active players can draw at one time. The player with the highest ranked card shall receive the flat white disk with the word “dealer” on it.
 - a. In the result of a tie, the player with the higher ranked card by suit will receive the dealer button. The suit rankings from highest to lowest shall be as follows: spades, hearts, diamonds, and clubs.
2. The game shall utilize a flat white disk with the word “dealer” on it to visually designate which player is in the dealer position (in theory) for that hand.
 - a. The dealer button shall rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the last right of action on all rounds of play except for the first round, where the big blind shall have the right of last action.
3. The game utilizes two blinds, a small blind and a big blind. The small blind and big blind are used to initiate action and are positioned immediately to the left of the dealer button and posted before the house dealer deals cards.
 - a. Action on the first round of betting will begin with the first active player to the left of the big blind.
 - b. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - c. The small blind and big blind will rotate from player to player around the table clockwise after each round of play.
4. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall be the small blind position and shall be required to place the small blind. Additionally, the player to the immediate left of the player that is in the small blind position shall be in the big blind position and shall be required to place the big blind.
 - a. Both blinds are pre-determined based on the posted table limit, mandatory for the players in the small blind and big blind positions, and are used to initiate action.
 - b. Both blinds shall be placed in the center of the table, which is referred to as “the pot”.
5. Once the blinds have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the player to the left of the dealer button, which is the player that is in the small blind position, and continuing clockwise around the table until all players have four cards face-down.
6. Once each player has received their four cards, the first round of betting will occur. Players are given the following options, starting with the player to the left of the player that received the big blind button and continuing clockwise around the table:

Badugi

- a. Place their four cards face-down into the center of the table, referred to as a “fold.” The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play;
 - b. Place a wager equal to the amount of the big blind, referred to as a “call.”
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a “raise.” If a player raises the pot, all other players will have the option to call the raise, re-raise the pot by placing a wager larger than the raise within the posted table limit, or fold their hand. There is a maximum of three raises per round of betting, known as being “capped”, unless there are only two players participating during a round of betting, in which case there is no limit to the number of raises. When a raise or re-raise occurs, checking is not permitted;
 - d. Place no additional wager at this time, referred to as a “check.” This is only permitted for the player in the big blind position when all other players have called the big blind and there have been no raises.
7. After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.
 8. The house dealer shall then ask each player to discard unwanted cards in turn, starting with the player to the left of the dealer button.
 - a. A player may choose to discard 1, 2, 3, or all 4 cards by placing them face-down into the center of the table.
 - i. However if all four cards are discarded, this does not constitute a fold.
 - b. If a player does not wish to discard any of their cards, they can stand “pat.”
 - c. Once a player has discarded cards or chosen to stay pat, they cannot change the amount of cards being discarded unless:
 - i. No cards have been dealt off the deck in response to the player’s request (including the burn card) or
 - ii. No player has acted on their hand.
 - d. If a player or the house dealer is asked how many cards the player drew by another active player, that player or the house dealer are obligated to respond until there has been action after the draw. Once there is any action after the draw, that player and the house dealer are no longer obligated to respond.
 9. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a “burn.”
 10. The house dealer will then announce how many cards each player has discarded, and begin to replace each players’ cards consecutively starting with the player to the left of the dealer button.
 11. Once the dealer has replaced all cards to the active players, the house dealer shall collect all of the discarded cards and place them face-down into the discard pile. This will also signal the start of the second round of betting.
 12. All active players that called all wagers and did not fold their hand, shall be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the rules and guidelines used in the previous betting round;
 - b. Fold their hand according to the rules and guidelines used in the previous betting round;
 - c. Do not make a wager, called a “check”, with the option to call or raise a wager by another player;

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard poker table which shall accommodate up to eight seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

- 1) Before the start of any round of play, each player will be required to put in a predetermined amount of money to participate in the coming hand, this is called the “ante.”
 - a. If a player chooses not to participate in the round, that player needs not to ante, and the house dealer will not deal that player in the round.
- 2) Once all participating players in that round have placed their ante, the house dealer shall move all player antes into the pot.
- 3) Once the antes have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the active player to the left of the house dealer and will continue clockwise around the table until all players have two cards face-down. The house dealer will then deal one card face-up to each player, starting with the active player to the left of the house dealer and will continue around the table until all players have one face-up card, for a total of three cards, two cards face-down and one card face-up.
 - a. The players’ face-down cards are called “hole cards.”
 - b. The players’ face-up cards are called “door cards.”

- 4) Once each player has received their initial three cards, the first round of betting will occur.
 - a. Action will start with the player with the highest ranked door card by suit, if necessary based on the Deuce-to-Seven Lowball hand ranking chart above. The rankings of suits when determining action, from highest to lowest shall be; spades, hearts, diamonds, and then clubs.
 - i. That player must either put in a pre-determined amount of money called the “bring-in; or
 - ii. Place a wager equal to the amount of the smaller posted table limit.
 - b. The following players starting to the left of the bring-in player, may:
 - i. Place a wager that is equal to the amount that the bring-in player made or “call” a wager, meaning to match the amount wagered by another player; or
 - ii. Place a wager equal to the amount that the bring-in player made as well as an additional amount within the posted table limit, referred to as a “raise.” If only the pre-determined bring-in amount was wagered, a player may only place a wager, that when added to the pre-determined bring-in amount, equals the smaller posted table limit. (**Example:** the bring-in would be \$1 for \$4-\$8 limit, so when Player A brings-in for \$1, Player B may complete to \$4); or
 - iii. Call the raise, re-raise, or fold their hand (described below). There is a maximum of three raises per round of wagering, known as a “cap” (a complete is not considered a raise), unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises; or
 - iv. The player in the “bring-in” position may “check,” meaning they do not wish to place an additional wager. However, if there has been a raise; they must call the amount raised; raise or re-raise by placing an additional wager (as long as the pot has not been capped yet); or
 - v. Place the face-up card face-down into the center of the table, with their other two face-down cards, referred to as a “fold.” The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play.
- 5) After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.
- 6) The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a “burn.”
- 7) The house dealer shall then take the next card, from the top of the deck, and place it face-up next to the first active player’s face-up card to the house-dealer’s left, and will continue until all active players have a second face-up card. - 22) All active players shall then enter into a showdown with each other and compare their hands.

Note: *In the event that there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card. This card is mixed with the burn cards, folded cards, and any cards burned from the deck due to a premature burn and deal (this occurs when the house dealer acts by burning a card before an active player has completed their action). The house dealer then scrambles and cuts these cards, burns the top card, and delivers the remaining cards as normal, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn a card, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

- 20) All active players that called all wagers and did not fold their hand, shall be give the following options, starting with the active player who has the lowest ranked face-up cards as described in the Ace-to-Five Lowball hand ranking chart above:
- Do not make a wager, referred to as a “check,” with the option to call or raise a wager by another player. This is only permitted if no other player has raised. If a raise or re-raise occurs, a player will be required to call the raise, re-raise or fold their hand; or
 - Place the larger limit wager according to the established table limits; or
 - Call a wager according to the rules and guidelines used in the previous round of play; or
 - Fold their hand according to the rules and guidelines used in the previous round of play; or
 - Raise the pot according to the rules and guidelines used in the previous round of play.
- 21) After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.
- 22) All active players shall then enter into a showdown with each other and compare their hands.

Note: *In the event that there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card. This card is mixed with the burn cards, folded cards, and any cards burned from the deck due to a premature burn and deal (this occurs when the house dealer acts by burning a card before an active player has completed their action). The house dealer then scrambles and cuts these cards, burns the top card, and delivers the remaining cards as normal, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn a card, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

The game shall be played on a standard poker table which shall accommodate up to eight seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

Note: *If there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card, which is mixed with the burn cards, folded cards, and any cards burned from the deck due to a premature burn and deal (when the dealer acts by burning a card before an active player has completed their action). The house dealer then shuffle and cuts these cards, burns again, and delivers the remaining face-down cards, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

- 1) Before the start of any round of play, each player will be required to put in a predetermined amount of money to participate in the next hand, this is called the "ante."
 - a) If a player chooses not to participate in the next round, that player needs not to ante, and the house dealer will not deal that player in the next round.

