

CAPSS Release Notes: September 2016

On September 15, 2016, some minor enhancements were made to the CAPSS system. Below are the major points outlining these changes.

- Users now have the ability to export their search results to .CSV format
- Enhanced the matching functionality for all new articles
- Allow user activity in browser to keep server from timing out in 30 minutes so user can continue working within that CAPSS session
- Data in 'Race' field is optional
- Label for Transaction Item Type changed from "Amount" to "Value" according to the type of transaction.
- Provided LEA with search capability for store usage

Licensing Component:

- Offsite Storage address includes a State drop down list
- Update of Certificate for SHD licenses and Expired License Letters

Next Planned Release:

The next release is tentatively scheduled to be delivered no sooner than Mid-November 2016 planning to include the necessary changes to accommodate the API solution.

Please note that the changes mentioned for the next release will impact the submissions of files using the current structure. XML Specification documentation for the API will be posted prior to the release.

Meetings:

The most recent webinar was held on August 31, 2016. This webinar was with store IT staff and vendors to discuss the API final specifications.
