Texas Hold' em RULES:

Ranking order of hands from highest to lowest

- | | |
|-------------------|--------------------|
| 1. Royal Flush | 6. Straight |
| 2. Straight Flush | 7. Three of a Kind |
| 3. Four of a Kind | 8. Two Pair |
| 4. Full House | 9. One Pair |
| 5. Flush | 10. Highest Card |

In Hold' em each player receives two cards face down. Five community cards are then turned face-up upon the table. Hold'em has structured betting: i.e. the betting is "split limit" (example: 3 - 6 limit indicates a \$3 wager for the "lower" limit and a \$6 wager for the "higher" limit), with the smaller limit occurring during the first two (2) betting rounds and the higher limit occurring during the final two (2) betting rounds.

1. Hold'em is played using a standard 52-card deck. The object is to make the best high hand among competing players using the traditional ranking of poker hands.
2. A Dealer Button is used to indicate the player, who in theory, dealt the cards for that pot. The button is the last to receive cards on the initial deal and has the right of last action on all betting rounds except the first.
3. Method of Play: Blinds are posted as in many other poker games; i.e. the first two players after the Dealer Button post a wager before the cards are dealt a small blind and a large blind. The large blind is equal to the "lower" betting limit, with the small blind being less than the large blind. In the 3 - 6 limit game described above, the large blind would be \$3 and the small blind \$2.

The player on the dealer button will also post \$1 before the cards are dealt.

4. Each player is dealt two cards face down, one at a time, in rotation in turn.
5. Around of betting ensues starting with the player to the left of the dealer button, where players have the option to check, bet, call, raise, or fold.
6. Three cards are turned face-up in the middle of the table. These are commonly called the "flop".

7. A round of betting ensues for players who wish to continue and contend for the pot, beginning with the first active player after the Dealer Button. Betting for this round is at the "lower" limit.
8. A fourth card is turned next to the initial three. (Fourth Street/the Turn) Betting for this and subsequent betting rounds are at the "higher" limit.
9. A round of betting ensues for players who wish to continue and contend for the pot, beginning with the first active player to the left of the Dealer Button.
10. A fifth and final card is turned next to the previous four. (The River Card/Fifth Street) These five cards are common to all active players.
11. A final round of betting ensues, beginning with the first active player to the left of the Dealer Button.
12. All active players expose their hands, beginning with the first player initiating action (a bet, raise, or a check if there was no bet) on the final betting round. Using the best of their personal two cards and the five community cards, the active player with the best five carded high hand is awarded the pot. Players may use two, one or none (playing the board) of their personal cards to form their hand.
13. Collection: The collection will be taken from the Blinds, after the first (2) cards are dealt. The total collection amount for each hand is \$5.00. This amount will be posted on the game table and the wall. The structured betting (split-limit) will also be posted on the each game table and wall (i.e. - $\frac{1}{2}$, 2/4, 3/6, 4/8, 6/12, 10/20, 15/30, 20/40, 40/80 and No Limit).

No-Limit Hold'em

No-Limit Hold'em is played the same as Hold'em (see above) with the following exceptions: No-limit Hold'em has no structured betting; i.e. players may bet any amount between the minimum opening bet to the entirety of their chips. On the first betting round, the first player entering the pot must "open" the pot for a wager at least the sum total of the blinds. Collection will be taken from the blinds as all other Hold'em games.

3 Card Texas Hold'em

Patents Pending

DEALING PROCEDURE

3 Card Texas Hold'em is played with a deck of 52 cards on a blackjack-sized table.

The game is played by up to seven players and a player banker.

The game can be dealt with or without a card shuffler.

A house dealer deals the game.

OBJECT OF THE GAME

Each player and the player banker will use 3 of their 5 cards to make their best three card poker hand. All players try to beat the player banker's 3 card poker hand.

BETTING LIMITS

Each player can bet between \$5 and \$200.

There is one betting spot per player.

Players may only play one hand.

RULES OF PLAY

- 1) Each player makes a compulsory Ante bet and places the appropriate amount of the collection fee. The Flush Or Pair and Straight Up side bets are optional (see Flush Or Pair and Straight Up side bets below) but can be made only if an Ante bet is made. The Ante and the two side bets need not be equal as long as they are within the table limits.

- 2) All players and the dealer get two hole cards face down. The player cards will remain face down until the player banker receives his hand.
- 3) Three communal cards known as the "flop" in Texas Hold'em are dealt on the board with the first card revealed.
- 4) After looking at his hand and the open communal card, the player can (1) fold and forfeit the Ante, or (2) match the Ante with an additional equal bet. If the player chooses to fold after seeing his first two cards, the Ante bet loses but both the Flush Or Pair and Straight Up side bets, if made, remain in action.
- 5) The dealer reveals the second communal card.
- 6) Now each player can either check or match the Ante with an additional bet.
- 7) The dealer reveals the third communal card and his two hole cards. Now everyone has 5 cards – his 2 hole cards plus the 3 communal cards. All players and the dealer use any 3 of the 5 cards to make their best three card poker hand.
- 8) Each player hand is compared with the dealer hand. Whoever has the higher rank wins. The dealer must have a pair of 4s or better, or else the Ante is not paid if the player wins.

Flush Or Pair

This side bet is optional. If the player's first two cards make a pair or are suited, it will be paid according to the pay tables below:

(All payouts are "to 1.")

Player 2 card Hand	A1	A2
AK Suited	30	30
AA	15	12
One Pair	5	5
Flush	1	1

Straight Up

This side bet is optional. If the player's best 3 card poker hand is a straight or better, it will be paid according to the pay tables below:

Hand Type	B1	B2
Straight Flush plus a Pair*	40	40
AKQ Suited	33	30
Straight Flush	10	10
Three of a Kind	6	6
Straight plus a Pair*	4	4
Straight	1	1

* All five cards must be used to win "straight flush plus a pair" and "straight plus a pair." Example: A♣K♣Q♣5♥5♦, 8♣9♥10♣3♥3♦.

NOTES

- a) There are neither 4 of a kinds nor full houses. Any 4 of a kind and any full house should be paid the same as a 3 of a kind.
- b) When a hand can have more than one rank, only the highest rank is paid. For example, if a hand has both a 3 of a kind and a straight flush, such as 8♥8♦8♣7♣9♣, then it is just a straight flush plus a pair. A hand of 8♥8♦8♣7♥9♣ is a 3 of a kind but not a straight plus a pair because a three of a kind pays more than a straight plus a pair.
- c) The outcome of the Ante bet has no bearing on the two side bets.

