
HOLD'EM

In Hold'Em, all players receive two down cards as their personal hand, after which there is a round of betting. Three board cards are turned simultaneously (called the "flop"), and then another round of betting occurs. The next two board cards are turned one at a time, with a round of betting after each card. The board cards are community cards, and after the final round of betting, a player may use any five-card combination from among the board and personal cards. A player may even use all of the board cards and no personal cards to form a hand. This is called "playing the board".

Hold'Em uses a flat disk called a dealer button to indicate the player who is in the dealer position for that hand (even though a non-playing casino employee actually deals). The dealer button rotates clockwise. The player with the dealer button is last to receive cards on the initial deal and has the right of last action after the first betting round.

One or more blind bets are used to stimulate action and initiate play. Blinds are posted before the players look at their cards. Blinds are part of a player's bet, unless the structure of a specific game or the situation requires part of all of a particular blind to be "dead". Dead chips are not part of a player's bet. The player immediately clockwise from the button posts the small blind, and the big blind is posted by the player two positions clockwise from the button.

The player to the left of the blinds initiates action on the first betting round. On all subsequent betting rounds, the action begins with the first active player to the left of the button.

In non-tournament play, the button rotates one position clockwise after each deal. The button must move forward, and the blinds will be adjusted accordingly.

RULES OF HOLD'EM

Blinds

-
1. In Hold'Em, all blinds are "live". If you post a blind, you have the option of raising the pot when it is your turn.
 2. When there are two blinds in a game with three or more players, the smaller blind is to the immediate left of the dealer button. In heads-up play, the small blind is on the button.
 3. A new player entering a Hold'Em game has the following options:
 - a. To wait for the big blind;
 - b. To post an amount equal to the big blind and immediately be dealt a hand;
 - c. To let the blinds and the button pass before posting an amount equal to the big blind and receiving a hand.
 4. A new player cannot be dealt in when between the small blind and the button. The new player must wait until the button passes.
 5. If a player chooses to post the big blind, the blind serves as the opening bet. When it becomes that player's turn to act, he/she may either call the action or raise.
 6. In multiple-blind games, players must meet their blind obligations for every round they play. Players cannot have the button twice; the button always moves forward, and the blinds are adjusted accordingly.
 7. If a player misses any or all blinds, he can resume play by either posting the total amount of the blinds for that limit game, or waiting for the big blind. If he chooses to post the total amount of the blinds, an amount up to the size of the minimum opening bet is live, and the remainder is placed in the pot as "dead money". When it becomes that player's turn to act, he may either call the action or raise.
 8. Blinds may not be made up between the big blind and the button. Except, 20/40 Limit and above, a player can post both small & big blind and receive a hand
 9. When a game starts, a new player will not be required to post a blind until the button has made one complete revolution around the table, provided a blind has not yet passed that seat. A player may also change seats without penalty, provided a blind has not yet passed the new seat. However, a player who drew for the button is considered active in the game, and is required to make up both blinds if he misses a blind.
 10. No live "straddle" bets are allowed. All games above 20/40 Limit can live straddle.

Irregularities

11. If the first card off the deck is exposed on the deal, the dealer will place it back onto the deck, reshuffle, and re-cut the cards. If any other card is exposed due to dealer error, it will be replaced as follows: If a down card is flashed or exposed due to dealer error, you may not keep the exposed card. After completing the hand, the dealer replaces the card with the top card on the deck, and the exposed card is then used for the burn card.
12. If the cards are prematurely flopped before the betting is complete, or if the flop contains too many cards, the board cards are mixed with the remainder of

the deck. The burn card remains on the table. After shuffling, the dealer cuts the deck and deals a new flop without burning a card.

13. Should the dealer turn the fourth card on the board before the betting round is complete, the card is taken out of play for that round and the betting is completed. The dealer then burns and turns what would have been the fifth card in the fourth card's place. After this round of betting, the dealer reshuffles the deck, including the card that was taken out of play, but not including the burn cards or discards. The dealer then cuts the deck and turns the final card without burning a card. If the fifth card is turned up prematurely, the deck is reshuffled and dealt in the same manner.

14. In Hold'em, if the dealer mistakenly deals the first player an extra card (after all players have received their starting hands), the card will be returned to the deck and used for the burn card. If the dealer mistakenly deals more than one extra card, it is a misdeal.

Playing the Board

15. You must declare that he is playing the board and show your hand. Otherwise, you relinquish all claims to the pot.

16. In non-post games, new players can receive a hand without posting a blind.

Dealing Procedures for Taking the Collection from the Pot

Follow all Poker game tag rates that are posted on the tables.

Hold'em Style

- In all Hold'em style Poker games, no collections are taken until there is a flop. **
- After the flop, the dealer will reach into the pot and take the corresponding amount of chips needed to cover the drop amount. The table tags indicate this amount.
- These chip(s) do not go into the dealer's rack.
- If a color change is needed, the entire transaction will be done on the table in front of the dealer's tray. For example, three (3) blue chips are taken from the pot and placed in front of the dealer's tray. The dealer then removes a three-dollar chip from their tray and places it on the table.
- Next, the dealer takes the chip(s) that they removed from the pot and places them on their tray.
- Then the dealer places the collection chip on the drop slot with their right hand; they will then open their hand and expose it to the cameras showing an empty hand.

** See collection sheet and/or Poker game tag for exceptions.

Stud Style

- All stud style Poker games collection procedures remain the same as are currently being done. (All collections and/or jackpot drops are taken from the antes.)

OMAHA

Omaha is similar to Hold'Em, except each player is dealt four down cards instead of two. In order to make a hand, a player must use precisely two hole cards with any combination of exactly three board cards. The betting is the same as in Hold'Em.

Omaha is often played high low split, 8 or better. You may use any combination of two holecards and three board cards for your high hand and another (or the same) combination of two holecards and three board cards for your low hand.

RULES OF OMAHA

1. You must use two of the four holecards in your hand and three cards on the board to make a valid hand.
2. All the rules of Hold'Em apply to Omaha, except the rule on playing the board, which is not possible in Omaha.
3. All the rules governing "kill pots" are listed in the section on kill pots.

Rules of Omaha High-Low Split (8 or Better)

1. All the rules of Omaha apply to Omaha High-Low Split (8 or better).
2. A qualifier of 8 or better for low is required for all high-low split games, unless a specific posting to the contrary is displayed.
3. If there is no low hand, the high hand wins the entire pot.
4. You can use one combination of cards to make a high hand and the same or any other combination to make a low hand, as long as each hand uses exactly two holecards with three boardcards.
5. All other Hold'Em rules apply

SEVEN CARD STUD

Seven Card Stud is played with two down cards and one up card dealt before the first betting round, followed by three more up cards (with a betting round after each card). After the last down card is dealt, there is a final round of betting. The best five card poker hand wins the pot. In all fixed limit games, the smaller bet is wagered on the first two betting rounds, and the larger bet is wagered after the betting rounds on the fifth, sixth, and seventh cards. If there is an open pair on the fourth card, any player has the option of making the smaller or larger bet.

Rules of Seven Card Stud

1. The first round of betting is initiated with a forced bet by the lowest value up card. A tie is broken by suit, with the lowest suit being forced to bet. On subsequent betting rounds, the high hand on board initiates the action. Ties are broken by position, with the player who received cards first acting first.
2. The player with the forced bet has the option of opening for a full bet.
3. Completing an opening forced bet does not count as a raise, but merely as a completion of the bet. For example, in \$15-\$30 Stud, the low card opens for \$5. If the next player to act brings the bet to \$15 (completion of the bet), three additional raises are then allowed.
4. In all fixed-limit games, when an open pair is showing on fourth street (second upcard), any player has the option of betting either the lower or the upper limit. For example, in a \$5-\$10 game, if you have a pair showing and you are the high hand, you may bet either \$5 or \$10. If you bet \$5, any succeeding player has the option to call \$5, raise \$5, or raise \$10. If a \$10 raise is made, then all other raises must be in increments of \$10. If the player who makes the open pair on fourth street checks, then all other players still have the same options.
5. In all games, the dealer announces the low card, the high hand, all raises, and all pairs. In limits of \$10-\$20 and higher, dealers do not announce possible straights or flushes.
6. If your first or second hole card is accidentally turned up by the dealer, then your third card will be dealt down. If both hole cards are dealt up, you have a dead hand and receive your ante back. If your hand would have been the low hand, action will start with the first hand to your left. That player may either fold, open for the amount of the forced bet, or open for a full bet.
7. If you are not present at the table when it is your turn to act on your hand, you forfeit your ante and your forced bet, if any. If you have not returned to the table in time to act on your hand, the hand will be killed in turn.

If you fold a hand after making a forced bet, or fold when there is no wager, your seat will continue to receive cards until a bet is made.

8. If you are all-in for the ante and you have the lowest card, the player to your left may come in for the forced bet, make the maximum bet, or fold the hand.
9. If the wrong person is designated as low and that person bets, the action will be corrected to the proper low card, if at all possible. The true low card must bet, and the improperly designated low card may take back the incorrectly forced wager.
10. If the dealer burns two cards for one round or fails to burn a card, the cards will be corrected, if at all possible, to their proper positions. If this should happen on a final down card and the cards intermingle with a player's hole cards or a player looks at the card, the player must accept the card.
11. If a dealer burns and deals one or more cards before a round of betting has been completed, the card(s) must be eliminated from play, along with an additional card for each remaining player still active in the hand. After that round of betting has concluded, the dealer reburns, and play resumes. (The removed cards are held off to the side in the event the dealer runs out of cards.) If the prematurely dealt card is the final down card and has been looked at or intermingled with the player's other hole cards, the player must keep the card. If there is further betting on sixth street, a player who has seven cards may not raise.
12. If there are not enough cards left in the deck for all players, the dealer will deal all the cards except the last card, which is mixed with the burn cards and any cards removed from the deck as in the previous rule. The dealer then scrambles and cuts these cards, burns again, and delivers the remaining down cards, using the last card if necessary. If there are not as many cards as players remaining without a card, the dealer does not burn, so that each player can receive a fresh card. If the dealer determines that there will not be enough fresh cards for all of the remaining players, then the dealer announces to the table that a common card will be used. The dealer will burn a card and turn one card face up in the center of the table. This card plays in everyone's hand. The player who is now high using the community card initiates the action for the last round.
13. If you pick up your up cards, and by doing so cause someone to act behind you (even in a heads-up situation), your hand is dead. This does not apply in a check-check situation or a bet-and-call situation.
14. You must have seven cards to win at the showdown.
15. A card dealt off the table must play and it is treated as an exposed card.
16. If the dealer turns the last card face up to any player, the following rules apply:
 - a. If there are more than two players, all remaining players receive their last card face down. Prior to action for the round of betting, a player whose last card is exposed will have the option of participating in the wagering or being declared all-in.
 - b. If there are only two players remaining and the first player's final downcard is dealt face up, the second player's final down card will also be dealt face up, and the betting proceeds as normal. In the event the first player's final card is dealt face down, and the opponent's final card is dealt face up, the player

Ocean's Eleven Casino

with the exposed card will have the option of declaring all-in. This decision must be made prior to any action on that round.

c. In any of the above situations, the player who is now high on the board using all the up cards will start the action.

17. If you call a bet even though you are beaten by an opponent's up cards, you are not entitled to a refund.

Seven Card Stud High-Low Split (8-or-Better) is a stud-format game that is played both high and low. A qualifier of 8 or better for low applies to all high-low split games, unless a specific posting to the contrary is displayed. The low card initiates the action on the first round, with an ace counting as a high card for this purpose. On subsequent rounds, the high hand initiates the action. If the high hand is tied, the first player clockwise from the dealer acts first. Fixed-limit games use the lower limit on third and fourth streets and the upper limit on subsequent betting rounds, and an open pair does not affect the limit. Aces may be used for high or low. Straights and flushes do not affect the low value of a hand. A player may use five cards to make the best high hand, and the same or any other grouping of five cards to make the best low hand.

Rules of Seven Card Stud High-Low Split (8-or-Better)

- A qualifier of 8-or-better for low applies to all high-low split games, unless a specific posting to the contrary is displayed.
- A player may use any five cards to make the best high hand and any five cards, whether the same as the high hand or not, to make the best low hand.
- The low card by suit initiates the action on the first round, with an ace counting as a high card for this purpose.
- Aces may be used for high or low, and straights and flushes do not affect the value of a low hand.
- Fixed-limit games use the lower limit on third and fourth streets and the upper limit on subsequent rounds. An open pair does not affect the limit.
- Splitting pots is only determined by the cards and not by agreement among players.
- When there is an odd chip in a pot, the chip goes to the high hand. If two players split the pot by tying for both the high and the low, the pot shall be split as evenly as possible, with the player with the highest card by suit receiving the odd chip. When making this determination, all cards are used, not only the five cards that constitute the player's hand.
- When there is one odd chip in the high portion of the pot and two or more high hands split all or half the pot, the odd chip goes to the player with the high card by suit. When two or more low hands split half the pot, the odd chip goes to the player with the low card by suit.

The lowest hand wins the pot. The format is similar to Seven Card Stud High, except the high card (aces are low) is required to make the forced bet on the first round, and the low hand acts first on all subsequent rounds. Straights and flushes have no ranking, so the best possible hand is 5-4-3-2-A (a wheel). An open pair does not affect the betting limit.

Rules of Razz

- The lowest hand wins the pot. Aces are low, and straights and flushes have no effect on the low value of a hand. The best possible hand is 5-4-3-2-A.
- The highest card starts the action with a forced bet. If the high card is tied, the forced bet is determined by suit from the highest to the lowest; that is, spaces, hearts, diamonds, clubs. The low hand acts first on all subsequent rounds. If the low hand is tied, the first player clockwise from the dealer starts the action.
- Fixed-limit games use the lower limit on the third and fourth streets and the upper limit on subsequent streets. An open pair does not affect the limit.
- Dealers announce all pairs the first time they occur, except pairs of face cards, which are never announced.
- All Seven Card Stud rules apply in Razz, except as otherwise noted.

Lowball is Draw Poker with the lowest hand winning the pot. Each player is dealt five cards face down, after which there is a betting round. Players are required to bet or fold. The players who remain in the pot now have an option to improve their hand by replacing cards in their hands with new ones. This is known as the draw. In limit Poker, the bet doubles after the draw (unless otherwise posted). The most popular forms of Lowball are ace-to-five Lowball (also known as California Lowball), and deuce-to-seven Lowball (also known as Kansas City Lowball). In ace-to-five Lowball, the best hand is 5-4-3-2-A and in deuce-to-seven Lowball, the best hand is 7-5-4-3-2, not of the same suit. For a further description of the forms of Lowball, please see the individual section for each game.

Rules of Lowball

All rules governing "kill pots" are listed in the Kill Pots section.

- Cards speak: Cards read for themselves. However, a verbal declaration in regards to a player's hand is binding. For example, if a player calls an "8", that player must produce at least an "8" low or better to win. If you miscall your hand and cause another player to foul his hand, your hand is dead. If both hands remain intact, the best hand wins. If a miscalled hand occurs in a multi-handed pot, the miscalled hand is dead and the best remaining hand wins the pot. For your own protection, always hold your hand until you see your opponent's cards.
- Any player spreading a hand with a pair in it must announce "pair" or risk losing the pot if it causes any other player to foul a hand. If two or more hands remain intact, the best hand wins the pot.
- In ace-to-five Lowball, the best hand is any 5-4-3-2-A. Straights and flushes do not count against your hand.
- The joker is considered to be the lowest card not present in your hand.
- As a new player, you have two options:
 - o To wait for the big blind; or,
 - o To kill the pot (double the limit for that hand by posting double the amount of the blind).

Ocean's Eleven Casino

- A player who has less than half a blind may receive a hand. However, the next player is obligated to take the blind. In the event that the all-in player winds the pot or buys in again, the player will then be obligated to take the blind.
- Half a blind or more constitutes a full blind.
- If a player fails to take the blind, you may only be dealt in on the blind.
- In multiple-blind games, if for any reason the big blind passes your seat, you may either wait for the big blind or kill the pot (provided no active player objects) in order to receive a hand. This does not apply if you have taken all of your blinds and changed seats. In this situation, you will be dealt in when your position, in relationship to the blinds, entitles you to a hand.
- In limit ace-to-five Lowball, before the draw, an exposed card of seven or under must be taken, and an exposed card higher than a seven must be replaced after the deal has been completed. This first exposed card is used as the burn card. After the draw, an exposed card cannot be taken. The draw is completed to each player, in order, and then the exposed card is replaced. A flashed card before the draw is not treated as an exposed card. After the draw, all flashed cards are considered exposed cards and replaced.
- Any player may draw up to five consecutive cards.
- Five cards constitute a playing hand; more or fewer than five cards after the draw constitutes a fouled hand. Before the draw, if you have fewer than five cards in your hand, you may receive additional cards, provided no action has been taken by the first player to act, unless that action occurs before the deal is completed. However, the dealer position may still receive a missing fifth card, even if action has taken place. If action has been taken, you are entitled on the draw to receive the number of cards necessary to complete a five-card hand.
- You may change the number of cards you wish to draw, provided;
 - o No cards have been dealt off the deck in response to your request (including the burn card).
 - o No player has acted on his or her hand based on the number of cards you have requested.
- If you are asked how many cards you drew by another active player, you are obligated to respond until there has been action after the draw, and the dealer is also obligated to respond. Once there is any action after the draw, you are no longer obliged to respond and the dealer cannot respond..
- In limit play, a bet and six raises are allowed in all multi-handed pots.
- In limit play, check-and-raise is not permitted.
- The minimum opening bet is the size of the large blind (unless otherwise posted). For example, in a \$30-\$60 limit game where the blinds are \$10, \$20, and \$30, you may open for \$30 or \$60 before the draw.
- Rapping the table in turn constitutes either a pass or the declaration of a pat hand, depending on the situation.
- In limit play, if you check a seven or better and it is the best hand, all action after the draw is void, and you cannot win any money on any subsequent bets. You are still eligible to win whatever existed in the pot before the draw if you have the best hand. If you check a seven or better and the hand is beaten by a better hand, you lose the pot and any additional call you make.

Ocean's Eleven Casino

- In ace-to-five Lowball, in the event of an all-in bet that is less than half a bet, a seven or better may call this short bet after the draw and win. However, if another player overcalls this short bet and loses, the person who overcalls receives the bet back. If the seven or better fulfills his obligation by completing to a full bet, all subsequent betting action will stand.

Deuce-to-Seven Lowball (Kansas City Lowball)

In deuce-to-seven Lowball, other known as Kansas City Lowball, the worst conventional poker hand wins. (An exception is that 5-4-3-2-A is not considered to be a straight, but, rather, an A-5 high so it beats other A-high hands and pairs.) The game is played with a 52-card deck; no joker is used. Unlike California Lowball, straights and flushes do count against you, and an ace is considered as a high value only. Therefore, in this game, the best hand is 7-5-4-3-2, not all of the same suit. Check-and-raise is permitted on any hand.

Rules of Deuce-to-Seven Lowball

The rules for Deuce-to-Seven Lowball are the same as those for ace-to-five Lowball, except for the following differences:

- The best hand is 7-5-4-3-2 of at least two different suits. Straights and flushes count against the value of the hand, and aces are considered high only.
- Before the draw, an exposed card of 7, 5, 4, 3 or 2 must be taken. Any other exposed card including a 6 must be replaced.
- Check-and-raise is permitted on any hand after the draw.
- A bet and six raises are allowed in any multi-handed betting round.

Rules of No-Limit and Pot-Limit Lowball

- All the rules for no-limit and pot-limit poker (See Poker section) apply. All other Lowball rules apply, except as noted.
- In no-limit ace-to-five Lowball, the player must take an exposed card of A, 2, 3, 4 or 5 before the draw and any other card must be replaced. In deuce-to-seven Lowball, a 2, 3, 4, 5 or 7 must be taken, and any other card including a 6 must be replaced. After the draw, any exposed card must be replaced.
- After the draw, a player may check any hand without penalty.
- Check-and-raise is permitted.

KILL POTS

In a game that requires a player who wins two consecutive pots to kill the next pot (natural kill), a marker called a "kill button" indicates which player has won the previous pot. The winner keeps this marker until the hand is completed. If the player who has the kill button wins a second consecutive pot and it qualifies monetarily, that player must kill the next pot. The pot size requirement for the first pot or "leg" of a kill is the same as the second leg to qualify for a kill, you must win at least one full bet for whatever limit you are playing, and it cannot be any part of the blind structure.