7 Card Stud Hi/Lo Regular

- 2) Once all participating players in that round have placed their ante wager, the house dealer shall move all player antes into the pot.
- 3) Once the antes have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the first active player to the left of the house dealer, and will continue clockwise around the table until all active players have two cards face-down. The house dealer will then deal one card face-up to each active player, starting with the first active player to the left of the house dealer, and will continue clockwise around the table until all active players have one card face-up, for a total of three cards, two cards face-down and one card face-up.
 - a) The player's card that is face-up is called the "door card" and will be a part of their board cards.
- 4) Once each player has received their initial three cards, the first round of betting will occur.
 - a) Action will start with the player with the highest ranked door card by suit (clubs, diamonds, hearts, then spades), if necessary.
 - i) That player must either put in a predetermined amount of money called the "bring-in" (the "bring-in" amount is predetermined by the table limits that the players are playing. If the bring-in player only places the predetermined bring-in amount, this player may only complete the bring-in to the smaller posted table limit, this is called a "complete");
 - ii) Or place a wager equal to the amount of the smaller posted table limit.
 - b) The following players starting to the left of the bring-in player, may:
 - i) Place a wager that is equal to the amount that the bring-in player made or "call" a wager, meaning to match the amount wagered by another player;
 - ii) Place the face-up card face-down into the center of the table, with their other two face-down cards, referred to as a "fold." The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play;
 - iii) Place a wager equal to the amount that the bring-in player made as well as an additional amount within the posted table limit, referred to as a "raise." If the bring-in player only places the predetermined bring-in amount, this player may only complete the bring-in to the smaller posted table limit, this is called a complete.

Note: When the player completes, they are completing the amount of the predetermined limit that the players are playing (i.e. the bring-in would be \$1 for \$4-\$8 limit, so when Player A brings in for \$1, Player B may complete to \$4).
 - iv) Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering (a complete is not considered a raise), unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises.
- 5) After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.
- 6) The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a "burn."
- 7) The house dealer shall then take the next card from the top of the deck, and place it face-up next to the first active player's face-up card (to the left of the house dealer), and will continue until all active players have a second face-up card. Once all active players have a total of four cards (two face-up and two face-down), this will signal the start of the second round of betting, also known as, "Fourth Street."
- 8) All active players that called all wagers and did not fold their hand, shall be given the following options, starting with the active player who has the lowest ranked face-up cards as described in the Low Hand Ranking above:

7 Card Stud Hi/Lo Regular

Once all active players have a total of five cards (three face-up and two face-down), this will signal the start of the third round of betting, also known as, "Fifth Street."
 - 12) All active players that called all wagers and did not fold their hand, shall be given the following options, starting with the active player who has the lowest ranked face-up cards as described in the Low Hand Ranking above:
 - a) Place the larger table limit wager according to the established table limits;

 - 15) The house dealer shall then take the next card from the top of the deck, and place it face-up next to the first active player's three face-up cards (to the left of the house dealer), and will continue until all active players have a fourth face-up card. Once all active players have a total of six cards (four face-up and two face-down), this will signal the start of the fourth round of betting, also known as, "Sixth Street."

Once all active players have a total of seven cards (four face-up and three face-down), this will signal the start of the fifth and final round of betting, also known as, "Seventh Street."

How Winners are Determined and Paid

Players must use five of any of their own seven cards dealt to them during the round of play to make the highest and lowest five-card poker hands. The following shall apply for determining which player wins the pot:

- The pot shall be divided equally in half, with half of the pot being awarded to the player with the highest ranked five-card hand and the other half of the pot being awarded to the player with the lowest ranked five-card hand.

Example: Player A has an Ace of spades, Ace of clubs, 2 of spades, 7 of hearts, 9 of clubs, 9 of diamonds, and 10 of diamonds, and Player B has the 4 of spades, 5 of diamonds, 9 of spades, 10 of clubs, jack of hearts, queen of clubs, and king of hearts. Therefore, Player A would have two pair for high (Aces and 9s with a 10 kicker) and Player B would have a King high straight (9-10-Jack-Queen-King). Player B would win the high portion of the pot. Additionally, Player A would have a 10-9-7-2-Ace for low; and Player B would have a Jack-10-9-5-4 for low. Player A would win the low portion of the pot.

- Furthermore, a player is eligible to win both the high hand portion of the pot as well as the low hand portion of the pot if they have the highest ranked five-card hand and the lowest ranked five-card hand.
 - They do not have to use the same cards to win both pots.
 - In the event that more than one player has the highest ranking hand and there is not a five-card low poker hand, the pot will be split equally among all players with the highest ranked five-card poker hand.
 - In the event that more than one player has the highest ranking hand and there is a five-card low hand, the pot will be divided equally in half, with half of the pot being split equally among all players with the highest ranked five-card poker hand and the other half of the pot being split equally among all players with the lowest ranked five-card hand.
 - In the instance that there are an odd number of chips, the odd chips shall be awarded to the player with the highest card by suit for the high hand and to the player with the lowest card by suit for the low hand.

Object of the Game

The object of the game is for players to form a five-card poker hand that ranks higher or lower than the other player's five-card poker hands. Players may use any combination of their three face-down cards, known as “hole” cards and their four face-up cards, known as their “board” cards to make their hand. When making a five-card low hand and a five-card high hand, a player is not required to use the same hole cards and/or board cards to complete each hand.

Description of the Deck and Number of Decks Used

The game will be played using one standard 52-card deck and no joker. The 52-card deck will be manually shuffled, or by machine, cut and dealt by the house dealer.

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table which will accommodate up to eight seated positions for patrons. Each seated position at the table will have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

Note: *In the event that there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card. This card is mixed with the burn cards, discarded cards, folded cards and any cards burned from the deck due to a premature burn and deal (this occurs when the house dealer acts by burning a card before an active player has completed their action). The house dealer then scrambles and cuts these cards, burns a card and delivers the remaining face-down cards, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn a card, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

1. Before the start of any round of play, each player will be required to put in a pre-determined amount of money to participate in the coming hand, this is called the "ante".

Super 7 Card Stud Hi/Lo Regular

- a. If a player chooses not to participate in the next round, that player needs not to ante and the house dealer will not deal that player in the round.
2. Once all participating players in that round have anted, the house dealer will move all player antes into the pot.
3. Once the antes have been placed in the pot, the house dealer will deal one card face-down to each player, starting with the first active player to the left of the house dealer and will continue clockwise around the table until all active players have three cards face-down. The house dealer will then deal one card face-up to each active player, starting with the first active player to the left of the house dealer and will continue clockwise around the table until all players have one card face-up, for a total four cards, three cards face-down and one card face-up.
 - a. The players' cards that are face-down are called "hole cards".
 - b. The player's card that is face-up is called the "door card".
4. Once players have received their initial four cards, the first round of betting will occur.
 - a. Action will start with the player with the lowest ranked door card by suit, if necessary. The suit rankings from highest to lowest will be as follows: spades, hearts, diamonds and clubs.
 - i. That player must either put in a pre-determined amount of money called the "bring-in" or place a wager equal to the amount of the smaller posted table limit.
 - b. The following players starting the to the left of the bring-in player, may:
 - i. Place a wager that is equal to the amount that the bring-in player made or "call" a wager, meaning to match the amount wagered by another player; or
 - ii. Place the face-up card face-down into the center of the table, with their other three face-down cards, referred to as a "fold". The hand will be kept face-down and will be collected by the house dealer, who will then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play; or
 - iii. Place a wager equal to the amount that the bring-in player made as well as an additional amount within the posted table limit, referred to as a "raise." If only the pre-determined bring-in amount was wagered, a player may only place a wager, that when added to the pre-determined bring-in amount, equals the smaller posted table limit; or
(Example: The bring-in would be \$1 for \$4-\$8 limit, so when Player A brings-in for \$1, Player B may only complete to \$4)
 - iv. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering (a complete is not considered a raise), unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises.
5. After all players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
6. The house dealer will then ask for all discards, each active player must discard one of their hole cards prior to getting any more up-cards.
 - a. After this process, all active players will have a total of three cards, two cards face-down and one card face-up.
7. The house dealer will then take the top card of the deck and place it in the discard pile without exposing it, referred to as a "burn".
8. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's face-up card and will continue until all active players have a second card face-up. Once all active players have a total of four cards (two face-up and two face-down), the second round of betting, also known as "fourth street", will occur.