DEALING THE GAME

The game may be dealt by hand or by an automatic shuffler.

Deal by Hand

The dealer will shuffle the deck using the house procedure for single deck shuffling. Upon completion of the shuffling process, the dealer will cut the deck in half using a one-handed "poker" cut before dealing to the players. The cut must be at least ten cards away from either the top or the bottom of the deck.

Automatic Shuffler

When using a shuffler, the casino will be permitted to use a second deck of cards to play the game provided that:

- a) The backs of the cards are of different colors.
- b) The shuffling machine is shuffling one deck while the other deck is either being dealt or used to play the game.
- c) Both decks are continuously alternated in and out of play, with each deck being used for every other round of play.

If the shuffler can be programmed to output two cards at a time, the dealer will pick up each two card hand from the shuffler and hand it to each player one at a time clockwise. If the shuffler can't output two cards at a time, the dealer must pick up the entire deck after the shuffle and deal according to the **Deal by Hand** rules above.

Dealing

Two cards are dealt face down to each player clockwise. The dealer then burns a card and deals three communal cards to the three card boxes in the center of the table from left to right. Only the first communal card to the dealer's left is dealt face up:

| _____ Chip Tray _____ |

First Betting Round

Now the players look at their cards. They may fold their hand or bet:

Fold - If a player folds, he must place his cards face down above his Ante bet.

Bet - If a player wishes to stay in the game, he must place a bet equal to the Ante on the betting circle labeled "Bet or Fold" beneath the Ante bet.

After all players have made their decisions, the dealer will pick up the Ante bets and cards from those players who folded. However, if the player who folded has a bet on any of the two side bet circles, the dealer should pick up the player's cards and tuck them, face up, under his side bet(s) because the side bet(s) remain in action:

Final Betting Round

After the dealer has picked up all bets and cards from those who folded, the dealer will reveal the second communal card:

Now the players may either check or place another bet equal to the Ante on the betting circle labeled "Bet or Check." No folding is allowed at this point. After all players have made their decisions, they must tuck their cards face down under their Ante and first bet.

After all players have made their decisions, the dealer reveals the last communal card.

Finally, the dealer burns a card off the top of the remaining deck and deals the player banker two cards face up, which should be placed between the chip tray and the row of the communal cards.

THE PLAYER BANKER HAND

On behalf of the player banker, the dealer will pick three of the five cards to make the player banker's best Three Card Poker hand. Depending on the player banker's two hole cards, the dealer has to place the cards as follows. Simply put, the three cards the dealer picks to use should be placed as close to one another as possible:

- a) If the dealer will use both his hole cards, he must place his two cards right above the one communal card he picks to use:

- 1) When using the left communal card (8-high straight):

- 2) When using the right communal card (K-high straight):

3) When using the center communal card (J-high straight flush):

b) If the dealer will use just one of his hole cards, he must place the card he won't use perpendicular to the card he will use and place the card he will use above the two communal cards he picks as follows:

1) When using the left two communal cards (10-high straight):

2) When using the right two communal cards (a pair of Kings):

3) When the left and right communal cards will be picked, the dealer must swap the center communal card with the left communal card before placing his one hole card above them. Assume the dealer has 5♠ and Q♣ to make a flush with the following flop:

The dealer has to swap 8♣ and 10♦ and then place his Q♣ right above 8♣ and K♣.

This is the only time the dealer must swap the communal cards.

- c) If the dealer will not use his hole cards at all, he must place his cards as follows:

After the dealer has properly arranged his hand, starting with the first player to his right, he turns over each player's hand to determine the hand rank. The dealer should place the player's hand in front of his Ante bet with one card partially superimposing the other as in blackjack. The top card should only cover a corner of the bottom card such that the rank and the suit of the bottom card can be seen easily.

SETTLING THE BETS

Ante/Bets

Only the best 3 of the 5 cards, including using all 3 cards on the board, are selected to make a three card poker hand. The hand ranking is the same as Three Card Poker:

- Straight Flush
- 3 of a Kind
- Straight
- Flush
- One Pair

The hand is settled as follows:

If the player banker beats the player, the Ante and Bets lose.

If the player beats the player banker, the outcome depends on whether the dealer has at least a pair of fours:

- If the player banker hand is less than a pair of fours, all Bets are paid 1 to 1 and the Ante pushes.
- If the player banker has a pair of fours or better, the Ante and all Bets are paid 1 to 1.

Ties are pushes.

Side Bets

If a Flush Or Pair bet was made, check the player hand against the Flush Or Pair pay table to see if it qualifies for a payoff.

If a Straight Up bet was made, check the player hand against the Straight Up pay table to see if it qualifies for a payoff.

All bets receive action to the extent that the player banker's bankroll covers.

The round of play ends when the player banker exhausts his bankroll or when all player wagers receive full action.

Putting Away the Cards

Each player's hand should be picked up and put in the discard rack as soon as his hand is settled. The player banker's hand should be picked up and put in the discard rack before the three communal cards are put in the discard rack.

PLAYER BANKER AND THE DEAL

The player banker position rotates. Each player is allowed to bank two consecutive hands. There must be an intervening player banker so that a single player cannot repeatedly act as the player banker within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-09, AB 1416, Wesson's Bill (an act to add Section 330.11 to Penal Code, relating to gambling establishments), and any future regulatory guidelines from the Division of Gambling Control with respect to the operation of controlled games featuring a player banker position.

The game will be closed if at least one other intervening player at the table does not accept the deal when offered. To comply with this ruling, we will place a plastic disk on the table. One side of the disk says "game open," and the other side says "game closed." As a player is banking, the "game open" sign is in use. When he has completed his second banking, banking is offered to all other seated players. If no other players accept banking, the disk is flipped to the "game closed" side. After a momentary pause, the disk is turned back to the "game open" side and a new game commences. This procedure would also pertain to the Third Party Proposition Players when they are banking and no one else wishes to bank.

A player banker is never required to cover all opposing player's wagers.

The House never participates as a player banker.

The House never takes a percentage of the wagers placed in the game.

Per Lodi Municipal Code, there can be no more than 10 active players at a table, plus the house dealer. There is no requirement of a minimum number of players. This presents no problem for 3 card Hold'em because the game is structured with no "back line betting" and a six spot table.

