PAI GOW TILES

ALL FEE COLLECTIONS WILL BE TAKEN PRIOR TO ANY TILES OR ANY BETS BEING PLACED. THE FEE COLLECTION IS PLACED IN FRONT OF EACH BETTING SQUARE, WHICH IS THEN COLLECTED FROM EACH PLAYER BEFORE THE START OF THE GAME. THE COLLECTION IS NOT A PERCENTAGE OF THE POT. THE DEALER OF THE GAME (HOUSE) HAS NO PLAY IN THE GAME. INITIALLY, AT THE START OF THE GAME THE PLAYER/DEALER BUTTON IS GIVEN TO THE PLAYER TO THE LEFT OF THE DEALER. AT ALL TIMES THERE IS ONLY THREE COLLECTIONS PER GAME. THE PLAYER/DEALER POSITION WILL ROTATE IN A CLOCKWISE MANNER AND CAN ONLY BE HELD FOR TWO CONSECUTIVE HANDS, THEN THE POSITION MUST ROTATE. IF THERE IS NO INTERVENING PLAYER THEN THE GAME MUST STOP. INDIVIDUAL BETS OR WAGERS ARE NOT TO EXCEED \$300.00. BACK LINE BETTING OR SIDE BETTING ARE NOT PERMITTED.

PAI GOW TILES

At Lake Bowl Pai Gow Tiles is played with a standard set of Chinese Dominos. It is a rotating player/dealer game. There are 32 tiles that are arranged into 16 pairs. Each player is offered to be the player/dealer in turn, counter-clockwise. The player has the option of either accepting the player/banker position or passing it on to the next player.

The players make a bet, then the dealer mixes or shuffles the tiles face down, and places them in eight stacks of four each. By using a dice cup, three dice are shaken and then shown. The total of the dice indicates which seat will receive the first stack of tiles. The collection is taken before play begins. Each player arranges his/her tiles to make the two highest combinations of rankings. When all players tiles are set, the player/dealer exposes his/her tiles, indicates to the dealer how they should be set, and tells the dealer to continue. The dealer then exposes each player's tiles, one player at a time, and compares their rankings with the player/dealer's ranking to determine the winner.

Both hands must be higher than the player/dealer's hand to win. If one hand is higher, and the other is lower, then it is a push. If both of the player's hands are lower than the player/dealer's hand, the player loses. If both the player and the player/dealer have the same numerical valued hand, the hand with the highest ranking domino wins (only the highest-ranking domino is considered). When the player/dealer and a player have the exact same ranking combinations, it is called a "COPY" and the player/dealer wins. A rating system determines the value of each hand. Pai Gow Tiles is similar to playing two separate hands of Baccarat at the same time, with 9 being the highest point; except that there are twenty different combinations of dominoes that are higher than 9. Sixteen of these combinations are pairs. The other four combinations of dominoes that is higher than 9 are called Wong and Gong. Each of these combinations and each individual domino have a ranking. The symbolism of the domino (not the numerical value) determines their ranking. (See ranking chart) If a player can't play one of the above mentioned combinations, he adds the total spots on two dominoes (subtracting 10' as in Baccarat) to determine his hand.

PAI GOW POKER

At Lake Bowl casino Pai Gow Poker is played with a standard 52-card deck plus one joker; for a total of 53 cards. There can be up to seven players per hand. Pai Gow Poker is played with three dice and a dice cup.

Before any cards are dealt each player pays a wager. Pai Gow Poker requires a player/dealer and all hands be compared to the player/dealer's hand. The dealer stacks seven piles of seven cards; one card at a time, and the remaining four cards are discarded face up. The player/dealer selects a pile of cards to start the distribution. Then the player dealer takes the three dice and shakes them in the dice cup. The player/dealer then counts around the positions at the table counter-clockwise and that is where the action button goes. Counting from the player/dealer position, the sum of the dice determines who receives the first hand and where the action begins. The remaining hands go to the other players in counter-clockwise rotation. If there is an open spot the hand will be discarded. Each player with the exception of the player/dealer looks at their cards and forms two hands (a two card front hand and a five-card backhand).

Standard poker hands apply with five aces beating a royal flush (using the joker). The joker can be used to complete a straight or a flush. For a two-card hand, any pair beats any two unmatched cards, but straights and flushes don't apply. The player must arrange their hand so that the five-card hand ranks higher than the two-card hand. If they don't do that then the hand is fouled and the player loses automatically. Once all players have placed their hand face down, the player/dealer's cards are then set.

Starting with the action button all players' cards are exposed and compared to the player/dealer's hand. The winnings are determined by comparing the player's five-card hand to the player/dealer's five-card hand, and the player's two-card hand to the player/dealer's two-card hand. If the player wins both hands, the player/dealer pays out the amount wagered. The player/dealer can not pay out more than he/she has wagered. Starting with the action button the player/dealer starts the pay out. If the player/dealer runs out of money before all winning hands have been paid, the remaining winning hands do not get paid. If the player/dealer wins one hand and the player wins the other (push), no money is exchanged. If the player/dealer wins both hands, the player/dealer wins the player's wager. If the player and the player/dealer have the same hand(s), the player/dealer wins. If the player/dealer wins, he/she can only win what he/she has wagered.

PAI GOW POKER

RULES

Object: To set 7 cards received on the deal into two separate poker hands: a two-card front hand; and a five-card back hand. The object is to have both hands rank higher than the corresponding front and back hands set by the opponent(s). Note; the front hand may not rank higher than the back hand.

Play: Pai gow poker is played with a conventional poker deck with one added joker, totaling 53 cards. The joker may be used as an ace, or as a card to complete a straight or a flush. Five aces (four aces and a joker) is the best possible hand. The following ranking chart indicates the general categories of hands in descending order of value:

1. Five Aces
2. Royal Flush
3. Straight Flush
4. Four of a Kind
5. Full House
6. Flush
7. Straight (A-2-3-4-5 is the smallest straight)
8. Three of a kind
9. Two pairs
10. One pair
11. No pair (Nothing)

To Win: A player wins when his / her two hands rank higher than the player / dealer's respective hands. When one of the hands ranks higher, and the other one lower, a tie (push) results; no wager is exchanged. When the player and the player / dealer have the exact same hand, the player / dealer wins that hand. If you are not sure what to do, you may request the casino dealer to play the hand according to the "House Way."

FEE COLLECTION METHOD

7 CARD STUD HIGH/LOW SPLIT

ALL FEE COLLECTIONS WILL BE TAKEN PRIOR TO ANY CARDS BEING DEALT OR ANY BETS BEING PLACED. THE DEALER OF THE GAME (HOUSE) HAS NO PLAY IN THE GAME. INITIALLY, AT THE START OF THE GAME THE DEALER BUTTON IS GIVEN TO THE PLAYER TO THE LEFT OF THE DEALER. THE COLLECTION IS NOT A PERCENTAGE OF THE POT. IF THE DESIGNATED HIGH HAND WISHES TO PLAY THE HAND, HE / SHE MUST CALL THE FULL AMOUNT OF HIS / HER BETS. THIS PROCESS WILL REPEAT ITSELF EACH HAND, AND THE DEALER BUTTON WILL ROTATE ONE PLAYER EACH HAND IN A CLOCKWISE MANNER AROUND THE TABLE. INDIVIDUAL BETS OR WAGERS ARE NOT TO EXCEED \$300.00. BACKLINE BETTING OR SIDE BETTING ARE NOT PERMITTED.