1. In Lowball, the betting limits before and after the draw are doubled when the pot is killed. Kill blinds are considered part of the pot. If a player with a natural kill wins again, then that player must kill it again (for the same amount as the previous hand).
2. If a player with one "leg up" splits the next pot, that player still has a "leg up" for the next hand. If the player who split the pot was the kill in the previous hand, then that player must also kill the next pot.
3. The kill button is neutral (belonging to no player) if:
 - a. It is the first hand of a new game.
 - b. The winner of the previous pot has quit the game.
 - c. The previous pot was split and neither player had the kill button.
4. A person who leaves the table with a "leg up" toward a kill still has a "leg up" upon returning to the game.
5. When a player wins both the high and the low pot ("scooper") in a split-pot game with a kill provision, the next hand will be killed only if the pot is at least five times the size of the upper limit of the game.
6. In Lowball, players may look at their first two cards and then occasionally decide to kill the pot. The pot may no longer be killed if any player in the game has received a third card. In order to kill the pot voluntarily, you must have at least four times the amount of the kill blind in your stack. For example, if the big blind is two chips, and the kill blind is four chips, the voluntary killer must have at least 16 chips prior to posting the kill.
7. If you are unaware that the pot has been raised or killed, and you put in a lesser amount, you may withdraw that money and reconsider that action. If it is a required kill pot with the kill button face up, you must complete the bet.
8. Only one kill is allowed per hand. In Lowball, a new player wanting to be dealt in an already killed pot may receive a hand by agreeing to kill the next available pot provided no one objects.
9. A player who is required to post a kill must do so that same hand even if he or she wishes to be dealt out or quit the game. A player who fails to post a required kill blind will not be allowed to participate in the game until the kill money is posted.

10. In a kill pot, the killer acts last on the first betting round, but before any player acts twice. If the killer raises, the action proceeds clockwise from the killer.

11. Broken game status is allowed only for players of the same limit and game type. For this purpose, a game with a mandatory kill is considered a different type of game than an otherwise similar game without a mandatory kill.

For Limits 10-20 and Higher:

12. Once called, player has 10 minutes to be seated

13. No "playovers"

14. One "live straddle" is allowed

15. Both blinds missed for any reason – player may:

a. Post both blinds (big-live, small-dead), or

b. Wait for the big blind

16. Overs:

a. True "overs" only (2x game limits) will be allowed.

b. 20-40 and higher only.

c. If a player mistakenly bets the "true" limit on an "overs" limit, and it is discovered before the round of betting is completed, all bets must be increased.

17. Must move procedures

a. Player may play to blind.

b. Player may post or wait for blind.

c. If a player declines to move, they must quit the game and will not be allowed to return until one hour has passed, then they will be added to the board.

d. Players moving within a "must move" game must take all chips.

18. Broken game (Post)

a. Players coming from broken game into main game may:

i. Take free hands in front of blinds, or

ii. Let button pass and then post.

19. All Collection Games

20. All players seated at the time of collection are required to pay collection in order to receive the next hand if there is a board, or if they have played a hand.

21. General

22. In 4-8 games and below, only \$1 and \$5 chips will play.

23. In 9-18 games, only \$3, \$25 or \$100 chips. No cash.

24. In 10-20 and 20-40 games, \$5, \$25, \$100 or \$500 chips.

25. In 40-80 or higher games, \$5, \$10, \$25, \$100 or \$500 chips.

26. In time collection games, if two players split the pot, they split collection.

If one player is a new player, $\frac{1}{2}$ is paid and $\frac{1}{2}$ is carried over.

All five-card jacks-or-better Draw games require a pair of jacks or better to open the pot. The game is played with a 53-card deck, which includes the joker. The joker can be used either as an ace or as any card that completes a straight, flush, or straight flush. All limit five-card Draw games have fixed-limit betting. There are two betting rounds, one before the draw and one after the draw. The betting limit after the draw is twice the amount of the betting limit before the draw. In all Draw Poker games, check-and-raise is permitted, and a bet and six raises is allowed in all multi-handed pots.

Note: A player who opens the pot in jacks-or-better must show the openers, whether the hand is called or not, in order to win the pot.

Five aces is the best possible hand (four aces and a joker).

Rules of Draw Poker (Jacks-or-Better)

- A pair of jacks or better is required to open the pot. If no player opens the pot, the button moves forward and each player must ante again, unless the limit of antes has been reached for that particular game.
- If the opener should show false openers before the draw, any other active player has the opportunity to declare the pot opened. However, any player who originally passed openers is not eligible to declare the pot open. The false opener has a dead hand and the opening bet stays in the pot. Any other bet placed in the pot by the opener may be withdrawn, provided the action before the draw is not completed. If no other player declares the pot open, all bets are returned except the opener's first bet. The first bet and antes will remain in the pot, and all players who were involved in that hand are entitled to play the next hand after anteing again.
- Any player who has legally declared the pot opened must prove openers in order to win the pot.
- In all cases, the pot will play (even if the opener shows or declares a fouled hand) if there has been a raise, two or more players call the opening bet, or all action is completed before the draw.

-
- Once action has been completed before the draw, the opener may not withdraw any bets, whether or not the hand contains qualifying openers.
 - An opener may be allowed to retrieve his or her hand to prove openers at the floorperson's discretion.
 - Any player may request that the opener retain the opening hand and show it after the winner of the pot has been determined.
 - You may split openers, but you must declare that you are splitting and place all discards under a chip to be exposed by the dealer after the completion of the hand. If you declare that you are splitting openers, but it is determined that you could not possibly have had openers when your final hand is compared with your discards, you will lose the pot.
 - You are not splitting openers if you retain openers. If you begin with the ace, joker, king, queen of spades, and the ten of clubs, you are not splitting if you throw the ten of clubs away. You are breaking a straight to draw to a royal flush, and in doing so, you have retained openers (ace, joker).
 - After the draw, if you call the openers bet and cannot beat openers, you will not get your bet back.
 - The joker may only be used as an ace, or in straights, flushes, or straight flushes.
 - If the joker is used to make a flush, it will be the highest card of the flush not present in the hand.
 - Any player may draw up to five consecutive cards.
 - Five cards constitute a playing hand. More or fewer than five cards after the draw constitutes a fouled hand. Before the draw, a player having fewer than five cards may receive the additional cards necessary to complete his hand, provided no action has been taken by the first player to act (unless that action is before the deal is completed). However, the dealer position may still receive the fifth card even if the action has taken place. If action has been taken, a player may draw the number of cards necessary to complete a five-card hand.
 - If you are asked how many cards you drew by another active player, you are obligated to respond until there has been action after the draw, and the dealer is also obligated to respond. Once there is any action after the draw, you are no longer obliged to respond and the dealer cannot respond.
 - You may change the number of cards you wish to draw, provided:
 - o No cards have been dealt off the deck in response to your request.
 - o No player has acted in any way on his hand based on the number of cards you have requested.
 - Cards that are exposed face up by the dealer before the draw must be kept.
 - Cards that are exposed by the dealer on the draw cannot be kept. These cards will be replaced at the end of the draw.
 - Checking and raising is permitted.
 - A maximum of a bet and six raises is permitted in multi-handed pots.
 - You may not change your seat between hands when there are multiple antes or forfeited money in the pot.

-
- Rapping the table in turn constitutes a pass, but rapping the table in turn also may mean the declaration of a pat hand. A player who indicates a pat hand by rapping the table, not knowing the pot has been raised, may still play his or her hand.
 - Even if you are all-in for just the ante (or part of the ante), you may declare the pot open if you have openers. If you are all-in and falsely declare the pot open, you will lose the ante money and may not continue to play on any subsequent deals until a winner is determined. Even if you buy in again, you must wait until the pot has been legally opened and someone else has won it before your draw, provided:
 - o No cards have been dealt off the deck in response to your request.
 - o No player has acted in any way on his hand based on the number of cards you have requested.
 - Cards that are exposed face-up by the dealer before the draw must be kept.
 - Cards that are exposed by the dealer on the draw cannot be kept. These cards will be replaced at the end of the draw.
 - Checking and raising is permitted.
 - A maximum of a bet and six raises is permitted in multi-handed pots.
 - You may not change your seat between hands when there are multiple antes or forfeited money in the pot.
 - You have the right to pay the ante (whether single or multiple) at any time and receive a hand, unless there is any additional money in the pot that has been forfeited during a hand in which you were not involved.
 - If the pot has been declared open by an all-in player playing for just the antes, all callers must come in for the full opening bet.
 - If you have only a full ante and no other chips on the table, you may play for just the ante. If no one opens and there is another ante, you may still play for that part of the antes that you have matched, without putting in any more chips.

Jacks Back is a five-card, jacks-or-better Draw game. The game converts to Lowball if no one with a pair of jacks or better opens the pot for high. In that case, the player immediately clockwise from the dealer button must automatically open the pot for the designated opening bet. A pot that is opened as high uses all jacks-or-better rules. A pot that is opened as low uses all Lowball rules.

Rules of Jacks Back

- If the pot is not opened for high, the game becomes the same as single blind Lowball. That is, the person to the left of the dealer button is forced to open the pot at the lower limit, and all Lowball rules apply.
- If the opening forced bet is not raised, the player who made the forced bet has the option of raising after the dealer has acted. If no one opens for high and the player to the left of the button has less than half the blind, the next player is forced to make the blind bet. After the hand, if the all-in player wins the pot or buys in again, the button remains in the same position for the all-in player to take the blind, should no one open for high. The button then advances to its proper position.
- If the pot is opened falsely for high and no one calls, the opener loses the opening bet, and the bet remains in the pot. The button then freezes and the hand is redealt.
- A maximum of a bet and six raises is allowed in any multi-handed pot.

No Limit Rules

- All the rules for limit games apply to no limit and pot limit games, except as noted in this section.
- There are no maximum number of raises in any betting round.
- All bets must be at least equal to the minimum bring-in, unless the player is going all-in. A bet of less than the minimum bring-in may not be raised by any player who has already checked.
- All raises must be equal to or greater than the size of the previous bet or raise on that betting round, except for an all-in wager. A player who has already checked or called may not subsequently raise an all-in bet that is less than the amount of the last bet or raise. For example:
 - o Player A bets \$100
 - o Player B raises \$100 more, making the total bet \$200.
 - o If Player C goes all-in for less than \$300 total (not a full \$200 raise), and Player A calls, then Player B has no option to raise again because he was not fully raised.
 - o Player A can, however, raise after Player C goes all-in because he was fully raised by Player B.
 - o If Player A does raise then the betting is reopened and Player B can raise again.
- A wager is not binding until the chips are actually released into the pot.
- If there is a discrepancy between a player's verbal statement and the amount put into the pot, the bet will be corrected to the verbal declaration.
- Since no limit play may require a large number of chips in order to make a bet, a player who says "raise" is allowed to make more than one move into the pot until the wager is complete.
- A bet of a single chip or bill without comment is considered to be the full amount of the chip or bill allowed. However, a player acting on a previous bet with a larger denomination chip or bill is calling the previous bet unless this player makes a verbal declaration to raise the pot.
- In all no limit and pot limit games, the house has the right to place a maximum time limit for taking action on your hand. The dealer will "put the clock" on someone when requested to do so by a floorperson. If the clock is put on you when you are facing a bet, you will have one additional minute to act on your hand. You will have a ten second warning, after which your hand is dead if you have not acted.
- The casino does not condone "insurance" or any other "proposition" wagers. The management will decline to make decisions in such matters, and the pot will be awarded to the best hand. Players are asked to refrain from instigating proposition wagers in any form.
- For those special rules that apply only to no limit and pot limit Lowball, see Lowball section rules.

Pot Limit Rules

- The rules of no limit play also apply to pot limit play, except that a bet may not exceed the size of the pot.
- If a bet is made that exceeds the size of the pot, the surplus will be given back to the bettor and the raise will be the maximum allowed.
- In pot limit Hold'Em and pot limit Omaha, a player can open for any amount up to four times the size of the big blind. For example, if the blinds are \$10 and \$20, a player may either open with a call of \$20 or raise to any amount from \$40 to \$80, in increments of the smallest chip used in the game.
- In pot limit play, if single dollars are used in the blind, the pot size will be rounded up to the next \$5 increment. Other betting structures may be rounded upward as required.
- The maximum amount a player can raise is the amount in the pot after the call is made. Therefore, if a pot is \$100 and a player makes a \$50 bet, the next player can call \$50 and raise the pot \$200, for a total wager of \$250.
- In pot limit, if a chip or a bill larger than the pot size is put into the pot without comment, it is considered to be a bet of the size of the pot.
- In pot limit games, an optional "live" straddle is allowed. The player with the "live" straddle must be immediately clockwise from the blind and must post an amount twice the size of the big blind. The player who posts the "live" straddle has last action for the first round of betting and is allowed to raise, even if all other players just call the straddle.

PAI-GOW POKER

OBJECT OF THE GAME:

To win your bet by having both of your hands rank higher than both of the designated Player/Dealer. Hands are played and ranked as traditional poker hands.

THE DECK:

Pai-Gow Poker is played with a total of 53 cards consisting of 52 cards and the joker. The joker may be used as a Wild Card to complete any pair, straight/or flush.

HOW THE GAME IS PLAYED:

The card game is dealt on a poker-style table to Seven (7) players. A House Supervisor (Casino Employee Dealer) controls the shuffling and dealing of the cards, controls the orderliness of the game and takes collections on each wager. The casino and its employees do not participate in the play of the hand nor do they have any interest in the outcome of the play.

One of the seven (7) players becomes the designated Player/Dealer. The remaining players will each play their hands against the Player/Dealer's hand. The Player/Dealer is the only opponent. The Player/Dealer is determined in a new game by starting at seat # 1, continuing clockwise. Each player in turn has the opportunity to become the Player/Dealer: As the Player/Dealer, you have the option to be the Player/Dealer for two consecutive hands. You may play one hand and pass the Player/Dealer option, or you may pass the option completely. For each hand that you accept the Player/Dealer button, you must wager at least the minimum bet requirement of that table (with no maximum wager). The Player/Dealer position cannot remain with one player for more than 2 consecutive hands. An intervening player must accept the option before it can be returned to any player.

Once the Player/Dealer has been established, the House Supervisor shuffles the cards. The House Supervisor will cut and complete the deal of seven (7) piles of seven (7) cards face down in front of him.

The designated Player/Dealer selects one of the seven (7) piles. An "action" button is placed on the selected pile. This pile will be the first hand distributed and the first hand to receive action from the Player/Dealer, continuing clockwise.

Wagers are placed in the small numbered circles. The amount you wager may not be altered once the play of the hand begins. As a player, you must bet within the table limit.

Ocean's Eleven Casino
Games & Rules Manual

At this time, a collection is taken for each wager before every hand begins. A dice cup containing three (3) dice is given to the Player/Dealer to shake. The sum of the dice determines where to place the first pile or "action" hand. Each position is counted whether it has a wager on it or not, starting with the Player/Dealer as 1, 8, or 15.

THE OPENING OF THE DICE CUP:

Revealing the total of the dice signifies the BEGINNING OF THE HAND. The House Supervisor will announce "no more bets." Once the dice are revealed, the hand has begun, all bets are final and you may not touch your wager until the hand is completely over.

The House Supervisor distributes the hands starting with the "action hand." The Player/Dealer button is placed on the "Player/Dealer's" cards, which will be opened only after all players have "set" their hands.

The players set their hands by making a two (2) card hand and a five (5) card hand. The five (5) card hand must rank higher than the two card hand. They will then lay both hands face down distinctly separate next to their wager. When the House Supervisor sees that all players cards are down, he will announce "all hands are set," at which time the players may not touch their cards for the remainder of the hand.

The House Supervisor will then reveal the Player/Dealer's cards and arrange the two hands the way the Player/Dealer wants them to be set.

The House Supervisor will get a confirmation from the Player/Dealer, then proceed to open the action hand. The hands are then compared in turn to the Player/Dealer's hand.

In order for the player to win: both the two (2) and five (5) card hands of the player must rank higher than both hands of the Player/Dealer. If only one of the hands ranks higher, it is a "push" and neither side wins. If one hand is identical in rank to the Player/Dealer's hand, that is a "copy" and the Player/Dealer wins all "copy hands." If both hands rank lower than both of the Player/Dealer's hands, the player loses to the Player/Dealer.

When all hands are declared wins or losses, the Player/Dealer can only receive action on the amount he wagered, i.e., if the "Player/Dealer" wagers \$100.00 and loses \$50.00 to the action hand and wins \$50.00 from the next hand he cannot win or lose any more money. No other wagers, win or lose, can be paid.

Ocean's Eleven Casino
Games & Rules Manual

Any wager that had no opportunity to receive action will get a "free collection" button to pay the collection on his next wager. This button must be used on the very next hand by the same player.

When all transactions are complete, then the hand is over. The House Supervisor shuffles and starts the procedure again, by determining the Player/Dealer.

BACKLINE WAGERS:

Each player's position has circles numbered 1, 2, and 3. The number 1 refers to player who is occupying the seat and handling the cards for that specific position. Numbers 2 and 3 are areas that another player may wager on. If there is a dispute on how the hand should be played, the person making the largest wager shall have the final say. All wagers in number 2 or 3 locations will pay equal collections on each wager before each hand is played.

SUPER PAN NINE

Object of the game:

To win bet by having a higher numerical total of all your cards than the numerical total of the designated Player/Dealer's cards.

The Deck:

Super Pan 9 is dealt using twelve (12) decks totaling 432 cards. Starting with a regular 52 card deck, the 7's, 8's, 9's and 10's are removed.

Structure of the game:

- 1) Each player, including the Player/Dealer places their wagers before the cards are dealt. This is the only chance to place a bet.
- 2) The designated Player/Dealer (each player is offered the opportunity to be the Player/Dealer in turn, clockwise starting from seat #1) then shakes the dice cup to determine the order in which the player's hand will be compared to his. In Super Pan 9, the Player/Dealer's position is always 1, 9, or 17; numbers count clockwise.
- 3) Each player, including the Player/Dealer, is then dealt three (3) cards. The cards have a numerical value corresponding to their face value except for face cards which have a value of zero (see below). An Ace has a value of one.
- 4) There are eight hands dealt. After the three (3) cards are added together, the last digit of the total determines the value of that hand.

FOR EXAMPLE:

A, A, Q, 5 = 7
6, 5, J, 3, = 4 (14)
2, K, Q, 6 = 8
5, 5, K, 6 = 6 (16)
3, 4, 2 = 9
5, 5, K, K = 0 (10)

- 5) Each player in turn (starting to the immediate left of the Player/Dealer), is given the option of playing his or her hand as is, or drawing one (1) additional card. In turn, the player tables his or her three cards in front of his or her bet in the box (in the horizontal box if a player wants to draw a card, in the vertical box if the player does not want to draw a card). Players must place their three hand in either the "card" or "no card" position. The player may draw an additional card (draw card). Once the cards are tabled, players may not touch the cards.
- 6) The Player/ Dealer's cards are opened last and he or she is given the option to draw.
- 7) Each player's cards are revealed starting from the action button and compared, in turn, to the Player/ Dealer's hand.
- 8) In order to win, a player's hand must have a higher total than the Player/Dealer. In the event that the Player/ Dealer's hand are the same total, no money is exchanged. This is considered a "push".

Ocean's Eleven Casino

BETTING LIMIT:

Players must bet within the table limits. There is no maximum for the Player/Dealer. The designated Player/Dealer can only receive "action" on the total amount he or she has wagered.

BACKLINE BETS:

Each player's position has circles numbered 1, 2, and 3. The number 1 refers to the player who is occupying the seat and handling the cards for that specific position. Numbers 2 and 3 are areas that another player may wager on. If there is a dispute on how the hand should be played, the person with the largest wager in action shall have the final say. All wagers in the number 2 or 3 locations will pay equal time collection before each hand is played.

21st Century Blackjack

No Bust w/Double Down, Split, 3/2 Odds & Surrender

21st Century Blackjack is a variation of standard Blackjack. It is a player-banked game with the similar objectives and strategy as standard Blackjack. The main differences are:

1. The best hand is a "Natural 22."
 - A "Natural 22" is any combination of Aces and Jokers on the first two cards. A "Natural 22" pays 3 to 2. Two suited Aces on the first 2 cards pays 2 to 1.
2. A player may "bust" and not lose.
 - The player does not lose his bet if the Player/Banker "busts" higher. (See Game Rules)
3. All cards have face value. Aces have a value of 1 or 11. Face cards have a value of 10.
4. The value of each hand is the sum of its cards.
5. All players' hands are compared with the Player/Banker's hand.
6. Two Jokers are added to the "shoe" on each table.
7. Each "shoe" consists of 5 (with the automatic shuffler) or 6 standard 52-card decks.
8. The Joker is considered a "wild" card and automatically makes the hand a 21 unless it is received in combination with an Ace or a Joker on the first 2 cards, then it is considered a "Natural 22".

PLAYER OBJECTIVE:

- a. Receive a "Natural 22" on the first 2 cards.
- b. Form a hand whose sum does not exceed 21 points.
- c. Form a hand whose value is greater than the Player/Banker's hand.

PLAYER/BANKER:

1. Each player has the option of banking on a betting spot for 2 consecutive hands.
2. The option starts from seat number 1 in a new game, if the player denies the banking option the option will be given to the next player moving clockwise.
3. There must be an intervening Player/Banker before the bank position may return to the previous player.
4. The Player/Banker must bank for the minimum table limit. There is no maximum amount on the Player/Banker's wager.
5. The Player/Banker will receive action only on the amount of his wager.
6. Player/Banker will receive one UP card and one DOWN card. The Player/Banker must draw additional cards until his hand totals a hard 17 or better.