10. After all players have acted in turn and either called all bets or folded their hand, the house dealer will move all player bets into the pot.
11. The house dealer will then burn a card.
12. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's two face-up cards and will continue until all active players have a third card face-up. Once all active players have a total of five cards (three face-up and two face-down), the third round of betting, also known as “fifth street”, will occur.
13. All active players that called all wagers and did not fold their hand, will be give the following options, starting with the active player who has the highest ranked cards face-up as described in the High Hand Rankings above:
 - a. Place the larger limit wager according to the established table limits; or

 - d. Fold their hand according to the rules and guidelines used in the previous round of play; or

15. The house dealer will then burn card.
16. The house dealer will then deal one card face-up, to the first active player to the left of the house dealer. The house dealer will place this card next to the player's three face-up cards and will continue until all active players have a fourth cards face-up. Once all active players have a total of six cards (four face-up and two face-down), the fourth round of betting, also known as “sixth street”, will occur.

How Winners are Determined and Paid

Players may use any five of their own seven cards dealt to them during the round of play to make the highest ranking five-card poker high hand and the highest ranking five-card low hand. The following will apply for determining which player wins the pot:

- The pot will be divided equally in half, with half of the pot being awarded to the player with the highest ranked five-card poker hand and the other half of the pot being awarded to the player with the highest ranking five-card low. All other players will lose.
- Furthermore, a player is eligible to win both the high hand portion of the pot as well as the low hand portion of the pot if they have the highest ranked five-card hand and the lowest ranked five-card hand.
 - They do not have to use the same cards to win both pots.
- In the event that more than one player has the highest ranking five-card high hand and more than one player has the highest ranking five-card low hand, the pot will be divided equally in half, with half of the pot being split equally among all players with the highest ranked five-card hand and the other half of the pot being split equally among all players with the highest ranking five-card low.
- In the instance that there are an odd number of chips, the odd chips will be awarded to the player with the highest card in their hand by suit.
 - Ranking of suits from highest to lowest will be spades, hearts, diamonds and clubs.

The ranking of “high” hands follows the game of Ace-to-Five California Lowball, and the ranking of “low” hands follows the game of Badugi. Each player will be given three opportunities to improve their hand by replacing 1, 2, 3, 4, or 5 cards currently in their hand by discarding and having new cards dealt to them. When making a five-card Ace to Five Lowball hand and a four-card Badugi hand, a player is not required to use the same hole cards and/or board cards to complete each hand.

Description of the Deck and Number of Decks Used

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table and will accommodate up to nine seated positions for patrons, although only up to seven active players may play at one time. If there are more players than seven players seated, the player(s) to the left of the big blind will not participate in a hand. For example, if there are nine seated players, the two players to the left of the big blind will sit out. The player(s) required to sit out will rotate each round. Each seated position at the table will have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

1. The game shall utilize a flat white disk with the word "dealer" on it to visually designate the player who is in the dealer position (in theory) for that hand. The dealer button shall rotate clockwise from player to player after each round of play.
 - a. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play with the exception of the first round, where the big blind shall have the right of last action.
2. The game utilizes two blinds, a "small blind" and a "big blind." The small blind and big blind are used to initiate action and are positioned immediately to the left of the dealer button. The small blind and big blind shall both be posted before any cards are dealt by the house dealer, and will visually designated with buttons with the words "Small Blind" and "Big Blind" on them.
 - a. Action on the first round of betting shall begin with the player to the left of the big blind. On all subsequent rounds, action shall begin with the first active player to the left of the dealer button.
 - b. The small blind and big blind will rotate clockwise from player to player after each round of play.
3. When first opening a game, the house dealer will shuffle, cut, and spread the entire deck (minus the top and bottom cards) across the poker table, and each active player shall draw one card. The player with the highest ranked card shall receive the dealer button.

Badacey

- a. In the event multiple active players receive a high card of the same rank (e.g., kings), ties will be settled by suit. Suit rankings from highest to lowest are as follows: spades, hearts, diamonds, and clubs.
4. Once the placement of the dealer button is resolved, the house dealer will retrieve all cards, begin the shuffle and cut requirements, and place the small blind and big blind buttons in front of the respective players.
5. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall be required to post the small blind. Additionally, the player to the immediate left of the player required to post the small blind shall be required to post the big blind.
 - a. Both blinds shall be predetermined based on the posted table limit and shall be placed into the designated wagering area, referred to as the “pot.”
6. Once both blinds have been placed in the pot, the house dealer shall deal one card face-down to each active player, starting with the player to the left of the big blind and continuing clockwise around the table until all players have five cards face-down.
7. After all active players have received and examined their five cards, the first round of betting will occur. Players are given the following options, starting with the player to the left of the big blind button and continuing clockwise around the table:
 - a. Place a wager that is equal to the amount of the big blind or “call” a wager, meaning to match the amount wagered by another player;
 - b. Place their five cards face-down in the center of the table, referred to as a “fold.” The hand shall be kept face-down and collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate in that round of play;
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a “raise;”
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, referred to as being “capped,” unless there are only two active players remaining, in which case there is no limit to the number of raises;
 - e. The player in the big blind position may “check,” meaning they do not wish to place an additional wager if there has not been a raise, call the amount that has been raised, raise or re-raise by placing an additional wager, so long as the pot has not been capped, or fold their hand.
8. After all players have acted in turn or folded their hand, the house dealer shall move all bets into the pot.
9. The house dealer shall then ask each player in turn to discard their unwanted cards, starting with the first active player to the left of the dealer button.
 - a. A player may choose to discard 1, 2, 3, 4, or all 5 cards by placing them face-down in the center of the table. Discarding all 5 cards is not considered a fold.
 - b. Players may also choose to stand “pat,” meaning they do not wish to discard any of their cards.
 - c. Once a player has discarded or chosen to stand pat, they cannot change the amount of cards being discarded, unless:
 - i. No cards have been dealt off the deck in response to the player’s request (including the burn card);
 - ii. No player has acted on their hand based on the number of cards the player requested.
 - d. If a player or the house dealer is asked how many cards another active player drew, that player and/or the house dealer is required to respond only until there has been action after the draw. Once there is any action after the draw, the player and/or the house dealer are no longer obligated to respond.