7-CARD STUD HIGH/LOW SPLIT

1. Lake Bowl plays 7-card stud High/Low Split with a standard 52-card deck.
2. The player/dealer button starts of at the first person to the dealers left. The button moves in a clockwise manner after each hand.
3. For each hand there will be a ante fee paid by each player which is the fee collection that goes to the house before the start of each game.
4. Each player will receive two card's face down and one card face up on the first round.
5. The player with the lowest card will begin the betting. The first bet is a minimum one-dollar forced bet.
6. Betting will proceed after each round is dealt. There are a total of five rounds of betting. After the first round it is up to the high hand to start the betting or check. One up card will be dealt for the next three rounds, each proceeding with checking or betting. The final round will be a face down card. This is the last round to bet.
7. If a player cannot call a bet due to running out of chips then there will be a side pot started for all addition betting amongst the remaining players. The player that ran out of chips is considered to be "all in" and is only eligible to win the original pot. In order to win the original pot and the second pot the remaining player must have a hand that is higher than the player's hand that is "all in."
8. Players are not allowed to buy additional chips in the middle of a game.
9. Players are not allowed to share chips or buy chips from other players.
10. Only one person can play a hand at one time.
11. The following ranking chart indicate the general categories of hands in descending order of value for the high hand:
 1. Royal Flush (10, J, Q, K, A all in the same suit)
 2. Straight flush (5 cards same suit in a row)
 3. 4 of a kind
 4. Full house (3 of a kind and a pair)
 5. Flush (5 cards same suit)
 6. Straight (5 cards in a row)
 7. 3 of a kind
 8. 2 pair
 9. Pair
 10. High card
12. Once all cards are dealt and the last round of bets has been collected the player who made the last bet must show his cards first. Any players who called the bet must then show their hands. Each player can only use the best five cards out of seven to form the high hand and the same or different to make a low hand.
13. The player with the highest-ranking hand will split the pot with the lowest-ranking hand. There is a qualifier of eight or lower to win the low hand. The ace counts as high

card for this purpose. In the event that there is a tie between two players, the dealer will split the pot between the two winning hands. The pot will be awarded to the winning hand once all losing hands have been killed.

14. There might not be a qualifying low hand every time, if there is no low hand then the high hand wins.
15. Qualifying low hands consist of five cards with different numerical values from Ace to 8. If multiple players meet this standard then the player with the high hand (ex. Ah, 2d, 5c, 6c, 7d beats Ac, 2c, 6d, 7h, 8d). The best possible low hand is A, 2,3,4,5 – straights and flushes do not count against a low hand, but a pair will disqualify it. One way to figure out a low hand is to look at the two highest cards in that hand. Ex. An A, 2, 3, 4, 6 scores a 64, and would therefore beat a A, 2, 3, 5, 6 because it scores a 65.

SEVEN-CARD STUD HIGH-LOW SPLIT RULES

1. A qualifier of eight or better is required for a low hand (ace counts as high card for this purpose).
2. Straights and flushes do not effect the value of a low hand.
3. Splitting the pot is only determined by the cards and not by any agreement among players.
4. When there is a odd chip in the pot the chip goes to the high hand.
5. The buy-in for 7-Card Stud is 10 times the minimum bet except in \$1 to \$3 limit. This game has a buy-in of \$20.
6. Check and raise is permitted.
7. The ranking of hands is the same as in Draw Poker, except there is no Joker. A player may use any five cards to make a high hand and the same or different to make a low hand.
8. Only a full bet constitutes a bet. Anything less than a full bet is considered to be action only. Example: In a \$1 & \$3 game, on the last card, the first player bets \$3. The next player goes all-in for \$5. The next player may call the initial bet of \$3 and \$2 action (a total of \$5) or may raise the initial bet of \$3 to \$6 for a total of \$6.
9. A bet and three raises are allowed for each betting round, however, completing an opening forced bet does not count as a raise. There is no limit on raises with only two players remaining.
10. String bets or raises are not allowed. A player must put in the full amount of the bet at one time or announce his intended action. A player who puts a single chip into the pot that is larger than the bet to him is assumed to have called the bet, unless he announces "raise".
11. No pot may be awarded until all losing hands have been killed. The winning hand should remain face up until the pot is awarded.
12. Suits do not count in ranking of hands to determine the winning hand. The ranking of suits is used only to determine the lowest card for a forced bet, drawing for seats in games, etc. Suits are ranked Spades (highest), Hearts, Diamonds and Clubs.
13. A card placed face up in the deck (boxed cards shall be treated as a "scrap of paper." A Joker will be treated as a scrap of paper and will be replaced by the next card below it in the deck, except when it is dealt to a player as a down card. In this situation, it will be replaced after the round of cards have been dealt. If a player does not call attention to the Joker among his down cards before acting on his hand, then he has a fouled hand and forfeits all rights to the pot and all monies involved.
14. If a player antes and/or asks to be dealt-in but is unable to make it back to the table in a reasonable amount of time to act on his hand, then he forfeits his ante and his forced entry bet, if any.
15. If a player does not have the correct number of cards on the deal and no action has been accepted the hand will be a misdeal. If there has been action ("action" defined as two or more players acting on their hands in turn) before the mistake is noticed, the player with the incorrect number cards will receive his money back and is out of the hand.

16. If a player folds his hand after making a forced bet or on a round of checking, his seat will continue to receive a card until there is a wager.
17. If a player's first or second hole card is accidentally turned up, the third card is dealt down. If both hole cards are dealt up, the third and fourth cards are dealt down.
18. If a dealer burns and deals a card before a round of betting has been completed, that card or cards must be eliminated from play along with an additional card for each remaining player in the hand. After that round of betting has concluded, play then resumes in a normal fashion.
19. If a dealer burns two cards or fails to burn a card, if possible, move the cards to the right position to rectify the error. If it happens on a down card and there is no way to tell which card was received, then the player must accept the card.
20. If any player, other than first position, receives his last card face up, all other players will receive their last card face down. The player or players whose down card was exposed has two options: (1) Declaring themselves all-in for the portion of the pot already played and any subsequent betting will be on the side, or (2) may, at that player's option, continue to be active in any further action in the pot on the final round.
21. If the first player's final card is exposed then all subsequent cards will be exposed. The player that is high on board is first to act and all action stands.
22. In all fixed limit games, i.e. 3-6, 5-10, etc., if a player makes an open pair on the fourth card, that player has the option of betting either \$5 or \$10 (5-10 limit). If he bets \$5, the next player(s) may raise in increments of \$5 or \$10. If a \$10 bet or raise is made, the next raise must be in increments of \$10 (i.e. player "A" bets \$5, player "B" raises to \$15, player "C" has the option of calling the \$15 bet or of raising to \$25. He may not make it \$20.) If that player checks, all other players, in turn, have the option to bet \$5 or \$10.
23. If there are not enough cards left in the deck for each player, the Dealer is to deal all the cards except the last card. He then scrambles the last card and four burn cards, cuts the deck, burns a card and delivers the remaining down cards, using the last card if necessary. If there are five players remaining without a card, the dealer will not burn so that each player may receive a fresh card. If the dealer determines that by using this procedure there will still not be enough cards for all the players, he cannot give any of the players a downcard. Instead, he is to announce to the table that there are not enough cards to go around and that a community card will be used. The dealer will then burn a card and turn a card up in the center of the table. That card plays in everyone's hand. The player with the highest hand initiates the action.
24. A player who calls when his opponents' up cards beat him is not entitled to a refund.
25. A player must have seven cards in order to win. Any other number of cards constitutes a dead hand. Players must protect their own hand.
26. A card accidentally dealt off the table must play. If it is the last card, it is to be treated as an exposed seventh street card.
27. The splitting of pots among players will not be allowed under any circumstances in any game. All hands must be played to completion.
28. When a player turns any of his up cards over after a bet has been made he risks losing all rights to the pot.
29. Cards read for themselves. Dealers will assist in reading hands to the best of their ability, but it is the players responsibility to protect their hand at all times.

30. If a player miscalls his/her hand with intent to cause another player to discard their hand may, at the discretion of management, risk forfeiting the pot and/or expulsion from the cardroom.

31. A players seat will only be held for 15 minutes if there is a waiting list. Once the time is up there chips will be removed from the table and placed behind the dealer. If the player decides to still play, he/she will have to put their name on the waiting list. If he/she decides to cash out, then the dealer will cash them out after that hand.