-
7. The Player/Banker receives his additional "hit" cards after all other players have acted on their hands by "standing" on their first 2 cards or drawing additional cards on their hands.

HOW THE GAME BEGINS:

1. The Player/Banker option is accepted by one player.
2. Each player places a wager in the designated circle. The game is dealt on a blackjack style table consisting of (7) player spots. Each player spot has 5 additional spots for backline betting. (See Betting Scheme)
3. The "dealer" (A casino employee) controls the shuffling and dealing of the cards, controls the orderliness of the game and takes collections on each wager before the cards are dealt. The casino and its employees do not participate in the play of the hand nor do they have any interest in the outcome of the play.
4. The amount of the wager may not be altered once the play of the hand begins. As a player you must bet within the table limits.
5. Each player receives two cards on the initial deal.
6. Players have the option of drawing additional cards.
7. When all players have concluded their play, the Player/Bankers hole card is exposed. The "dealer" plays the Player/Bankers hand by drawing cards until the Player/Banker hand reaches a total of 17 or more. (He must hit a "soft 17")

Betting Scheme:

1. Players must bet within the table limits. There is no maximum wager for the Player/Banker.
2. A collection, based on the amount of wager is taken by the dealer, for the house, prior to the start of each hand.
3. Players may "double down" on any two cards except a "Natural 22" or any hand with a Joker. Players may double down for any amount from table minimum and up to their original bet. Player will receive one additional card.
4. Players may "split" any pair or any two face cards. An amount equal to the original wager must be wagered on the "split" card. If the player receives the same pair or a face card on the next card he can "split" again by matching his initial wager. (A player can "split" three times).
5. There are 5 additional backline wagering spots on each players spot. The original player, or 1st spot player controls the playing of the hand. The wager in each spot must meet the minimum and maximum table limits and a collection based on the amount of the additional wagers will be taken prior to the start of each hand.

GAME RULES:

1. All players' hands are compared to and played against the Player/Bankers hand.

-
2. If both player and Player/Banker have a "Natural 22" it's a PUSH.
 3. If both player and Player/Banker hands are 21 or less, the hand closest to 21 wins. All ties are a PUSH.
 4. If both players' and Player/Bankers' hands are over 21 after, the first 2 cards are dealt;
 - a. Player/Banker is closer to 21, PLAYER/BANKER WINS.
 - b. If player is closer to 21, it is a PUSH.
 - c. If Player/Banker and player tie, PLAYER/BANKER WINS.
 5. If the Player/Bankers up card is a Joker, there is no draw.
 6. If the Player/Banker has a Natural 22 he wins all wagers unless a player ties with a "Natural 22".
 7. If the Player/Banker has a Joker as his up card and does not make a Natural 22, he pushes all hands equaling 21 and loses to any Natural 22.
 8. If the Player/Banker has a Joker as his down card, or has a Natural 22, the player may only lose his original bet.

MEXICAN POKER

Mexican Poker is played with a standard deck "stripped" to 41 cards. The 8's, 9's, and 10's are removed. The cards are dealt clockwise, beginning to the left of the dealer button. The dealer button rotates clockwise after each hand is complete.

Objectives:

Each player receives a total of 5 cards, 4 of which must be face up. After the first two cards are dealt (1 down and 1 up), a betting round begins with the high card clockwise of the dealer button, making a forced opening bet to start the action. After the betting is complete, the players may expose their down card, if they wish. This action must be complete prior to the deal of the third card which may be delivered up or down, depending on whether or not previously dealt down cards have been opened. When the third card has been delivered, betting then occurs. The fourth and fifth card are then dealt and played according to the same format. The player with the ranking hand wins the pot.

Ranking of hands – From Highest to Lowest.

1. All cards 8 through 10 are removed from a regular 53 card deck (Deck includes Joker which remains). The Joker is "wild" in all cases when dealt face down. However, when dealt face up, it is "wild" only with Aces, Straights and Flushes.
2. The player with the highest card clockwise of the dealer button will make a mandatory opening bet. When the Joker is dealt face up, it will be considered an Ace for purposes of the opening bet. The opening better has the option of opening at either the lower or upper limit.

7. In that case, on 3rd, 4th, or 5th streets, cards are dealt either face up or face down. Any cards dealt out of sequence on those streets will be moved face up to their correct position. The deal of the affected street will be completed if necessary. No betting will be permitted on the affected street. Any following street will then be dealt and betting will resume. Any bets made by players who receive out of sequence cards, which had not yet been returned to their correct position will be denied and returned to the player.
8. If a player exposes a card during other than prescribed times, it is not considered an exposed card and player will be required to play it as a down card.

Three Card Poker

LEGAL

The Player/Dealer position must rotate in a continuous and systematic fashion, and cannot be occupied by one person for more than two consecutive hands. There must be an intervening Player/Dealer so one person cannot continually occupy the position and the "bank" hand within the meaning of *Oliver v. County of Los Angeles* (1998) 66 Cal. App. 4th 1397, 1408-1409. And in addition to the meaning of AB 1416 (the Wesson Bill) which added section 330.11 to the California Penal Code relating to the California licensed gambling establishments and any future regulatory guidelines from the California Department of Justice, Division of Gambling Control, with respect to the operation of a controlled game featuring a Player/Dealer position.

PANGUINGUE, THE GAME

Players

Two or three can play, but four to eight players are best.

The Pan Deck

The Pan deck consists of 320 cards. Eight decks of regular cards make one Pan deck, with 8's, 9's, and 10's taken out. There are no Jokers. In all games, one complete set of Spades is removed, thereby leaving a total of 310 cards. Sequence of cards: A, 2, 3, 4, 5, 6, 7, J, Q, K (high). Note that the Jack follows the seven in sequence.

The Deal

The deal and play are counter-clockwise.

To Start the Play

Five cards are dealt to each player with one card turned face-up. The player dealt the lowest card first will be the first one to act. Each player then receives five more cards. From then on, the winner of the last hand will be dealt to first and be the first to act.

Before the Action

Each player gets to look at his or her hand and evaluate its potential. Starting with the winner of the previous hand, each player declares whether he or she will play the hand or forfeit his or her top and discard the hand.

Action Begins

Action begins with the first person to declare in, drawing a card from the top of the deck. If he or she chooses not to use the first card drawn, he or she is allowed to draw again. A player drawing a card from the deck, or from the top of the discard pile, must use the card immediately in a meld, NEVER placing the card in his or her hand. If a drawn card cannot be used, it must be discarded. A player may draw from the top of the discard pile only if both the top card of the discard pile was drawn from the deck and discarded by the preceding player, and he or she can immediately meld this card.

After drawing a playable card and using it in a meld, a player may meld as many spreads as he or she holds or may add to his or her existing meld(s) and collect any pays due before discarding, which ends his or her turn.

Melds or Spreads

Melds or Spreads must be at least three cards or as many as eleven. There are two types of melds: sets usually called "squares" and sequences usually called "ropes."

Ropes

Ropes are any three or more cards of the same suit and in sequence, i.e., Clubs 6, 7, J.

Squares

Squares are three or more cards of the same rank and of different suits, i.e., Club 6, Heart 6, Diamond 6, or also allowed the same suit, i.e. as Diamond Q, Q, Q. Additionally, any three Aces or any three Kings, regardless of suit, qualify as Heart K, Heart K, Club K. Aces and Kings are called non-comoquers.

Conditions

Certain melds have value and are called konditions. When melding a payable kondition, the player may immediately collect chips from each player who had declared to play the hand, by asking for the correct amount due him or her.

Value of Conditions

All three's, five's, and seven's are valle (pronounced "valley") cards, all others are non-valle.

1. Any set of valle cards, not in the same suit: one chip.
2. Any set of valle cards, in the same suit: two chips; four chips in Spades.
3. Any set of non-valle cards, in the same suit: one chip; two chips in Spades.
4. Any sequence of A, 2, 3, in the same suit: one chip; two chips in Spades.
5. Any sequence of K, Q, J, in the same suit: one chip; two chips in Spades.

Adding to a Meld

A player may add one or more cards to any of his or her melds provided that the character of the meld is preserved. To a set of different suits, same rank, he or she may add any card of the same rank. Also, to a set of the same suit, another card of the same rank may be added. If a kondition is increased as Heart K, K, K, original kondition for each Heart K added. When adding to a set of three valle cards in the same suit, half value is collected. One chip in any suit, two chips in Spades. Non-valle cards are paid full value for each identical card added to original meld.

Borrowing

A player may take a card from one of his or her increased melds to make a new spread provided he leaves a valid meld. For example: From Diamond J, 7, 6, 5, he or she may borrow either the Jack or the five, but not the seven or the six. When borrowing from a square as Heart 6, Club 6, two Spade 6's, only one Spade 6, and no other, can be removed without effecting the meld.

On the Out

The winner of the hand receives, from each participating player with chips, the total value of his pays as they lay, plus two (2) chips for the outs. The winner also receives the tops which are given to him or her last.

PANGUINGUE RULES

1. You are required to pay your collections in advance.
2. All players are to be seated by the Floorperson, in turn, from the board.
3. No telephone reservations are accepted.
4. No one is allowed to play over anyone else's checks except when authorized by floorperson.
5. You must keep your cards above the table at all times. If you remove any card(s) from the plane of the table, your hand may be declared dead. If you deliberately throw a card(s) off the table, you are subject to being penalized or denied use of the facilities.
6. No cutting of cards by players.
7. The dealer deals 10 cards to each player, two rounds of 5 cards each. In dealing cards, if all five cards are turned face up, that player is entitled to another 5 cards from the center of the deck. If only 4 cards or less are exposed, they remain in play.
8. **COUNT YOUR CARDS BEFORE YOU DECLARE YOURSELF IN. TO DECLARE IN MEANS THAT YOU HAVE COUNTED YOUR CARDS AND ARE READY FOR PLAY. IT IS YOUR OWN RESPONSIBILITY, NOT THE DEALER'S, TO SEE THAT YOU HAVE THE CORRECT NUMBER OF CARDS.**
9. **BOXED CARDS DO NOT PLAY AT ANY TIME.**
10. No stuffing of cards is permitted except by dealer.
11. A player who has been dealt 8 cards or 12 cards has a dead hand, and his top is returned.
12. If a player is dealt 9 cards, the player gets another card from the front of the deck. If cards have been drawn, the player gets a card from the center of the deck.
13. If a player is dealt 11 cards, that player lays all of his or her cards face-down. The Dealer then counts the 11 cards and draws the extra card from the hand.
14. In both instances, if a player has declared in and another player has acted, or if any action has been taken, the player with the wrong number of cards must play the hand.
15. If a player has declared in with the wrong number of cards, and has touched the deck, that player is playing a foul hand.
16. If "Time" or "Hold to me" is called, you have protected your right to act while considering what to do if the player ahead of you has not yet completed his or her action.
17. In a dealer game, the first player has the option on the first card. The first card drawn off the deck to start play can be used by the second player if two players are in the hand.
18. **NEVER PUT A DRAWN CARD INTO YOUR HAND. YOUR HAND WILL BE FOULED.**
Exception: If the player is going out.

19. If a player discards a card he or she has drawn, he or she loses all action on that card. IT IS ALSO UNETHICAL FOR ANY PLAYER TO CALL ATTENTION TO THAT CARD. Players repeatedly doing so may be denied use of the facilities.
20. Napkins, towels, ashtrays, or chip racks are not permitted on the table.
21. If any hand is flat on the table and that player has either discarded a card they need, or neglected to take a card that would put them out, you may not force that card back on that player.
22. If all hands are fouled, except one, the player places his or her remaining cards face-up on the table. That player continues to draw and must use any card that fits the player's hand in any way. The player draws until the hand is panned. To pan hand, player must go easiest way.
23. Collecting a pay and then making a switch may only occur when a player is going out.
24. Each player must play his or her own hand. No help or discussion from others is permitted. If a player asks for a smaller amount due him or her and discards, he or she receives the amount asked for. However, if that player is hit again, he or she is then entitled to correct amount due but must ask for it.
25. Three valid cards down constitute a meld.
26. NO POTTING ALLOWED.
27. A player using a discard from another player's hand, and discarding, has a fouled hand. If that player has not discarded, the play can be backed up with no penalty.
28. If a player misses a turn, and three players have acted behind him or her, or until it is their turn again, there is no penalty. That player just misses a turn.
29. All cards lying on the table in valid melds must remain there. At no time may they be discarded or returned to your hand. These infractions foul your hand. This rule does not apply to a player who is flat in his or her hand or on board.
30. If a non-valid meld is down and player has discarded, and is asked to make it good, he or she must do so or have a fouled hand. A player must use the card drawn. If he can use the drawn card in a different meld, he may do so and his hand is not foul. This does not involve secondary meld until the player has touched the deck.
31. Discarding a card before you bring the valid card to your meld means that you have a fouled hand because you only have 9 cards in your hand. The exception is in a dealer game, and only after you have requested a card from the dealer prior to discarding.
32. When playing heads up, Player drawing a card does not have to expose card till other player discards.
33. If player draws two cards at one time in error (cards stuck together) that player puts back the card and continues playing. If a player draws a card and accidentally turns the next card over, the second card plays.

34. When a player draws a card, offers it to the in turn player and then reconsiders, it is still their privilege to use the card because they have not released the card.
35. Player "A" has a flat hand on the table. Player "B" also has a flat hand on the table. There are other players in the hand. Player "A" draws his or her out card, but inadvertently discards it. The card drawn is a dead card. When there are only 2 players, the card is not dead, except in Tournament play.
36. Player "A" draws a card and throws it into the muck. Player "B" brings the card toward his meld, then decides not to use the card and throws it into the muck. If the player changes his mind again and wants to use the card, the player cannot use the card because the player has already acted on that card. The player must draw.
37. **FORCING HAS PRECEDENCE OVER ANY OTHER ACTION.** After three (3) players act, including the first pluck, all action on the card is dead. For example: Player "A" draws a card and discards it even though that player could have used it; Player "B" draws a card and discards. Player "C" draws a card and discards. All action on that card is dead.
38. If a player thinks he or she is out and is not out, and all of the player's melds are good except the last one, the player may put back into his or her hand the cards that belonged there, discard the card that does not belong, and continue playing. However, if you say you are out and this causes another player to foul his or her hand, and you find you are not out, then you also have a fouled hand.
39. If you draw a card which you cannot use and put out the next player, who is flat on the table, you must show your entire hand face up on the table if requested to do so.
40. On the outs, a player may collect chips due him from a previous meld providing he has enough chips in front of him, and as long as condition is intact.
41. A player is not allowed to build-up and go out. On the outs he can only collect the amount of chips he has in front of him.
42. If a player asks the value of a hand, any player seated is obligated to correct any errors.
43. If the winner of the hand wants to change seats, that player gives up the first.
44. There shall be no change in seating after a new player has been seated or has placed the "buy-in" on the table, except when there has been a change previously requested of the dealer or floorperson. The players on the board have priority on all new games.
45. You may be granted a change of table from one game to another of the same limit providing your game is full. You must begin with a full buy-in when you change tables except when coming from a broken game of the same limit.
46. If your game breaks, you will be allowed to cut cards with the remaining players for any available seats in another game of the same limit.
47. You have the right to insist that any player in your game exchange cash on the table for

chips. You must make at least a full buy-in upon being seated in a game. A full buy-in is one full stack of twenty (20) times the kondition of the game being played.

48. A player is allowed to make one short buy-in after a full buy-in. Anything less than a full buy-in is a short buy-in, even when adding to your stack.
49. You cannot remove chips from the table. If you leave the table with chips (or money), it must be replaced before you resume play.
50. **THERE WILL BE NO PLAYING FOR TOPS.** If you run out of chips during the playing hand, you must throw your hand away.
51. If a player with no chips plucks a card, that card is live until the following player has completed their turn; or if the card was used in a spread, then the plucked card is dead.
52. There is no playing behind. A player declaring playing behind may do so only if the table accepts the action. The House will take no responsibility for any player playing behind, nor will the House render any decision in regard to playing behind.
53. Each player is responsible for their own collections. The House will not pay any short pay or top. If a player is not in the hand, and he knows who is short, that player should say so if asked.
54. **IT IS YOUR RESPONSIBILITY TO PROTECT YOUR HAND AT ALL TIMES.**
55. By accepting a seat in a Pan game, you have agreed that management has the right to interpret rules and enforce decisions in the best interest of the game.
56. The Floorperson's decision is final.
57. Management assumes no responsibility for the conduct of any player. However, we do reserve the right to decide on who may play and how they may play. Players are expected to conduct themselves in a proper manner at all times. In order to protect players fully, we retain our right to refuse use of the facilities to any person.
58. There is no transfer of liability. In case of theft or natural disaster, Ocean's Eleven Casino will not be responsible for chips or money left on the table.

RULES FOR ASIAN 5-CARD STUD:

1. All cards 2 through 6 are removed from a regular 52 card deck. No jokers.
2. The player with the highest card clockwise of the dealer button will have a mandatory opening bet. This is a "Live Bet." This player may raise if anyone else fails to do so.
3. The highest hand will start the action on all following rounds. When there are two hands of equal value, the hand closest to the dealer acts first.
4. If the down card (second card) is exposed by the House dealer, that player will receive his next card down.
5. If a player exposes a card, it is not considered an exposed card and he will be required to play it.
6. Starting after the second card a card will be burned on each round.
7. Check and raise is permitted.
8. All raises must be at least equal to the size of the last bet.
9. **ENGLISH ONLY** will be permitted while the hand is in play.

Caribbean Stud Poker

California Version

The game is played on a blackjack -like table with up to eight spots. A standard 52- card is used. In front of each player's position, there are two betting spots. ANTE & BET.

Players must place an ANTE prior to receiving their cards. Each player will receive five cards. Player/dealer will receive four faces down cards and one face up cards. There is no dice in the game; The player/dealer's last card is used for determining action button.

Players will examine their hand and decide whether to fold or call. Player may fold and forfeit their entire ANTE. Other wise they must call by placing in the "BET" circle an additional BET equal to exactly twice the ANTE. After making their decisions, all players must put their cards face down on the table. The player/dealer collects the ANTE from players who folded and then reveals his four face down cards for those players who have stayed in the game.

The player/dealer hand must qualify to play. If the player/dealer does not have an Ace-King or higher, he does not qualify and the hand is over. In that case all players who called and stayed in are paid even money on their ANTE and their call BET is returned. The player/dealer's hand must have at least an Ace/King (an ace and a king) to "qualify."

- If the player/dealer hand does not qualify, the player wins the Ante bet even the player's hand is lower than the player/dealer's hand.
- If the player/dealer's hand qualifies with an Ace-King or higher, then each player's hand must be compared against the player/dealer's hand. If the player/dealer's hand is better than the player's hand, the player loses both the ANTE & call BET.
- If the player/dealer's hand qualifies and the player's hand is better than the player/dealer's is hand, the player is paid even money on the ANTE plus a bonus on the call BET according to the bonus payout schedule.
- If the player/dealer's hand qualifies and the player and the player/dealer have the same hand ranking, the remaining cards are taken into consideration and the highest hand wins. In the event that all cards are identical, the hand is tie and no action is taken.

Rules of Play

Buster Blackjack features a side bet that allows the player to bet that the dealer will bust. The more cards in the dealer's busted hand, the higher the payoff is.

The game can be played on a regular Blackjack or No Bust 21 table. It can be dealt with six to eight decks of cards. In addition to the mandatory blackjack bet, the player has the option to make a "Buster" side bet. After all bets are made, the dealer deals himself and each player two cards. One of the dealer's cards is revealed. All players then play out their hands according to the house rules.

The Buster side bet remains in action whether or not the player busts or has a blackjack.

Once all players have played out their hands, the dealer will reveal his hole card and play out his hand. If the dealer does not bust, all Buster side bets lose. If the dealer busts, all Buster side bets are paid according to the below pay tables. The payoff odds vary with the number of cards in the dealer's busted hand.

Note that if all players have a blackjack, as long as there are Buster side bets, the dealer must complete his hand, if not 17 or greater.

The Benefits of Buster Blackjack

- ❑ **Camaraderie**

A feature that is almost nonexistent in other blackjack side betting games. In Buster Blackjack, everyone roots for the dealer to bust.

- ❑ **Suspense**

This is the only blackjack side bet that keeps the player in the game after they bust. The outcome of the side bet won't be determined until the dealer's last card is drawn. A player who has busted remains in action. So, his participation and anticipation to win also remain till the last second of the round. There is no such thing as "watching the paint dry" after the player busts.

- ❑ **Easy to deal**

If the dealer doesn't bust, all Buster Blackjack bets are swept. Otherwise, all bets are paid the same odds. Unlike other blackjack side bets, the dealer need not check to see whether each player has a qualified winning hand and how much it pays.