IRREGULARITIES

- a) We will attempt to deal with what we believe are reasonable errors to expect and offer solutions. In all floor rulings, the rule of fairness may supersede a hard rule. It needs to also be understood that in all decisions, the floor supervisor's ruling is final.
- b) If any card is found face up in the shuffler, or the deck, while the cards are being dealt, all hands will be voided and the cards will be reshuffled.
- c) If any player, or the banker, is dealt an incorrect number of cards, all hands will be voided and the cards will be reshuffled.
- d) If an automated shuffler is being used and the device malfunctions, jams or fails to deal the appropriate number of cards, the round of play will be voided and the cards will be removed from the device, checked by a casino supervisor, and reshuffled.
- e) Other errors that may occur in the card game:

1) Card on the Floor:

If a player drops a card from their hand, that card will still be in play. A floor supervisor should be called to pick up the card.

2) Exposed Card in the Player Banker's Hand:

If a second card is exposed in the player banker's hand, the round will be declared a misdeal.

3) Boxed Card:

If a boxed card is found and it is in a player's hand, the player will receive the top card from the stub after the deal is completed. If there is a boxed card in the Player Bankers hand the hand will be declared a misdeal. If more than one boxed card is noted the entire round of play will be declared a misdeal.

4) If a Player Lacks Sufficient Funds to Make Additional Bets::

Dealers will make every attempt to keep players alerted to the fact that they must have sufficient funds to match their additional bets with their ante bet. In case that this is not noted prior to the hand being dealt the player will

have the following options: 1. purchase chips at the table to complete the bet; 2. have a player at the table complete the bet for them; forfeit their ante bet and side bet(s). They will not be allowed to stop the game and use a cash machine to complete the hand.

5) Additional Bets do not Equal Ante Bet::

If the hand is completed and it is determined that the player had made an additional bet that is less than the ante bet, and the player has a winning hand, the overage on the ante bet will be refunded and the amount of the additional bet that is over will be refunded. If it is a losing hand, all monies wagered will be lost. If the additional bet is larger than the ante bet, and it is a winning bet the smaller ante bet will be paid and the overage on the play bet will be refunded. This will also hold true if the hand is a losing hand.

6) If a Player is not Dealt a Hand: (missed by the dealer)

All players must be seated at the table in order to receive a hand. If the player is seated, has placed a bet, and is missed by the dealer, the hand will be declared a misdeal and all hands will come back.

Glossary

Ante The compulsory wager players make before seeing their hands.

Fold The player option to surrender his Ante, rather than continue in the game.

Check After the second communal card is revealed, each player has the option to stay in the game without making an additional bet.

Collection The amount that the House collects for the players to play their hand.

Communal Cards The three cards that are dealt to the center of the table which are shared by all players and the player banker. The three communal cards will be combined with each player's two cards to form their best three card poker hand.

OMAHA HIGH/LOW SPLIT 8 OR BETTER DEALING PROCEDURES - COLLECTIONS

1. Each Player receives four down cards as his initial hand followed by a round of betting.
2. Players may then either release (fold) their hand or they must call the amount of the big blind which, in structured betting games, is the lower bet, or raise the amount equal to the big blind.
3. The dealer then burns a card and turns three cards up at once; this is called the “flop”. After the flop, there is a second round of betting (lower bet).
4. The Dealer then burns and turns one card (the fourth card, commonly known as the turn card), followed by another round of betting (higher bet).
5. Finally the dealer will burn and turn the last card (the fifth card, commonly known as the river card), followed by the last betting round (highest bet). Example: In a \$4-\$8 Omaha game, the blinds are \$2 and \$4. The first two betting rounds are in \$4 increments, the third and fourth betting rounds are in \$8 increments. The same betting strategy would be true for Kill with the limits raised to \$8 and \$16.
6. There can be two winners; a straight high hand and a low hand as long as the 5 card board has 3 separate cards 8 or lower and a player has two additional low cards in their hand. The best low hand is A,2,3,4,5, called a Wheel. If there is a qualifying low hand and high hand, they split the pot equally. If there is only a high hand and no qualifying low hand, the high hand wins the entire pot. If the low hand is the only left in the game after all other players fold, he will win the entire pot.
7. After all betting has been completed, a player must use a combination of five cards (two in his hand, three from the board) to determine his best hand.
8. Omaha uses a flat disc called a dealer button to indicate position of the deal. The dealer button moves clockwise one seat each hand. The button (player with the dealer button) is last to receive cards on the initial deal and has the right of last-action on all betting rounds except the first.
9. There are designated blinds in Omaha (usually two, in the first and second positions to the left of the dealer button). The blinds are considered to be bets, and used to initiate action.

10. On all subsequent betting rounds the action is begun by the first active player clockwise from the button. Players must post both blinds each round.
11. In a new game, players are dealt cards, with the highest card by suit receiving the button.
12. Collection amount will be posted on the table at all times.

Description of Table Used and Total Number of Seated Positions

The game shall be played on either a standard blackjack table that accommodates up to seven players and a player-dealer position for a total of eight seated positions or a standard baccarat table that accommodates up to thirteen players and a player-dealer position for a total of fourteen seated positions. ULTIMATE WAR

Lodi Casino

- The War Bet, which pays according to the pay table below;
- The Ultimate 5 Player Bet, which pays according to the pay table below;
- The Ultimate 5 Banker Bet, which pays according to the pay table below.

Once all wagers are placed, the house dealer deals one card to the right and one card to the left. The hand to the left of the house dealer is a community hand that belongs to those that placed a wager on the Player Bet. The hand to the right of the house dealer is a community hand that belongs to those that placed a wager on the Banker Bet.

The hand that has the highest card value wins. If the both hands have the same value they are considered a tie and the hand “goes to war”. When a hand goes to war the house dealer will deal an additional card to the Player Bet hand and the Banker Bet hand to determine the winner. The hand that is dealt the highest card wins. In the event that the hands tie again, the hand will go to war again and the process will repeat until a winner is determined. There is no limit to the amount of times the Player and Banker Bet hands may go to war. The winner is determined by a comparison of the last card given to each player.

How Each Wager Wins, Loses, or Pushes

ULTIMATE PAI GOW POKER

Type of Game

Ultimate Pai Gow Poker is a seven card California style game that utilizes a player-dealer position. Players play against the player-dealer who pays and collects back to front seat by seat according to action until the hand is over or the bank money has been depleted.