HOLD'EM

THE DEALER OF THE GAME (HOUSE) HAS NO PLAY IN THE GAME. INITIALLY, AT THE START OF THE GAME THE DEALER BUTTON IS GIVEN TO THE PLAYER TO THE LEFT OF THE DEALER. THE PLAYER TO THE LEFT OF THE DEALER BUTTON IS THE SMALL BLIND. THE PLAYER WITH THE BIG BLIND BUTTON (TWO SPOTS TO THE LEFT OF THE DEALER BUTTON) PAYS THE POSTED FEE COLLECTION. ALL FEE COLLECTIONS WILL BE POSTED PRIOR TO ANY CARDS BEING DEALT. THE FEE IS TAKEN FROM THE POT AFTER THE FIRST ROUND OF BETTING HAS BEGUN AND THEN DROPPED. THE COLLECTION IS NOT A PERCENTAGE OF THE POT. THE PLAYER TO THE LEFT OF THE BIG BLIND STARTS THE ROUND OF BETTING. THIS PROCESS WILL REPEAT ITSELF EACH HAND. THE DEALER BUTTON, BIG BLIND, & SMALL BLIND WILL ROTATE ONE PLAYER EACH HAND IN A CLOCKWISE MANNER AROUND THE TABLE. HOLD'EM

Hold'em is played with a standard 52-card deck, and it uses a flat disc called a dealer button to indicate the player in the dealer position for that hand (even though the game is actually dealt by a non-playing casino employee). The button starts to the left of the dealer and rotates clockwise after each hand. The player with the big blind is the last to receive cards, and posts the fee collection for that hand.

Hold'em uses one or more blinds to stimulate action and initiate play. Blinds are posted before the cards are dealt. Blinds are part of a player's bet. The player posts the small blind immediately to the left of the button and the player posts the big blind two positions to the left of the button.

The player to the left of the blinds initiates action on the first betting round. On all subsequent betting rounds, the action begins with the first active player to the left of the button.

In Hold'em, all players receive two cards dealt face down as their personal hand, after which there is a round of betting. Next three cards are turned face up in the middle of the board simultaneously (this is called the "the flop") after which there is another round of betting. Two more cards are dealt face up on the board one at a time, with a round of betting after each card. The "boardcards" are community cards; a player may use any combination of five cards from among the boardcards and personal cards to form a hand. A player may choose to use all the boardcards and no personal cards to form a hand. This is called "playing the board".

After each deal the button must move forward, and the blinds will be adjusted accordingly.

The player with the highest ranking 5-card poker hand wins. In the event of a tie the pot will be split equally between the winning hands.

HOLD'EM RULES

1. A new player entering the game has the following options:
 - a. Wait for the big blind.
 - b. Post an amount equal to the blinds and be dealt in immediately.
 - c. Wait for the blinds and buttons to pass and then be dealt in.
2. A new player may not be dealt in between the small blind and the button. You must wait until the button passes.
3. Players must meet their blind obligations for every round of play. Players cannot have the button twice; the button always moves forward, and the blinds are adjusted accordingly.
4. If you miss your blinds you may be dealt in by either posting the amount equal to your blinds or by waiting for your big blinds. If you choose to post the amount equal to the blinds only the amount equal to the big blind is live, and the remainder is placed into the pot as "dead money."
5. You may not make up blinds between the big blind and the button.
6. A player may change seats without penalty provided the blind has not passed the new seat.
7. No live "straddle" bets are allowed.
8. A player must declare that they are playing the board before they throw their cards away. Otherwise they relinquish all claims to the pot.
9. You can have a max of 8 players per table.

The button starts to the left of the dealer and rotates clockwise after each hand. The player with the dealer button is the last to receive cards. The player with the big blind posts the maximum forced bet, and the small blind posts half the maximum forced bet for that hand.

Omaha High/Low (8 or better) uses one or more blinds to stimulate action and initiate play. Blinds are posted before the cards are dealt. Blinds are part of a player's bet. The player posts the small blind immediately to the left of the button and the player posts the big blind two positions to the left of the button.

The player to the left of the blinds initiates action on the first betting round. On all subsequent betting rounds, the action begins with the first active player to the left of the button.

In Omaha High/Low (8 or better) all players receive four cards dealt face down one at a time, as their personal hand, after which there is a round of betting. Next three cards are turned face up in the middle of the board simultaneously (this is called the "the flop") after which there is another round of betting. Two more cards are dealt face up on the board one at a time, with a round of betting after each card. The "board-cards" are community cards. Each player at showdown may use any two hole cards with three community cards to make the highest five-card poker hand and any two hole cards with three community cards to make the lowest qualifying five-card poker hand. The lowest qualifying five-card poker hand is Ace, 2, 3, 4, 5. Players must qualify for the low hand by making the five-card poker hand 8 high or better (lower). There are two winners; one for the highest hand and one for the lowest hand. The pot is split equally between the players with the highest-ranking hand and lowest qualifying hand. The ace can be used as a high or low card. If no player has a low qualifying hand, the player with the highest ranking five-card poker hand wins the entire pot. In the event of a tie, the pot, or portion of the pot, if the tie is for high or low hand only, is split equally.

After each deal the button must move forward, and the blinds will be adjusted accordingly.

ALL FEE COLLECTIONS WILL BE TAKEN PRIOR TO ANY CARDS BEING DEALT OR ANY BETS BEING PLACED FROM EACH PLAYER. THE DEALER OF THE GAME (HOUSE) HAS NO PLAY IN THE GAME. INITIALLY, AT THE START OF THE GAME THE DEALER BUTTON IS GIVEN TO THE PLAYER TO THE LEFT OF THE DEALER. THE COLLECTION IS NOT A PERCENTAGE OF THE POT. IF THE DESIGNATED HIGH HAND WISHES TO PLAY THE HAND, HE / SHE MUST CALL THE FULL AMOUNT OF HIS / HER BETS. DRAW POKER (JACKS OR BETTER)

Draw Poker (jacks or better) is played with a standard 52 –card deck, and one joker for a total of 53 cards. Standard poker rankings apply. Players are dealt five cards face down, one at a time, in rotation. In Draw Poker (jacks or better) it requires a pair of jacks or better to open the pot. A round of betting begins (check, bet, call, raise, or fold). The following players may discard any number of their original cards and have the same number of cards replaced by the dealer. Another round of betting occurs. The player with the highest ranking five-card poker hand wins. In the event of a tie, the pot is split equally between the two winning hands.

DRAW POKER

All five-card jacks-or-better Draw games require a pair of jacks or better to open the pot. The game is played with a 53-card deck, which includes the joker. The joker can be used either as an ace or as any card that completes a straight, flush, or straight flush. All limit five-card Draw games have fixed-limit betting. There are two betting rounds, one before the draw and one after the draw. The betting limit after the draw is twice the amount of the betting limit before the draw.

In all Draw Poker games, check-and-raise is permitted, and a bet and six raises is allowed in all multi-handed pots.

Note: A player who opens the pot in jacks-or-better must show the openers, whether the hand is called or not, in order to win the pot.

ROUND OF PLAY

- 1. No Bust-21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the dealer in a 180 degree seating arrangement. The tables are commonly used in the casino industry. The casino dealer stands opposite of the players, and in the center of the table. The casino dealer's chip tray is set in front of him/her. The play starts from the right of the dealer and proceeds in a clock-wise fashion.**
- 2. The game utilizes a standard 52 card deck, with the addition of one Joker per deck for a total of 53 cards. The game can be played with a minimum of a single deck, totaling 53 cards and to a maximum of eight decks totaling 424 cards.**
- 3. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed, and collection fee for the players and Player/Dealer. A maximum of three collection rates are allowed in compliance with the California Penal Code.**
- 4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer will place an amount of money (casino chips) in front of their seat in a betting circle and that money will be used to pay the winners and will also set the amount that he/she can collect from the loser. The casino will place a "button" in front of the Player/Dealer which designates that they are taking the "bank" position and further designate whether it is the first or second turn for the Player/Dealer in the banking position. The Player/Dealer will place the collection fee in front of his betting circle.**
- 5. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the posted collection for the wager they placed in any betting circle where they have money or "action".**
- 6. Once the Player/Dealer has posted the amount of money he/she will wager against the other players, and once the players have placed their wagers, the casino dealer will collect all of the fees. This will always be accomplished prior to the start of the game in accordance with the California Penal Code. The casino dealer will take the**

collection fees and drop them into a locked collection box affixed to the gaming table.