ROUND OF PLAY

1. No-Bust- 21st Century Blackjack is played on a raised gaming table. The table seats eight players who face the Dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino Dealer stands opposite of the players, and in the center of the table. The casino Dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.
2. The game utilizes a 52-card deck with special marked "Bonus" or "No Bust" aces with 3 values. The aces are Bonus cards with the value of:
 - a. 12 on first two cards with all cards with the value of 10's.
 - b. 1 or 11 with all cards with value of 2-9.
 - c. 1 or 11 with three or more cards.
3. All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed, and collection fees for the Players and Player/Dealer.
4. A standard round of play begins when a Player/Dealer is designated. The Player/Dealer places a wager in front of her betting circle. This wager is used to pay the winners. The casino will place a "button" in front of the Player/Dealer and a designation whether it is the first or second turn for the Player/Dealer in the

banking position. The Player/Dealer will place the collection fee in front of his betting circle.

5. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each Player must pay the posted collection for their wager(s) in any betting circle where they have money or “action”.
6. Prior to the start of play, the casino dealer will take the collection fees.
7. Play commences with the casino Dealer distributing the cards to the Players and the Player/Dealer. All cards are dealt face up. The casino Dealer is the only person on the table to touch the cards. The Players will signal to the Dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino Dealer deals the first card to the Player seated to the left of casino Dealer, in a clock-wise fashion. Each Player will be dealt one card face up. The Player/Dealer’s first card will be placed in front of the casino dealer.
8. The casino Dealer will deal a second face up card to the players, again starting at the Player to the first seated position to the left of the casino Dealer, in a clock-wise fashion. The Player/Dealer will receive a face down card in front of the casino Dealer.
9. Players must follow the below listed chart in deciding whether to hit or stand on a particular hand:

Rules For Player		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Soft & Hard 21 “Naturals”	11 Or Less	12
		13
		14
		15
		16
		17
		18
		19
		20

10. After all Players have made their best hands by indicating to the casino Dealer that they do not wish to have additional cards dealt to them, the casino Dealer will turn over the Player/Dealer hole (second) card.
11. Beginning with the player to the right of the casino dealer, the settling of the wagers will be done in a counter-clockwise manner until all wagers have been acted upon.
12. The Player/Dealer’s cards will always be dealt and placed in front of the casino Dealer’s tray.

13. The casino Dealer continues to draw cards for the Player/Dealer, if necessary until a Hard 17 or higher number is reached. The Player/Dealer must follow the following hit rules:

Rules For Player/Dealer		
<i>Must Stand On</i>	<i>Must Hit On</i>	<i>Have Option On</i>
Hard 17 And Above	Soft 17 Or Less	None

14. Once the Player/Dealer's hand has been made, all winners and losers are determined by comparing the numerical value of the Player's hands with the Player/Dealer's hand. The Player/Dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.
15. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the Player/Dealer position is rotated in a clock-wise fashion around the table.
16. The next round of play begins once the casino Dealer collects all cards from the table and places them in the discard tray. The casino Dealer will also change the Bank Button, and if necessary (if the same person has already held the Player/Dealer position twice) rotate the Player/Dealer position clock-wise to the next position on the table.

EZ BACCARAT™

SUMMARY OF GAME

The object of the game is to assemble two hands of two (2) or three (3) cards with a point value as close to nine (9) as possible.

EZ Baccarat™ plays the same way as regular baccarat except that it eliminates the odds differential between Player Line and Dealer Line wagers and replaces it by "barring" one specific winning Bank hand (the winning Bank hand consisting of three cards and totaling seven points). The appearance of this hand is the "Dragon 7™". Customers can make an insurance bet - the Dragon 7 bet, which pays 40 to 1 when the three card winning Bank hand totaling 7 points occurs.

To begin the game, players make a wager(s) on Player, or Dealer, or Tie ("Base Game Wager") or a combination of the above. Players that have placed a Base Game Wager may also place a "Dragon 7" bet (three card winning Bank hand totaling 7 points). All wagers must be between the minimum and maximum table limit.

Wagers are resolved as follows:

In the case of a Bank win, Bank wagers are paid 1 to 1. Player, Tie and Dragon 7 wagers lose.

In the case of a Player win, Player wagers are paid 1 to 1. Bank, Tie and Dragon 7 wagers lose.

In the case of a Tie, Tie wagers are paid 8 to 1. Bank and Player wagers push and Dragon 7 wagers lose.

In the case of a Dragon 7, Dragon 7 wagers are paid 40 to 1. Bank wagers push, Player and Tie wagers lose.

2. All wagers shall be placed prior to any cards being dealt. No bets shall be made, increased, or withdrawn after the dealer has begun dealing.

Seated players as well as back-line bettors may place a tie bet wager. The tie wager may be less than, equal to, or greater than the base game wager. However, the tie bet wager cannot exceed the table limit. In the event that the player's hand and the player-dealer's hand are not of the same value, the player-dealer will win the tie bet wager. There will be no extra fee for placing a tie bet wager.

Dragon 7 Bonus Bet

EZ Baccarat™ plays the same way as regular baccarat except that it eliminates the odds differential between Player Line and Dealer Line wagers and replaces it by "barring" one specific winning Bank hand (the winning Bank hand consisting of three cards and totaling seven points). The appearance of this hand is the "Dragon 7™". Customers can make an insurance bet - the Dragon 7 bet, which pays 40 to 1 when the three card winning Bank hand totaling 7 points occurs. A player may only place a Dragon 7 wager if they have also placed either a player line wager or a dealer line wager prior to the initial deal. Seated players as well as back-line bettors may place a Dragon 7 wager. The Dragon 7 wager may be less than, equal to, or greater than the base game wager. There will be no extra fee for placing a Dragon 7 wager.

The player-dealer will pay all winning Dragon 7 wagers and will collect all losing Dragon 7 wager. Wagers are collected or paid, to the extent that the player-dealer's wager covers. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players. In the event that the player-dealer's wager does not cover the amount wagered by all players, an action button shall be used to designate where the action will begin.

Dealing Procedures

At the start of a game a player is offered the player/dealer position. Once accomplished, the casino dealer shall wait for each player to make their wager (within posted table limits) on base game as well as any bonus bets. Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until each hand has a total of two cards each. All cards are dealt face up. The hand to the left of the house dealer is a community hand that belongs to those that placed a bet on the dealer line. The hand to the right of the house dealer is a community hand that belongs to those that placed a bet on the player line. The decision, if any, is made by the player's betting on the Player hand and then the Dealer's hand is resolved. The position that is closest to 9 wins.

A Natural 8 or 9 is accomplished when the first two cards of the player or dealer's hand has a value of eight (8) or nine (9). When this occurs, the other hand will not be allowed to draw an additional card.

How Winners are Determined and Paid

After the cards are dealt, the closest to 9 will be declared the winner and all winners will be paid and all losers will have their wagers awarded to the player/dealer.

Game Rule:

After the casino dealer delivers the first two cards to both the Player Line and Dealer Line, the following Baccarat rules are followed.

- The player hand must stand when their hand is valued at 6 through 9, and must hit when the hand is valued at 5 or less.
- If the player stands, then the dealer hand hits on a total of 5 or less.
- If the player does hit for a complete hand then the dealer hand hits using the following rules:
 - If the dealer's hand total is 3, then the dealer hand is dealt a third card unless the player's third card was an 8.
 - If the dealer's hand total is 4, then the dealer hand is dealt a third card unless the player's third card was a 0, 1, 8, or 9.
 - If the dealer's hand total is 5, then the dealer hand is dealt a third card if the player's third card was 4, 5, 6, or 7.
 - If the dealer's hand total is 6, then the dealer hand is dealt a third card if the player's third card was a 6 or 7.

The following chart, where "S"= Dealer Line "stands" and "H"= Dealers Line "hits" demonstrates how each hand combination is resolved:

	0	1	2	3	4	5	6	7	8	9
7	S	S	S	S	S	S	S	S	S	S
6	S	S	S	S	S	S	H	H	S	S
5	S	S	S	S	H	H	H	H	S	S
4	S	S	H	H	H	H	H	H	S	S
3	H	H	H	H	H	H	H	H	S	H
2	H	H	H	H	H	H	H	H	H	H
1	H	H	H	H	H	H	H	H	H	H
0	H	H	H	H	H	H	H	H	H	H

Once all cards have been dealt, the hand with the highest total point count is declared the winner. In the case where both hands have an equal point count, the hand is a Tie. Wagers will then be settled in one of the following two ways:

If the player-dealer's wager covers all action on the table, wagers will be settled starting with the player to the left of the casino dealer and continuing in a clockwise manner around the table until all wagers have received action.

If the player-dealer's wager does not cover all action on the table, an action button will be used, which determines which player receives first action on their wager(s). The second card dealt to the player-dealer's hand determines the position of the action button. The player-dealer position is always zero (0). The other seats, in clockwise rotation, starting with the player to the left of the player-dealer and continuing in a clockwise manner around the table, respectively represent the other numbers. Wagers will be settled in the following order: each player line and dealer line wager placed, then all tie bet wagers, then all Dragon 7 wagers. When determining where the action button will be placed, cards will hold the following values:

Action Button Card Chart:

Card Dealt	Card Value
Ace	1
2 through 10	Hold their face value
Jack	11
Queen	12
King	13

House Way

Player hand hits on five (5) or below and stands on six (6) or more. The casino dealer must use the house way when a player requests the casino dealer to play an additional wager.

Round of Play

- The Player/Dealer makes their wager.
- All players place their wagers on the player or dealer line.
- The dealer takes all casino collections and drops it in the affixed drop box.
- The dealer deals the cards and then determines the winner (Player or Dealer) or whether the hand is a tie.
- All ties between the player line and the dealer line on zero through nine (0-9) are considered a "push," and the original wagers are called off.
- The dealer places the action button. The action button determines which player receives first action on their wager. The second card dealt to the dealer's hand determines the position of the action button. The player/dealer's position is always zero. Other seats, in clockwise rotation, respectively represent other numbers.
- All wagers are settled to the extent the player/dealer's wager covers the action.
- The dealer (if applicable) records whether the preceding hand was won by the player, dealer or was a Tie on the affixed electronic reader board.

Table Limits & Collection Rates

The collection is taken from each player for every player or dealer line wager prior to start of the game. The player-dealer shall pay a fee based on the total player action, which will be the sum of all player line, dealer line, tie bet, and Dragon 7 wagers. Players including the player-dealer must post required collection prior to receiving any cards. Collection is paid before cards are dealt. Collection is paid based on the table limit and is paid for each spot playing a hand.

PLAYER-DEALER & DEAL

The player/dealer position rotates in a systematic and continuous way so that the opportunity to act as the player/dealer does not constantly remain with a single person for many hands. The person in player/dealer position may not act as player/dealer position more than two consecutive hands or rounds of play. The opportunity to act as the player/dealer must be offered to all seated players after two hands or rounds of play so that a single player cannot repeatedly act as the player/dealer within the meaning of *Oliver v. County of Los Angeles*, (1998) 66 Cal.App.4th 1397, 1408-09 or section 330.11 of the California Penal Code, relating to gambling establishments and any future regulatory guideline from the California Bureau of Gambling Control or the California Gambling Control Commission with respect to the operation of controlled games featuring a player/dealer position.

Player/dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player/dealer wager. The house never participates as a player/dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player/dealer's wager.

Ultimate Texas Hold'em lets players bet aggressively. The earlier they bet, the more they can risk and win. If players bet pre-flop, they may risk 3x or 4x their ante. If they bet on the flop, they may bet 2x their ante. If they wait until the river, when all community cards are out, they may only bet 1x their ante.

This game also features an optional bet, the Trips bonus. Players win the Trips bonus if their final five-card hand is three of a kind or higher. Odds will be printed on layout.

An ante wager and a blind wager are required to play the round.

Back-line betting is not permitted on any wagers.

4. The player-dealer will collect all losing wagers and will pay all winning wagers to the extent of their wager. Once the player-dealer's wager is exhausted, all player wagers not covered by the player-dealer will be returned to the players.

Dealing procedures:

1. Immediately before the start of each round of play and after all ante wagers, blind wagers, and any trips bonus wagers have been made, the house dealer shall:

 - a. 1 card to each wagering area containing an ante wager and blind wager and then 1 card to the player-dealer; followed by

 - c. 5 community cards in the center of the table.
4. The automatic shuffler shall deal cards as follows:
 - a. 2 cards at a time to each wagering area containing an ante wager and blind wager, starting with the player to the left of the house dealer and continuing clockwise; followed by
 - b. 2 cards to the player-dealer, who receives their cards last; followed by
 - c. 5 community cards in the center of the table.
5. After the cards have been dealt and delivered to each player and the player-dealer, the house dealer shall unload the remaining cards in the shuffler and place them into the discard rack without exposing the cards.

Round of Play

1. After the dealing procedures above have been completed, each player shall examine his or her cards and decide whether to check (do nothing) or to make a play wager three or four times the value of their ante wager. Once players bet, they cannot bet again and they cannot change their bet.
2. When players have made their player wagers (if any), the house dealer shall proceed to turn over the first three community cards.
3. Players who have not already made a play wager may decide to either check again or to make a play wager two times the value of their ante wager.
4. The house dealer shall proceed to turn over the remaining two community cards (the turn and the river).
5. When all five community cards are revealed, players who have not yet made a play wager can either fold or make a play wager equal to the value of their ante wager.
6. A player who decides to fold shall place his/her cards face down on the table. The house dealer shall then, in relation to each player who has folded:
 - a. Collect the ante wager, blind wager, any trips bonus wager (if the hand is not a 3 of a Kind or better) on behalf of the player-dealer, and the player's cards;

- b. Individually spread out the cards, face down, and count them; and
 - c. Place the cards in the discard rack.
7. For all remaining players, the house dealer will turn over the player-dealer's two cards. Each player and the player-dealer's five-card poker hand shall be determined using any combination of hole cards and community cards.
8. When handling the cards, players shall at all times ensure that the cards remain on or above the area of the table. The cards must not be removed from the table.

When the player-dealer does not qualify:

9. Where the player-dealer's hand is not 1 pair or higher, the player-dealer does not qualify. Starting with the player on the player-dealer's left, the house dealer shall:
- a. Expose each player's cards, signal a push for the ante and return the ante wager to each player that did not fold;
 - b. Resolve the play, blind, and trips bonus bets normally (see below "When player-dealer qualifies"); and
 - c. Collect, count and place the player's cards in the discard holder.

NOTE: Ultimate Texas Hold'em handles qualifying differently than other games. When the dealer does not qualify, it is not an automatic win for the player.

When the player-dealer qualifies:

10. If the player-dealer's hand has a poker value of a pair or higher, the house dealer reconciles the hands of those players who remain in the game. Starting with the player to the left of the player-dealer and moving clockwise around the table, the house dealer will:
- a. Bring the player's cards into the "work area" between the player-dealer's hand and the trips bonus wager area and reveal the player's cards;
 - b. Determine the player's best 5-card poker hand utilizing any of the 7 cards available (player's 2 hole cards and 5 community cards);
 - c. Compare the player's hand with that of the player-dealer; and
 - d. Announce the value of the player's hand and whether it wins or loses.
11. A player's hand shall:
- a. Win if it has a higher poker value than that of the player-dealer's hand;

- b. Lose if it has a lower poker value than that of the player-dealer's hand;
 - c. Constitute a push if it has a poker value equal to that of the player-dealer's hand.
 - d. If a player wins with less than a straight, the blind bet pushes.
12. If a player's hand loses, the house dealer shall:
- a. Collect on behalf of the player-dealer, in order, the play, ante and blind wagers;
 - b. Determine whether the trips bonus wager qualifies and pay accordingly on behalf of the player-dealer; and
 - c. Collect, count and place the player's cards in the discard holder.
13. If a player's hand wins, the house dealer shall on behalf of the player-dealer:
- a. Pay the ante wager and play wager on the hand;
 - b. Pay the blind wager if the hand is a straight or better;
 - c. Pay any trips bonus wager if the hand is a 3 of a kind or better; and
 - d. Collect, count and place the payer's cards in the discard holder.
14. If a player's hand constitutes a push, the house dealer shall:
- a. Pay any trips bonus wager if the hand is a 3 of a kind or better;
 - b. Collect, count and place the player's cards in the discard holder.
15. Winning ante wagers and play wagers shall be paid 1 to 1.
16. Winning blind wager and trips bonus wagers shall be paid in accordance with the approved pay table for the cardroom.
17. Where a player has made a trips bonus wager at the beginning of the round and has received a 3 of a Kind or higher, the house dealer shall leave the particular cards face up on the table and those cards shall not be collected or discarded until the payout on the hand has been made.
18. If the player receives a 3 of a Kind or higher, the trips bonus payouts are made regardless of whether the hand wins, loses, or pushes.

NOTE: If the player has a 3 of a Kind or better, the trips bet always wins – even if the player folds.

19. The player-dealer is never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house never participates as the player-dealer. The house never takes a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
20. The player-dealer position rotates in a systematic and continuous way among the seated players, and no one player may serve as the player-dealer for more than two consecutive hands. The player-dealer button rotates clockwise around the table.

Trips Bonus

1. This is an optional wager for Ultimate Texas Hold'em.
2. Backline betting is not permitted.
3. This bet will be paid according to the payable if it is a qualifying hand of three of a kind or better. If the hand does not qualify with a three of a kind or better, according to the payable, the wager shall lose and be collected. This bet cannot push. This bet wins or loses regardless of whether the player hand wins, loses, or ties.
4. If a player placed a Trips Bonus bet and folds their hand, they are still eligible if the community cards contains three of a kind or better. If there is a three of a kind or better on the board, the Trips Bonus bet wins, otherwise, that wager is collected as well with the ante and blind bet.
5. To participate in the Trips Bonus, players must make bets on the Ante, Blind. Players place their Trips Bonus wagers in the marked circle.
6. If the player's hand qualifies for payouts, the player-dealer pays him according to the posted payable. If the player's hand does not qualify, the player-dealer takes his wager and moves on to the next player.
7. If the player receives a 3 of a Kind or higher, the trips bonus payouts are made regardless of whether the hand wins, loses, or pushes.

ROUND OF PLAY

1. Pure Spanish 21.5 is played on a raised gaming table. The table seats up to eight players who face the house dealer in a 180-degree seating arrangement. The tables are the standard blackjack tables commonly used in the casino industry. The house dealer stands opposite the players, and in the center of the table. The house dealer's chip tray is set in front of the dealer.
2. All tables will have some type of signage where the name of the game is displayed, along with the minimum and maximum wager allowed. The collection fee for the players and player-dealer shall also be displayed. A maximum of five collection rates is allowed in compliance with the California Penal Code.
3. A standard round of play begins when a player-dealer is designated. The player-dealer will place a wager in a betting circle in front of their seat. That wager will be used to pay the winners and will set the amount that he/she can collect for the losers. The casino will place a button in front of the player-dealer, which designates that they are taking the "bank" position and further designates whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the appropriate collection fee in front of his/her betting circle.
4. Players at a table then place their wagers in designated betting circles. The players may place a wager at his/her seat along with other unoccupied betting circles. Each player must pay the appropriate collection fee based on the posted schedule for the cardroom. Prior to the start of play the house dealer will take collection fees and drop them into a locked collection box affixed to the gaming table.
5. After the fees have been collected, the house dealer will deal the cards to the players and the player-dealer. All cards dealt throughout the game are face up, with the exception of the player-dealer's second card, which will remain face-down until all players have acted on their hands. The house dealer is the only person on the table allowed to touch the cards. The players will signal the dealer with hand gestures that indicate whether they wish to hit or stand. The hand signals will be consistent with the industry standard signals of a sweeping motion towards a player's body, indicating a hit, or a side to side hand motion, indicating the desire to stand. The house dealer deals the first card to the player seated to the left of the player-dealer, and continues in a clock-wise manner. Each player will be dealt one card face up with the player-dealer receiving the last card. The player-dealer's cards will be placed in front of the house dealer.
6. The house dealer will deal a second card to the players in the same order noted above and the last card will go to the player-dealer and will be dealt face down. The players are given an opportunity, starting with the player seated to the left of the player-dealer, to be dealt additional cards to make the best possible hand.
7. Players must follow the below listed **Chart 1A** in deciding whether to hit or stand on a particular hand.