Badacey

10. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a “burn.”
11. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players’ cards in turn, starting with the first active player to the left of the dealer button.
12. Once the dealer has replaced all active players’ cards, the house dealer shall collect all discards and place them face-down in the discard pile. This will signal the second round of betting.
13. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the posted table limits;
 - b. Choose not to place a wager, referred to as a “check,” with the option to call or raise a wager by another player;
 - c. Call a wager according to the rules used for the previous round of play;
 - d. Fold their hand according to the rules used in the previous round of play;
 - e. Raise the pot according to the rules used in the previous round of play.
14. After all active players have acted in turn and called all bets or folded their hand, the house dealer shall move all bets into the pot.
15. The house dealer shall then ask each player in turn to discard their unwanted cards, starting with the first active player to the left of the dealer button.
 - a. A player may choose to discard 1, 2, 3, 4, or all 5 cards by placing them face-down in the center of the table. Discarding all 5 cards is not considered a fold.
 - b. Players may also choose to stand “pat,” meaning they do not wish to discard any of their cards.
 - c. Once a player has discarded or chosen to stand pat, they cannot change the amount of cards being discarded, unless:
 - i. No cards have been dealt off the deck in response to the player’s request (including the burn card);
 - ii. No player has acted on their hand based on the number of cards the player requested.
 - d. If a player or the house dealer is asked how many cards another active player drew, that player and/or the house dealer is required to respond only until there has been action after the draw. Once there is any action after the draw, the player and/or the house dealer are no longer obligated to respond.
16. The house dealer shall then burn the top card of the deck.
17. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players’ cards in turn, starting with the first active player to the left of the dealer button.
18. Once the dealer has replaced all active players’ cards, the house dealer shall collect all discards and place them face-down in the discard pile. This will signal the third round of betting.
19. All active players who called all wagers and did not fold their hand will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the posted table limits;
 - b. Check a wager;
 - c. Call a wager according to the rules used for the previous round of play;
 - d. Fold their hand according to the rules used in the previous round of play;

21. The house dealer shall then ask each player in turn to discard their unwanted cards, starting with the first active player to the left of the dealer button.
 - a. A player may choose to discard 1, 2, 3, 4, or all 5 cards by placing them face-down in the center of the table. Discarding all 5 cards is not considered a fold.
 - b. Players may also choose to stand “pat,” meaning they do not wish to discard any of their cards.
 - c. Once a player has discarded or chosen to stand pat, they cannot change the amount of cards being discarded, unless:
 - i. No cards have been dealt off the deck in response to the player’s request (including the burn card);
 - ii. No player has acted on their hand based on the number of cards the player requested.
 - d. If a player or the house dealer is asked how many cards another active player drew, that player and/or the house dealer is required to respond only until there has been action after the draw. Once there is any action after the draw, the player and/or the house dealer are no longer obligated to respond.
22. The house dealer shall then burn the top card of the deck.
23. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players’ cards in turn, starting with the first active player to the left of the dealer button.
24. Once the dealer has replaced all active players’ cards, the house dealer shall collect all discards and place them face-down in the discard pile. This will signal the fourth round of betting.
25. All active players who called all wagers and did not fold their hand will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the posted table limits;
 - b. Check a wager;
 - c. Call a wager according to the rules used for the previous round of play;
 - d. Fold their hand according to the rules used in the previous round of play;
 - e. Raise the pot according to the rules used in the previous round of play.
26. After the fourth and final round of betting has been completed, the house dealer shall move all wagers into the pot.
27. All active players shall then enter into a showdown and compare their hands.

NOTE: *During the play of the game, if there are not enough cards left in the deck for all active players to receive cards from the first round of betting up to the final round of betting, the house dealer will deal each active player cards until there are not enough cards left in the deck to give each active player a card. The house dealer will combine the burn cards and the discard pile (not using the discards from the current round), scramble and shuffle per house procedures, re-cut, re-burn, and complete the draw starting from the last position the house dealer was at the time the house dealer ran out of cards.*

1. *The house dealer may not use the last card from the unused portion of the deck, known as the “stub,” unless the stub will be used to replace the final discarded card for the final round of draws or needs to be used per the below guidelines:*
 - a. *If there are not enough cards in the discard pile combined with burn cards to complete all active players’ hands, the stub will be shuffled with the burn card and all discarded cards from the active players whose draws were replaced (i.e. there are 7 active players going to the draw, and active Players 1-6 have all their cards completely replaced, and cards still need to be replaced for active Player 7. The house dealer would take the bottom card, the burn card, and the discarded cards from Players 1-6 only, reshuffle those cards, and continue to deal).*

Badacey

2. *The house dealer will deal out the remaining cards to any player who does not have a five-card hand.*
3. *The house dealer will then collect all discarded cards from the discard round and begin a new discard pile.*
4. *Also, the house dealer will replace any missing burn cards from the discard pile to keep track of the betting round.*

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table and will accommodate up to eight seated positions for patrons. Each seated position at the table will have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

Note: *If there are not enough cards left in the deck for all active players to receive cards to complete the hand, the house dealer will deal all the cards except the last card, which is mixed with the burn cards, folded cards, and any cards burned from the deck due to a premature burn and deal (when the dealer acts by burning a card before an active player has completed their action). The house dealer then shuffle and cuts these cards, burns again, and delivers the remaining face-down cards, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

1. Before the start of any round of play, each player will be required to put in a predetermined amount of money to participate in the coming hand, this is called the "ante."
 - a. If a player chooses not to participate in the round, that player needs not to ante, and the house dealer will not deal that player in the round.
2. Once all participating players in that round have anted, the house dealer shall move all player antes into the pot.
3. Once all antes have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the first active player to the left of the house dealer and continuing clockwise around the table until all players have three cards face-down. The house dealer will then deal one card face-up to each player, starting with the first active player to the left of the house dealer and continuing around the table until all players have one card face-up.
 - a. The players' face-down cards are referred to as "hole cards."
 - b. The players' face-up cards are referred to as "board cards."

Super Razzdacey

4. Once each player has received their initial four cards, the first round of betting will occur.
 - a. Action will start with the player with the highest ranked door card by suit, if necessary. The rankings of suits when determining action, from highest to lowest shall be spades, hearts, diamonds, and clubs.
 - i. That player must either put in a predetermined amount of money called the “bring-in; or
 - ii. Place a wager equal to the amount of the smaller posted table limit;
 - b. The following players starting to the left of the bring-in player, may:
 - i. Place a wager that is equal to the amount that the bring-in player made or “call” a wager, meaning to match the amount wagered by another player;
 - ii. Place a wager equal to the amount that the bring-in player made as well as an additional amount within the posted table limit, referred to as a “raise.” If only the pre-determined bring-in amount was wagered, a player may only place a wager, that when added to the pre-determined bring-in amount, equals the smaller posted table limit. (**Example:** the bring-in would be \$1 for \$4-\$8 limit, so when Player A brings-in for \$1, Player B may complete to \$4); or
 - iii. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering (a complete is not considered a raise), unless there are only two players participating during a round of wagering, in which case there is no limit to the number of raises;
 - iv. The player in the “bring-in” position may “check,” meaning they do not wish to place an additional wager. However, if there has been a raise; they must call the amount raised; raise or re-raise by placing an additional wager (as long as the pot has not been capped yet);
 - v. Place the face-up card face-down into the center of the table, with their other three face-down cards, referred to as a “fold.” The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play.
5. After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.
6. The house dealer will then ask for all discards, as each active player must release one of their face-down cards before receiving any additional cards. The cards shall be placed in the discard pile.
7. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a “burn.”
8. The house dealer shall then take the next card, from the top of the deck, and place it face-up next to the first active player’s face-up card to the house dealer’s left, and will continue until all active players have a second face-up card. Once all active players have a total of four cards (two face-up and two face-down), this will signal the start of the second round of betting, also known as, “fourth street.”

Dealing Procedures and Round of Play

1. The game will utilize a flat white disc/button with the word "dealer" on it (referred to as the dealer button) to visually designate the player in the dealer position (in theory) for the hand.
 - a. The dealer button will rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the big blind position will have the right of last action.
2. The small blind and the big blind positions (each position is represented by a flat white disc/button with the phrase "small blind" and a flat white disc/button with the phrase "big blind") are used to initiate action and are positioned immediately to the left of the dealer button and their blind wagers posted before the house dealer distributes the cards.
 - a. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - b. The small blind and big blind buttons will rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, the house dealer shall spread the entire deck (minus the top and bottom card) across the poker table so the players can draw one card each. The player with the highest ranked card shall receive a flat white disk with the word "dealer" on it. The house dealer will collect the cards from the players and will then shuffle back into the deck.
 - a. The player with the highest ranked card with traditional suit rankings (spades, hearts, diamonds, and clubs) will receive the dealer button.
 - b. There is no turn or rotation order in which the players draw the card for the dealer button.