7. After the fees have been collected, the dealer will deal the cards to the players and the Player/Dealer. All cards dealt throughout the game are always dealt face up. The casino dealer is the only person on the table to touch the cards. The players will signal to the dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino dealer deals the first card to the player seated to the left of the designated Player/Dealer, in a clock-wise fashion. Each player will be dealt one card face up and the Player/Dealer will receive his/her first card also. The Player/Dealer's dealer first card will be placed in front of the casino dealer rather than in front of the Player/Dealer's seat position.
8. The casino dealer will deal a second face up card to the players, again starting at the player to the first seated position to the left of the Player/Dealer, in a clock-wise fashion. The Player/Dealer does not get dealt a second card until all players have been given the opportunity to be dealt additional cards to make the best possible hand. (Rules and procedures for hands that can be split, double-down, and surrendered are outlined on page 11.)
9. Players must follow the below listed charts in deciding whether to hit or stand on a particular hand.

Rules for Players

Must Stand on	Must Hit on	Have Option on
		<u>12</u>
	<u>11 or Less</u>	<u>13</u>
<u>Soft & Hard 20</u>		<u>14</u>
<u>Soft & Hard 21</u>		<u>15</u>

		<u>18</u>

10. After all players have made their best hands by indicating to the casino dealer that they do not wish to have additional cards dealt to them, the Player/Dealer will receive his/her second card. This card will determine where the "action button" will be placed.

11. The action button determines where the action starts or who will be first to be paid for their winning hand or lose their wager. The action button is placed based on its numerical value and in comparison to the players seated at the table. (Please see the chart below for an example of how the card's value is used to determine the placement of the action button.)

12. Once the hand is played to the end, the payout or collection of the wagers will begin at the seat where the action button is placed. The settling of the wagers will proceed in a clock-wise manner until all wagers have been acted upon.
13. In the event that the Player/Dealer does not have enough money on the table to cover all the wagers on the table, there will be no free collection button, refund, or other conciliatory action give to the affected players by the casino or the Player/Dealer.
14. If the Player/Dealer's first up card is a Joker, all hands are frozen on the table. The Player/Dealer will be dealt the next card and the action button will be placed. Winning and losing wagers will be determined and all pay-offs made. Players have no options on their hands if this occurs.
15. The Player/Dealer's cards will always be dealt and placed in front of the casino dealer's tray. The placement of the Player/Dealer's cards is standard in all games and is depicted in the chart below:

16. The casino dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer does not have an option of hitting a Hard 17 or higher nor staying on a Soft 17 or lower. See the chart below for details:

Rules for Player/Dealer

Must Stand on	Must Hit on	Have Option on
HARD 17 AND ABOVE	SOFT 17 OR LESS	NONE

17. Once the Player/Dealer's hand has been made, all winners and losers are determined when their card's numerical value are compared to the Player/Dealer's. The Player/Dealer is never required to cover all opposing player's wagers. A Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers. If there is not enough money from the Player/Dealer position to cover all winning wagers, there will be no refund, free collection, or other form of rebate given to the affected players.
18. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clock-wise fashion around the table.
19. The next round of play begins once the casino dealer collects all cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clock-wise to the next position on the table. If there is no person that intervenes on the Player/Dealer's position, the game will be "broken" or stopped, as required by the California Penal Code.

GAME RULES

After deck meets the standards of the club, shuffle the deck twice.
2. Break 8 decks (brick) in half then break the right half in half again placing the bottom portion of the stack on top, making two piles of cards. Take $\frac{1}{2}$ of a deck from the left pile and $\frac{1}{2}$ of a deck from the right pile, shuffle twice. Place the newly shuffled deck in the middle of the table in front of where the cards are shuffled. Take $\frac{1}{2}$ of a deck from the newly shuffled deck, and $\frac{1}{2}$ of a deck from the right pile shuffle the cards twice, place the deck on top of the shuffled cards in the middle of the table, take $\frac{1}{2}$ of a deck from the middle of the table and $\frac{1}{2}$ of a deck from the left pile, shuffle twice then place the cards in the middle of the table, continue this until the entire brick is shuffled and is in one pile in the center of the table.
3. Cut brick in half, cut the left side in half placing the bottom on top of the same pile, Take $\frac{1}{2}$ of a deck from the left pile and $\frac{1}{2}$ of a deck from the right pile, shuffle once, placing the deck in the center of the table, then take $\frac{1}{2}$ of a deck from the pile in the middle, and $\frac{1}{2}$ of a deck from the right pile shuffle once, then $\frac{1}{2}$ of a deck from the center and $\frac{1}{2}$ of a deck from the left pile shuffle once, continue until entire deck is completely shuffled. Place last shuffled deck on top of cut card, then place the rest of the brick on top of the cards on the cut card.
4. Turn brick on the side with cut card facing you. Slide stack of cards over to the shoe, using the side of the shoe to square up the deck. After deck is square take the 2nd cut card and offer the pile of cards to be cut to the Player/Banker, who has 1st option to either cut the cards or let someone else cut the cards. After cards are cut, place the cut portion from the back to the front then square up the deck again using the shoe.
5. Take 2nd cut card out and place it in the brick one deck from the back end, square the brick again and place it in the shoe.
6. Shake the dice cup then offer the dice cup to the Player/Banker, who has the choice of shaking the dice cup or letting one of the other players shake the dice cup. Open the cup and see what number appears on the cup, burn the amount of cards on the dice.

No Bust Additional Rules

1. For Double down wagers, player is allowed to wager up to the amount of the initial wager. Ex: If player bets \$40 and wishes to double-down, they can bet anywhere from \$1-40 on the double down. It doesn't matter whether player has chips or not.
2. Aces are the only pair that player can draw only one card to, if player splits two aces and the first card is an ace, the player is not allowed to split again. If player splits and first card is any card, player is not allowed to double-down.
3. The action button should be placed as soon as the second Player/Bankers card is brought out, the action is counted starting from the Player/Bankers immediate left (if Player/Banker is in seat one, count would start from seat two, seat eight would be number 7, skip Player/Banker, then seat two would count number 8. If Player/Bankers second card is higher than a ten, the Jack is 11, the Queen is 12, the King is 13 and the Joker is 14. So if the Player/Bankers second card is a Jack the action would start from seat 5.
4. The hit cards for players should not be removed from the shoe until the dealer is sure of the signal. If the dealer isn't sure of the signal, the customer should be asked to signal again, if the player doesn't understand the different signals the dealer should show them. If a player gets a card they did not signal for, the card will be burned, and action will continue as if dealer didn't make a mistake.
5. Face cards are ten point value cards, if player has two face cards; they are allowed to split them. So if the player is dealt a Jack and a King, they are allowed to split.
6. If a player decides to surrender, half of the wager is returned to the player; the other half of the wager is placed on top of the cards, and paid to the bank according to where the action button starts. It is possible that if the bank doesn't cover that the player that surrendered could receive his forfeited money back.
7. When cards are being dealt, the middle of the card should be able to be seen after the second card is placed on top, if dealers deal quickly and cover the middle of the card, the second card can be moved so the middle of the card is visible. If the first card is a 6, the blank middle of the card should show, if the card is a 7 the spot in the middle of the card should be visible.