Object of the Game

The object of the game is for the players to compete against the player-dealer by betting that either the player's hand will win or the banker's hand will win. At the beginning of the game one seven-card hand will be placed out on the table to represent the player and another seven card hand will be placed out on the table to represent the banker. Both hands are opened by the dealer and set house way. The dealer is required to form a two-card hand and a five-card hand for both the player and banker according to the house way strategy. The five-card hand must always rank higher than the two-card hand. Once each of the hands have been set house way the dealer will compare the two hands to determine if the wagers placed on the table win, lose, or push. If the player's side wins both the two-card and five-card hands all player wagers will get paid and all banker wagers will lose. If the banker side wins both the two-card and five-card hands all banker wagers will get paid and all player wagers will lose. All copy/ tie hands lose to the player-dealer and the second hand alone will determine the outcome. If both the two-card and five-card hands result in a tie both the player and banker wagers will lose. Additionally, if the player's or banker's hand has a two-card or five-card copy it cannot win. The hand can only push or lose depending on if the non-copy hand is of higher or lower value. In order to get paid out on a base bet the player must win the two-card and five-card hand.

Example: Both the player and banker two-card hand copies and the banker's five-card hand is better than the player's five-card hand, then the banker wager results in a push and the player wager loses.

Example: Both the player and banker two-card hand copies and the player's five-card hand is better than the banker's five-card hand, then the player wager results in a push and the banker wager loses.

Object of the Game

The object of the game is to play to 31. The Player hopes to be dealt a "Natural" which is the Top Ranked Hand. The Players and the Player Dealer add the numerical value of their initial two-cards and compare them against each other. In the event the Player Dealer is dealt a "Natural" the game stops, and the Hands are compared. If the Player is not dealt a two-card thirty-one (31) then the Player will play to Hard thirty-one and if not, then the Player will try to get as close to twenty-one.

The Player's hand is frozen from receiving an additional Draw card when their hand total is between 22 and 30. After the Draw the Player will lose their original wager with a hand value between 22 and 30 and Win on a value of 31 no matter the value of the Player Dealers hand.

- ♣ A Natural consists of an Ace card and a 10-point card when the first two hands are dealt.
- ♣ A "Blackjack X" consists of an Ace/King of Spades.
- ♣ All cards have face value. Face cards have a value of 10.
- ♣ If the Player Dealer does not have a Natural the Players will have the option to Double Down, Hit, Split, Surrender, or Stand depending on the value of their hand.
- ♣ The Player must stand on a Natural, and a Hand that totals between 22 and 30. The Player has an option when their hand total is between 2 and 21.
- ♣ Player Dealer must hit soft 17 and stands on Hard 17 or above.

Game Rules

A standard deck of cards with no Joker is used in the play of the game. The Deck will contain a total of 52-cards. The game can be played with a minimum of one (1) and a maximum of eight (8) decks. All Aces of spade will have an "x" stamped on the card.

The game plays to 31 which can be achieved either on the initial two-card deal by being dealt a standard Ace card along with a 10-point card or by hitting to 31 while trying to avoid landing on a hand that totals between 22 and 30. The best hand is referred to as a "Natural 31" and is accomplished when the player or player-dealer's initial two (2) card hand consists of a standard ace and a ten (10) point card. The second best hand is a two-card hand that consists of an Ace and King suited. If the player is not dealt a two-card hand of thirty-one (31), the player will try to achieve either a hard thirty-one (31), which is the third best hand, or a hand of twenty-one (21), which is the fourth best hand. Both the Player and the Player-Dealer's hand are frozen from taking additional Hit cards when their hand value is between 22 and 30. When exceeding twenty-one, the Player will win on Hard (31) and will lose on any other total, no matter the value of the Player Dealer hand. The Players will have the option to Stand, Split, take Insurance, Double Down, Surrender or Hit provided the Player Dealer is not dealt a two-card 31. A hard hand is any hand that the minimum value is more than 11. Minimum value means there are aces in the hand and using all the aces as 1 instead of 11's the hand is 12 or more, or it would be any hand that if were to receive another 10 would bust over 22.

A hard 31 would be a hand that the player hits a hard 21 and receives a 10. This is the only way that hand could be achieved.

When both the Player and the Player Dealers hand value is between 22 and 30 they are frozen from taking additional Hit cards. When exceeding twenty-one, the Player will win on Hard (31) and will lose on any total between 22 and 30, no matter the value of the Player Dealer hand.

6. The Players will have the opportunity to act on their hand.
 - a. After the Draw, if the Player totals 31 they will win their original wager provided the Dealer is not dealt a natural.
 - b. The Player loses on a hand with a value between 22 and 30.
 - c. The player wins if their hand total is closer to thirty-one without totaling a hand between 22 and 30. The Player loses if the Player Dealer is closer. If both the Player and the Player Dealer are dealt a Hand of equal value then the wager is a push.
7. Once the Dealer's hand is concluded the round is over.
8. The Dealer will then compare the bets placed by the Player who is occupying the House position to see if the Player wins, loses, or ties and completes the payoffs. If the Player wins the Dealer will pay the Player with monies from the Player occupying the Player Dealer position.

Pai Gow Poker with Triple Bonus Bets

Synopsis:

This game uses the traditional Pai Gow Poker game and adds three bonus bets, Ultimate Push, Happy Pai Gow and Double Luck Bonus Bet. The bonus bets have to be placed prior to the hands being played. A player has the option to place an Ultimate Push wager; the wager will win when the player's hand and the player-dealer's hand push. This Ultimate Push Bonus Bet pays 1:1 except when there is a pair of 3's or higher, then it will pay 2:1. In addition, a player has the option to place a Happy Pai Gow wager; the wager will win when the player's hand is a Pai Gow Hand. A "Pai Gow" Hand consists of seven cards that have no pairs and do not make a straight or flush. Finally, a player has the option to place a Double Luck Bet; the wager wins if the player's hand contains one of the hands in the Double Luck Pay Table.

Object of the Game:

The object of the game is for both of the player's two hands to rank higher than both of the player-dealer's two hands by strategically playing the seven-card poker hand with a two card low hand and a five-card poker high hand. Should one hand rank exactly the same as the player-dealer's hand, this is a tie. The player-dealer wins all ties. If the player wins one hand, but loses the other, this is considered a "push", and no money exchanges hands.