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table and will accommodate up to nine seated positions for patrons, although only up to seven active players may play at one time. If there are more players than seven players seated, the player(s) to the left of the big blind will not participate in a hand. For example, if there are nine seated players, the two players to the left of the big blind will sit out. The player(s) required to sit out will rotate each round. Each seated position at the table will have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

1. The game shall utilize a flat white disk with the word “dealer” on it to visually designate the player who is in the dealer position (in theory) for that hand. The dealer button shall rotate clockwise from player to player after each round of play.
 - a. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play with the exception of the first round, where the big blind shall have the right of last action.
2. The game utilizes two blinds, a “small blind” and a “big blind.” The small blind and big blind are used to initiate action and are positioned immediately to the left of the dealer button. The small blind and big blind shall both be posted before any cards are dealt by

Badeucey

the house dealer, and will visually designated with buttons with the words "Small Blind" and "Big Blind" on them.

- a. Action on the first round of betting shall begin with the player to the left of the big blind. On all subsequent rounds, action shall begin with the first active player to the left of the dealer button.
- b. The small blind and big blind will rotate clockwise from player to player after each round of play.
3. When first opening a game, the house dealer will shuffle, cut, and spread the entire deck (minus the top and bottom cards) across the poker table, and each active player shall draw one card. The player with the highest ranked card shall receive the dealer button.
 - a. In the event multiple active players receive a high card of the same rank (e.g., kings), ties will be settled by suit. Suit rankings from highest to lowest are as follows: spades, hearts, diamonds, and clubs.
4. Once the placement of the dealer button is resolved, the house dealer will retrieve all cards, begin the shuffle and cut requirements, and place the small blind and big blind buttons in front of the respective players.
5. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall be required to post the small blind. Additionally, the player to the immediate left of the player required to post the small blind shall be required to post the big blind.
 - a. Both blinds shall be predetermined based on the posted table limit and shall be placed into the designated wagering area, referred to as the "pot."
6. Once both blinds have been placed in the pot, the house dealer shall deal one card face-down to each active player, starting with the player to the left of the big blind and continuing clockwise around the table until all active players have five cards face-down.
7. After all active players have received and examined their five cards, the first round of betting will occur. Players are given the following options, starting with the player to the left of the big blind button and continuing clockwise around the table:
 - a. Place a wager that is equal to the amount of the big blind or "call" a wager, meaning to match the amount wagered by another player;
 - b. Place their five cards face-down in the center of the table, referred to as a "fold." The hand shall be kept face-down and collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate in that round of play;
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a "raise;"
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, referred to as being "capped," unless there are only two active players remaining, in which case there is no limit to the number of raises;
 - e. The player in the big blind position may "check," meaning they do not wish to place an additional wager if there has not been a raise, call the amount that has been raised, raise or re-raise by placing an additional wager, so long as the pot has not been capped, or fold their hand.
8. After all players have acted in turn or folded their hand, the house dealer shall move all bets into the pot.
9. The house dealer shall then ask each player in turn to discard their unwanted cards, starting with the first active player to the left of the dealer button.
 - a. An active player may choose to discard 1, 2, 3, 4, or all 5 cards by placing them face-down in the center of the table. Discarding all 5 cards is not considered a fold.
 - b. Players may also choose to stand "pat," meaning they do not wish to discard any of their cards.

Badeucey

- c. Once a player has discarded or chosen to stand pat, they cannot change the amount of cards being discarded, unless:
 - i. No cards have been dealt off the deck in response to the player's request (including the burn card);
 - ii. No player has acted on their hand based on the number of cards the player requested.
 - d. If a player or the house dealer is asked how many cards another active player drew, that player and/or the house dealer is required to respond only until there has been action after the draw. Once there is any action after the draw, the player and/or the house dealer are no longer obligated to respond.
10. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a "burn."
11. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players' cards in turn, starting with the first active player to the left of the dealer button.
12. Once the dealer has replaced all active players' cards, the house dealer shall collect all discards and place them face-down in the discard pile. This will signal the second round of betting.
13. All active players will be given the following options, starting with the first active player to the left of the dealer button:
- a. Place a wager according to the posted table limits;
 - b. Choose not to place a wager, referred to as a "check," with the option to call or raise a wager by another player;
 - c. Call a wager according to the rules used for the previous round of play;
 - d. Fold their hand according to the rules used in the previous round of play;
 - e. Raise the pot according to the rules used in the previous round of play.
14. After all active players have acted in turn and called all bets or folded their hand, the house dealer shall move all bets into the pot.
15. The house dealer shall then ask each player in turn to discard their unwanted cards, starting with the first active player to the left of the dealer button.
- a. A player may choose to discard 1, 2, 3, 4, or all 5 cards by placing them face-down in the center of the table. Discarding all 5 cards is not considered a fold.
 - b. Players may also choose to stand "pat," meaning they do not wish to discard any of their cards.
 - c. Once a player has discarded or chosen to stand pat, they cannot change the amount of cards being discarded, unless:
 - i. No cards have been dealt off the deck in response to the player's request (including the burn card);
 - ii. No player has acted on their hand based on the number of cards the player requested.
 - d. If a player or the house dealer is asked how many cards another active player drew, that player and/or the house dealer is required to respond only until there has been action after the draw. Once there is any action after the draw, the player and/or the house dealer are no longer obligated to respond.
16. The house dealer shall then burn the top card of the deck.
17. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players' cards in turn, starting with the first active player to the left of the dealer button.
18. Once the dealer has replaced all active players' cards, the house dealer shall collect all discards and place them face-down in the discard pile. This will signal the third round of betting.

 - ii. No player has acted on their hand based on the number of cards the player requested.
 - d. If a player or the house dealer is asked how many cards another active player drew, that player and/or the house dealer is required to respond only until there has been action after the draw. Once there is any action after the draw, the player and/or the house dealer are no longer obligated to respond.
22. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a "burn."
23. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players' cards in turn, starting with the first active player to the left of the dealer button.
24. Once the dealer has replaced all active players' cards, the house dealer shall collect all discards and place them face-down in the discard pile. This will signal the fourth round of betting.

27. All active players shall then enter into a showdown and compare their hands.

NOTE: *During the play of the game, if there are not enough cards left in the deck for all active players to receive cards from the first round of betting up to the final round of betting, the house dealer will deal each active player cards until there are not enough cards left in the deck to give each active player a card. The house dealer will combine the burn cards and the discard pile (not using the discards from the current round), scramble and shuffle per house procedures, re-cut, re-burn, and complete the draw starting from the last position the house dealer was at the time the house dealer ran out of cards.*

Badeucey

1. *The house dealer may not use the last card from the unused portion of the deck, known as the "stub," unless the stub will be used to replace the final discarded card for the final round of draws or needs to be used per the below guidelines:*
 - a. *If there are not enough cards in the discard pile combined with burn cards to complete all active players' hands, the stub will be shuffled with the burn card and all discarded cards from the active players whose draws were replaced (i.e. there are 7 active players going to the draw, and active Players 1-6 have all their cards completely replaced, and cards still need to be replaced for active Player 7. The house dealer would take the bottom card, the burn card, and the discarded cards from Players 1-6 only, reshuffle those cards, and continue to deal).*
2. *The house dealer will deal out the remaining cards to any player who does not have a five-card hand.*
3. *The house dealer will then collect all discarded cards from the discard round and begin a new discard pile.*
4. *Also, the house dealer will replace any missing burn cards from the discard pile to keep track of the betting round.*

Dealing Procedures and Round of Play

1. Before the start of any round of play, each player will be required to put in a predetermined amount of money to participate in the coming hand, this is called the “ante.”