8. A player can bet as many spots as they wish, if they want to bet on spot 1, 4 and 7 they can, the dealer should pay attention to who bets where and when the hand comes due to hit, the dealer should place their hand near the hand and ask the player what he/she wishes to do with the hand.
9. Whenever a customer is buying a bet from the corporation, the customer places twice the amount of the buy bet on the spot they wish, if customer wishes to buy \$100. \$100 of the customers money is placed in the chosen box, the other \$100 is placed an inch or so behind the box that the original buy bet is in, if the hand is not a split or a double-down, the second \$100 is returned to the customer before the hand is acted on (the money is not added to the bank).
10. Whoever is seated has control over the hand that is dealt to that seat. If a player is seated in spot 5 and is betting \$10 and someone bets \$300 on the same spot, the seated player can play the hand how they wish. If the seated player wishes to split and the back line better doesn't the backline bettor doesn't want to split, the back line money will be wagered on the first hand of the split pair. So if the player is dealt two 6's, the first 6 is split the seated player matches his/her initial wager, the backline bettor's money is placed on the first 6 and that is considered their hand.
11. If the seated player decides to play the hand, the backline bettor does have the option of surrendering.
12. \$100 is the minimum to take the bank, unless the player kum-kums with the corporation.
13. If a hand goes over 21, the card making the total go over should be turned sideways, the same as a double down, so that if the Player/Banker makes a hand less than 21, the hands with turned cards can simply be collected and placed in the discard tray.
14. To Qualify for the Player/Banker position:
 - You must pay collection on the Player/Bankers 2nd bank when sitting directly to the left.
 - You must have played a hand if the Player Banker passes the bank after the 1st hand when you are seated directly on the left.
 - If the bank is passed and skips a seat, you are allowed to be the Player/Banker as long as you have played one hand.
 - A customer cannot be the Player/Banker if they have not paid a collection that day

FEE COLLECTION METHOD

7 CARD STUD

ALL FEE COLLECTIONS WILL BE TAKEN PRIOR TO ANY CARDS BEING DEALT OR ANY BETS BEING PLACED. THE DEALER OF THE GAME (HOUSE) HAS NO PLAY IN THE GAME. INITIALLY, AT THE START OF THE GAME THE DEALER BUTTON IS GIVEN TO THE PLAYER TO THE LEFT OF THE DEALER. THE COLLECTION IS NOT A PERCENTAGE OF THE POT. IF THE DESIGNATED HIGH HAND WISHES TO PLAY THE HAND, HE / SHE MUST CALL THE FULL AMOUNT OF HIS / HER BETS. THIS PROCESS WILL REPEAT ITSELF EACH HAND, AND THE DEALER BUTTON WILL ROTATE ONE PLAYER EACH HAND IN A CLOCKWISE MANNER AROUND THE TABLE. INDIVIDUAL BETS OR WAGERS ARE NOT TO EXCEED \$300.00. BACKLINE BETTING OR SIDE BETTING ARE NOT PERMITTED.

7-CARD STUD

1. Lake Bowl plays 7-card stud with a standard 52-card deck.
2. The player/dealer button starts off at the first person to the dealers left. The button moves in a clockwise manner after each hand.
3. For each hand there will be a .50 ante paid by each player which is the fee collection. That fee goes to the house before the start of each game.
4. Each player will receive two card's face down and one card face up on the first round.
5. The player with the lowest card will begin the betting. The first bet is a minimum one-dollar forced bet.
6. Betting will proceed after each round is dealt. There is a total of five rounds of betting. After the first round, it is up to the high hand to start the betting or check. One up card will be dealt for the next three rounds, each proceeding with checking or betting. The final round will be a face down card. This is the last round to bet.
7. If a player cannot call a bet due to running out of chips then there will be a side pot started for all addition betting amongst the remaining players. The player that ran out of chips is considered to be "all in" and is only eligible to win the original pot. In order to win the original pot and the second pot the remaining player must have a hand that is higher than the player's hand that is "all in."
8. Players are not allowed to buy additional chips in the middle of a game.
9. Players are not allowed to share chips or buy chips from other players.
10. Only one person can play a hand at one time.
11. The following ranking chart indicates the general categories of hands in descending order of value:
 1. Royal Flush (10, J, Q, K, A all in the same suit)
 2. Straight flush (5 cards same suit in a row)
 3. 4 of a kind
 4. Full house (3 of a kind and a pair)
 5. Flush (5 cards same suit)
 6. Straight (5 cards in a row)
 7. 3 of a kind
 8. 2 pair
 9. Pair
 10. High card
12. Once all cards are dealt and the last round of betting has been collected, the player who made the last bet must show his cards first. Any players who called the bet must then show their hands. Each player can only use the best five cards out of seven to form the winning hand. Each player must show all seven cards.
13. The player with the highest-ranking hand wins the pot. In the event that there is a tie between two players, the dealer will split the pot between the two winning hands. The pot will be awarded to the winning hand once all losing hands have been killed.

15. If a dealer burns two cards or fails to burn a card, if possible, move the cards to the right position to rectify the error. If it happens on a down card and there is no way to tell which card was received, then the player must accept the card.

16. If any player, other than first position, receives his last card face up, all other players will receive their last card face down. The player or players whose down card was exposed has two options: (1) Declaring themselves all-in for the portion of the pot already played and any subsequent betting will be on the side, or (2) may, at that player's option, continue to be active in any further action in the pot on the final round.

17. If the first player's final card is exposed then all subsequent cards will be exposed. The player that is high on board is first to act and all action stands.

18. In all fixed limit games, i.e. 3-6, 5-10, etc., if a player makes an open pair on the fourth card, that player has the option of betting either \$5 or \$10 (5-10 limit). If he bets \$5, the next player(s) may raise in increments of \$5 or \$10. If a \$10 bet or raise is made, the next raise must be in increments of \$10 (i.e. player "A" bets \$5, player "B" raises to \$15, player "C" has the option of calling the \$15 bet or of raising to \$25. He may not make it \$20.) If that player checks, all other players, in turn, have the option to bet \$5 or \$10.

19. If there are not enough cards left in the deck for each player, the Dealer is to deal all the cards except the last card. He then scrambles the last card and four burn cards, cuts the deck, burns a card and delivers the remaining down cards, using the last card if necessary. If there are five players remaining without a card, the dealer will not burn so that each player may receive a fresh card. If the dealer determines that by using this procedure there will still not be enough cards for all the players, he cannot give any of the players a downcard. Instead, he is to announce to the table that there are not enough cards to go around and that a community card will be used. The dealer will then burn a card and turn a card up in the center of the table. That card plays in everyone's hand. The player with the highest hand initiates the action.

20. A player who calls when his opponents' up cards beat him is not entitled to a refund.

21. A player must have seven cards in order to win. Any other number of cards constitutes a dead hand. Players must protect their own hand.

22. A card accidentally dealt off the table must play. If it is the last card, it is to be treated as an exposed seventh street card.

23. The splitting of pots among players will not be allowed under any circumstances in any game. All hands must be played to completion.

24. When a player turns any of his up cards over after a bet has been made he risks losing all rights to the pot.

25. Cards read for themselves. Dealers will assist in reading hands to the best of their ability, but it is the players responsibility to protect their hand at all times.

26. If a player miscalls his/her hand with intent to cause another player to discard their hand may, at the discretion of management, risk forfeiting the pot and/or expulsion from the cardroom.

27. A players seat will only be held for 15 minutes if there is a waiting list. Once the time is up there chips will be removed from the table and placed behind the dealer. If the player decides to still play, he/she will have to put there name on the waiting list. If he/she decides to cash out, then the dealer will cash them out after that hand.

5. DESCRIBE THE TYPE OF GAMING TABLE UTILIZED FOR THE GAME.

Based on customer demand and advancement in the industry, Lake Bowl Cardroom proposes to modify the existing Texas Hold'em poker game by utilizing a modified traditional poker table with an Electro-Mechanical Shuffler. ROUND OF PLAY

1. No-Bust- 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Dealer stands opposite of the players, and in the center of the table. The casino Dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.
2. The game utilizes a 52-card deck with special bonus aces. The aces are "Natural" cards with the value of:
 - a) 11.5 on first two cards with all 10-value cards.
 - b) 1 or 11 with all cards with value of 2-9.
 - c) 1 or 11 with three or more cards.
3. All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed, and collection fees for the Players and Player-Dealer. A maximum of five collection rates are allowed in compliance with the California Penal Code.
4. A standard round of play begins when a Player-Dealer is designated. The Player-Dealer places a wager in front of their betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the Player-Dealer and a designation whether it is the first or second turn for the Player-Dealer in the banking position. The Player-Dealer will place the collection fee in front of his betting circle.
5. Players at a table then place their wagers in designated betting circles directly in front of them. Players are prohibited from betting on open seats, also known as side-betting. Each Player must pay the posted collection for their wager(s) in the betting circle where they have money or "action".
6. Prior to the start of play, the casino dealer will take the collection fees and drop them into a locked collection box affixed to the gaming table.
7. Play commences with the casino Dealer distributing the cards to the Players and the Player-Dealer. All cards are dealt face up. The casino Dealer is the only person on the table to touch the cards. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of casino Dealer, in a clock-wise fashion. Each Player will be dealt one card face up. The Player-Dealer's first card will be placed in front of the casino dealer.
8. The casino Dealer will deal a second face up card to the players, again starting at the Player to the first seated position to the left of the casino Dealer, in a clock-wise fashion. The Player-Dealer will receive a face down card in front of the casino Dealer.