8. After all players have acted on their hands and indicated to the house dealer that they do not want or cannot receive additional cards, the player-dealer's down card will be turned up. This down card will determine where the "action button" is placed.
9. Both the deal and settling of wagers will start with the player to the left of the player-dealer and continue in a clockwise manner. No action button will be utilized.
10. The player-dealer's hand will then be completed according to the rules listed on **Chart 1B**. Once the player-dealer's hand is completed, the payoff and/or collection of wagers will begin in the seat designated by the action button and continue in a clockwise manner until all wagers have been acted on.
11. Player-dealers are never required to cover all opposing players' wagers. Payoffs of wagers are limited to the amount of the player-dealer wager. The house shall not participate as the player-dealer. The house shall not take a percentage of wagers placed in the game. There is no maximum on the player-dealer's wager.
12. The player-dealer's cards will always be dealt and placed in front of the house dealer's tray. The placement of the player-dealer's cards is standard in all games and is depicted below. See **Diagram #1**
13. The next round of play begins when the house dealer collects all the cards from the table and places them in the discard tray. The player-dealer position shall be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

DOUBLE-DOWN, RESCUE, DOUBLE-DOUBLE DOWN, SPLIT, AND SURRENDER

1. Players can double-down on the first two cards dealt to them. The player must place a second wager which may be equal to or less than the player's original wager. The player will only receive one additional card, regardless of the total.
2. After doubling, if a player is dissatisfied with his/her non-busted hand, he/she may "rescue" (take back) the last doubled portion of the bet and forfeit the remainder of the wager. Their play for the hand will then cease.
3. If the player-dealer hits on a soft 17, the casino may allow an option known as "double-double down." If the casino allows the double-double down option, once a player elects to double and receives a double card, the player then has the option to double-double down (double his total wager again), rescue the last doubled portion of the bet, or stand. A player may double the total wager up to three times, once via double down and twice via double-double down, creating a maximum wager up to 8 times the original wager. After doubling a third time and receiving a double card, a player only has the option to stand or rescue. When a player "rescue" (take back) the last doubled portion of the bet and forfeit the remainder of the wager. Their play for the hand will then cease.
- a. Important: The "double-double down" option is not available to the player when the player-dealer stands on all totals of 17. Doubling for less is only allowed if the double-double down option is not allowed. In other words, when the double-double down option is allowed there is no doubling for less.
4. Players can split any pair or two cards of the equal value, including aces and Bonus cards. The player must place a second wager equal to the original wager. The player may draw as many cards as desired per split card. There is no splitting for less.
5. A maximum of three splits is allowed per hand, giving a player up to 4 hands. Doubling-down is permitted after splitting.
6. Players can surrender after the first two cards are dealt to them. If they choose to surrender, half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
7. Late surrender option:
 - a. Players will have to option to surrender after the dealer has checked for Pure Spanish 21.5 Blackjack. If the player-dealer has Pure Spanish 21.5 Blackjack, the hand is over there will be no draw; the player will not have the option to surrender.

- b. If the player-dealer does not have Pure Spanish 21.5 Blackjack the player will have the option on their original first two cards dealt to them to surrender, whereas half of their wager will be forfeited. The player must indicate their desire to surrender before the player-dealer's down card is exposed. Their play for the hand will then cease.
8. The casino will take no extra collection fee on double downs or splits from the player or player-dealer.
9. All payoffs are to the extent that the player-dealer's money covers the action on the table. A player-dealer cannot win or lose more than the entire amount of money placed on the table before the start of the hand.

Wagering Limits and Collection Rates

For **schedule option 1**, a collection rate shall be taken per hand from the player in the player-dealer position based on the total monetary value of all game wagers and Match the Dealer bonus bet wagers that are placed by players prior to cards being dealt, referred to as total table action. The collection is taken after the first card is delivered. The total table action does not count the player-dealer's wager or any additional wagers placed by players after cards are dealt, such as when players double-down, split cards, place an insurance wager, or when a hand is surrendered. The bonus bet may be less than, more than, or equal to the game wager, but must be within the table limits. The collection shall be collected from the player-dealer and dropped by the house dealer after the house dealer has dealt each player their initial two card hand. The collection rates shall be pre-determined prior to any cards being dealt or a round of play commencing. Only one collection schedule option, which utilizes one table limit and the specified collection rates for that table limit, as listed above, shall be used at a table at any one time. Rates may not be calculated as a fraction or percentage of wagers made or winnings earned. Flat fees on wagers may be assessed at different collection rates. However, no more than five collection rates may be permitted per table limit. The approved collection fees and schedules for the game of Pure Spanish 21.5 Blackjack are as shown below:

Description of Table Used and Total Number or Seated Positions

21st Century Blackjack 8.0 is played on a gaming table. The table seats seven to eight players, including the player-dealer, who face the dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino dealer stands opposite of the players, and in the center of the table. The casino dealer's chip tray is set in front of him/her. The play starts from the left of the dealer and proceeds in a clock-wise fashion.

All tables will have signage displaying the name of the game along with the minimum and maximum wager allowed, and collection fees for the players and player-dealer.

Dealing Procedures and Round of Play

1. A standard round of play begins when a player-dealer is designated. The player-dealer places a wager in front of their betting circle. This wager is used to pay the winners. The casino will place a "placard" in front of the player-dealer indicating whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the collection fee in front of his betting circle.
2. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each player must pay the posted collection for their wager(s) in any betting circle where they have money or "action".
3. Prior to the start of play, the casino dealer will take the collection fees.
4. Play commences with the casino dealer distributing the cards to the players and the player-dealer. All cards are dealt face up. The casino dealer is the only person on the table to touch the cards. The players will signal to the dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino dealer deals the first card to the player seated to the left of casino dealer, in a clock-wise fashion. Each player will be dealt one card face up. The player-dealer's first card will be placed in front of the casino dealer.
5. The casino dealer will deal a second face up card to the players, again starting at the player to the first seated position to the left of the casino dealer, in a clock-wise fashion. After all players have received a second card, the player-dealer will receive their second card, which will be placed in front of the casino dealer face down. The player-dealer's face-down card shall be checked for a "natural" when the player-dealer's face-up card is a "bonus" ace card. If the player-dealer is dealt a "bonus" ace face-up, players will be asked if they would like to place an "insurance" wager. Players may either decline or place an "insurance" wager by betting an amount equal to half of their game wager. After each player has been given the opportunity to place an "insurance" wager, the casino dealer will check the player-dealer's face-down card. If the player-dealer has a "natural," players shall not be given the opportunity to draw additional cards and the hands shall be compared immediately. Players that placed an insurance bet are paid 2 to 1 on the insurance bet.

6. If the player-dealer does not have a “natural,” each player is given an opportunity, starting with the player seated to the left of the player-dealer and continuing clockwise around the table, to “hit” and be dealt additional cards to make the best possible hand. This shall also include “doubling-down,” “splitting,” “surrendering,” or “standing.” Each player shall be required to hit or stand according to the chart below:

Rules for player		
<i>Must stand on</i>	<i>Must hit on</i>	<i>Have option on</i>
Soft & hard 21 “naturals”	11 or less	12
		13
		14
		15
		16
		17
		18
		19
		20

- A soft hand is achieved when a hand contains a “bonus” ace with a combination of two or more cards that add up to 10.
 - A hard hand is achieved when a hand contains a “bonus” ace with any combination of three or more cards adding up to 21. In the event that the hand includes a “bonus” ace, the “bonus” ace is counted as 1, not 11.
7. After all players have made their best hands by indicating to the casino dealer that they do not wish to have additional cards dealt to them, the casino dealer will turn over the player-dealer hole (second) card.
8. Beginning with the player to the right of the casino dealer, the settling of the wagers will be done seat by seat in a counter-clockwise manner until all wagers have been acted upon. Furthermore, each seated wager will be settled in the following order: base game wager, then buster blackjack bonus bet wager.
9. The player-dealer’s cards will always be dealt and placed in front of the casino dealer’s tray.
10. The casino dealer continues to draw cards for the player-dealer, if necessary until a hard 17 or higher number is reached. The player-dealer must follow the following hit rules:

Rules for player-dealer		
<i>Must stand on</i>	<i>Must hit on</i>	<i>Have option on</i>
Hard 17 and above	Soft 17 or less	None

- A hard hand is achieved when a hand contains a combination of three or more cards totaling 17. In the event that the hand includes an ace, the ace is counted as 1, not 11.
- A soft hand is achieved when a hand contains a combination of two or more cards totaling 17 with an ace counted as 1 or 11.

11. Once the player-dealer's hand has been made, all winners and losers are determined by comparing the numerical value of the player's hands with the player-dealer's hand. The player-dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.
12. After all wagers are settled, the cards are collected and discarded. The bank button is changed and after every two hands, the player-dealer position is offered in a clock-wise fashion around the table.
13. The next round of play begins once the casino dealer collects all cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the player-dealer position twice) offer the player-dealer position clock-wise to the next position on the table.

How Each Wager Wins, Loses, or Pushes

1. A "natural" is an initial two card hand containing a bonus ace and any card with a value of 10 and is the best possible hand. Winning "natural" hands will be paid 6 to 5
 - a. If the player and the dealer's hands are both a "natural," the hand is a push or tie, and no action is taken on the wager.
2. If the value of a player's hand is less than a "natural" and the value of the player-dealer's hand is more than a "natural", the player wins the hand.
3. If the value of a player's hand is less than a "natural" and the value of the player-dealer's hand is less than a "natural," the hand closest to a "natural", without going over, wins.
4. If a player and the player-dealer hands have the same value and it is less than a "natural," the hand is a push or tie, and no action is taken on the wager.
5. If a player's and the player-dealer's hands both have a value of more than a "natural", the following rules apply:
 - a. If the value of the player-dealer's hand is closer to a "natural," the dealer wins the hand.
 - b. If the value of the player's hand is closer to a "natural," the player loses except when the player has a 3-card hand with a value of 23, 24, or 25, and then they will "push".
6. The player-dealer wins all ties over a "natural."
7. If the value of a player's hand is greater than a "natural" and the player-dealer hand has a value of less than a "natural," the dealer wins
8. A two card "natural" beats all other hands.

Double-Down, Split, Surrender and Insurance

1. Double-Down:
 - a. Players can double-down on the first two-cards only, with the exception of all “natural” hands and 21. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. The player will only receive one card regardless of the total.
 - b. There is no extra collection fee taken by the casino on any double-down or split executed by a player, nor is there any extra collection fee charged to the player-dealer.
 - c. Players may double down for any amount up to his/her original bet in increments of \$5.
2. Splits:
 - a. Players can split any two cards of the same value (2-9) or any 10-value cards (i.e. “10”, jack, queen, or king) originally dealt to them. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. A player may draw as many cards as they desire per split card to make the best hand. Players may double-down or surrender after each split. After the initial split, players can split the same value cards a maximum of two additional times for a total of four hands.
 - b. A “natural” cannot be attained in any hand following the split of a ten-value card.
 - c. Players can split any two “bonus” aces originally dealt to them but can only receive one extra card per “bonus” ace. The player must place an additional wager equal to the wager he/she originally placed prior to the start of the game. When using two decks only, one “bonus” ace can be split for a maximum of two hands. When using more than two decks, a total of three aces can be split. The player must place an additional wager equal to the wager he/she originally placed prior to the start of the game. “Bonus” aces cannot qualify for a “natural” hand after the split.
3. Surrender:

Players can surrender on their original two cards at any time if their value is over 11 but do not exceed 20. If they choose to surrender, half of their wager will be forfeited. The player must indicate they wish to surrender before acting on their hand.
4. Insurance:
 - a. Players may make an optional insurance wager.
 - b. When the dealer has an ace showing, players can take insurance by betting half (1/2) of their original wager. If the player-dealer has blackjack (and the player does not), the insurance bet is paid 2 to 1 and the player's original wager loses.
5. There is no collection fee taken by the casino on any double-down, split or insurance bet executed by a player, nor is there any collection fee charged to the player-dealer.

Buster Blackjack Side Bet

1. 21st Century Blackjack 8.0 features an optional bonus wager. The Buster Blackjack Side Bet allows the player to bet that the player-dealer will bust. The greater the number of cards in the player-dealer's busted hand, the higher the payoff. A player must place a base game wager in the game in order to make the buster blackjack side bet wager.

21st Century Blackjack 8.0

2. Buster Blackjack Side Bets must be placed prior to the initial deal.
3. Backline betting is allowed on the Buster Blackjack Side Bet.
4. The Buster Blackjack Side Bet may be less than or equal to, but may not exceed, the game wager.
5. If the player-dealer does not or cannot have a “natural” and the player has a “natural”, the game wager is paid and the player’s cards are put away. The Buster Blackjack Side Bet remains in action whether or not the player busts or is dealt a “natural.”
6. Once all players have made the decisions concerning their hands according to the rules for game, the player-dealer will reveal their hole card and play out their hand. The payoff odds vary with the number of cards in the player-dealer’s busted hand. The more cards in his busted hand, the higher the payoff.
 - a. If the player-dealer hand busts, all Buster Blackjack Side Bets will be paid according to the posted buster blackjack pay table.
 - b. If the player-dealer does not bust, all Buster Blackjack Side Bets will be collected in rotation to the extent of the money in action.
7. The player-dealer will pay all qualifying Buster Blackjack Side Bets and will collect All Buster Blackjack Side Bets that did not qualify.

1. All wagers in this game are based on the posted blinds. For example, in a \$2-\$4 limit game, the forced wagers, or blind, are \$1 for the small blind and \$2 for the big blind. All other wagers are a decision that the individual player will make in turn in a clockwise fashion from the blind position.

The "position" button will only be awarded after a hand in which there is only one winner and is not awarded to any player in a split pot. If a split pot occurs, no player will receive the "position" button until the next round of play.
3. The player with the "position" button will act accordingly during each round of play:
 - a. **Pre-flop:** the holder of the "position" button acts (fold, call, raise, re-raise) after the player with the dealer button but before the small blind, unless the holder of the "position" button is in the big blind position. In that case, that player will act after the small blind;
 - b. **After the flop:** the holder of the "position" button always acts (fold, call, raise, re-raise) after the holder of the dealer button;

Dealing procedures:

The house dealer who is an employee of the casino deals all cards. Neither the house nor the house dealer has any financial interest in the outcome of the game.

After the cards have been shuffled by the house dealer, or with the assistance of an automatic shuffling machine, the two players that are the small and big blind will place their wagers, which are the two positions to the immediate left of the player with the dealer button.

The house dealer will then deal two cards to each player one at a time in a clockwise fashion, starting with the player who is the small blind and ending with the player who has the "dealer button".

After all players have looked at their cards, the betting will begin with the player who is seated to the left of the player that is the big blind. That player and each thereafter, has the option to call, raise or fold (to a maximum of four raises for each round of play). After the player with the dealer button has acted, the player with the "position" button in front of them will have the option to call, raise, or fold, regardless of where they are seated at the table. After the player with the position button has acted, the small blind and big blind players will act.

After all bets are made, the casino dealer will burn a card and then deal three community cards commonly referred to as the flop face up on the table.

The betting will begin with the player who is seated to the left of the player with the dealer button. That player, and each thereafter, has the option to call, raise or fold. After all players have acted, including the player with the dealer button has acted, the player with the "position" button in front of them will have the option to call, raise, or fold, regardless of where they are seated at the table. After all bets are made and folded cards are collected from the players, the dealer burns a card and deals one card that is added to the community cards and referred to as the turn or fourth street.

Another round of betting takes place. The betting will begin with the player who is seated to the left of the player with the dealer button. That player, and each thereafter, has the option to call, raise or fold. After all players have acted, including the player with the dealer button has acted, the player with the "position" button in front of them will have the option to call, raise, or fold, regardless of where they are seated at the table.

A final round of betting takes place. The dealer burns a final card and then deals a final card commonly referred to as the river. A final round of betting takes place and the winner(s) is determined and awarded the pot. The betting will begin with the player who is seated to the left of the player with the dealer button. That player, and each thereafter, has the option to call, raise or fold. After all players have acted, including the player with the dealer button has acted, the player with the "position" button in front of them will have the option to call, raise, or fold, regardless of where they are seated at the table.

Determining and Paying Winners:

The value of a hand is determined by the cards on the board and may or may not include the player's hole cards.

Round of play:

1. A round of play begins when the dealer button is placed in front of dealer and where it moves in a clockwise fashion around the table. If the game is just started, each seated player will select from a deck of cards that the dealer fans out face down. The player with the highest value card is awarded the "dealer" button.
2. The position button is placed in front of the player who won the previous hand. (In the event that two players split the previous pot, thus both winners, the button will go in front of the player who had the higher ranking suit Spade, Heart, Diamond and Club).
3. The players who are the small and big blinds will be forced to post their respective bets.
4. The casino dealer deals the cards beginning with the small blind (the player seated to the left of the player with the dealer button) one at a time until each player has two cards (hole cards).

5. An initial round of betting takes place where the big blind acts first and can check, fold, or bet. Each player in a clockwise fashion then does the same.
6. The player with the position button will act after the player with the dealer button during the initial round of betting only. After the position button player has acted, the small and big blind players will act.
7. The dealer will collect all bets and place them in the middle of the table; commonly referred to as the pot.
8. The dealer will burn a card and deal three (3) cards and place them in the middle of the table; commonly referred to as the flop.
9. A round of betting takes place starting with the player to the left of the dealer button position and continues clockwise around the table. The player with the position button will act last.

How and when house fees are collected:

There will be a fixed collection for each wager that will not be a percentage of the wager. The Casino has no financial interest in the outcome of any wager. The Casino's only interest is the collections taken for each bet. The house dealer collects all fees prior to the start of play and places them next to the slot for the drop box. The modified fee is taken if a round of play proceeds after 'the turn.' When the hand is complete, the collections are dropped into the slot. Collection fees are pre-determined by the casino and can be up to five separate rates per table. All collection rates and wagering limits for the game will be posted at each gaming table.

CRAZY PINEAPPLE

Type of Game

The players of Crazy Pineapple play against each other for "the pot" of money on the table. The game does not utilize a player-dealer position, it is a Poker game. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

Crazy Pineapple is a variation of Hi/Lo Split 8 or Better Hold'em games. The object of the game is for players to form a five-card high poker hand that ranks higher than the other players' five-card high poker hand and a five-card poker hand that ranks lower than the other players' five-card low poker hand. Each player may use any combination of two out of the three cards initially dealt to them at the beginning of the game, referred to as "hole" cards, and the five cards dealt on the table throughout the round of play, referred to as "community" cards or "the board" cards to make the highest five-card poker hand and/or the lowest five-card poker hand. A player may also play the board by using no hole cards and using the five community cards, to make the highest ranking five-card poker hand and/or the lowest ranking five-card poker hand, according to the rankings as shown below.

When making a five-card low poker hand and a five-card high poker hand, a player may use zero, one, or both hole cards to complete each hand. A player is not required to use the same community cards to complete each hand.

Description of the Deck and Number of Decks Used

The game shall be played using one standard 52-card deck and no joker.

Card Values and Hand Rankings

Five-Card High Card Values

The rank of each card used in Pineapple High/Low Split when forming a five-card high poker hand, in order of highest to lowest rank, shall be: ace, king, queen, jack, 10, 9, 8, 7, 6, 5, 4, 3, and then 2. All suits shall be considered equal in rank.

Five-Card Low Card Values

The rank of each card used in Pineapple High/Low Split when forming a five-card low poker hand, in order of highest to lowest rank, shall be: king, queen, jack, 10, 9, 8, 7, 6, 5, 4, 3, 2 and then ace. All suits shall be considered equal in rank.

In order to make a qualifying five-card low poker hand, a player must have an 8 high or better (lower), meaning that none of the cards to complete the hand used by the player can contain a card with a value of 9 or higher. Additionally, when determining if a player has a qualifying five-card low poker hand, straights and flushes do not disqualify the player's hand if all other requirements are met. However, if the player has a pair or higher in their low hand, the hand does not qualify, even if the cards have a value of 8 or lower. The lowest possible five-card poker hand is 5, 4, 3, 2, and an ace. If multiple players have qualifying five-card low poker hands, the lowest hand is determined by comparing the highest card(s) of each players' five-card poker hand, with the lowest high card being the winning low hand.

CRAZY PINEAPPLE

For example: A hand of 7, 6, 4, 3, and a 2 is lower than an 8, 6, 5, 3, and an ace, even though the second hand has the lowest card.

For example: A hand of 8, 4, 3, 2, and an ace is lower than an 8, 5, 3, 2, and an ace.

CRAZY PINEAPPLE

Action and Distribution of Cards

The game shall utilize a flat white disk with the words “dealer button” on it to visually designate which player is in the dealer position (in theory) for that hand. The dealer button shall rotate from player to player around the table clockwise after each round of play. The player with the dealer button is the last to receive cards when they are initially dealt at the beginning of the round of play and has the right of last action on all betting rounds (second, third, and fourth) except the first betting round, in which the “big blind” shall have the right to act last.

The game also utilizes two separate disks, one with the words “small blind” and the other with the words “big blind” on them, to visually designate which player is in the “small blind” position and which player is in the “big blind” position. The small blind and the big blind, which are used to initiate action, are made from the positions immediately to the left of the dealer button and posted before the house dealer deals cards. On all subsequent betting rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button. The small blind and big blind buttons shall rotate from player to player around the table clockwise after each round of play.

Dealing Procedures and Round of Play

The 52-card deck shall be manually shuffled, cut, and dealt by the house dealer.

When first opening a game, all players shall be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table. The player with the highest ranked card, by suit, shall receive the dealer button.

Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall receive the small blind button and shall be required to place the small blind. Additionally, the player to the immediate left of the player that received the small blind button shall receive the big blind button and shall be required to place the big blind. Both blinds are pre-determined based on the posted table limit, mandatory for the players with the small blind and big blind buttons, and are used to initiate action.