Type of Deck Used:

The traditional Pai Gow Poker game uses a total of 52 cards and a joker. The Joker is used as an Ace or to complete a straight or flush.

Table Layout:

Each table has 7 active seats and 1 inactive seat. An 8-seat table may be used with one inactive seat in order to symmetrically accommodate a floor person and another seated player. The inactive seat has the betting spots blocked. The inactive seat rotates clockwise, and is always located immediately to the right of the player-dealer, from the Dealer's perspective.

Number of Players:

There is no minimum number of players, as long as there is at least one player and one player-dealer.

Ranking of Hands:

Pai Gow Poker is played with a standard fifty-two (52) card deck with one joker, fifty-three (53) cards total. The Joker can only be used as an Ace, or to complete a Straight, Flush, or a Straight Flush.

The highest 5-card hand is Five Aces, and the highest 2-card hand is a Pair of Aces. The PGPQ hand rankings, based on traditional poker rankings, are as follows:

Rank	Combination of Cards
1 st	Five Aces (A-A-A-A-Joker)
2 nd	Royal Flush (10-J-Q-K-A of the same suit)
3 rd	Straight Flush (Five cards, same suit, ranked in order; i.e. 6-7-8-9-10 of hearts)
4 th	Four-of-a-kind (Four cards of the same rank; for example, 5-5-5-5) The highest-ranked cards win should the p/d and player both have a four-of-a-kind

Game Rules and Structure:

Each player at the table is dealt seven cards to make two hands, a two-card hand and a five-card hand. Rankings are based on basic poker rankings. The five-card hand must be higher than the two-card hand.

Play of the game is as follows:

- a. The dealer places seven hands of seven cards each, face down in front of the dealer's tray. The dealer checks that exactly four cards are left over, and then places those cards into the dealer's tray.
- b. There are two steps taken to determine which of the seven hands goes to which player. In the first step, the player-dealer calls out a number from one to seven, and the Action button is placed on the pile that corresponds to that number. This hand is pushed slightly forward and the preceding hand is turned sideways.
- c. If a dice cup is used, the player-dealer then shakes the dice cup containing three dice. The cup is opened only by the house dealer, after all bets are placed in the betting circles. If a random number generator is used, the number generated by the random generator will be used.
- d. The player-dealer's position is always 1, 8 or 15. The dealer counts clockwise from the player-dealer's position to locate the seat corresponding to the number on the dice. The pile of cards with the Action button, will then be placed in front of the player indicated by the dice or number generated by the random number generator. The remaining piles will then be distributed clockwise. The player-dealer's hand is left in front of the dealer and the dealer button is placed on top of it.
- e. Each player then arranges their cards into a two-card low and a five-card high hand as described above.
- f. The dealer does not look at the cards until all players have set their hands in the designated spaces face down. Any hands that are going "house way" will have a "house way" button placed on them.
- g. The dealer then turns his cards over and sets his hand face up. Losing hands should be turned face down and losing wagers should be placed on top. If the player wins one hand and loses the other, this is considered a "push". No money exchanges hands and the cards are placed in the discard holder.
- h. If one player is wagering on more than one seat, that player may look at and determine the setting of the first hand only. The remaining hand(s) must be set according to the "house way". Players and the player-dealer must place their bets before the dice cup is opened or the random number generator is finalized. No change in bets can occur after that point. Only chips placed in the appropriate position(s) on the table constitute a valid bet. Each player is responsible for the chips he/she places on the table.

Foul Hand:

If the player sets the hands so that the two-card hand is higher than the five-card hand, it is a Foul Hand and automatically is a losing hand. Similarly, if there are not exactly two cards in one hand and five cards in the other hand, it is a foul hand and automatically loses.

Payoff:

The base Pai Gow game winning hands are paid even money. The payout starts with the person to the left of the player-dealer then continues clockwise. The succession of payoff starts with the base Pai Gow game wager then followed by the Ultimate Push bet, the Happy Pai Gow bet and lastly the Double Luck Bet. All wagers are paid all at once from person to person. Once the player-dealer's money has been exhausted, the wagers that were not covered by the player-dealer will be returned to the players.

Player-dealer (Banker):

Any player may be the Player-dealer position. All players bet against the player-dealer. The Bank must rotate in a continuous and systematic fashion. The player-dealer position is offered to each seated player seat in a clockwise fashion. That player may accept or pass, in which case the player-dealer position is offered to the next player. When the player-dealer position passes to the next seat, the player seated in that seated position has the first option. If she refuses the player-dealer position, any player betting on that seated position the previous hand is eligible to be the player-dealer for the next hand, in order of the betting spot in which they bet the prior hand.

Ultimate Push Bonus Bet:

The Ultimate Push Bet is an optional wager for players. The wager wins when the outcome of the player hand and player-dealer hand results in a push, otherwise the wager loses. The wager pays 1:1 if the hand results in a push and 2:1 when the outcome of the hand is a push with either the player's hand, player-dealer's hand, or both hands containing a pair of 3's or higher in their two-card hand. Both hands will always be set house way to determine the outcome of this bonus wager.

1. Players have the option to bet bonus wagers only. They are not required to place a base bet in order to have a bonus wager.
2. The Ultimate Push Bonus Bet may be less than, equal to, or greater than the base game wager as long as it is within the table limits.
3. The player-dealer will pay all winning bonus bets and will collect all losing bonus bets.
4. In the event the player-dealer's money does not cover the amount wagered by the players, an action button will be used to designate where the payout will begin.

SUMMARY OF GAME

The object of the game is to assemble two hands with a point value as close to nine as possible. Aces have a value of 1, picture cards have a value of 10, all other cards have their face value. A hand with cards whose sum is ten or higher is ranked with the tens (10s) digit ignored. For example, a hand totaling 18 would be valued simply as 8.

The casino dealer deals two hands of two cards each, two cards to the right and two cards to the left one by one in rotation. The hand to the left of the casino dealer is a community hand that belongs to those that placed a bet on the banker line. The banker's is dealt face down. The hand to the right of the casino dealer is a community hand that belongs to those that placed a bet on the player line. The player's hand is dealt face down. Players have the option to bet on the player's hand, the player-dealer's hand, or tie bet. In addition, if a player placed a wager on the player line or the banker line, that player may place a wager on the Player Dragon Bonus Bet or the Banker Dragon Bonus Bet. A player may place a tie bet wager even if they have not also placed either a player line wager or a banker line wager prior to the initial deal.