9. Players must follow the below listed chart in deciding whether to hit or stand on a particular hand:

Rules For Player		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Soft & Hard 22 "Naturals"	11 Or Less	12
		13
		14
		15
		16
		17
		18
		19
		20

10. After all Players have made their best hands by indicating to the casino Dealer that they do not wish to have additional cards dealt to them, the casino Dealer will turn over the Player-Dealer hole (second) card.
11. Beginning with the player to the right of the casino dealer, the settling of the wagers will be done in a counter-clockwise manner until all wagers have been acted upon.
12. The Player-Dealer's cards will always be dealt and placed in front of the casino Dealer's tray. The placement of the Player-Dealer's cards is standard in all games and is depicted in the chart below:

13. The casino Dealer continues to draw cards for the Player-Dealer, if necessary until a Hard 17 or higher number is reached. The Player-Dealer must follow the following hit rules:

Rules For Player-Dealer		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

14. Once the Player-Dealer's hand has been made, all winners and losers are determined by comparing the numerical value of the Player's hands with the Player-Dealer's hand. The Player-Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.
15. After all wagers are settled, the cards are collected and discarded. The 'dealer' button is changed and after every two hands, the Player-Dealer position is rotated in a clock-wise fashion around the table.
16. The next round of play begins once the casino Dealer collects all cards from the table and places them in the discard tray. The casino Dealer will also change the 'dealer' Button, and if necessary (if the same person has already held the Player-Dealer position twice) rotate the Player-Dealer position clock-wise to the next position on the table. If there is no person that intervenes on the Player-Dealer's position, the game will be "Broken" or stopped, as required by the California Penal Code.

GAME RULES

1. A "Natural" is the best possible hand. If the player and the Player-Dealer's hands are both a "Natural," the hand is a push or tie, and no action is taken on the wager.
2. If a Player's total is less than a "Natural" and the Player-Dealer's total is more than a "Natural" the Player wins the hand.
3. If a Player's total is less than a "Natural" and the Player-Dealer's hand is less than a "Natural," the hand closest to a "Natural" wins.
4. If a Player and the Player-Dealer have the same total and it is less than a "Natural," the hand is a push or tie, and no action is taken on the wager.
5. If a Player's and the Player-Dealer's totals are more than a "Natural", the following will apply:
 - a. If the Player-Dealer is closer to a "Natural," the Player-Dealer wins the hand.
 - b. If the Player is closer to a "Natural," the Player loses except when the Player has a 3-card hand totaling 22, 23, 24 or 25 and then they will "PUSH".

6. The Player-Dealer wins all ties or pushes over a “Natural.”
7. If a player has more than a “Natural” and the Player-Dealer has less than a “Natural,” the Player-Dealer wins.
8. A two card 21.5 beat all other hands.
9. The game is played on an industry standard Blackjack table where up to eight primary players can be seated.
10. All table fees are collected by the casino Dealer prior to the start of play. Table fees are pre-determined by the casino and can be up to five separate rates per game. All collection rates and wagering limits for the game will be posted at each gaming table and will not be based on a percentage of the amount wagered or won.
11. Backline betting is not allowed.
12. Third Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code (the Gambling Control Act), are permitted to play.

DOUBLE-DOWN, SPLIT, SURRENDER, ODDS& INSURANCE

DOUBLE-DOWN

- Players can double-down on the first two-cards only, with the exception of all ‘Natural’ 21.5 hands. The Player must place a second wager equal to the wager he/she originally placed prior to the start of the game. The Player will only receive one card regardless of the total.
- There is no extra collection fee taken by the casino on any double-down or split executed by a Player, nor is there any extra collection fee charged to the Player-Dealer.

SPLIT

- Players can split any two cards of the same value or rank originally dealt to them. The Player must place a second wager equal to the wager he/she originally placed prior to the start of the game. A Player may draw as many cards as they desire per split card to make the best hand. Players may double-down after each split, and split up to three times.
- Players may split any ten-value card (i.e. “10”, Jack, Queen, or King) once. A player may make a second, consecutive split only if their dealt-card is of the same value or rank as the original card. A player may make a third, consecutive split if their dealt-card is of the same value or rank and of the same suit as the original card.
- Players can split any two Aces originally dealt to them but can only receive one extra card per Ace. The Player must place a second wager equal to the wager he/she originally placed prior to the start of the game. Aces may only be split once.

- There is no extra collection fee taken by the casino on any double-down or split executed by a Player, nor is there any extra collection fee charged to the Player-Dealer.

SURRENDER

- Players can not surrender at anytime.

INSURANCE (CASINO OPTION) ;

- When the Dealer has an Ace showing, Players can take insurance by betting half ($^{1/2}$) of their original wager. If the Player-Dealer has a 'Natural' (and the Player does not), the insurance bet is paid 2 to 1 and the Player's original wager loses.

ODDS

- A 'Natural' 21.5 hand pays two to 1 (2 to 1).
- A blackjack 21 hand pays six to five (6 to 5).

All pay-offs are limited to the amount of the Player-Dealer's wager. A Player-Dealer cannot win or lose more than the amount of their wager placed on the table prior to the start of the hand.

Buster Blackjack Side Wager

Buster Blackjack is a side game that complements No Bust 21st Century Blackjack (hereafter **NB21**). It features a side wager that allows the player to bet that the Player-Dealer will bust. The greater the number of cards in the Player-Dealer's busted hand, the higher the payoff.

There will be a distinctive marked circle on the table in which the player will place the optional wager. There is no collection for the extra wager.

Rules of Play

1. The Buster Blackjack side wager is an optional bet offered to all players who placed an **NB21** wager. A player must participate in the base game in order to make the additional wager.
2. Buster Blackjack side wagers must be placed prior to the initial deal.
3. The Buster Blackjack side wager cannot exceed the **NB21** original wager.
4. If the Player-Dealer does not or cannot have a Natural and the player has a "Natural," the **NB21** wager is paid and the player's cards are put away. The Buster Blackjack wager remains in action whether or not the player busts or is dealt a "Natural."
5. Once all players have made the decisions concerning their hands according to the rules for **NB21**, the Player-Dealer will reveal his hole card and play out his hand. The payoff odds vary with the number of cards in the Player-Dealer's busted hand. The more cards in his busted hand, the higher the payoff.
 - a. If the Player-Dealer hand busts, all Buster Blackjack side wagers will be paid according to the posted Buster Blackjack pay table.
 - b. If the Player-Dealer does not bust, all Buster Blackjack wagers will be collected in rotation to the extent of the money in action.
6. The Player-Dealer will pay all winning Buster Blackjack side wagers and will collect all losing Buster Blackjack side wagers.
7. In the event that the player/dealer's wager does not cover the amount wagered by the players, an action button will be used to designate where the action will begin. Additionally, each player's wager receives action in the following order: NB21 wager, Buster Blackjack side wager.

Note: If there are no **NB21** wagers remaining simply because all players have received a "Natural," as long as there are Buster Blackjack side wagers, the Player-Dealer must complete his hand, if not 17 or greater.

The Lake Bowl Cardroom will provide ample notice to all patrons prior to the implementation of any changes to the Buster Blackjack side wager payout. The decision, on which payout option is utilized, is set prior to the start of play and depends on market conditions such as how busy the table is.

LEGAL

The Player-Dealer position must rotate in a continuous and systematic fashion, and cannot be occupied by one person for more than two consecutive hands. There must be an intervening player-dealer so that no single player can continually occupy the player-dealer position within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-1409. If there is not an intervening person occupying the Player-Dealer’s position, the game will be “broke” or stopped, as required by the California Penal Code.