Super Razz

- a. If a player chooses not to participate in the round, that player needs not ante, and the house dealer will not deal that player in the round.
2. Once all participating players in that round have placed their ante, the house dealer shall move all player antes into the pot.
3. Once all antes have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the first active player to the left of the house dealer and continuing clockwise around the table until all players have three cards face-down. The house dealer will then deal one card face-up to each player, starting with the first active player to the left of the house dealer and continuing around the table until all players have one card face-up.
 - a. The players' face-down cards are referred to as "hole cards."
 - b. The players' face-up cards are referred to as "board cards."

The house dealer then scrambles and cuts these cards, burns the top card, and delivers the remaining cards as normal, using the last card if necessary. If there are not as many cards as players remaining without a card, the house dealer does not burn a card, so that each player can receive a fresh card. If the house dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a community card will be used. The house dealer will burn a card and turn one card face-up in the center of the table. This card plays in everyone's hand.*

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard poker table which shall accommodate up to nine seated positions for patrons, although only up to seven players may play at one time (if there are more players seated, the player(s) to the left of the big blind will not participate in a hand; i.e. for eight seated players, the player to the left of the big blind will sit out). Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

1. The game will utilize a flat white disc/button with the word "dealer" on it (referred to as the dealer button) to visually designate the player in the dealer position (in theory) for the hand.
 - a. The dealer button will rotate from player to player around the table clockwise after each round of play.

Drawmaha Ace-to-Five

- b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the big blind position will have the right of last action.
2. The small blind and the big blind positions (each position is represented by a flat white disc/button with the phrase “small blind” and a flat white disc/button with the phrase “big blind”) are used to initiate action and are positioned immediately to the left of the dealer button and their blind wagers are posted before the house dealer distributes the cards.
 - a. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - b. The small blind and big blind buttons will rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, all players will be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table.
 - a. The player with the highest ranked card according to the Omaha Card Values above with traditional suit rankings (spades, hearts, diamonds, and clubs) will receive the dealer button. The cards will then be collected and shuffled back into the deck.
4. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button will receive the small blind button and the player to the immediate left of the player who received the small blind button will receive the big blind button.
 - a. Blind wagers are pre-determined, mandatory and are used to initiate action.
 - b. Blind wagers will be placed in the designated wagering area, referred to as “the pot.”
5. Once the blinds have been placed in the pot, the house dealer will deal one card face-down to each player, starting with the player to the left of the dealer button, the player who received the small blind button, and continuing clockwise around the table until all players have five cards face-down.
 - a. These initial five cards are referred to as “hole cards.”
6. Once each player has received their five hole cards, the first round of wagering will occur. Players are given the following options, starting with the player to the left of the player who received the big blind button and continue clockwise around the table:
 - a. Place a wager equal to the amount of the big blind wager, referred to as a “call”; or
 - b. Place their five hole cards face-down into the center of the table, referred to as a “fold.” The hand will be kept face-down and collected by the house dealer, who will then place them in the discard pile. A player who chooses to fold their hand will no longer participate during the round of play; or
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a “raise”; or
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, unless there are only two players participating during a round of wagering, in this case there is no limit to the number of raises; or
 - e. The player in the big blind position may “check” if no player has raised; meaning they do not wish to place an additional wager, or they may also raise by placing an additional wager.
7. After all players have acted in turn, the house dealer will move all wagers into the pot.
8. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as the “burn.”
9. The house dealer shall then take the next three cards from the top of the deck and place them face-up on the table simultaneously, referred to as “the flop.”
 - a. These are community cards and are shared by all players.

Drawmaha Ace-to-Five

10. Once the flop has been placed face-up on the table, the second round of wagering will occur.
11. All active players who called all wagers and did not fold their hand, will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager; this means to match the amount wagered by another player; or
 - e. Do not make a wager, referred to as a “check”, with the option to call or raise a wager by another player.
12. After all players have acted in turn, the house dealer shall move all wagers into the pot.
13. The house dealer shall then burn a card.
14. Starting with the first active player to the left of the dealer button and continuing clockwise, the house dealer will ask each active player to discard any unwanted cards. Cards will only be replaced after all active players have discarded in turn.
 - a. An active player may choose to discard 1, 2, 3, 4 or all 5 cards by placing them face-down into the center of the table.
 - i. However if all five cards are discarded, this does not constitute a fold.
 - ii. A player must have five cards after the draw.
 - b. If an active player does not wish to discard any of their cards, this is referred to as standing “pat.”
 - c. Once an active player has discarded their cards or chosen to stand pat, they cannot change the amount of cards being discarded unless:
 - i. No cards have been dealt off the deck in response to the player’s request; or
 - ii. If no active player has acted on their hand.
 - d. If an active player or the house dealer is asked how many cards the active player drew by another active player, that active player or the house dealer are obligated to respond until there has been action after the draw. Once there is any action after the draw, that active player and the house dealer are no longer obligated to respond.
15. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players’ cards starting with the first active player to the left of the dealer button.
16. Once the house dealer has replaced all the discards, the house dealer will collect all of the discarded cards and place them face-down into the discard pile.
17. Once all participating players have completed their option to draw, the house dealer will then take one card from the top of the deck and place it face-up on the table so there are now a total of four community cards face-up on the table, referred to as “the turn card.”
 - a. This card is also a community card and is shared by all players.
18. Once the turn card has been placed face-up on the table, the third round of wagering will occur.
19. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
20. After all players have acted in turn, the house dealer shall move all wagers into the pot.
21. The house dealer will then burn a card.

Drawmaha Ace-to-Five

22. The house dealer will then take one card from the top of the deck and place it face-up on the table so there are now a total of five community cards face-up on the table, referred to as "the river card."
 - a. This card is also a community card and is shared by all players.
23. Once the river card has been placed face-up on the table, which is the final community card, the fourth and final round of wagering will occur.
24. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
25. After the fourth and final round of wagering has been completed, the house dealer will move all wagers into the pot and begin to split the pot into two equal pots.
26. All active players will then enter into a showdown with each other and compare their hands.

NOTE: *During the play of the game, if there are not enough cards left in the deck for all active players to receive cards from the first round of betting up to the final round of betting, the house dealer will deal each active player cards until there are not enough cards left in the deck to give each active player a card. The house dealer will combine the burn cards and the discard pile, scramble and shuffle per house procedures, re-cut, re-burn, and complete the draw starting from the last position the house dealer was at the time the house dealer ran out of cards.*

1. *The house dealer may not use the last card from the unused portion of the deck, known as the "stub," unless the stub will be used to replace the final discarded card for the round of draws or needs to be used per the below guidelines:*
 - a. *If there are not enough cards in the discard pile combined with burn cards to complete all active players' hands, the stub will be shuffled with the burn card and all discarded cards from the active players whose draws were replaced (i.e. there are 7 active players going to the draw, and active Players 1-2 have all their cards completely replaced, and cards still need to be replaced for active Player 3-7. The house dealer would take the bottom card, the burn card, and the discarded cards from Players 1-2 only, reshuffle those cards, and continue to deal. This process would continue until each player has completed their draw).*
2. *The house dealer will deal out the remaining cards to any player who does not have a five-card hand.*
3. *The house dealer will then collect all discarded cards from the discard round and begin a new discard pile.*
4. *Also, the house dealer will replace any missing burn cards from the discard pile to keep track of the betting round.*

Drawmaha Hi is a split pot game comprised of five-card Omaha and Draw poker. In Drawmaha Hi, half of the pot is awarded to the highest ranking five-card Omaha hand, and the other half of the pot is awarded to the highest ranking five-card Draw poker hand. When making a five-card Draw poker hand, each player must use the same five hole cards referenced above. Each active player will be given an opportunity to improve their hole cards by replacing the cards currently in their hand with new cards, described below. This is referred to as the “draw.” An active player can win both the five-card Omaha hand and the five-card Draw poker hand.