The house dealer shall deal one card face-down to each player, starting with the player to the left of the dealer button, which is the player that received the small blind button, and continuing clockwise around the table until all players have three cards face-down. These initial three cards are referred to as “hole cards.” Once each player has received their three hole cards, the first round of betting will occur. Players are given the following options, starting with the player to the left of the player that received the big blind button and continuing clockwise around the table:

- Place their three hole cards face-down into the center of the table, referred to as a “fold.” The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play;
- Place a wager that is equal to the amount of the big blind, referred to as a “call.”

CRAZY PINEAPPLE

- Place a wager that is equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a “raise.” If a player raises the pot, all other players will have the option to call the raise, re-raise the pot by placing a wager larger than the raise within the posted table limit, or fold their hand. There is a maximum of three raises per round of betting, unless there are only two players participating during a round of betting, in which case there is no limit to the number of raises. When a raise or re-raise occurs, checking is not permitted;
- Place no additional wager at this time, referred to as a “check.” This is only permitted for the player in the big blind position when all other players have called the big blind and there have been no raises, or if a player raises the pot and all other players call the raise, in which case the player that originally raised the pot would be permitted to check.

After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.

The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a “burn.” The house dealer shall then take the next three cards from the top of the deck and place them face-up on the table simultaneously, which is referred to as “the flop.” These are community cards and are available to all players. Once the first three community cards have been placed face-up on the table, the second round of betting will occur. All active players shall be given the following options, starting with the first active player to the left of the dealer button:

- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot.

Each active player, which are players that called all wagers and did not fold their hand, shall be required to discard one card from their three-card hand, starting with the first active player to the left of the dealer button. The cards shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile.

[Note: Any player that does not discard one card from their three-card hand prior to the dealer's next act described below whereby the dealer takes the top card of the deck and places it in the discard pile without exposing it, referred to as a burn, is disqualified and is no longer an “active player.” The player is not entitled to any refund or return of bets made.]

CRAZY PINEAPPLE

Once all active players have discarded one card and now only have two cards in their hand, the house dealer shall proceed dealing the game by taking the top card of the deck and placing it in the discard pile without exposing it, referred to as a burn. The house dealer shall then take one card from the top of the deck and place it face-up on the table so that there are now a total of four community cards face-up on the table. This is referred to as "the turn card." This card shall also become a community card and is available to all players. Once the fourth community card has been placed face-up on the table, the third round of betting will occur. All active players shall be given the following options, starting with the first active player to the left of the dealer button:

- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot. The house dealer shall then take the top card of the deck and place it in the discard pile without exposing it, referred to as a burn. The house dealer shall then take one card from the top of the deck and place it face-up on the table so that there are now a total of five community cards face-up on the table. This is referred to as "the river card." This card shall also become a community card and is available to all players. Once the fifth community card has been placed face-up on the table, which is the final community card, the fourth and final round of betting will occur. All active players shall be given the following options, starting with the first active player to the left of the dealer button:

- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

How The Pot Is Awarded

After the fourth and final round of betting has been completed, the house dealer shall move all player bets into the pot. All active players shall then enter into a showdown with each other and compare their hands. Players may use any combination of the two remaining hole cards in their hand and the five community cards turned over throughout the round of play, or they may use the five community cards and no hole cards to make the highest ranking five-card poker hand and the lowest ranking five-card poker hand. When making a five-card low poker hand and a five-card high poker hand, a player is not required to use the same two hole cards or the same community cards to complete each hand.

CRAZY PINEAPPLE

- If there is no qualifying five-card low poker hand, as described above, the entire pot shall be awarded to the player with the highest ranked five-card poker hand, according to the hand and card rankings shown above. All other players shall lose.
- If there is one or more qualifying five-card low poker hands, as described above, the pot shall be divided equally in half, with half of the pot being awarded to the player with the highest ranked five-card poker hand and the other half of the pot being awarded to the player with the lowest qualifying five-card poker hand. Furthermore, a player is eligible to win both the high hand portion of the pot as well as the low hand portion of the pot if they have the highest ranked five-card poker hand and the lowest qualifying five-card poker hand.
- In the event that more than one player has the highest ranking hand and there is not a qualifying five-card low poker hand, the pot shall be split equally among all players with the highest ranked five-card poker hand. In the instance that there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.
- In the event that more than one player has the highest ranking hand and there is a qualifying five-card low poker hand, the pot shall be divided equally in half, with half of the pot being split equally among all players with the highest ranked five-card poker hand and the other half of the pot being split equally among all players with the qualifying five-card low poker hand. In the instance that there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.

Collection Fee Schedule

For **schedule options 1 through 9**, the regular table fees shall be taken from the pot in all hands that proceed past the flop. In hands that conclude prior to the flop, a collection fee shall not be taken. The collection fees shall be pre-determined and conspicuously posted on each table prior to any cards being dealt or a round of play commencing. Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed below, shall be used at a table at any one time. - Call a raise according to the rules and guidelines used in the previous betting round.

How The Pot Is Awarded

After the fourth and final round of betting has been completed, the house dealer shall move all player bets into the pot. All active players shall then enter into a showdown with each other and compare their hands. Players must use at least two of the five hole cards initially dealt to them at the beginning of the game and a maximum of three of the five community cards turned over throughout the round of play to make the highest ranking five-card poker hand. The following shall apply for determining which player wins the pot:

- The pot shall be awarded to the player with the highest ranking five-card poker hand, according to the hand and card rankings shown above. All other players shall lose;
- In the event that more than one player has the highest ranking hand, the pot shall be split equally among the winners. In the instance that there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.

Collection Fee Schedule

The collection fees shall be pre-determined and conspicuously posted on each table prior to any cards being dealt or a round of play commencing. Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed below, shall be used at a table at any one time. Rates may not be calculated as a fraction or percentage of wagers made or winnings earned. However, no more than five collection rates may be permitted per table limit. The approved collection fees and schedules for the game of Big O are as shown below:

Badugi

Type of Game

The players of Badugi play against each other for “the pot” of money on the table. The game does not utilize a player-dealer position, it is a poker game. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

The object of the game is for players to form a four-card low poker hand that ranks higher than the other players' four-card low poker hand. The best unsuited low-hand wins. The ultimate low-hand is made up of four cards that are different suits and different ranks (A-2-3-4 unsuited). If the player has four unsuited different ranked cards, this is a Badugi.

Description of the Deck and Number of Decks Used

The game shall be played using one standard 52-card deck and no joker.

Card Values and Hand Rankings

The rank of each card used in Badugi, in order of highest to lowest rank, shall be: king, queen, jack, 10, 9, 8, 7, 6, 5, 4, 3, 2 and ace. All suits shall be considered equal in rank.

The ranking of hands for Badugi, in order from highest to lowest rank, shall be:

Hand Dealt	Hand Requirements
Badugi	A hand that consists of four cards of different suits and no pairs. The highest ranking Badugi hand is an ace, 2, 3, 4 unsuited.
Three Card Incomplete	A hand that consists of four cards, two of which are suited or same ranked. Therefore, one of the cards “impairs” the hand. The lowest Three Card Incomplete beats other Three Card Incomplete hands.

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard poker table which shall accommodate up to eight seated positions for patrons. Each seated position at the table shall have the same minimum and maximum wagering limits during each betting round, as specified by the table limits.

Dealing Procedures and Round of Play

When first opening a game, all players shall be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table. The player with the highest ranked card shall receive the dealer button. If the ranking of the card is the same for two or more players, the player with the highest ranked card by suit shall receive the dealer button. The game shall utilize a flat white disk with the words “dealer button” on it to visually designate which player is in the dealer position (in theory) for that hand. The dealer button shall rotate from player to player around the table clockwise after each round of play. The player with the dealer button is the last to receive cards when they are initially dealt at the beginning of the round of play and has the right of last action on all betting rounds (second, third, and fourth) except the first betting round, in which the “big blind” shall have the right to act last.

The small and the big blind, which are used to initiate action, are made from the positions immediately to the left of the dealer button and posted before the house dealer deals cards. On

all subsequent betting rounds (second and third), the action is started by the first active player to the left of the dealer button. The small blind and big blind position shall rotate from player to player around the table clockwise after each round of play.

Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button shall be the small blind position and shall be required to place the small blind. Additionally, the player to the immediate left of the player that is in the small blind position shall be in the big blind position and shall be required to place the big blind. Both blinds are pre-determined based on the posted table limit, mandatory for the players in the small blind and big blind positions, and are used to initiate action. Both blind bets shall be placed in the center of the table, which is referred to as "the pot." Once the blinds have been placed in the pot, the house dealer shall deal one card face-down to each player, starting with the player to the left of the dealer button, which is the player that is in the small blind position, and continuing clockwise around the table until all players have four cards face-down. Once each player has received their four cards, the first round of betting will occur. Players are given the following options, starting with the player to the left of the player that received the big blind button and continuing clockwise around the table:

- Place their four cards face-down into the center of the table, referred to as a "fold." The hand shall be kept face-down and shall be collected by the house dealer, who shall then place them in the discard pile. A player that chooses to fold their hand will no longer participate during that round of play;
- Place a wager that is equal to the amount of the big blind, referred to as a "call."
- Place a wager that is equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a "raise." If a player raises the pot, all other players will have the option to call the raise, re-raise the pot by placing a wager larger than the raise within the posted table limit, or fold their hand. There is a maximum of six raises per round of betting, unless there are only two players participating during a round of betting, in which case there is no limit to the number of raises. When a raise or re-raise occurs, checking is not permitted;
- Place no additional wager at this time, referred to as a "check." This is only permitted for the player in the big blind position when all other players have called the big blind and there have been no raises.

After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot. Players now have the chance to draw cards. The first player to act is always the player closest to the left of the button. Players then discard zero to four cards to receive new cards. Players wishing to replace cards in their hand must place those cards in front of their position to signify to the house dealer that they would like new cards. After each player has decided on their discards, the dealer shall collect the cards in front of each player and place them in the discard pile. Then the dealer shall deal that same number as the discarded cards, face down, to each player in turn, so each player has a total of four cards. If the dealer runs out of cards, he/she shall shuffle and use the discarded cards. Once all players have had the option to discard cards, the second round of betting will occur. All active players, which are players that called all wagers and did not fold their hand, shall be given the following options, starting with the first active player to the left of the dealer button:

Badugi

- Place a wager according to the rules and guidelines used in the previous betting round;
- Fold their hand according to the rules and guidelines used in the previous betting round;
- Do not make a wager, called a “check,” with the option to call or raise a wager by another player;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

After all players have acted in turn and either called all bets or folded their hand, the house dealer shall move all player bets into the pot. At this point, players have another chance to draw additional cards. The first player to act is always the player closest to the left of the button. Players then discard zero to four cards to receive new cards. Players wishing to replace cards in their hand must place those cards in front of their position to signify to the house dealer that they would like new cards. After each player has decided on their discards, the dealer shall collect the cards in front of each player and place them in the discard pile. Then the dealer shall deal that same number as the discarded cards, face down, to each player in turn, so each player has a total of four cards. If the dealer runs out of cards, he/she shall shuffle and use the discarded cards. Once all players have had the option to discard cards, the third and final round of betting will occur. All active players, which are players that called all wagers and did not fold their hand, shall be given the following options, starting with the first active player to the left of the dealer button:

- Place a wager according to the rules and guidelines used in the previous betting round;
- Fold their hand according to the rules and guidelines used in the previous betting round;
- Check their hand according to the rules and guidelines used in the previous betting round;
- Raise the pot according to the rules and guidelines used in the previous betting round;
- Call a raise according to the rules and guidelines used in the previous betting round.

How Winners are Determined and Paid

After the third and final round of betting has been completed, the house dealer shall move all player bets into the pot. All active players shall then enter into a showdown with each other and compare their hands. Players shall use their four cards dealt, either originally or from the “draw,” to make the highest ranking four-card low poker hand. The following shall apply for determining which player wins the pot:

- The pot shall be awarded to the player with the highest ranking four-card low poker hand, according to the hand and card rankings shown above. All other players shall lose;
- In the event a hand reaches the showdown and no player has a Badugi, the player with the best three-card or two-card hand wins the pot;
- In the event that more than one player has the highest ranked hand, the pot shall be split equally among the winners. In the instance that there are an odd number of chips, the odd chips shall be awarded to the player closest to the left of the dealer button.

Collection Fee Schedules

For **schedule option 1 - 16**, the collection fees shall be taken from the pot after the first round of betting occurs. If the round of play ends before the first round of betting occurs, the modified fee shall be taken. An additional collection fee is taken from the pot after the last draw card has been dealt and before the fourth and final round of betting occurs. For **schedule options 17 - 32**, the collection fees shall be taken from the pot after the first round of betting occurs. If the round of play ends before the first round of betting occurs, the modified fee shall be taken. The appropriate fees are dependent on the number of players as shown. The collection fees shall be pre-determined and conspicuously posted on each table prior to any cards being dealt or a round of play commencing. Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed below, shall be used at a table at any one time. Rates may not be calculated as a fraction or percentage of wagers made or winnings earned. Flat fees on wagers may be assessed at different collection rates; however, no more than five collection rates may be established per table limit.

Type of Game

Pursuant to the letter issued February 19, 2016, the Bureau is in the process of establishing options that will be deemed in compliance with Penal Code section 330.11, related to the rotation of the player-dealer position in California Games. Although the Bureau has approved these rules, the Bureau is reviewing the lawfulness of the gambling enterprise's player-dealer rotation practices. If the Bureau determines the practices to be unlawful, the Bureau will require the gambling enterprise to modify its rules, may require the gambling enterprise to cease offering 21st Century Blackjack 8.0, and take action against the gambling enterprise if it declines to abide by the Bureau's notification.

The game of 21st Century Blackjack 8.0 utilizes a player-dealer position and is a California game. Although these rules have been updated and revised to reflect the gambling establishments request for a modification, the rules regarding the player-dealer rotation have not been reviewed or modified. The Ocean's Eleven Casino's existing rules regarding the player-dealer position are as follows:

The game of 21st Century Blackjack 8.0 utilizes a player-dealer position and is a California game. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players. A player shall only remain in the player-dealer position for two consecutive rounds of play before it is offered in a clockwise fashion around the gaming table. The gambling enterprise does not participate in the actual play of the game and has no interest in the outcome of the play.

The bank button is changed and after every two hands, the player-dealer position is offered in a clock-wise fashion around the table. The next round of play begins once the casino dealer collects all cards from the table and places them in the discard tray. The casino dealer will also change the bank button, and if necessary (if the same person has already held the player-dealer position twice) offer the player-dealer position clock-wise to the next position on the table.

Object of the Game

The object of the 21st Century Blackjack 8.0 is for the players and the player-dealer to add the numerical value of their cards and:

- Get as close to a Natural without going over and get a higher count than the player-dealer.

Description of the Deck and Number of Decks Used

A plural standard deck of cards (52 cards) with no joker is used in the play of the game. However, all four of the aces shall be removed from the deck and shall be replaced with four specially marked bonus aces with the word "Bonus" on them. The game can be played with a minimum of one (1) and a maximum of eight (8) decks.

Description of Table Used and Total Number of Seated Positions

21st Century Blackjack 8.0 is played on a gaming table that seats up to eight players, including the player-dealer, who face the casino dealer in a 180-degree seating arrangement. The tables are commonly used in the casino industry. The casino dealer stands opposite of the players, and in the center of the table. The casino dealer's chip tray is set in front of him/her. The play starts from the left of the casino dealer and proceeds in a clock-wise fashion.

All tables will have signage displaying the specific name of the game along with the minimum and maximum wager allowed, and collection fees for the players and player-dealer.

Dealing Procedures and Round of Play

1. A standard round of play begins when a player-dealer is designated. The player-dealer places a wager in front of their betting circle. This wager is used to pay the winners. The casino will place a "placard" in front of the player-dealer indicating whether it is the first or second turn for the player-dealer in the banking position. The player-dealer will place the collection fee in front of his/her betting circle.
2. Players at a table then place their wagers in designated betting circles or other unoccupied betting circles. Each player must pay the posted collection for their wager(s) in any betting circle where they have money or "action".

21st Century Blackjack 8.0

3. Prior to the start of play, the casino dealer will take the collection fees and place them on the drop slot. All collections will be dropped into a locked collection box affixed to the gaming table after the completion of the hand, and prior to the start of a new hand.
4. Play commences with the casino dealer distributing the cards to the players and the player-dealer. All players' cards are dealt face up. The casino dealer is the only person on the table to touch the cards. The players will signal to the dealer by hand gesture if they wish to hit or stand. These hand signals will be consistent with industry standard signals such as moving their hand in a sweeping motion towards their body indicating they want an additional card and in moving their hands in a side to side manner, indicating they wish to stay with their cards on the table. The casino dealer deals the first card to the player seated to the left of casino dealer and continues in a clockwise fashion dealing each player one card face up. The player-dealer's first card will be placed in front of the casino dealer.
5. The casino dealer will deal a second face up card to the players, again starting at the player in the first seated position to the left of the casino dealer and continue in a clockwise fashion. After all players have received a second card, the player-dealer will receive his/her second card, which will be placed in front of the casino dealer face down. The player-dealer's face-down card shall be checked for a "natural" when the player-dealer's face-up card is a "bonus" ace card. If the player-dealer is dealt a "bonus" ace face-up, players will be asked if they would like to place an "insurance" wager. Players may either decline or place an "insurance" wager by betting an amount equal to half of their game wager. After each player has been given the opportunity to place an "insurance" wager, the casino dealer will check the player-dealer's face-down card. If the player-dealer has a "natural," players shall not be given the opportunity to draw additional cards and the hands shall be compared immediately. Players that placed an insurance bet are paid 2 to 1 on the insurance bet.
6. The casino dealer will also check for a "Natural" on the player-dealer position's hand when the face up card has a value of ten; however, insurance will not be offered.
7. If the player-dealer does not have a "natural," each player is given an opportunity, starting with the player seated to the left of the player-dealer and continuing clockwise around the table, to "hit" and be dealt additional cards to make the best possible hand. This shall also include "doubling-down," "splitting," "surrendering," or "standing." Each player shall be required to hit or stand according to the chart below:

Rules for player		
<i>Must stand on</i>	<i>Must hit on</i>	<i>Have option on</i>
Soft & hard 21 "naturals"	11 or less	12-20

- A soft hand is achieved when a hand contains a "bonus" ace with a combination of two or more cards that add up to 10.

- A hard hand is achieved when a hand contains a “bonus” ace with any combination of three or more cards adding up to 21. In the event that the hand includes a “bonus” ace, the “bonus” ace is counted as 1, not 11.
8. After all players have made their best hands by indicating to the casino dealer that they do not wish to have additional cards dealt to them, the casino dealer will turn over the player-dealer hole (second) card.
 9. Beginning with the player to the right of the casino dealer, the settling of the wagers will be done seat by seat in a counter-clockwise manner until all wagers have been acted upon. Furthermore, wagers for each seat will be settled in the following order: buster blackjack bonus bet, then base game wager.
 10. The player-dealer’s cards will always be dealt and placed in front of the casino dealer’s tray.
 11. The casino dealer continues to draw cards for the player-dealer, if necessary until a hard 17 or higher number is reached. The player-dealer must adhere to the following rules:

Rules for player-dealer		
<i>Must stand on</i>	<i>Must hit on</i>	<i>Have option on</i>
Hard 17 and above	Soft 17 or less	None

- A hard hand is achieved when a hand contains a combination of three or more cards totaling 17. In the event that the hand includes an ace, the ace is counted as 1, not 11.
 - A soft hand is achieved when a hand contains a combination of two or more cards totaling 17 with an ace counted as 1 or 11.
12. Once the player-dealer’s hand has been made, all winners and losers are determined by comparing the numerical value of the player’s hands with the player-dealer’s hand. The player-dealer can only win or lose as much as they have placed on the table to cover a portion or all of the wagers.
 13. After all wagers are settled, the cards are collected and discarded.

How Winners are Determined and Paid

1. A “natural” is an initial two card hand containing a bonus ace and any card with a value of 10 and is the best possible hand. A two card “natural” beats all other hands. Winning “natural” hands will be paid 6 to 5
 - a. If the player and the player-dealer’s hands are both a “natural,” the hand is a push or tie, and no action is taken on the wager.
2. If the value of a player’s hand is less than a “natural” and the value of the player-dealer’s hand is more than a “natural,” the player wins the hand.
3. If the value of a player’s hand is less than a “natural” and the value of the player-dealer’s hand is less than a “natural,” the hand closest to a “natural,” without going over, wins.
4. If a player’s and the player-dealer’s hands have the same value and it is less than a “natural,” the hand is a push or tie, and no action is taken on the wager.

5. If a player's and the player-dealer's hands both have a value of more than a "natural," the following rules apply:
 - a. If the value of the player-dealer's hand is closer to a "natural," the player-dealer wins the hand.
 - b. If the value of the player's hand is closer to a "natural," the player loses except when the player has a 3-card hand with a value of 23, 24, or 25, and then they will "push."
6. The player-dealer wins all ties over a "natural."
7. If the value of a player's hand is greater than a "natural" and the player-dealer hand has a value of less than a "natural," the player-dealer wins.