Collection Procedures

California games utilize a player-dealer position. The position must be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

- **Pai Gow Poker & Pai Gow Tiles** – for schedule **option 1**, a collection fee shall be taken per hand from the player and the player-dealer position. The collection fees shall be collected and dropped by the house dealer prior to any cards being dealt or any round of play being conducted.
- **No Bust 21st Century Blackjack & No Bust 21st Century Blackjack 5.0** – for schedule **options 1 through 3**, a collection fee shall be taken per hand from the player-dealer position based on the total monetary value of all game wagers that are placed by players prior to cards being dealt, referred to as “total table action.” The total table action does not count the player-dealer's wager or any additional wagers placed by players after cards are dealt, such as when players double-down, split cards, or when a hand is surrendered. There will be no additional collection fee required from a player when a player double-downs, splits cards, or surrenders their hand. The collection fees shall be collected and dropped by the house dealer prior to any cards being dealt or any round of play being conducted.
- **Three Card Poker**– for schedule **option 1**, a collection fee shall be taken per hand from the player-dealer position based on the total monetary value of all game wagers that are placed by players prior to cards being dealt, referred to as “total table action.” The total table action does not count the player-dealer's wager or any additional wagers placed by players after cards are dealt, such as the play wager. The collection fees shall be collected and dropped by the house dealer prior to any cards being dealt or any round of play being conducted.
- **Ultimate Texas Hold'em** - For **schedule options 1 through 3**, a collection fee shall be taken per hand from the player-dealer based on the total table action, which shall include the total of all Ante, Blind, Play, and Trips Bonus wagers placed. There shall be no collection fee taken from players for placing an Ante, Blind, Play, or Trips Bonus wager. The Blind wager must be equal to the Ante wager placed. The Trips Bonus wager may be less than, equal to, or greater than the game wager but must be within the minimum and maximum table limits. The Play wager may be two, three or four times the amount of the Ante wager, as stated above. The collection fees shall be collected prior to any cards being dealt or a round of play commencing.

Standards of play:

Ultimate Texas Hold'em features head-to-head play against the player/dealer and an optional bonus bet.

The player/dealer position will be selected as in other games approved by the Bureau of Gambling Control; and the player/dealer will only "bank" the hand (including bonus bets) for two (2) consecutive times before it is rotated in a clockwise fashion around the gaming table.

Players and the player/dealer each receive two cards. They combine them with five community cards to make their best five-card hand.

Ultimate Texas Hold'em lets players bet aggressively. The earlier they bet, the more they can risk and win. If players bet pre-flop, they may risk 3x or 4x their ante. If they bet on the flop, they may bet 2x their ante. If they wait until the river, when all community cards are out, they may only bet 1x their ante.

This game also features an optional bet, the Trips bonus. Players win the Trips bonus if their final five-card hand is three of a kind or higher. Odds will be printed on layout. Backline betting is not permitted on any wager.

Type of gaming table utilized for this game:

Ultimate Texas Hold'em shall be played on a table having seven (7) places on one side for the players and the player/dealer for a total of eight seated positions, including a place for the Casino dealer on the opposite side of the table. Each Ultimate Texas Hold'em table shall have a drop box attached to it.

The layout cloth covering the table shall bear an inscription to the effect that the "Player/Dealer only plays with a pair or higher."

The wagering areas shall be designated as follows:

1. For ante wagers on the word "Ante";
2. For blind wagers on the word "Blind";
3. For trips bonus wagers on the word "Trips"; and
4. For play wagers on the word "Play."

Number of players in the game:

BGC ID: GEGA-003621 (July 2012)

A maximum of seven players plus the player/dealer position for a total of eight seated positions.

1. All suits of cards shall have the same rank.
2. Cards shall rank, from lowest to highest, as follows:
 - a. 2, 3, 4, 5, 6, 7, 8, 9, 10, jack, queen, king, ace.

 - a. 1 Pair 2 cards of the same value. A higher pair beating a lower pair. Aces shall be high.
 - b. 2 Pairs 2 different sets of pairs. The highest pair has priority when comparing hands. If the high pairs are the same, then the low pairs are compared, and then the remaining card.
 - c. 3 of a Kind 3 cards of the same value.
 - d. Straight 5 cards of any suit in sequence. An ace may be counted as high or low.

- e. Flush 5 cards of the same suit, not in sequence. The value of the highest card in the hand shall decide the ranking between 2 flushes, and where the highest cards in both hands are the same value, the next card and so on.

Betting scheme:

1. All wagers at Ultimate Texas Hold'em shall be made by placing gaming chips on the appropriate betting areas of the table layout, keeping in mind the table minimum and maximum wagering limits.
2. All wagers shall be placed prior to the dealer announcing "No more bets." No bets shall be made, increased, or withdrawn after the dealer has announced, "No more bets."
3. Before the first card is dealt in a round, each player shall make either:
 - a. An equal wager in the "Ante" and "Blind" circles; or
 - b. An equal wager in the "Ante" and "Blind" circles and a "Trips Bonus Wager."

An ante wager and a blind wager are required to play the round.

4. The player/dealer will collect all losing wagers and will pay all winning wagers to the extent of their wager. Once the player/dealer's wager is exhausted, all player wagers not covered by the player/dealer will be returned to the players.

Dealing procedures:

1. Immediately before the start of each round of play and after all ante wagers, blind wagers, and any trips bonus wagers have been made, the casino dealer shall:
 - a. Call "No more bets"; and then
 - b. Starting on his/her left and continuing clockwise around the table, deal the cards.
2. All cards shall be dealt face down.
3. When a card shoe is used the cards shall be dealt as follows:

- a. 1 card to each wagering area containing an ante wager and blind wager and then 1 card to the player/dealer; followed by
 - b. A further card to each such wagering area and the player/dealer, so that each player and the player/dealer have 2 cards each; followed by
 - c. 5 community cards in the center of the table.
4. When an automatic shuffler is used the cards shall be dealt as follows:
- a. 2 cards at a time to each wagering area containing an ante wager and blind wager; followed by
 - b. 2 cards to the player/dealer; followed by
 - c. 5 community cards in the center of the table.
5. After the cards have been dealt and delivered to each player and the player/dealer, the dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.

Round of Play

1. After the dealing procedures above have been completed, each player shall examine his or her cards and decide whether to check (do nothing) or to make a play wager three or four times the value of their ante wager. Once players bet, they cannot bet again and they cannot change their bet.
2. When players have made their player wagers (if any), the casino dealer shall proceed to turn over the first three community cards.
3. Players who have not already made a play wager may decide to either check again or to make a play wager two times the value of their ante wager.
4. The casino dealer shall proceed to turn over the remaining two community cards (the turn and the river).
5. When all five community cards are revealed, players who have not yet made a play wager can either fold or make a play wager equal to the value of their ante wager.
6. A player who decides to fold shall place his/her cards face down on the table. The casino dealer shall then, in relation to each player who has folded:
 - a. Collect the ante wager, blind wager, any trips bonus wager (if the hand is not a 3 of a Kind or better) on behalf of the player/dealer, and the player's cards;
 - b. Individually spread out the cards, face down, and count them; and

- c. Place the cards in the discard rack.
7. For all remaining players, the casino dealer will turn over the player/dealer's two cards. Each player and the player/dealer's two cards will be combined with three of the community cards to make the best five-card poker hand.
8. When handling the cards, players shall at all times ensure that the cards remain on or above the area of the table. The cards must not be removed from the table.

When the player/dealer does not qualify:

9. Where the player/dealer's hand is not 1 pair or higher, the player/dealer does not qualify. Starting with the player on the player/dealer's left, the casino dealer shall:
 - a. Expose each player's cards, signal a push for the ante and return the ante wager to each player that did not fold;
 - b. Resolve the play, blind, and trips bonus bets normally (see below "When player/dealer qualifies"); and
 - c. Collect, count and place the player's cards in the discard holder.

NOTE: Ultimate Texas Hold'em handles qualifying differently than other games. When the dealer does not qualify, it is not an automatic win for the player.