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard poker table which shall accommodate up to seven seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

1. The game will utilize a flat white disc/button with the word "dealer" on it (referred to as the dealer button) to visually designate the player in the dealer position (in theory) for the hand.
 - a. The dealer button will rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the big blind position will have the right of last action.
2. The small blind and the big blind positions (each position is represented by a flat white disc/button with the phrase small blind and a flat white disc/button with the phrase big blind) are used to initiate action and are positioned immediately to the left of the dealer button and their blind wagers posted before the house dealer distributes the cards.
 - a. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - b. The small blind and big blind buttons will rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, all players will be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table.
 - a. The player with the highest ranked card with traditional suit rankings (spades, hearts, diamonds, and clubs) will receive the dealer button. The cards will then be collected and shuffled back into the deck.
4. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button will receive the small blind button and the player to the immediate left of the player who received the small blind button will receive the big blind button.
 - a. Blind wagers are pre-determined, mandatory and are used to initiate action.
 - b. Blind wagers will be placed in the designated wagering area, referred to as "the pot."
5. Once the blinds have been placed in the pot, the house dealer will deal one card face-down to each player, starting with the player to the left of the dealer button, the player who received the small blind button, and continuing clockwise around the table until all players have five cards face-down.
 - a. These initial five cards are referred to as "hole cards."
6. Once each player has received their five hole cards, the first round of wagering will occur. Players are given the following options, starting with the player to the left of the player who received the big blind button and continue clockwise around the table:
 - a. Place a wager equal to the amount of the big blind wager, referred to as a "call"; or

Drawmaha Hi

- b. Place their five hole cards face-down into the center of the table, referred to as a “fold.” The hand will be kept face-down and collected by the house dealer, who will then place them in the discard pile. A player who chooses to fold their hand will no longer participate during the round of play; or
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a “raise”; or
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, unless there are only two players participating during a round of wagering, in this case there is no limit to the number of raises; or
 - e. The player in the big blind position may “check” if no player has raised; meaning they do not wish to place an additional wager, or they may also raise by placing an additional wager.
7. After all players have acted in turn, the house dealer will move all wagers into the pot.
8. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as the “burn.”
9. The house dealer shall then take the next three cards from the top of the deck and place them face-up on the table simultaneously, referred to as “the flop.”
 - a. These are community cards and are shared by all players.
10. Once the flop has been placed face-up on the table, the second round of wagering will occur.
11. All active players who called all wagers and did not fold their hand, will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. “Call” a wager; this means to match the amount wagered by another player; or
 - e. Do not make a wager, referred to as a “check”, with the option to call or raise a wager by another player.
12. After all players have acted in turn, the house dealer shall move all wagers into the pot.
13. The house dealer shall then burn a card.
14. Starting with the first active player to the left of the dealer button and continuing clockwise, the house dealer will ask each active player to discard any unwanted cards. Cards will only be replaced after all active players have discarded in turn.
 - a. An active player may choose to discard 1, 2, 3, 4 or all 5 cards by placing them face-down into the center of the table.
 - i. However if all five cards are discarded, this does not constitute a fold.
 - ii. A player must have five cards after the draw.
 - b. If an active player does not wish to discard any of their cards, this is referred to as standing “pat.”
 - c. Once an active player has discarded their cards or chosen to stand pat, they cannot change the amount of cards being discarded unless:
 - i. No cards have been dealt off the deck in response to the player’s request (including the burn card); or
 - ii. If no active player has acted on their hand.
 - d. If an active player or the house dealer is asked how many cards the active player drew by another active player, that active player or the house dealer are obligated to respond until there has been action after the draw. Once there is any action after the draw, that active player and the house dealer are no longer obligated to respond.
15. The house dealer will then announce how many cards each player has discarded, and begin to replace each active players’ cards consecutively starting with the first active player to the left of the dealer button.

Drawmaha Hi

16. Once the house dealer has replaced all the discards, the house dealer will collect all of the discarded cards and place them face-down into the discard pile.
17. Once all participating players have completed their option to draw, the house dealer will then take one card from the top of the deck and place it face-up on the table so there are now a total of four community cards face-up on the table, referred to as “the turn card.”
 - a. This card is also a community card and is shared by all players.
18. Once the turn card has been placed face-up on the table, the third round of wagering will occur.
19. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
20. After all players have acted in turn, the house dealer shall move all wagers into the pot.
21. The house dealer will then burn a card.
22. The house dealer will then take one card from the top of the deck and place it face-up on the table so there are now a total of five community cards face-up on the table, referred to as “the river card.”
 - a. This card is also a community card and is shared by all players.
23. Once the river card has been placed face-up on the table, which is the final community card, the fourth and final round of wagering will occur.
24. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
25. After the fourth and final round of wagering has been completed, the house dealer will move all wagers into the pot and begin to split the pot into two equal pots.
26. All active players will then enter into a showdown with each other and compare their hands.

NOTE: *During the play of the game, if there are not enough cards left in the deck for all active players to receive cards from the first round of betting up to the final round of betting, the house dealer will deal each active player cards until there are not enough cards left in the deck to give each active player a card. The house dealer will combine the burn cards and the discard pile, scramble and shuffle per house procedures, re-cut, re-burn, and complete the draw starting from the last position the house dealer was at the time the house dealer ran out of cards.*

1. *The house dealer may not use the last card from the unused portion of the deck, known as the “stub,” unless the stub will be used to replace the final discarded card for the round of draws or needs to be used per the below guidelines:*

Drawmaha Hi

- a. *If there are not enough cards in the discard pile combined with burn cards to complete all active players' hands, the stub will be shuffled with the burn card and all discarded cards from the active players whose draws were replaced (i.e. there are 7 active players going to the draw, and active Players 1-2 have all their cards completely replaced, and cards still need to be replaced for active Player 3-7. The house dealer would take the bottom card, the burn card, and the discarded cards from Players 1-2 only, reshuffle those cards, and continue to deal. This process would continue until each player has completed their draw).*
2. *The house dealer will deal out the remaining cards to any player who does not have a five-card hand.*
3. *The house dealer will then collect all discarded cards from the discard round and begin a new discard pile.*
4. *Also, the house dealer will replace any missing burn cards from the discard pile to keep track of the betting round.*

Dealing Procedures and Round of Play

All wagers in Three Card Poker 6 Card Bonus shall be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.

1. Third Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
2. Backline betting is not permitted on any wager.
3. At the beginning of each round of play, each player shall be required to place an Ante wager. Each player will have the option to place a Play wager, after inspecting their hand, which must be equal to the Ante wager.
4. Each player who has placed the Ante wager required above, shall also have the option to make an additional Pair Plus and a 6 Card Bonus.
 - a. The Pair Plus awards a bonus payout to the player(s) who receives a poker hand consisting of certain hand combinations as listed in the Pair Plus Payout Table.
5. The 6 Card Bonus considers the three cards dealt to the player's hand and the three cards dealt to the player-dealer's hand. A player then uses any of those six cards, regardless of the number of cards used from their hand or the player-dealer's hand, to make the best possible five card poker hand. If the player's hand qualifies for a payout, the player is paid by the player-dealer according to the posted pay table.
6. The house dealer shall wait for each player to place their Ante wager as well as any bonus bets. After each player has placed their wager(s), the house dealer will announce, “no more bets.” No Ante, Pair Plus, or 6 Card Bonus shall be made, increased, or withdrawn after the house dealer has announced “no more bets.”