Game Rules

1. The object of the game is to form a hand that equals 9 or as close to it as possible
2. The game is played with eight decks of 52 standard cards. There are no Jokers.
3. The game may be played on either a standard baccarat table which accommodates up to eight seated positions or a batwing table that accommodates up to fourteen seated positions; however, per the City of San Bruno's local ordinance, *"Not more than ten players shall be permitted at any one cardtable."*
4. Cards between 2 and 9 have face value.
5. Picture cards and 10's are counted as 0.
6. Aces have a value of 1.
7. Prior to the deal, all players must place a wager in accordance with table limits.
8. Players have the following options when placing their bet:

 - c. Tie line which pays 9 to 1 on all push (tie) hands
9. The hand to the right of the casino dealer is a community hand that belongs to those that placed a bet on the player line. The player's hand is dealt face down.
10. The hand to the left of the casino dealer is a community hand that belongs to those that placed a bet on the banker line. The banker's is dealt face down.

17. Backline betting is allowed so long as the total number of players does not exceed the ten players allowed per the local ordinance. Each seat has betting circles for the player line, banker line, and tie bets.
18. Wagers will be settled in a clockwise manner, starting with the player to the left of the player-dealer position, in the following order: all player line wagers, then all banker line wagers, then all tie bet wagers, then all Dragon Bonus Bet wagers.
19. All bets for the base game and tie bet must be between the minimum and maximum table limit.

Player-dealer and Deal

The player-dealer position rotates in a systematic and continuous way so that the opportunity to act as the player-dealer does not constantly remain with a single person for many hands. The person in player-dealer position may not act as player-dealer position more than two consecutive hands or rounds of play. There must be an intervening player-dealer so that a single player cannot repeatedly act as the player-dealer within the meaning of *Oliver v. County of Los Angeles*, (1998) 66 Cal.App.4th 1397, 1408-09 or section 330.11 of the California Penal Code, relating to gambling establishments and any future regulatory guideline from the California Bureau of Gambling Control or the California Gambling Control Commission with respect to the operation of controlled games featuring a player-dealer position. The game will be broken if at least one other intervening player at the table does not accept the deal when offered.

Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house never participates as a player-dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.

Dragon Bonus Bet

Each player wagering in the base game of Baccarat has the option of placing a wager within table limits on the designated DB (Dragon Bonus) spot located next to each player's position on the gaming felt layout. The Dragon Bonus Bet may award a bonus payout to the player(s) who receives a hand that meets the requirements, as described below. There will be two circles in front of each player position. One will be labeled "Player Dragon Bonus" and the other will be "Banker Dragon Bonus."

Commission-Free Baccarat

Players have two ways to win:

1. If the hand the wager on (Player or Banker) is a natural or;
2. If the hand they wager on is a non-natural that wins by four or more points from the losing hand. The higher margin of victory, the higher the payout. If the spread is three points or less, the DB bet loses.
3. Regardless of what hand a player wagered on, a player may wager on the Player Dragon Bonus Bet circle, the Banker Dragon Bonus Bet circle, or both.
4. The Dragon Bonus Bet may less than or equal to the base game wager. However, the bonus bet may not exceed the base game wager or the table limit.
5. There is no collection for the DB bet.
6. The player-dealer will pay all Dragon Bonus Bet wagers and will collect all losing Dragon Bonus Bet wagers. Wagers are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

Pai Gow Tiles

Type of Game

The game of Pai Gow Tiles utilizes a player-dealer position and is a California game. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. A player shall only remain in the player-dealer position for two consecutive rounds of play before it is offered to the next player in a clockwise fashion around the gaming table. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

The object of the game is for the player to beat both the high and low hands of the player-dealer.

Description of the Deck and Number of Decks Used

Pai Gow Tiles is played with 32 Chinese dominoes or 'tiles', which form 16 possible pairs.

Tile Values

The value of a hand is based on both the numeric and symbolic ranking of the tiles. To find the numeric value of a tile, count the total of the dots on each tile. Use only the right hand digit value if the total is over 9. Example: A 12-spot tile has a value of 2. The object is to make both your high hand and low hand as close to 9 as possible.

To form a hand, add the total number of spots contained on two tiles, again using only the right hand digit value of any two-digit value. Example: An 8-spot tile and a 9-spot tile have a value of 17 which equals 7. When two hands have the same numeric value, the symbolic ranking of the tile determines the winner. To find which is higher, take the highest ranked tile in each hand and compare them.

When two hands have the same numeric value and identical high tiles, it is called a 'copy' hand. The player-dealer wins all copy hands. When two hands have a numeric value of zero (0), regardless of the high tile, the player-dealer also wins.

How to Arrange the Tiles:

1. Supreme Pair
2. Matched Pairs
3. Unmatched Pairs
4. Wongs
5. Gongs
6. Any two tiles that total 9 or less
7. Largest tile with the smallest tile

Hand Rankings: The color of the dots has no significance and does not change the value of any tile numerically or symbolically.

Pai Gow Tiles

SUPREME PAIR

Jee Goon

MATCHED PAIRS: Any matched pair.

UNMATCHED PAIRS: Any of the below mixed pairs.

WONG: Any 2 or 12-spot tile and any 9-spot tile.