When the player/dealer qualifies:

10. If the player/dealer's hand has a poker value of a pair or higher, the casino dealer reconciles the hands of those players who remain in the game. Starting with the player to the left of the player/dealer, the casino dealer will:
 - a. Bring the player's cards into the "work area" between the player/dealer's hand and the trips bonus wager area and reveal the player's cards;
 - b. Determine the player's best 5-card poker hand utilizing any of the 7 cards available (player's 2 hole cards and 5 community cards);
 - c. Compare the player's hand with that of the player/dealer; and
 - d. Announce the value of the player's hand and whether it wins or loses.
11. A player's hand shall:
 - a. Win if it has a higher poker value than that of the player/dealer's hand;
 - b. Lose if it has a lower poker value than that of the player/dealer's hand;

- c. Constitute a push if it has a poker value equal to that of the player/dealer's hand.
 - d. If a player wins with less than a straight, the blind bet pushes.
12. If a player's hand loses, the casino dealer shall:
- a. Collect on behalf of the player/dealer, in order, the play, ante and blind wagers;
 - b. Determine whether the trips bonus wager qualifies and pay accordingly on behalf of the player/dealer; and
 - c. Collect, count and place the player's cards in the discard holder.
13. If a player's hand wins, the casino dealer shall on behalf of the player/dealer:
- a. Pay the ante wager and play wager on the hand;
 - b. Pay the blind wager if the hand is a straight or better;
 - c. Pay any trips bonus wager if the hand is a 3 of a kind or better; and
 - d. Collect, count and place the payer's cards in the discard holder.
14. If a player's hand constitutes a push, the casino dealer shall:
- a. Pay any trips bonus wager if the hand is a 3 of a kind or better;
 - b. Collect, count and place the player's cards in the discard holder.
15. Winning ante wagers and play wagers shall be paid 1 to 1.
16. Winning blind wager and trips bonus wagers shall be paid in accordance with the approved pay table for the cardroom.
17. Where a player has made a trips bonus wager at the beginning of the round and has received a 3 of a Kind or higher, the casino dealer shall leave the particular cards face up on the table and those cards shall not be collected or discarded until the payout on the hand has been made.
18. If the player receives a 3 of a Kind or higher, the trips bonus payouts are made regardless of whether the hand wins, loses, or pushes.
- NOTE: If the player has a 3 of a Kind or better, the trips bet always wins – even if the player folds.
19. The player/dealer is never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player/dealer wager. The house never participates as the player/dealer.

The house never takes a percentage of wagers placed in the game. There is no maximum on the player/dealer's wager.

20. The player/dealer position rotates in a systematic and continuous way among the seated players, and no one player may serve as the player/dealer for more than two consecutive hands. The player/dealer button rotates clockwise around the table.

Dealing Procedures and Round of Play

All wagers in Three Card Poker 6 Card Bonus will be made by placing gaming chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.

1. Third-Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code, are not permitted to play while off duty.
2. Backline betting is not permitted on any wager.
3. A standard round of play begins when a player-dealer is designated. The player-dealer will place their wager in the betting circle in front of their seat. This wager will be used to pay the winners and will set the amount the player-dealer can collect from the losers. The house dealer will place a button in front of the player-dealer.
4. At the beginning of each round of play, each player will be required to place an Ante wager. Each player will have the option to place a Play wager after inspecting their hand. The Play wager must be equal to the Ante wager.
5. Each player who has placed the Ante Bet required above, will also have the option to make an additional Pair Plus Bonus Bet and a 6 Card Bonus Bet.
 - a. The Pair Plus Bonus Bet awards a bonus payout to the player(s) who receives a poker hand consisting of certain hand combinations as listed in the Pair Plus Bonus Bet Payout Table.
 - b. The 6 Card Bonus Bet considers the three cards dealt to the player’s hand and the three cards dealt to the player-dealer’s hand. A player then uses any of those six cards, regardless of the number of cards used from their hand or the player-dealer’s hand, to make the best possible five card poker hand. If the player’s hand qualifies for a payout, the player is paid by the player-dealer according to the posted pay table.

6. The house dealer will wait for each player to place their Ante Bet as well as any bonus bets. After each player has placed their wager(s), the house dealer will announce, “no more bets.” No Ante, Pair Plus, or 6 Card Bonus Bets will be made, increased, or withdrawn after the house dealer has announced “no more bets.”
7. After all wagers have been placed, the house dealer will shuffle the cards by use of a shuffle machine so the cards are randomly intermixed.
8. Upon completion of the shuffle, the device will dispense cards in stacks of three.
 - a. The house dealer will deliver the first stack of cards dealt by the shuffler to the player to the left of the player-dealer position. As the remaining stacks are dispensed by the shuffler, the house dealer will deliver a stack in turn to each of the other players, including the player-dealer, moving clockwise around the table. The house dealer will deliver each stack face-down. The stack given to the player-dealer will be delivered face-down after which the bottom card will be turned face-up.
9. The house dealer will unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.
10. The game will utilize an “action button” to determine which player receives first action on their wager. The player-dealer’s third card, which is dealt face-up, determines the position of the action button. The player-dealer position is not counted when determining where the action button will be placed. The seats, in clockwise rotation, starting with the player to the left of the house dealer and continuing left to right, respectively represent the numbers of the player-dealer’s face-up card, as shown below.

Ace	1
2-10	Hold their face value
Jack	11
Queen	12
King	13

11. After the dealing procedures above have been completed, each player will examine his/her cards.
12. Each player who wagers in Three Card Poker 6 Card Bonus is responsible for his/her own hand and no person other than the player or the house dealer may touch the cards of that player. Each player will be required to keep his/her three cards in full view of the house dealer at all times.
13. After examination of the cards, each player will have the option to either make a Play Bet in an amount **equal** to the player's Ante Bet or forfeit the Ante Bet and end his/her participation in the round of play. The house dealer will offer this option to each player, starting with the player to the left of the player-dealer and moving clockwise around the table in order.
 - a. If a player has placed a Pair Plus Bonus Bet, but does not make a Play Bet, the player will forfeit the wager, as well as the Ante Bet.
 - b. If a player has placed a 6 Card Bonus Bet, the 6 Card Bonus Bet is still active.
14. After each player has either placed a wager on the table in the Play Bet area or forfeited his/her wager and hand, the house dealer will collect all forfeited wagers and associated cards, placing them in the discard rack except for players who have placed a 6 Card Bonus Bet. The house dealer will place the player’s cards under the 6 Card Bonus Bet.
15. The house dealer will then reveal the remaining player-dealer's cards and place the cards so as to form the highest possible ranking hand. The player-dealer must qualify to play with a **minimum of queen-high**.

How Winners are Determined and Paid

1. Wagers will be settled in the following order from player to player: the Ante Bet, then the Play Bet, then the Pair Plus Bet (if placed), and then the 6 Card Bonus Bet (if placed).
2. If the player-dealer's hand does not have a minimum of a queen-high, the **player-dealer does not qualify**.
 - a. The Play Bet receives no action. The house dealer will immediately refund these wagers to players.
3. The Ante Bet receives action. If the player did not fold and their hand ranks higher than the player-dealer's hand, the player shall be paid even money. If the player-dealer's hand ranks higher than the player's hand, the Ante wager shall **lose** and be collected by the player-dealer.
4. If the player-dealer's hand has a queen or better, the **player-dealer's hand qualifies**. The house dealer will immediately stack each player's Play Bet atop the Ante. The house dealer will then reveal the three-card hand of each active player, starting with the player to the left of the player-dealer position or the player with the action button.
 - a. If the player's hand beats the player-dealer's hand, the player wins even money on the Ante and the Play Bets.
 - b. If the player-dealer's hand beats the player's hand, the player loses both the Ante and the Play Bets.
 - c. If the player's hand and the player-dealer's hand are equal in rank and value, the hand is considered a tie (push) and the Ante and Play Bets will push and be returned to the player.
5. All cards collected by the house dealer will be picked up in order and placed in the discard rack in such a way they can be readily arranged to reconstruct each hand in the event of a question or dispute.
6. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. Once the player-dealer's monies have been exhausted, the wagers not covered by the player-dealer will be returned to the players. The house will not participate as the player-dealer. The house will not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