Game Variation

If the game is played with two decks, the cards will be dealt face down to the players. The players may touch the cards and must turn the cards over when they double down, split, (see Player Options) or have a "natural." All other rules are the same.

Player Options

Double-Down, Split, Surrender and Insurance

1. Double-Down:
 - a. Players can double-down on the first two-cards only, with the exception of all "natural" hands and 21. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. Players may double down for less as low as the table minimum limit and the maximum of the original wager. The player will only receive one card regardless of the total.
 - b. There is no extra collection fee taken by the casino on any double-down or split executed by a player, nor is there any extra collection fee charged to the player-dealer.
 - c. Players may double down for any amount up to his/her original bet in increments of \$5.
2. Splits:
 - a. Players can split any two cards of the same value (2-9) or any 10-value cards (i.e. "10", jack, queen, or king) originally dealt to them. The player must place a second wager equal to the wager he/she originally placed prior to the start of the game. A player may draw as many cards as they desire per split card to make the best hand. Players may double-down or surrender after each split. After the initial split, players can split the same value cards a maximum of two additional times for a total of four hands.
 - b. A "natural" cannot be attained in any hand following the split of a ten-value card.
 - c. Players can split any two "bonus" aces originally dealt to them but can only receive one extra card per "bonus" ace. The player must place an additional wager equal to the wager he/she originally placed prior to the start of the game. When using two decks only, one "bonus" ace can be split three times for a maximum of four hands. When using more than two decks, a total of three aces can be split. The player must place an additional wager equal to the wager he/she originally placed prior to the start of the game. "Bonus" aces cannot qualify for a "natural" hand after the split.

21st Century Blackjack 8.0

3. Surrender:
Players can surrender at any time if the value of their cards is over 11 but does not exceed 20. If they choose to surrender, half of their wager will be forfeited. The player must indicate they wish to surrender before acting on their hand.
4. Insurance:
 - a. Players may make an optional insurance wager.
 - b. When the player-dealer has an ace showing, players can take insurance by betting half (1/2) of their original wager. If the player-dealer has blackjack (and the player does not), the insurance bet is paid 2 to 1 and the player's original wager loses.
 - c. When the player-dealer has an Ace showing, the player with a natural would have the option to get paid even money before the player-dealer checks the bottom card for a natural.
5. There is no collection fee taken by the casino on any double-down, split or insurance bet executed by a player, nor is there any collection fee charged to the player-dealer.

Buster Blackjack Side Bet

1. 21st Century Blackjack 8.0 features an optional bonus wager. The Buster Blackjack Side Bet allows the player to bet that the player-dealer will bust. The greater the number of cards in the player-dealer's busted hand, the higher the payoff. A player must place a base game wager in the game in order to make the buster blackjack side bet wager.
2. Buster Blackjack Side Bets must be placed prior to the initial deal.
3. Backline betting is allowed on the Buster Blackjack Side Bet.
4. The Buster Blackjack Side Bet may be less than or equal to, but may not exceed, the game wager.
5. If the player-dealer does not or cannot have a "natural" and the player has a "natural", the game wager is paid and the player's cards are put away. The Buster Blackjack Side Bet remains in action whether or not the player busts or is dealt a "natural."
6. Once all players have made the decisions concerning their hands according to the rules for game, the player-dealer will reveal their hole card and play out their hand. The payoff odds vary with the number of cards in the player-dealer's busted hand. The more cards in his busted hand, the higher the payoff.
 - a. If the player-dealer hand busts, all Buster Blackjack Side Bets will be paid according to the posted buster blackjack pay table.
 - b. If the player-dealer does not bust, all Buster Blackjack Side Bets will be collected in rotation to the extent of the money in action.
7. The player-dealer will pay all qualifying Buster Blackjack Side Bets and will collect All Buster Blackjack Side Bets that did not qualify.

Note: if there are no game wagers remaining simply because all players have received a "natural", as long as there is Buster Blackjack Side Bet, the player-dealer must complete his hand, if not 17 or greater.

Collection Procedures:

- California games utilize a player-dealer position. The position must be offered systematically and continuously in a clockwise manner around the table after every two hands. The player-dealer shall collect all losing wagers, pay all winning wagers, and may not win or lose more than the original amount wagered. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the players. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.
- The collection fees shall be pre-determined and conspicuously posted on each table prior to any cards being dealt or a round of play commencing.
- Collection rates and fees shall be determined prior to the start of play of any hand or round.
- Only one collection schedule option, which utilizes one table limit and the specified collection fees for that table limit, as listed above, shall be used at a table at any one time.
- Rates may not be calculated as a fraction or percentage of wagers made or winnings earned.

Short Deck

Type of Game

The game of Short Deck is a poker game where the patrons play against each other for “the pot” of money on the table. The game does not utilize a player-dealer position, it is a Poker game. The gambling establishment does not participate in the actual play of the game and has no interest in the outcome of the play.

Object of the Game

The object of the game is for players to form a five-card poker hand that ranks higher than the other players’ five-card poker hands. Each player may use any combination of the two cards initially dealt to them at the beginning of the game, referred to as “hole” cards, and the five cards dealt on the table throughout the course of the game, referred to as “community” cards or “board” cards. They may play the board by using no hole cards and using the five community cards to make the highest ranking five-card poker hand, according to the rankings as shown below.

Description of the Deck and Number of Decks Used

The game will be played using a 36-card deck with no joker. The 36-card deck is created by removing the 2s, 3s, 4s, and 5s (16 total cards removed) from a standard 52-card deck; the 6 through ace of each suit are the play cards. The 36-card deck will be shuffled, cut, and dealt by the house dealer.

Card Values and Hand Rankings

The rank of each card used in Short Deck when forming a five-card high poker hand, in order of highest to lowest rank, will be: ace, king, queen, jack, 10, 9, 8, 7 and 6. All suits will be considered equal in rank. The ace would be considered low any time the ace begins a straight or a straight flush; i.e. ace, 6, 7, 8 and 9.

Card hands will rank, from highest to lowest, as follows:

Description of Table Used and Total Number of Seated Positions

The game will be played on a standard poker table which will accommodate up to ten seated positions for patrons. Each seated position at the table will have the same minimum and maximum wagering limits and collection rates during each round of play, as specified by the table limits.

Dealing Procedures and Round of Play

1. The game will utilize a flat white disc/button with the word "dealer" on it (referred to as the dealer button) to visually designate the player in the dealer position (in theory) for the hand.
 - a. The dealer button will rotate from player to player around the table clockwise after each round of play.
 - b. The player with the dealer button is the last to receive cards, and has the right of last action on all rounds of play except for the first round, where the big blind position will have the right of last action.
2. The small blind and the big blind positions (each position is represented by a flat white disc/button with the phrase small blind and a flat white disc/button with the phrase big blind) are used to initiate action and are positioned immediately to the left of the dealer button and their blind wagers posted before the house dealer distributes the cards.
 - a. On all subsequent wagering rounds (second, third, and fourth), the action is started by the first active player to the left of the dealer button.
 - b. The small blind and big blind buttons will rotate from player to player around the table clockwise after each round of play.
3. When first opening a game, all players will be dealt one card face-up, starting with the player to the immediate left of the house dealer and continuing clockwise around the table.
 - a. The player with the highest ranked card with traditional suit rankings (spades, hearts, diamonds, and clubs) will receive the dealer button.
4. Once the dealer button has been distributed by the house dealer, the player to the immediate left of the player with the dealer button will receive the small blind button and the player to the immediate left of the player who received the small blind button will receive the big blind button.
 - a. Blind wagers are predetermined and mandatory and are used to initiate action.
 - b. Blind wagers will be placed in the designated wagering area, the pot.
 - c. The structure of certain, specified games may involve three blinds. The order of action will follow the same procedure as with two blinds. The players to the immediate left of the dealer button posts a small blind wager; the player to the immediate left of the small blind posts a middle blind wager; and the player to the immediate left of the middle blind posts the big blind wager.
5. Once the blind wagers have been placed in the pot, the house dealer will deal one card face-down to each player, starting with the player to the left of the dealer button, the player who received the small blind button, and continue clockwise around the table until all players have two cards face-down.

Short Deck

- a. These initial two cards are referred to as “hole cards.”
6. Once each player has received their two hole cards, the first round of wagering will occur. Players are given the following options, starting with the player to the left of the player who received the big blind button and continue clockwise around the table:
 - a. Place a wager equal to the amount of the big blind wager, referred to as a “call”; or
 - b. Place their two hole cards face-down into the center of the table, referred to as a “fold.” The hand will be kept face-down and collected by the house dealer, who will then place them in the discard pile. A player who chooses to fold their hand will no longer participate during the round of play; or
 - c. Place a wager equal to the amount of the big blind as well as an additional amount within the posted table limit, referred to as a “raise”; or
 - d. Call the raise, re-raise, or fold their hand. There is a maximum of three raises per round of wagering, unless there are only two players participating during a round of wagering, in this case there is no limit to the number of raises; or
 - e. The player in the big blind position may “check” if no player has raised; meaning they do not wish to place an additional wager, or they may also raise by placing an additional wager.
7. After all players have acted in turn, the house dealer will move all wagers into the pot.
8. The house dealer will then take the top card of the deck and place it in the discard pile without exposing it, referred to as the “burn.”
9. The house dealer will then take the next three cards from the top of the deck and place them face-up on the table simultaneously, referred to as “the flop.”
 - a. These are community cards and are shared by all players.
10. Once the first three community cards have been placed face-up on the table, the second round of wagering will occur.
11. All active players who called all wagers and did not fold their hand, will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. “Call” a wager; this means to match the amount wagered by another player; or
 - e. Do not make a wager, referred to as a “check”, with the option to call or raise a wager by another player.
12. After all players have acted in turn and either called all wagers or folded their hand, the house dealer will move all player wagers into the pot.
13. The house dealer will then take the top card of the deck and burn it.
14. The house dealer will then take one card from the top of the deck and place it face-up on the table so there are now a total of four community cards face-up on the table, referred to as the “turn card.”
 - a. This card is also a community card and is shared by all players.
15. Once the fourth community card has been placed face-up on the table, the third round of wagering will occur.
16. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
17. After all players have acted in turn, the house dealer will move all wagers into the pot.
18. The house dealer will then take the top card of the deck and burn it.

Short Deck

19. The house dealer will then take one card from the top of the deck and place it face-up on the table so there are now a total of five community cards face-up on the table; referred to as the “river card.”
 - a. This card is also a community card and is shared by all players.
20. Once the fifth community card has been placed face-up on the table, which is the final community card, the fourth and final round of wagering will occur.
21. All active players will be given the following options, starting with the first active player to the left of the dealer button:
 - a. Place a wager according to the established table limits; or
 - b. Fold their hand according to the rules used in the previous round of play; or
 - c. Raise the pot according to the rules used in the previous round of play; or
 - d. Call a wager according to the rules used in the previous round of play; or
 - e. Check according to the rules used in the previous round of play.
22. After the fourth and final round of wagering has been completed, the house dealer will move all wagers into the pot.
23. All active players will then enter into a showdown with each other and compare their hands.

How Winners are Determined and Paid

Players may use any combination of the two hole cards initially dealt to them at the beginning of the game and the five community cards turned over throughout the course of the game, or they may use the five community cards and no hole cards to make the highest ranking five-card poker hand. The following will apply for determining which player wins the pot:

- The pot will be awarded to the player with the highest ranking five-card poker hand, according to the hand and card rankings shown above. All other players will lose.
- In the event that more than one player has the highest ranked hand, the pot will be split equally among all players with the winning hand.
- In the instance that there are an odd number of chips, the odd chips will be awarded to the player closest to the left of the dealer button.

Dealing Procedures and Round of Play

1. Third Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
2. Backline betting is not permitted on any wager or bonus bet.
3. At the start of a game a player is offered the player-dealer position. Once a player-dealer position has been established for that game, the house dealer shall wait for each player to make their wager in accordance with the table limits.
4. The house dealer will shuffle/mix the cards either by hand or a shuffling machine. Players are offered to cut the deck after the shuffle but before the cards are placed in the shoe. The first card dealt out of the shoe will be placed face-up. The value of the card will equal the amount of cards to be burnt face-down; face cards are equal to ten.
5. Each player has the following option(s) when placing their wager(s):
 - The Player line: pays 1 to 1;
 - The Banker line: pays 1 to 1 on all wins except a three-card hand totaling seven, this will be a push;
 - Regardless of whether a player placed a wager on the Player line or the Banker line, that player may place a wager on the Kill the Ox/Tiger Bonus Bet: pays 30 to 1;
 - If a player placed a wager on the Player line or the Banker line, that player may also place a wager on the Tiger 7 Bonus Bet: pays 40 to 1.
 - If a player placed a wager on the Player line or the Banker line, that player may also place a wager on the Ox 6 Bonus Bet: pays 40 to 1.
6. Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until the Banker line hand and Player line hand has a total of two cards each. All cards are dealt face-down.
 - The hand to the left of the house dealer is a community hand and belongs to those who placed a bet on the Banker line.
 - The hand to the right of the house dealer is a community hand and belongs to those who placed a bet on the Player line.
7. The house dealer will then turn the Player line hand face-up and then the Banker line hand face-up.
8. The Player line hand is resolved first and then the Banker line hand is resolved.
9. After the house dealer turns the Player line hand and Banker line hand face-up, the following Baccarat rules are followed.
 - The Player line hand must stand when the hand is valued at six through nine, and must hit when the hand is valued at five or less.
 - If the Player line hand stands, then the Banker line hand hits on a total of five or less.
 - If the Player line hand hits for a complete hand, then the Banker line hand hits using the following rules:
 - If the Banker line hand total is three, then the Banker line hand is dealt a third card unless the third card dealt to the Player line hand was an eight.
 - If the Banker line hand total is four, then the Banker line hand is dealt a third card unless the third card dealt to the Player line hand was a ten value card thus equal to zero, one, eight, or nine.
 - If the Banker line hand total is five, then the Banker line hand is dealt a third card if the third card dealt to the Player line hand was four, five, six, or seven.
 - If the Banker line hand total is six, then the Banker line hand is dealt a third card if the third card dealt to the Player line hand was a six or seven.

Tile Values and Rankings

The value of a hand is based on both the numeric and symbolic ranking of the tiles. To find the numeric value of a tile, count the total number of the dots on each tile. Use only the right hand digit value if the total is over 9.

- Example: A 12-dot tile has a value of 2.

The color of the dots have no significance and do not change the value of any tile. As noted below, the numerical value of a tile does not represent the actual ranking of each tile.

- Example: A Gor Tile (4-dots) is higher ranking than a Foo Tile (11-dots).

Rank 1	Rank 2	Rank 3	Rank 4	Rank 5	Rank 6
 Teen	 Dey	 Yun	 Gor	 Mooy	 Chong
Rank 7	Rank 8	Rank 9	Rank 10	Rank 11	Rank 12
 Bon	 Foo	 Ping	 Tit	 Look	 Chop Gow
Rank 13	Rank 14	Rank 15	Rank 16		
 Chop Bot	 Chop Chit	 Chop Ng	 Gee Joon		

Pai Gow Tiles

- The above tiles ranked 1 through 11 have an exact copy, representing 22 of the 32 total tiles.
- The above tiles ranked 12 through 15 have different dot representations but share the same name, numerical value, and ranking.
- The above tile ranked 16, Gee Joon is wild and can be played with a numerical value of either 3 or 6 depending on what the player wants to achieve.
 - *Example: a Gee Joon (3-Dot) tile can be used as a Gee Joon (6-Dot) tile.*

Hand Rankings

Each player will use their 4 tiles to create a two-tile high hand and a two-tile low hand. When a player sets their hands, the player will attempt to arrange them by the below rankings, from high to low:

- 1) Supreme Pair
- 2) Matched Pairs

Description of Table Used and Total Number of Seated Positions

The game shall be played on a standard Pai Gow table that accommodates up to seven players and a player-dealer position for a total of eight seated positions. Within each betting area for each seated player, there shall be one separate betting space specifically designated for one separate base game wager. Backline betting is not permitted on any wagers.

Dealing Procedures and Round of Play

All players post wagers in the betting circles on the table in front of their position before the dice cup is shaken and opened.

1. The house dealer shuffle-washes the tiles and stacks them in rows, with four tiles facing down in each row.
2. Once tiles have been stacked, the player-dealer selects which stack will receive the "Action button". The house dealer identifies the selected hand by placing a button marked "Action" on the stack by pushing it forward.
3. To determine the placement of the Action button and first tile stack, the player-dealer shakes a dice cup containing three standard dice.

Pai Gow Tiles

4. All players must post wagers in the betting circles in front of their position before the dice cup is shaken and opened.
5. The value of the three die indicates which seat the first pile of tiles will be distributed to. The player-dealer's position is always one, nine, and seventeen. Other seats (occupied and unoccupied), in counterclockwise rotation, respectively represent the other numbers.
6. If the total of the three die is nine or seventeen, the player-dealer shall receive the first set of tiles and the player to the left of the player-dealer shall receive the Action button.
7. The house dealer shall distribute the eight sets of tiles in order to each seat, starting with the hand that has the Action button and continuing counterclockwise around the table. All eight sets will be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed.
 - a. The house dealer will use their right hand to deliver the tiles to seats 1, 2, 3, 4, and use their left hand to deliver to seats 5, 6, 7, and 8. The house dealer will always slide the tiles to ensure no tiles are exposed and use one hand to deliver the tiles.
 - b. The player-dealer's tiles will always be placed in the center of the table, and indicated by placing a "Banker Button" on top of the tiles.
8. Once all of the tiles have been distributed, the house dealer will collect the tiles distributed to seats without a wager and place them in the discard pile. The house dealer will leave these tiles unexposed until the completion of the round of play.
9. Each player shall then set their hands according to the rankings above by arranging the four tile set into a two-tile high hand and a two-tile low hand. The two stacks do not have to be placed in a specific position in relation to each other.
10. Players may have the house dealer set their hands in the "House Way." The player will place their four tiles in one stack in front of their wager. When opened, this hand will be set according to the House Way.
11. Once everyone has placed their tiles in front of their wagers and any House Way hands stacked four tiles high, the house dealer will pass the player-dealer tiles to the player-dealer. Once the tiles have been passed to the player-dealer, any player touching their tiles or wager will forfeit their hand and their wager will be awarded to the player-dealer.
12. After the player-dealer has exposed and looked at their tiles, the house dealer will collect the exposed player-dealer hand and set it into two hands according to the below House Way chart. The player-dealer will have final say as to how the tiles will be set and will be asked for confirmation by the house dealer.
13. Once the player-dealer's hands are set, each player's hand is exposed, in turn, and compared to the player-dealer's hands to determine the winners, losers, or pushes.
 - a. Each two-tile stack will be exposed one tile at a time to avoid any chance of a low hand and a high hand becoming mixed up.

House Way

- Most valuable high hand is a pair.
- Split paired Supreme Pair (Gee Joon) if the third tile has 6-dots and the fourth tile has 4, 5, or 6-dots.
- Split 7-dots tiles if hand has a Teen, Dey and the low hand after the split has a value of 7 or higher.
- Split 8-dot tiles if the low hand after the split has a value of 7 or higher.
- Split 9-dot tiles if the low hand after the split has a value of 9 or higher.
- Split the Teen or Dey tiles if the low hand after the split has a value of 6 or higher, or with tiles containing 9 or 11-dots.
- Never split pair with tiles that have 4, 5, 6, 10, or 11 dots.

How Winners are Determined and Paid

All bets are made against the player-dealer. A player wins if both hands rank higher than both hands of the player-dealer. If only one hand ranks higher, it is a tie or a “push.” In case both two-tile combinations are of the same total value (9, 8, 7, etc.), the highest ranking tiles are compared, and the two-tile combination holding the highest ranking individual tile wins. If both of the player’s hands rank lower than the player-dealer’s hands, the player loses to the player-dealer. The player-dealer wins all situations where both hands are identical to the player’s hands. The player-dealer also wins all “zero value” combination ties regardless of the highest tile ranking.

The player-dealer can only receive action on the amount wagered and cannot win or lose more than their original wager. Wagers shall be settled in a clockwise manner around the table, starting with the player with the Action button. Furthermore, all wagers shall be settled from seat to seat. Wagers are collected or paid, to the extent that the player-dealer’s wager covers. Once the player-dealer’s wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

Once all hands have been settled and collected, the house dealer will expose all unused tile hands. After they have been exposed to the players, the tiles are to be turned over in preparation for the shuffle-wash.

A player may place a Tie Bet even if they have not also placed either a Player line wager or a Banker line wager prior to the initial deal. The Tie Bet takes into account the total value of the player's hand and the total value of the banker's hand, regardless of the number of cards each hand has, at the completion of the round. Each hand must be played according to the guidelines above. In the event that the player's hand and the banker's hand are of the same value (tie), the Tie Bet shall win. In the event that the player's hand and the banker's hand are not of the same value, the player-dealer shall win the Tie Bet.