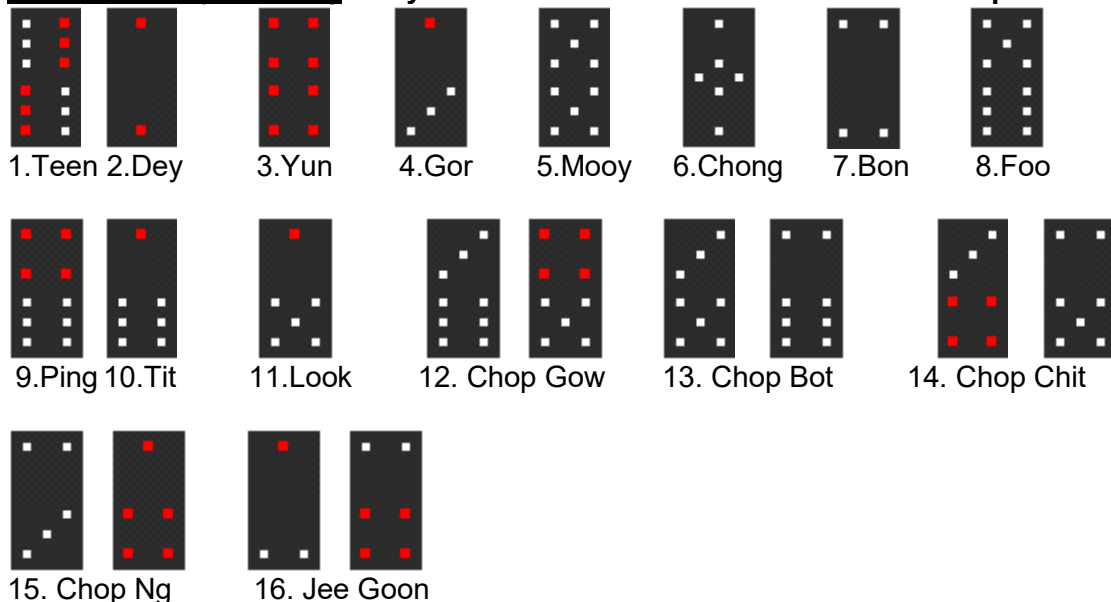

GONG: Any 2 or 12-spot with any 8-spot tile.

Pai Gow Tiles

SINGLE Tile by Ranking: Any Combination that totals as close to 9 as possible.

House Way:

- Most valuable high hand is a pair.
- Split paired Supreme Pair (Gee Joon) if the third tile has 6-spots and the fourth tile has 4, 5 or 6-spots.
- Split 7-spot tiles if hand has a Teen, Dey and the low hand after the split has a value of 7 or higher.
- Split 8-spot tiles if the low hand after the split has a value of 7 or higher.
- Split 9-spot tiles if the low hand after the split has a value of 9 or higher.
- Split the Teen or Dey tiles if the low hand after the split has a value of 6 or higher, or with tiles containing 9 or 11-spots.
- Never split pairs with tiles that have 4, 5, 6, 10 or 11 spots.

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard Pai Gow table that accommodates up to seven players and a player-dealer position for a total of eight seated positions. Within each betting area for each seated player, there shall be one separate betting space specifically designated for one separate base game wagers. Each position at the table has a fixed amount for wagering limits defining the minimum and maximum amounts that may be wagered in each position. Players must bet at least the table minimum. Back-line betting is permitted for all wagers, and players may wager on available betting spaces.

Dealing Procedures and Round of Play

Pai Gow Tiles is played with 32 Chinese dominoes or “tiles”, which form 16 possible pairs. All players post wagers in the betting circles on the table in front of their position before the dice cup is opened.

The house dealer shuffles the tiles and stacks them in rows, with four tiles face down in each row. Starting with the action button and proceeding counterclockwise, the house dealer then deals four tiles to each player, and to the player-dealer. Players then proceed to set their tiles into two hands; each consisting of two tiles, with the high hand in one stack and the low hand in

Pai Gow Tiles

another. Players may also ask the house dealer to set the tiles in a “house way.” Once this is complete, the player-dealer sets his/her hand.

The goal is to make two hands that are both higher than the two hands made by the player-dealer, and as close to 9 as possible.

The game also utilizes an action button to determine which player receives first action on their wager. The player-dealer shakes a dice cup, which contains three dice, and the numerical total of the three dice determines the position of the action button. The player-dealer's position is always one, nine, and seventeen. Other seats, in counter clockwise rotation around the table, respectively represent the other numbers. If the numerical total of the dice are one, nine, or seventeen, the player-dealer shall receive the first set of cards, regardless of how many players are seated, and the player to the right of the house dealer shall receive the action button.

How Winners are Determined and Paid

All bets are made against the player-dealer. A player wins if both hands rank higher than both hands of the player-dealer. If only one hand ranks higher, it is a tie or a “push.” If both of the player's hands rank lower than the player-dealer's hands, the player loses to the player-dealer. The player-dealer wins all situations where both hands are identical to the player's hands. The player-dealer can only receive action on the amount wagered and cannot win or lose more than their original wager. Wagers shall be settled in a clockwise manner around the table, starting with the player with the action button. Furthermore, all wagers shall be settled from seat to seat. Wagers are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

Collection Fees

Although the Bureau has approved these collection rates, games offering a zero collection are currently under Bureau review. The Bureau has the right to: (1) review the lawfulness of the CA Games Collection Rates; (2) notify all law enforcement agencies and gambling establishments if further review determines that the CA Games Collection Rates are unlawful; (3) require gambling establishments to cease and desist offering the CA Games Collection Rates, if found unlawful; and (4) take action against those gambling establishments that decline to abide by the Bureau's cease and desist notification.

For **schedule option 1**, a collection shall be taken per round of play from the player-dealer. A collection shall also be taken from the player based on the amount wagered per betting circle. For **schedule option 2**, a collection shall be taken per round of play from the player-dealer and no collection shall be taken from the player. The collection fees shall be collected prior to tiles being dealt or any round of play being conducted. The collection fees shall be pre-determined and conspicuously posted on each table prior to any tiles being dealt or a round of play commencing. Only one collection schedule, which utilizes one table limit and the specified collection fees for that table limit, as listed below, shall be used at a table at any one time. The collection rates may not be calculated as a portion of wagers made or winnings earned. Flat fees on wagers may be assessed at different collection rates; however no more than five collection rates may be established per table limit. How Winners are Determined and Paid

Once each player has set their hands and the house dealer has set the player-dealer's hand, a series of showdowns begins, with each player comparing their hand against the player-dealer's hand. The following will apply for each possible outcome when determining the winner. The player-dealer will pay and collect all wagers accordingly:

Lucky Pai Gow Poker

- The Pai Gow Poker base game wager wins if the two-card hand and the five-card hand held by the player ranks higher than the player-dealer's two-card hand and the five-card hand. The player-dealer will pay all winning base game wagers.
- The Pai Gow Poker base game wager loses if the two-card hand and the five-card hand held by the player ranks lower than the player-dealer's two-card hand and the five-card hand. The player-dealer will collect all losing base game wagers.
- The Pai Gow Poker base game wager 'pushes' if one of the hands held by the player ranks higher than the player-dealer's hands and the other hand ranks lower than the player-dealer's hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a 'push' and is returned to the player.
- If one hand is identical in rank to the player-dealer's hand, it is a "copy hand." The player-dealer wins all "copy hands."
- The player-dealer will pay all winning Lucky Bonus Bets when the player's hand qualifies according to the chart below.
- The player-dealer will collect all losing Lucky Bonus Bets when the player's hand does not qualify according to the chart below (Payout chart listed below in the "Bonus Bet" section).