Three Card Poker 6 Card Bonus

7. The game utilizes an action button to determine which player receives first action on their wager. The player-dealer's third card, which is dealt face-up, determines the position of the action button. The player-dealer position is not counted when determining where the action button shall be placed. The other seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer's face up card.
 - a. When determining where the action button will be placed, cards will hold the following values: Ace is one, 2 through 9 have their face value, jack is eleven, queen is twelve, and king is thirteen.
8. After all wagers have been placed, the house dealer shall shuffle the cards by use of a shuffle machine so the cards are randomly intermixed. Upon completion of the shuffle, the device shall dispense cards in stacks of three.
9. After the stacks have been delivered to each player, face-down, the player-dealer's bottom card will be turned face-up. The house dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.
10. After the dealing procedures above have been completed, each player shall examine their cards.
11. Each player who wagers in Three Card Poker 6 Card Bonus is responsible for their own hand and no person other than the player or the house dealer may touch the cards of that player. Each player shall be required to keep their three cards in full view of the house dealer at all times.
12. After examination of the cards, each player shall have the option to either make a Play wager in an amount **equal** to the player's Ante wager or forfeit the Ante wager and end their participation in the round of play. The house dealer shall offer this option to each player, starting with the player to the left of the player-dealer and moving clockwise around the table in order.
 - a. If a player has placed a Pair Plus, but does not make a Play wager, the player shall forfeit the wager, as well as the Ante wager.
 - b. If a player has placed a 6 Card Bonus, the 6 Card Bonus is still active.
13. After each player has either placed a wager on the table in the Play wager area or forfeited their wager and hand, the house dealer shall collect all forfeited wagers and associated cards, placing them in the discard rack except for players who have placed a 6 Card Bonus. The house dealer will place the player's cards under the 6 Card Bonus.
14. The house dealer shall then reveal the remaining player-dealer's cards and place the cards so as to form the highest possible ranking hand. The player-dealer must qualify to play with a **minimum of queen-high**.
15. Wagers will be settled in the following order from player to player: the Ante wager, then the Play wager, then the Pair Plus wager (if placed), and then the 6 Card Bonus wager (if placed). Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

How Winners are Determined and Paid

1. If the player-dealer's hand does not have a minimum of a queen-high, the **player-dealer does not qualify** and the following applies:
 - a. The Ante wager receives action. The house dealer will pay each Ante wager not surrendered (by folding) even money, regardless if the player's hand beats the player-dealer's hand. If the player surrendered (by folding), the player loses.
 - b. The Play wager receives no action. The house dealer shall immediately refund these wagers to players.

Three Card Poker 6 Card Bonus

2. If the player-dealer's hand has a queen or better, the **player-dealer's hand qualifies**. The house dealer shall immediately stack each player's Play wager atop the Ante. The house dealer shall then reveal the three card hand of each active player, starting with the player to the left of the player-dealer position or the player with the action button.
 - a. If the player's hand beats the player-dealer's hand, the player wins even money on the Ante and the Play wagers.
 - b. If the player-dealer's hand beats the player's hand, the player loses both the Ante and the Play wagers.
 - c. If the player's hand and the player-dealer's hand are equal in rank and value, the hand is considered a tie (push) and the Ante and Play wagers shall push and be returned to the player.
3. All cards collected by the house dealer shall be picked up in order and placed in the discard rack in such a way they can be readily arranged to reconstruct each hand in the event of a question or dispute.
4. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. Description of Table Used and Total Number of Seated Positions

Face Up Pai Gow Poker is played on a standard Pai Gow Poker table, which seats a maximum of six players and a player-dealer, for a total of seven seated positions. Within each betting area for each seated player, there shall be two separate betting areas representing each players' base game wager and the Fortune Bonus Bet. Each betting space at the table has a fixed amount for wagering limits defining the minimum and maximum amounts that may be wagered. Players must bet at least the table minimum.

Dealing Procedures and Round of Play

All wagers in Face Up Pai Gow Poker will be made by placing casino chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.

1. At the start of a game a player is offered the player-dealer position. Once the player-dealer position is accepted, the house dealer shall wait for each player to make their wager in accordance with the table limits.
 - a. Each player then has the following option(s) when placing their wager(s):
 - i. The base game which pays 1 to 1;
 - ii. The Fortune Bonus Bet which pays according to the payable, as shown below; If a player wagers at least \$5 on the Fortune Bonus Bet, the player qualifies for the Envy Bonus and the house dealer must place an "envy" button next to the player's Fortune Bonus Bet wager.
2. Third-Party Providers of Proposition Player Services (TPPPS), as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
3. Backline betting is permitted on all wagers.
4. The game shall utilize an action button to determine the first player to receive first action from the player-dealer.
 - a. To determine the placement of the action button, the house dealer shall use a dice cup. The player-dealer shakes a dice cup, which contains three dice, and the numerical total of the three dice determines the position of the action button. The player-dealer's position is always one, eight, and fifteen. Other seats in clockwise rotation, respectively represent the other numbers. If the total dice value is one, eight, or fifteen, the player-dealer shall receive the first set of cards and the player to the left of the player-dealer shall receive the "Action" button.

Face Up Pai Gow Poker

5. Once all wagers have been placed, the house dealer shall complete the deal of seven piles of seven cards face-down in front of the house dealer, one at a time from the house dealer's left to right, until all seven hands are dealt. The house dealer shall then spread the remaining cards to verify there are four cards remaining and placed in the discard pile.
6. Should there be a need to deal the game manually (due to a machine malfunction, etc.) the following procedure shall be followed:
 - a. The house dealer shall complete the deal of seven piles of seven cards face-down in front of them. When dealing the seven piles of seven cards, the house dealer shall deal one card at a time in front of the house dealer position until there are seven cards, starting from left to right. Once there are seven cards laid out, the house dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven cards. The remaining four cards shall be placed in the discard pile.
 - i. Once the cards have been stacked, the player dealer selects which pile will be distributed to the first player who receives the "action" button. The house dealer identifies the hand by placing a button marked "action" on this pile by pushing it forward and turning the pile behind it sideways.
7. Once the first position is determined, the house dealer then distributes the seven piles of cards, starting with the action button and continuing clockwise.
 - a. The player-dealer receives their cards in turn according to the action.
 - b. All seven piles of cards will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed. The house dealer will then spread the remaining cards to verify there are four cards remaining and placed in the discard pile.
8. The player-dealer's hand will then be exposed and set before the players set their hands.
 - a. If the player-dealer has an ace-high or king-high seven-card hand, all player's wagers shall automatically push.
 - i. If the player-dealer's hand does not contain a seven-card ace-high or king-high hand, each player shall then set their hand.
 - b. The player-dealer has the option to ask the house dealer to set their hand according to the House Way chart.
9. Once the player-dealer's hand is set, each player sets their hands by arranging the seven cards into a two-card hand in front, and a five-card hand in back.
 - a. The five-card hand must rank higher than the two-card hand, according to the hand rankings, as shown above.
 - b. The player has the option to ask the house dealer to set their hand according to the House Way chart below.
 - c. Players do not have to set their hand the "House Way", they are free to set the hand in any fashion they choose as long as it is not a foul hand. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player will automatically lose their wager.
10. Once the player's hands are set, each player's hand is exposed, in turn, and compared to the player-dealer's hands to determine the winners, losers, or push hands.
11. Each player's five-card hand will be compared to the player-dealer's five-card hand, and each player's two-card hand will be compared to the player-dealer's two-card hand, in turn.
12. Wagers will be settled in a clockwise manner around the table, starting with the player with the Action button.

Face Up Pai Gow Poker

13. All wagers will be settled from seat to seat (including backline betters) in the following order: the base game wager, then the Fortune Bonus Bet, and then the Envy Bonus. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.
14. The cards are collected, shuffled, and a new round begins.

How Winners are Determined and Paid

Once each player has set their hands and the house dealer has set the player-dealer's hand, each player's hand shall be compared against the player-dealer's hand. The following shall apply for each possible outcome when determining which hand wins, loses, or if there is a push.

1. The base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand.
2. The base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
3. The base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
 - a. The base game wager also "pushes" if the ranking of the player-dealer's shown hand is a seven-card ace-high or king-high hand. Neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
4. If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
5. The player-dealer will collect losing Fortune Bonus Bets and pays winning Fortune Bonus Bets to the extent of the player-dealer's wager.