- The player-dealer shall pay all winning Tie Bets when the total of the player's hand and the total of the banker's hand are equal.
- The player-dealer shall collect all losing Tie Bets when the total of the player's hand and the total of the banker's hand are not equal.
- Backline betting is permitted on the Tie Bet.
- See the collection rate schedule for restrictions on the amount that may be wagered on the Tie Bet and any collection fees that may be taken.

Dealing Procedures and Round of Play

1. Third-Party Providers of Proposition Player Services, as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
2. At the start of a game, the player-dealer position is offered to the players starting with the first active patron in the seated position to the left of the house dealer. Once a player-dealer position has been established for the game, the house dealer shall wait for each player to place their wager(s) within the table limits as listed below.
3. The house dealer will shuffle/mix the cards.
4. Each player has the following option(s) when placing their wager(s):
 - a. The Player line hand, which pays 1 to 1;
 - b. The Banker line hand, which pays 1 to 1;
 - c. Regardless if the player placed a wager on either the Player line or the Banker line, the player may place a wager on the Tie Bet, which pays 8 to 1;
 - d. Regardless if the player placed a wager on either the Player line or the Banker line, the player may place a wager on the Tiger 7 Bonus Bet, which pays 40 to 1.
 - e. Regardless if the player placed a wager on either the Player line or the Banker line, the player may place a wager on the Ox 8 Bonus Bet, which pays 25 to 1.
 - f. Regardless if the player placed a wager on either the Player line or the Banker line, the player may place a wager on the Kill the Ox/Tiger Bonus Bet, which pays 60 to 1.
5. Once all wagers are placed, the house dealer deals one card to the right and one card to the left, one by one in rotation, until the Banker line hand and the Player line hand have a total of two cards each. All cards are dealt face-down.
 - a. The hand to the left of the house dealer is a community hand and belongs to those who placed a bet on the Banker line hand.
 - b. The hand to the right of the house dealer is a community hand and belongs to those who placed a bet on the Player line hand.
 - c. The house dealer will then turn the player's hand face-up and then the banker's hand face-up.
6. The Player line hand is resolved first and then the Banker line hand is resolved.
7. After the house dealer delivers the first two cards to both the Player line hand and the Banker line hand, the following Dragon Dai Bacc rules are followed.
 - a. The Player line hand must stand when the hand is valued at six through nine, and must hit when the hand is valued at five or less.
 - b. If the Player line hand stands, then the Banker line hand must hit on a total of five or less.
 - c. If the Player line hand hits for a complete hand, then the Banker line hand hits using the following rules:
 - i. If the Banker line hand total is three, then the Banker line hand is dealt a third card unless the third card dealt to the Player line hand was an eight.
 - ii. If the Banker line hand total is four, then the Banker line hand is dealt a third card unless the third card dealt to the Player line has a value of zero, one, eight, or nine.
 - iii. If the Banker line hand total is five, then the Banker line hand is dealt a third card if the third card dealt to the Player line hand was four, five, six, or seven.
 - iv. If the Banker line hand total is six, then the Banker line hand is dealt a third card if the third card dealt to the Player line hand was a six or seven.
 - v. If the first two cards dealt to the Player line hand equal a natural, the Banker line hand will not be allowed to draw any additional cards.
 - vi. If the first two cards dealt to the Banker line hand equal a natural, the Player line hand will not be allowed to draw any additional cards.

All wagers will be settled from seat to seat in the following order: all Player line wagers, all Banker line wagers, all Tie Bets, all Tiger 7 Bonus Bets, all Ox 8 Bonus Bets, and then all Kill the Ox/Tiger Bonus Bets.
11. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the players.

How Winners are Determined and Paid

Once both hands have been completed, according to the rules above, the player's wagers are settled. The following shall apply for each possible outcome when determining the winner. The player-dealer shall pay and collect all wagers accordingly to the extent they have wagered:

- The player-dealer shall pay all winning Player line wagers made by players when the Player line hand is closer to nine than the Banker line hand.
- The player-dealer shall pay all winning Banker line wagers made by players when the Banker line hand is closer to nine than the Player line hand.
- The player-dealer shall collect all losing Player line wagers when the Banker line hand is closer to nine than the Player line hand.

Dealing Procedures and Round of Play

All wagers in Face Up Pai Gow Poker shall be made by placing casino chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.

1. At the start of a game, a player is offered the player-dealer position. Once the player-dealer position is accepted, the house dealer shall wait for each player to make their wager in accordance with the table limits.
2. Third-Party Providers of Proposition Player Services (TPPPS), as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
3. Backline betting is permitted on all wagers.
4. Before the start of each hand the player and the player-dealer make their bets. Players also have the option of placing a Fortune Bonus Bet at this time as well.
5. Once all wagers have been placed, the house dealer shall complete the deal of seven piles of cards face-down in front of the house dealer.
 - a. Each seven-card hand shall be distributed by the shuffle machine and placed on the table by the house dealer, one at a time, from the house dealer's left to right, until all seven hands are dealt.
 - b. The house dealer shall then spread the remaining cards to verify there are four cards remaining and placed in the discard pile.
6. Should there be the need to deal the game manually (due to machine malfunction, etc.), the following procedure shall be followed:
 - a. When dealing the seven piles of seven cards, the house dealer shall deal one card at a time in front of the house dealer position until there are seven cards, starting from left to right.

7. To determine the placement of the action button, the player-dealer shakes a dice cup containing three standard dice.
 - a. The sum of the dice indicates the seat the pile of cards shall be distributed. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers.
 - b. If the numerical total of the dice represents a seat/spot without any wagers placed, the action button shall be placed at the first active seat/spot clockwise from the original seat/spot.
8. Once the action button position has been determined, the house dealer shall distribute the seven piles of cards, starting with the pile that has the action button and continuing clockwise around the table.

11. Wagers shall be settled in a clockwise manner around the table, starting with the player with the action button.

12. All wagers shall be settled from seat to seat in the following order: the base game wager, then the Fortune Bonus Bet, and the Envy Bonus. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer shall be returned to the respective players.

How Winners are Determined and Paid

Once each player has set their hands and the house dealer has set the player-dealer's hand, each player's hand shall be compared against the player-dealer's hand. The following shall apply for each possible outcome when determining which hand wins, loses, or if there is a "push."

- The Face Up Pai Gow Poker base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand. Winning base game wagers are paid 1 to 1.

Face Up Pai Gow Poker

- The Face Up Pai Gow Poker base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
- The Face Up Pai Gow Poker base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
- If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
- When the player-dealer's hand is an ace-high or king-high seven-card Pai Gow hand, all player's hands shall push and their wagers shall be returned.
- Once the standard base game wagers are settled (win, lose, tie/push) the house dealer shall determine if the player's hand qualifies for the Fortune Bonus and/or the Envy Bonus.
- The player-dealer shall pay all winning Fortune Bonus Bets made by players when a player has one of the qualifying hands listed below.
- The player-dealer shall collect all losing Fortune Bonus Bets made by players when a player does not have one of the qualifying hands listed below.
- A player qualifies for an Envy Bonus payout when a player places a Fortune Bonus Bet of at least \$5. The player-dealer shall pay all winning Envy Bonus' when a player at the table receives a Four of a Kind or higher, excluding the player-dealer hand their own hand.

Bonus Bets

Fortune Bonus Bet

For each seated position, there shall be one separate and specifically designated area for the placement of a Fortune Bonus Bet. A player may only place the optional Fortune Bonus Bet if they have also placed a Face Up Pai Gow Poker base game wager prior to the initial deal.

- The Fortune Bonus Bet takes into account the seven cards dealt as a player's hand.
- In the event the seven cards dealt to a player who placed a Fortune Bonus Bet is a designated qualifying hand, as shown below, the Fortune Bonus Bet shall win.
- If the player's hand does not contain one of the qualifying hands listed below, that player's Fortune Bonus Bet shall lose.
- The player does not have to set their hand just for the Fortune Bonus Bet.
- A Fortune Bonus Bet of at least \$5 qualifies the player for Envy Bonus payouts. If a player wagers at least \$5 on the Fortune Bonus, the house dealer must place an "Envy" lammer either on top of the Fortune Bonus wager or next to it. Players win the Envy Bonus when a player at the table receives a Four of a Kind or higher, excluding the player-dealer and their own hand.
- The player shall then receive a monetary payout based on the bonus hand the player has received and the pay table, as shown below. Any other combination of the first seven cards dealt, other than the hands shown below, shall lose.
- There is no opportunity for the Fortune Bonus Bet to tie as it is dependent on the cards dealt as the player's hand, not a comparison of cards or hands.
- The Fortune Bonus Bet remains in action regardless of whether the player's Face Up Pai Gow Poker base game wager wins, loses, or pushes.

Face Up Pai Gow Poker

- The player-dealer shall pay qualifying Fortune Bonus Bets and shall collect Fortune Bonus Bets to the extent of the player-dealer's wager that did not qualify.

Envy Bonus

A player who places a wager of at least \$5 on the Fortune Bonus Bet shall receive an Envy button and may qualify for the Envy Bonus payout if another player who placed a Fortune Bonus Bet receives a pre-determined and designated qualifying hand, as shown below. Players shall receive one Envy button for each Fortune Bonus Bet in an amount equal to or greater than \$5.

- The Envy Bonus takes into account the first seven cards dealt as a player's hand.
- In the event that the first seven cards dealt to a player that has placed a Fortune Bonus Bet is a pre-determined and designated qualifying hand, as shown below, all players with an Envy button shall win.
- Players are not eligible to win an Envy Bonus for their own hand.
- If multiple players have made a seven-card qualifying Fortune Bonus Bet and Envy Bonus hand, then all players with an Envy button shall win, other than for their own hand.
- If multiple Envy Bonus hands are achieved, only the highest-ranking hand is awarded the payout.

EXAMPLE: *One player achieves a Four of a Kind and another player achieves Five Aces. The Five Aces Envy Bonus is the only bonus payout.*

- Players shall receive a fixed monetary payout based on the qualifying hand that another player has received and the pay table, as shown below.
- Any other combination of the first seven cards dealt, other than the hands shown below, shall lose.
- The Envy Bonus may win regardless of the outcome of the Face Up Pai Gow Poker base game wager.

Each betting space at the table has a fixed amount for wagering limits defining the minimum and maximum amounts that may be wagered. Players must bet at least the table minimum.

Dealing Procedures and Round of Play

All wagers in Face Up Pai Gow Poker will be made by placing casino chips on the appropriate betting areas of the table layout keeping in mind the table minimum and maximum wagering limits.

1. At the start of a game a player is offered the player-dealer position. Once the player-dealer position is accepted, the house dealer shall wait for each player to make their wager in accordance with the table limits.
 - a. Each player then has the following option(s) when placing their wager(s):
 - i. The base game which pays 1 to 1;
 - ii. The Ace-High Bonus Bet which pays according to the payable, as shown below;
 - iii. The Fortune Bonus Bet which pays according to the payable, as shown below;
 1. If a player wagers at least \$5 on the Fortune Bonus Bet, the player qualifies for the Envy Bonus and the house dealer must place an "envy" button next to the player's Fortune Bonus Bet wager.
2. Third-Party Providers of Proposition Player Services (TPPPS), as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
3. Backline betting is permitted on all wagers.
4. Once all wagers have been placed, the house dealer shall complete the deal of seven piles of cards face-down in front of the house dealer.
 - a. Each seven-card hand shall be distributed by the shuffle machine and placed on the table by the house dealer, one at a time, from the house dealer's left to right, until all seven hands are dealt.
 - b. The house dealer shall then spread the remaining cards to verify there are four cards remaining and placed in the discard pile.
5. Should there be the need to deal the game manually (due to machine malfunction, etc.), the following procedure shall be followed:

Face Up Pai Gow Poker

- a. When dealing the seven piles of seven cards, the house dealer shall deal one card at a time in front of the house dealer position until there are seven cards, starting from left to right.
 - b. Once there are seven cards laid out, the house dealer shall deal each pile another card from right to left, giving each pile a total of two cards.
 - i. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven cards.
 - c. The remaining four cards shall be placed in the discard pile.
 - d. Once the cards have been stacked, the player-dealer randomly selects which pile shall be distributed to the first player who receives the "Action" button.
 - e. The house dealer identifies the hand by placing a button marked Action on this pile by pushing the button forward and turning the pile behind it sideways.
6. To determine the placement of the action button, the player-dealer shakes a dice cup containing three standard dice.
 - a. The sum of the dice indicates the seat the pile of cards shall be distributed. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers.
 - b. If the numerical total of the dice represents a seat/spot without any wagers placed, the action button shall be placed at the first active seat/spot clockwise from the original seat/spot.
7. Once the action button position has been determined, the house dealer shall distribute the seven piles of cards, starting with the pile that has the action button and continuing clockwise around the table.
 - a. All seven piles of cards shall be distributed to all seats at the table, regardless of whether a player is seated at each position or a wager has been placed.
8. Once all of the piles of cards have been distributed, the house dealer shall collect the cards distributed to seats without a wager and place them in the discard pile.
9. The player-dealer's hand will then be exposed and set before the players set their hands.
 - a. If the player-dealer has an ace-high seven-card hand, all player's wagers shall automatically push and any Ace-High Bonus Bets will win.
 - i. If the player-dealer's hand does not contain a seven-card ace-high hand, each player shall then set their hand.
 - b. The player-dealer has the option to ask the house dealer to set their hand according to the House Way chart below.
10. Once the player-dealer's hand is set, each player sets their hands by arranging the seven cards into a two-card hand in front, and a five-card hand in back.
 - a. The five-card hand must rank higher than the two-card hand, according to the hand rankings, as shown above.
 - b. The player has the option to ask the house dealer to set their hand according to the House Way chart below.
 - c. Players do not have to set their hand the "House Way", they are free to set the hand in any fashion they choose as long as it is not a foul hand. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player will automatically lose their wager.
11. Once the player's hands are set, each player's hand is exposed, in turn, and compared to the player-dealer's hands to determine the winners, losers, or push hands.
12. Each player's five-card hand will be compared to the player-dealer's five-card hand, and each player's two-card hand will be compared to the player-dealer's two-card hand, in turn.

Face Up Pai Gow Poker

13. Wagers will be settled in a clockwise manner around the table, starting with the player with the Action button.
14. All wagers will be settled from seat to seat (including backline betters) in the following order: the base game wager, then the Fortune Bonus Bet, then the Envy Bonus, and then the Ace-High Bonus Bet. Once the player-dealer's wager has been exhausted, the wagers not covered by the player-dealer will be returned to the respective players.

How Winners are Determined and Paid

Once each player has set their hands and the house dealer has set the player-dealer's hand, each player's hand shall be compared against the player-dealer's hand. The following shall apply for each possible outcome when determining which hand wins, loses, or if there is a push.

1. The base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand.
2. The base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
3. The base game wager "pushes" if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
 - a. The base game wager also "pushes" if the ranking of the player-dealer's shown hand is a seven-card ace-high hand. Neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
4. If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
5. The player-dealer will collect losing Fortune Bonus Bets and pays winning Fortune Bonus Bets to the extent of the player-dealer's wager.
6. A player qualifies for an Envy Bonus payout when a player places a Fortune Bonus Bet of at least \$5. The player-dealer shall pay all winning Envy Bonus' when a player at the table receives a Four of a Kind or higher, excluding the player-dealer hand or their own hand.
7. The player-dealer shall pay all winning Ace-High Bonus Bets made by players when the player-dealer's or the player-dealer and player's hand is an ace-high seven-card hand.
8. The player-dealer shall collect all losing Ace-High Bonus Bets made by players when the player-dealer's hand is not an ace-high seven-card hand.

Within each betting area for each seated position, there shall be two separate betting spaces specifically designated for two separate wagers: the Fortune Pai Gow Poker base game wager and the Fortune Bonus Bet.

Dealing Procedures and Round of Play

1. At the start of a game a player is offered the player-dealer position. Once the player-dealer position is accepted, the house dealer shall wait for each player to make their wager in accordance with the table limits.
2. Third-Party Providers of Proposition Player Services (TPPPS), as defined in Section 19984 of the California Business and Professions Code, are permitted to play.
3. Backline betting is permitted on all wagers.
4. Before the start of each hand the player and the player-dealer make their base game wagers, keeping in mind the posted minimum and maximum table limits. Players also have the option of placing a Fortune Bonus Bet at this time as well.
 - a. If a player wagers at least \$5 on the Fortune Bonus Bet, the player qualifies for the Envy Bonus and the house dealer must place an "Envy" button next to that player's Fortune Bonus Bet wager.
5. The house dealer will complete the deal of seven piles of seven cards face down in front of the house dealer position.
 - a. When dealing the seven piles of seven cards, the house dealer will deal one card at a time in front of the house dealer position until there are seven cards, starting from left to right.
 - b. Once there are seven cards laid out, the house dealer shall deal each pile another card, from right to left, giving each pile a total of two cards. This process of dealing cards left to right, then right to left, shall be completed until each pile has seven cards.
 - c. The remaining four cards shall be placed in the discard pile.
6. Once the cards have been stacked, the player-dealer randomly selects which pile will be distributed to the first player who will also receive the Action button.
 - a. The house dealer identifies the hand by placing a button marked "Action" on this pile, by pushing the button forward and turning the pile behind it sideways.

Fortune Pai Gow Poker

7. To determine the placement of the first pile of cards and Action button, the player-dealer shakes a dice cup containing three standard dice.
 - a. The sum of the dice indicates the seat the first pile of cards and the Action button will be distributed to. The player-dealer's position is always one, eight, and fifteen. Other seats, in clockwise rotation, respectively represent the other numbers.
 - i. Once the first pile of cards and the Action button have been delivered the remaining cards will be distributed to each seat starting with the player to the left of the Action button and continuing clockwise.
 - b. If the numerical total of the dice is one, eight, or fifteen, the player-dealer will receive the first set of cards, but the Action button will go to the player to the left of the player-dealer.
 - i. The remaining cards will then be distributed starting with the Action button and continuing clockwise.
 - c. If the numerical total of the dice represents a seat without any wagers placed, the seat will keep the first pile of cards but the Action button will be placed at the first active seat clockwise from the original seat.
8. Once all of the piles of cards have been distributed, the house dealer will collect the cards distributed to seats without a wager and place them in the discard pile.
9. Once the cards have been distributed, each player will use their seven cards to set two hands, one two card hand and one five card hand.
 - a. The two-card hand, will be placed in front of the five-card hand and must rank less than the five-card hand according to the ranking of hands, as shown above.
 - b. The five-card hand will be placed behind the two-card hand and must rank higher than the two-card hand according to the ranking of hands, as shown above.
 - c. If a player arranges the two-card hand so it out-ranks the five-card hand, this will be considered a foul and the player will automatically lose their wager.
 - d. Players may ask the house dealer to place their hand the House Way according to the chart below. Once the player asks the house dealer for assistance, the hand must be set the House Way and cannot be changed nor re-arranged.
 - i. Players do not have to set their hand the "House Way", they are free to set the hand in any fashion they choose as long as it is not a foul hand.
10. When all players' hands have been set, the house dealer will expose the player-dealer's hand, and will set it according to the "House Way" chard, as shown below.

Fortune Pai Gow Poker

the wagers not covered by the player-dealer will be returned to the respective players. The following shall apply for each possible outcome when determining which hand wins, loses, or if there is a push:

- The Fortune Pai Gow Poker base game wager wins if the two-card hand and the five-card hand, held by the player, ranks higher than the player-dealer's two-card hand and five-card hand. Winning base game wagers are paid 1 to 1.
- The Fortune Pai Gow Poker base game wager loses if the two-card hand and the five-card hand held by the player, ranks lower than the player-dealer's two-card hand and five-card hand.
- The Fortune Pai Gow Poker base game wager pushes if one of the hands held by the player ranks higher than the player-dealer's corresponding hand, and the player's other hand ranks lower than the player-dealer's corresponding hand. In this case, neither the player nor the player-dealer wins or loses; the wager is a push and is returned to the player.
- If either the two-card hand or the five-card hand is identical in rank to the player-dealer's two-card hand or five-card hand, it is a "copy hand." The player-dealer wins all copy hands.
- Once the standard base game wagers are settled (win, lose, or push) the house dealer will determine if the player's hand qualifies for the Fortune Bonus and/or the Envy Bonus.
 - If the player's hand qualifies for payouts, the player is paid according to the posted pay table.
 - The house dealer leaves the Envy button, if applicable, next to the player's Fortune Pai Gow Poker base game wager and payouts. The house dealer will not pick up Envy buttons until all wagers are reconciled.
 - If the player's hand does not qualify for payouts, the player-dealer collects the Fortune Bonus Bet.
 - The house dealer leaves the Envy button, if applicable, next to the player's Fortune Pai Gow Poker base game wager and payouts. The house dealer will not pick up Envy buttons until all wagers are reconciled.
- The player-dealer pays any Envy Bonuses at the end of the round as noted below:
 - If multiple players have made a seven-card qualifying Fortune Bonus Bet and Envy Bonus hand, then all players with an Envy button will win, other than for their own hand.
- The player-dealer collects losing Fortune Bonus Bets and pays winning Fortune Bonus Bets to the extent of the player-dealer's wager.