Bonus Bet

Lucky Bonus Bet

The Lucky Bonus Bet is an optional bonus bet that complements the game of Pai Gow Poker, as listed above. It is a wager that allows a player to bet that they will be dealt a pre-determined and designated qualifying hand, as described below. There will be a distinctively marked circle on the table in which a player may place the optional bonus bet.

- A player does not have to place a base bet in order to place a Lucky Bonus Bet. Furthermore, the wager must be placed prior to the initial deal.
- Any seated player as well as any backline bettor may place a Lucky Bonus Bet.
- The Lucky Bonus Bet may be less than, equal to, or may exceed the base game wager. However, it may not exceed the table limit.
- The bonus bet takes into account the first seven cards dealt as a player's hand. In the event that the first seven cards dealt to a player that placed a bonus bet is a pre-determined and designated qualifying hand, as described below, the bonus bet will win. The player will then receive a monetary payout based on the bonus hand that the player has received and the paytable, as shown below. Any other combination of the first seven cards dealt, other than the hands described below, will lose.
- The bonus bet may win regardless of the outcome of the base game wager.
- There is no additional collection fee for placing a Lucky Bonus Bet. All collection fees are for the base game only.
- The player-dealer will pay all winning Lucky Bonus bets and will collect all losing Lucky Bonus bets. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.
- Winning Lucky Bonus bets will be paid according to the table, as shown below.

- The Phoenix 7 Bet, which pays 40 to 1;
- The Tiger 8, which pays 25 to 1;

Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until each hand has a total of two cards each. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the Banker line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the Player line. The player hand is resolved first and then the banker hand is resolved. The hand that is closest to nine wins. After the house dealer delivers the first two cards to both the Player line and Banker line, the following Baccarat rules are followed.

- If there is a Natural on either side, there are no more draws, and the game is settled as is.
- The player hand must stand when the hand is valued at 6 through 9, and must hit when the hand is valued at 5 or less.
- If the player hand stands, then the banker hand hits on a total of 5 or less.
- If the player hand hits for a complete hand then the banker hand hits using the following rules:
 - If the banker hand total is 3, then the banker hand is dealt a third card unless the third card dealt to the player hand was an 8.
 - If the banker hand total is 4, then the banker hand is dealt a third card unless the third card dealt to the player hand was a 0, 1, 8, or 9.

CASH-IN BACCARAT

- If the banker hand total is 5, then the banker hand is dealt a third card if the third card dealt to the player hand was 4, 5, 6, or 7.
- If the banker hand total is 6, then the banker hand is dealt a third card if the third card dealt to the player hand was a 6 or 7.
- If the banker hand total is 7, then the banker hand is not dealt a third card regardless of the value of the player third card.

The following chart shows when the banker hits (H) or stands (S) according to the rules above:

Once there are seven cards laid out, the house dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. - iii. To determine who receives the action button, the player-dealer shakes a dice cup, which contains three dice, and the numerical total of the three dice determines the position of the action button. The player-dealer's position is always one, eight, and fifteen.
 - iv. Once the first position is determined, the house dealer then distributes the seven piles of cards, starting with the action button and continuing clockwise.
 - v. The player-dealer receives their cards in turn according to the action.

 - b. If a machine shuffler is used, the house dealer will use the shuffle machine to randomly intermix and deliver seven cards to each seat.
 - i. The action button, which determines the first player to receive first action from the player-dealer, is placed on the selected pile and will be the first hand distributed once the placement of the action button has been determined.

 - a. If the player-dealer has an ace-high seven-card hand, all player's wagers shall automatically push and any Ace Up Bonus Bets will win.
 - b. If the player-dealer's hand does not contain a seven-card ace-high hand, each player shall then set their hand by arranging the seven cards in to a two-card hand, which is placed in front of the five-card hand, and a five-card hand, which is placed behind the two-card hand.
 - i. The five-card hand must rank higher than the two-card hand, according to the hand rankings, as shown above.
 - ii. The player-dealer has the option to ask the house dealer to set their hand according to the House Way chart.
 - c. Players do not have to set their hand the "House Way", they are free to set the hand in any fashion they choose as long as it is not a foul hand. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player will automatically lose their wager.
6. Once the player-dealer's hand is set, each player sets their hands by arranging the seven cards into a two-card hand in front, and a five-card hand in back.
 - a. The five-card hand must rank higher than the two-card hand, according to the hand rankings, as shown above.
 - b. The player-dealer has the option to ask the house dealer to set their hand according to the House Way chart below.

How Winners are Determined and Paid

Once each player has set their hands and the house dealer has set the player-dealer's hand, each player's hand shall be compared against the player-dealer's hand. The following shall apply for each possible outcome when determining which hand wins, loses, or if there is a push.

1. The base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand.
2. The base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
3. The base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
 - a. The base game wager also "pushes" if the ranking of the player-dealer's shown hand is a seven-card ace-high hand. Neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
4. If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
5. The player-dealer will collect losing Lucky Bonus Bets and pays winning Lucky Bonus Bets to the extent of the player-dealer's wager.
6. The cards are collected, shuffled, and a new round begins.

Object of the Game

The object of the game is for each player to form a five-card hand that ranks higher than the player-dealer's hand.

Players and the player-dealer each receive two cards, referred to as hole cards. They combine zero, one or two of their hole cards with the five community cards to make their best five-card hand. Ultimate Texas Hold'em lets players bet aggressively. The earlier they bet, the more they can risk and win.

1. If players bet pre-flop, they may bet three times or four times their Ante.
2. If they bet on the flop, they may bet two times their Ante.
3. If they wait until the river, when all community cards are out, they may only bet the same amount as their Ante.

This game also features an optional Trips Bonus Bet. Players win the Trips Bonus Bet if their final five-card hand is a Three of a Kind or better. The game also features an optional Bad Beat Bonus Bet. Players win the Bad Beat Bonus if the player and the player-dealer are involved in a qualifying bad beat hand.
